

HINDI GRAMMAR

BY

EDWIN GREAVES

LONDON MISSIONARY SOCIETY, BENARES

Allahabad PRINTED AT THE INDIAN PRESS, Ltd. 1921

PRINTED AND PUBLISHED BY APURVA KRISHNA BOSE,
AT THE INDIAN PRESS, LTD., ALLAHABAD.

CORRIGENDA.

(All that can be offered in the way of extenuation for this long Corrigenda is the fact that the author was in England while the Grammar was passing through the Press in Allahabad, consequently correction of proofs was very limited.)

(As the later printed sheets did not reach England in time, these corrections could only be carried as ar as page 208.—E. G.)

PREFACE.

DR. Kellogo's "Grammar of the Hindi Language" is the standard work on the subject and occupies a position of unquestioned supremacy. The very fulness of the work, however, detracts somewhat from its value for a student commencing the study of Hindi, and thus there is room for a Grammar of less pretentious size and scope.

In 1896, my "Grammar of Modern Hindi" was published by the .te Dr. Lazarus at his "Medical Hall Press," Benares. Another edition, revised and slightly enlarged, was published at the same Press in 1908. Finding that the second edition was nearly exhausted, I decided not to revise and republish the old work but to prepare a new Grammar. Over 20 years of further residence and work in India ought, I felt, to enable me t produce a better book. Such an attempt has been made. A comparison of the two Grammars will make may ifest the fact that there are great differences in the two books, and it is hoped that these changes are for the better in he way of clearness and simplicity.

Apart from a few notes on the Braj Bhasha, no attempt has been made to treat of dialectical differences, and Urdu has not been included. The language dealt with is modern Hindi in the form that many of its best friends are endeavouring to standardize it, a self-respecting Hindi which is not for ever parading its aristocratic ancestry by filling its pages with Sanskrit words, nor affecting modernity by the cultivation of Persian vocabulary and idioms.

The hope is entertained that the present volume may more than fill the place of the book which has done over 20 years of service and may now be allowed to retire

EDWIN GREAVES.

CHAPTER 1.

THE HINDI LANGUAGE.

1. Hindi, Urdu, Hindustani,

These three names are used very loosely by many writers and speakers, and possibly no definitions are possible which will compel general acceptance.

It might be wise to discard the use of the word Hindustani as applied to literature and confine its application to the language so widely spoken throughout India and employed in the ordinary affairs of business and social life. Most of the words included in the vocabulary of this lingua franca are common to both Hindi and Urdu.

Hindustani might, with some measure of fitness, be used of one class of literature affected by certain writers who employ a vocabulary which is largely Urdu, but have the works printed in the Nagari character.

Hindi may stand for those forms of the language which are the outcome of the languages which the early Aryan settlers brought with them, combined with, and affected by, the languages of Madhya-desh or Mid-India. It would seem that from the commingling

of these came into being various so-called Prakrits (and Sanskrit). From the former of these were evolved what Sir George Grierson terms the Apabranshas (i.e., fallen or corrupted). Prakrit may be taken to mean "natural" or "colloquial" as contrasted with Sanskrit which is the polished language burnished up for literary purposes. The Apabranshas were later modifications of the Prakrits, and from these came the various forms of Hindi current since, say, about the twelfth century.

Urdu may be appropriately used of the language in which the verbs and many other words are common to both Urdu and Hindi, but are supplemented by a considerable vocabulary of Persian or Arabic origin. Urdu is generally printed in the Persian character, but quite a considerable literature has grown up, largely used by the Christian communities, which is printed in the Roman character.

2. Modern Hindi.

In the beginning of the 18th century two pundits in Calcutta, Lallu Jì Lâl and Sadal Misra, instructed and inspired by the European head of the college in which they were professors, initiated, or to speak more exactly, developed, a movement which is largely responsible for the existence of modern Hindi. The endeavour was made to draw on the Prakrits or Apabranshas and, to some

extent, on Sanskrit, for the vocabulary, and to exclude, as far as practicable, Persian and Arabic words not already naturalized. Combined with this was the endeavour to standardise certain verbal and other forms instead of perpetuating dialectical differences.

In recent times Hindi has suffered not a little in the house of those of its friends who are eager to crowd their pages with pure Sanskrit words. A few parade the range of their learning by introducing Persian and Arabic words, thus still further increasing the trials of their readers.

The Prakrits and their descendants differed widely in different parts of India. The aim of modern writers, more or less consistently carried out, is to perfect and make current a language freed from provincialisms and suited to be a literary vehicle for the use of all who speak any of the dialects of Hindi.

The whole question of the rise of Hindi is discussed with great ability, though necessarily not very fully, by Sir George Grierson in his chapter on the "Languages of India," in Vol. I of "The Indian Empire"—one of the four volumes written as introductory to the *Imperial Gazetteer of India*. There is also an interesting little book on the subject in Hindi, "Hindî bhâshâ kî Utapatti" (The Birth of Hindi), by Pundit Mahabir Prasad, published at The Indian Press, Allahabad.

It should be recognized that the Hindi represented in this Grammar is to some extent an artificial language used chiefly in literature. It is the language which writers are endeavouring to make the common literary medium for all the Hindi-speaking peoples. The colloquials which they use in their own homes and in social intercourse may differ widely from this and vary much in different parts of even the same Province. For literary purposes, however, the language dealt with in this Grammar may, be regarded as generally accepted not only in the United Provinces, but also in Bihar, Central India and Rajputana.

By some this language has been called High Hindi, but this term should rather be kept sacred for the productions of those who delight to cram their pages with high-sounding Sanskrit words.

Up to the time of Lallu Jî nearly all, and even since then many, works were written in verse. In these the language is very different from modern prose. The Braj Bhâshâ, Avadhî and other dialects were used. The Sûr Sâgar of Sûr Dâs and the Râmâyan (Râmcharit Mânas) of Tulsî Dâs stand out as two great models of this class of literature.

During recent years the endeavour has been made to popularise poetry written in the standardised modern Hindi, but even to the ear of a foreigner the successes, achieved up to the present, appear doubtful, the verses lack the swing and sweetness of the poetry written in the dialectical forms. However, the "Kharî bolî" poetry has probably come to stay.

The study of the Hindi given in this Grammar is essential for every student of Hindi, as it is increasingly the standard language. Every one, however, who is brought into contact with the people, especially in rural districts, will have to familiarise himself with the dialect of the District in which his lot is cast.

3. Tatsamas and Tadbhavas.

Words closely akin to the Sanskrit forms are called Tatsamas तत्सम (like that). The term Tadbhavas तद्भव (produced from that) is applied to those words which have been modified from their original forms in their transition through the Prakrits and Apabranshas.

Purism in Hindi is sheer folly. Words of Persian and Arabic origin, and words imported also from English and other languages, have made their home in Hindi, and it is futile to try and oust them from their place. Pedants, who have struggled to exclude all such words and to supply their places by unfamiliar Sanskrit words or manufactured compounds, have done not a little to stay the progress of Hindi. The wise writer or speaker is the man who selects with discrimination his words from the already available material. There is a large

vocabulary awaiting his use, furnishing words which will probably well express his meaning and convey it to the ordinary reader or listener.

CHAPTER II.

THE HINDI ALPHABET.

4. बगामाला Alphabet. A group of related 5 consonants; gutturals, palatals, etc. अक्षर or बर्ग Letter Its form. आ़कार Its pronunciation. उच्चारण The part of the mouth from उच्चारग-स्थान which the sound is produced. Vowel. स्वर Consonant. अनुस्वार (') Anusvâr or Nasal. The name of the sign (') बिन्द अनुनासिक (ँ) Anunasik or Nasalization. चन्द्रबिन्दु or ऋर्द्ध् चन्द्र The sign ()

Visarg. The final aspiration.

A consonant with no yowel

closed consonant.

sound following it. A

विसर्ग

हल

A word terminating with a हलन्त closed consonant. विराम () The sign under the consonant to indicate that it is "hal." Short vowel. Long .. Extra long vowel. A syllable or "instant." The joining of two or more consonants. Compound consonant thus संयुक्ताक्षर joined.

5. The Hindi Alphabet differs but slightly from the Sanskrit. Indian grammarians are not unanimous in their views as to the number of the letters. For practical purposes, the number of the letters may be taken as 46, i.e., 11 vowels and 35 consonants. The 3 vowels are, or, or, ir, iri and iri, are pure Sanskrit and have no place in Hindi. and are added to the consonants, as they are quite distinct in sound from and and are therefore not included in the 46.

THE HINDI ALPHABET.

6. The Vowels.

Initial	Form	Medial or Final	Initial.	Medial or Final.
a.	ऋ	(unwritten)	^â ' आ	T
i.	इ	f	î. ई	ी
u,	उ	9	û. ज	6
ri.	亚	د		
e.	ए	~	ai. ऐ	, 🚓
0.	आ़ो	Î	au. ऋौ	7
Na	sal	(अनुस्वार)	•	
Na	saliz	ation (ऋनुनासिव	1) 3	
Fi	nal a	spiration (विसर्ग):	

7. Consonants.

Gutturals	क	k	ख	kh	ग	g	घ	gh	ड	ñ.	- कवग
Palatals	च	ch	কু	chh	ज	j	भ	jh	ञ	ή.	- चवग्

Labials	प	p	फ	ph	ब	b	भ	bh	म	m ·	्पवग
Semi-Vowels	य	у	₹	r	ल	I	व	w or	v	3	प्रन्तस्य
Sibilants	श	sh	ष	sh	स	s					कच्स
Aspirate	ह	h									01041

By the use of a dot written under a letter, a few other sounds are indicated.

कि q खिkh गुgh ज z फा f

These five stand for sounds found in Urdu words; for $\ddot{\sigma}$; The last two are fairly represented by the English z and f; the first 3 are gutturals having no equivalents in English.

ৰ and ব or ম are sometimes included as letters of the alphabet, but this is incorrect; they are conjunct letters: ৰ = ব + স and ম = ক + ম.

Modified forms of some of the letters are used in some fonts of type, e.g.. 到 for 到, 年 for 刊, 年, for 平 etc.

PRONUNCIATION.

8. Pronunciation of Vowels.

In seeking to acquire a correct pronunciation, it may be well to consider three points: 1. The pronunciation must be learned from the lips of an Indian teacher: watching attentively the speaker as well as listening to the sounds, is a matter of much importance; every endeavour should be made to ascertain HOW the sounds are made, where the tongue is placed, etc.

2. The pronunciation of the letters should be learned as the letters occur in words.

3. It is still better to group

the words in phrases or short sentences, for sounds do not assume their true balance and power until they take their place as parts of words and sentences. What foreigner would learn the pronunciation of "the" until

PRONUNCIATION.

The Hindi alphabet is peculiarly scientific, as will be discovered by carefully studying the "classification of letters" chart given later on. Phonetics is no modern discovery in India.

he had learned it as part of a sentence?

It should be noted that each Hindi letter has its own proper sound, there is not one symbol for several different sounds as in English, e.g., how different is the sound of α in such words as lad, lace, lard, call.

While insisting on the importance of what has been written above about learning the sounds from the lips of an Indian, a few remarks are offered on some of the sounds as subsidiary helps.

Represents a sound approximately like the English a in the words arise, avert or u in suggest.

आ	is much l	ike the	a in the	English	father, mart.
द			<i>i</i>		fit, wrist.
द्ध	• • •		ee or ea	• • •	feel, seat.
उ	• • •		u or 00		put, foot.
ক	• • •		00		pool, fool.
亚			ri		drink, bring.

The vowels **v** and **v** require great attention and care. It is sometimes stated that they correspond with the English a and o in such words as same and so. This is misleading, as the sounds mentioned in English are much more drawled than the Hindi **v** and **v**; they commonly are pronounced in English with what is called the "glide," a prolongation of the vowel sound and a gradual dying away of it. In Hindi, though not clipped, these sounds are single and sustained until they suddenly close without any drawl. Possibly the first a in the phrase "Davidic Psalms," and o in the words opaque and oration are about as near as the English language will furnish.

Let the student ask his pundit to repeat again and again the two phrases and and again. It will at once be evident to the ear how very widely these sounds differ, not only in the consonants of the second, but in the vowels of both, from the English lay low and dado (room decoration).

रे (अ+इ) and आ (आ + उ) somewhat approximate to the ai and ou in the words aisle and stout; but in Hindi the amalgamation of the two elements of the diphthong seems to be more complete than in the English sounds, and the अ and आ retain more of their power. The difference may be felt by listening to an

Indian's pronunciation of and (bullock) and comparing this with the sound in English aisle or pile, or enist (boy) with the Eng. pound.

When final in a word, after a consonant, इ and उ are sometimes very short, e.g., in such words as स्तृति, भानु, ऋतु.

The long vowels \mathbf{v} and \mathbf{x} are also very much shortened at times, especially in verse, e.g., \mathbf{s} , \mathbf{v} . The shortening is so marked in some instances as to lead to the vowel being reckoned as short instead of long. (compare the sound with o in molest.)

9. The Visarg can be easily disposed of. It is infrequent in Hindi. It can only be described as an aspiration at the end of a syllable. It is almost like an English ha reversed, as though, e.g., halloo, should be pronounced backwards oollah. The sound must be learned from an Indian speaker.

As illustrations of its use, take **प्रातःकाल**, morning ; अन्तःकरण, mind.

10. Anusvar and Anunasik.

Some would contend that both these are simply nasalizations of different degrees, and that Anusvâr is distinct from the nasal letters. It seems, however, to the writer that this is not so; there are not two nasalizations and the five nasal letters distinct from both, but one nasalization (the Anunâsik), and the

five nasal letters which may be represented by the Anusvâr at the option of the writer. The nasalization represented by the Anunâsik may vary in intensity; but there is no room between them and the nasal letter sounds for another nasalization. That there are degrees of intensity in the nasalization, will be very evident if attention be given to the pronunciation of the three words, as and and analytic the nasalization increases in the order in which the words are given.

The difficulty in this matter is increased by the fact that much inconsistency exists with reference to the writing and printing of Anusvâr and Anunâsik, Very frequently the former (*) is found where the sound of the latter (*) is correct. The student may be assured that there is little practical difficulty in the matter. After a short time it will be found that the correct pronunciation, nasal or nasalization, will come quite naturally and the reader will scarcely notice whether the Anusvâr or Anunâsik be printed.

The use of Anusvâr as the equivalent of one of the five nasal letters, must be treated in a separate paragraph.

11. The Pronunciation of the Consonants.

The Five N's. Although these do not take the first t; place among the consonants, it may be well to deal with of them at once so as to conclude the consideration of the the subject raised in para. 10.

Five nasal letters may be regarded as an unnecessarily large supply; but a little consideration will disclose the fact that English comes little short of this though it is more economical in its symbols to represent them. The English "n" stands for **s**, **s** and **n**; "m" for **t**; the Hindi **n** has no equivalent in English.

It will be noticed that there is a nasal for each of the five groups of gutturals, palatals, etc.; and the nasal naturally assumes its proper sound when joined to any of these letters. It is on this ground that in so many cases the special "n" is not printed, but the more simple Anusvâr used instead. This becomes, with the letter following it, a conjunct consonant, and the second letter decides the pronunciation to be given to the Anusvâr.

Some illustrations are appended which should be carefully practised with a pundit.

ङ with one of the gutturals. ग्रंक, a mark; ग्रंग, a member of the body; ऊँचना, to doze. Compare with these the English ink, longer. Note that in other words, such as आँख, it is Anunâsik, not Anusvâr; the sound is a nasalization, not a letter.

ज with a palatal. पंच, a committee of five; पंछी, a bird; अंजन, collyrium; संभा, evening. As an illustration of the inconsistencies existing with reference to the use of the Anusvâr and the Anunâsik, the words

पंच and पाँच may be noticed; although, etymologically, very closely allied in पंच, the sound is unmistakeably the full nasal letter; while in पाँच, as pronounced by most speakers, there is only a nasalization.

u with cerebrals. In some words there is clearly a full nasal letter: e.g., चगरा, a gong; अगडा, egg; उगडेलना, to empty out; but in many cases the sound is only a nasalization: e.g., ऊँट, camel; बाँटना, to distribute; च्यूरी, an ant; हाँठ, lip; गाँठ, knot. In the word ढूँढना, it will be found that on the lips of some speakers, the sound is a full nasal letter, with others hardly more than a nasalization: very frequently the word becomes ढूँढना, in which case there is only a nasalization.

With the two letters, इ and ढ़, the sound is perhaps always only a nasalization, i.e., Anunâsik. साँड, a bull; केाँढा or केाँहरा, a gourd.

न with the dentals. In this series there is some variation. In such words as सन्त, a devotee or saint; पन्य, a path; संदर, beautiful; अन्धा, blind; बन्धक, a pledge, there is a full nasal; but in other words, such as दाँत, teoth; गाँथना, to bind, it is only a nasalization that is heard.

With the labials, the full nasal **\(\mu**\) is often found, as in **\(\mu \tau \tau_1**, \(a \) certain flower: **\(\mu \tau \tau_1**, \) connection;

HEATIGHT, to support. Compare the English impossible, impolite, immoderate. In English, however, the "n" is frequently not changed to "m" before a labial, e.g., unpolished, unborn, unburnt.

In Hindi, before the labials, there is often only a nasalization, e.g., a snake; a snake; a commit to the care of.

With reference to the other letters. It will be found from the classification of letters to which group any letter belongs, the Anusvâr before a letter commonly assumes the nasal belonging to that group. No rigid rule, however, can be formulated: sometimes Anusvâr is used, sometimes the Anunâsik. As examples of the use of Anunasik take the following:—ara, brown or dark coloured. But it is the Anusvâr in the following:—arath, a devotee; (cf. English onion); the universe; (cf. English unsafe); aportion; (cf. bunch); the universe; (cf. English unholy). This word is not uncommonly pronounced as though written the

The exact pronunciation of these nasals must be acquired from an Indian; as a matter of fact, however, if the pronunciation of the following letter be already acquired, there is no great difficulty as in anticipation

the

of the following sound, the organs of the mouth prepare themselves and the nasal appropriate to it is formed.

When followed by a vowel, the nasals have their fullest sound. The two s and s are not used in this way; s and s are about equivalent to the English n and m. Compare the Hindi s name, with English name or nasty, and s trait, to strike, with English mart. The Hindi nas no equivalent in English. Practise such words as so, a foot; nn, a host; nn, quality.

12. The aspirated letters n, s, s, s, etc.

These may be treated of in one section, as, so far as the aspiration of the letters is concerned, the same principles are involved. The combinations in English, ch, ph rh, sh yield no help as the h is not aspirated. In the English words church, cholera, philosophy, rhetoric, ship we have somewhat the equivalents of **a**, the Urdu **b**, and **a**. The English words ghost and which do render some assistance, as these words, as pronounced by some speakers, do give a distinct aspiration to the h.

Perhaps the nearest equivalents to the Hindi sounds to be found in English are in those cases where one of two words ends in one of the consonants referred to and the following word begins with h. If the earlier part of the first word be eliminated and only the last letter be pronounced in close conjunction with the second word

beginning with h, we get something suggestive of these aspirated Hindi letters. Take the following as examples:—

(si) ck-hound	pronounce	khound	खौंड
(bi) g-hound	• • •	ghound	घोंड
(tou) ch-hole	* * *	chhole	छोल
(spon) ge-house	• • •	jhause	भौस
(u)p hill		phill	फिल
(ca)b-horse		bhorse	भ
(a) bhorrent	• • •	bhorrent	भ

Of course, in Hindi the two letters become more unified into a single sound than occurs in these illustrations from the English words, but the illustrations may start the student on the right lines for acquiring these Hindi sounds.

13. an and T.

11.1

About equivalent to the English k and g (hard), in such words as kill (Fig.), gum (14), the Hindi letters are, however, formed further back towards the throat than the English sounds and the tongue is slightly broadened out.

च and ज. These two letters are about the same as the English ch and j or soft g in cheap (चीप) and gin, (जिन). Probably in the Hindi the tongue touches the palate a little further back than in the production of the English sounds. Even in Hindi, however, there are slight differences in the pronunciation of the letters, e.g., the च in चिद्राना (to cry out), seems to be some-

what sharper than the same letter in **gy** (be silent), probably because of the vowel sound which follows the **g** in the second word being formed further back in the mouth than the earlier word.

The Cerebral and Dental letters. The pronunciaton of the letters in the **E** and **A** series is found difficult by some. Often this only arises through insufficient care in studying the method of producing these sounds. The part of the palate used by the tongue for producing t and d in English is about midway between the parts used for the enunciation of **E**, **E** and **A**, **E**. Some teachers of Hindi write of turning the tip of the tongue upwards and backwards against the roof of the mouth to obtain right pronunciation of **E** and **E**, but it seems to the writer that this is incorrect; the tip of the tongue is rather broadened out and lumped together, pressed against the palate rather far back, and then somewhat sharply brought away as the sound is uttered.

It is worth while calling the attention of the student to the fact that all speakers do not produce sounds in identically the same way.

Indians consider our t and d nearer to \mathbf{z} and \mathbf{z} than to \mathbf{z} and \mathbf{z} , as in transliterating English words into the Nagari character the \mathbf{z} and \mathbf{z} are used. Listen to an uneducated Indian using the word \mathbf{z} or \mathbf{z} or \mathbf{z}

and boat). Or, to take an illustration already used in another connection, listen to the word **देदा**, and notice the distinction between that and the English dado.

It is worth much trouble to acquire the correct pronunciation of these two groups of letters, and with attention and practice there is no serious difficulty.

 \mathbf{z} and \mathbf{z} . These are cerebral r and rh, and are produced in the same way as that mentioned above for the production of the other Cerebrals.

For the enunciation of the π and ξ series the tongue is brought forward against the upper teeth, or even between the teeth (some say at the junction of the palate with the upper teeth). These sounds are distinctly softer and more dental than the t and d in English.

u and a. These are very similar to English p and b. Compare English pull with Hindi ya, a bridge, and bin with aa, without. Possibly in Hindi the lips are not quite so tense as in the production of the English letters.

vouth. Possibly in Hindi the tongue is a trifle more forward against the palate. This letter is often pronounced by the less educated as and is not infrequently so printed: e.g., an age.

 $\boldsymbol{\tau}$ is crisper and not so dull as the English r. Indian grammarians class it as one of the Cerebrals; but the

writer is disposed to think that it should be placed among the Palatals. The tongue is placed well forward against the palate just behind where it joins the teeth. Compare English rip with fig., an enemy.

is not so thick and muffled as the English l. It is produced further forward. It will be noticed that it is classed as a Dental. The English l is often pronounced as a Palatal sometimes as a Cerebral. Compare English loam with Hindi qiqiq, a fox.

a is somewhere between the English v and w, but nearer to w. The lips, however, are not so pressed together as in the production of w, in fact scarcely touch one another.

It should be noticed that in words brought into Hindi from the Sanskrit, **a** is largely replaced by **a** even in printing, and still more so in pronunciation.

between these two letters is not generally maintained even by Indians. There is, however, a distinction, some being classed as a Palatal, of as a Cerebral. Some suggestion as to the difference may be found in the pronunciation of the two English words, sheet and shoot. In the former, the tongue is thrown further forward, in the latter, further back: this is on account of the vowels which follow and affects to some degree the sound of the sh.

ष is sometimes pronounced ख and sometimes printed so, e.g., भाखा and मनुख for भाषा and सनुष्य.

स is practically equal to the English s, though slightly more dental. Compare सिसको, a sob or sigh with sister.

ह corresponds with the English h. Compare हॉफना, to pant, with English half.

The following table, shewing the classification of letters according to Indian grammarians, is worth very careful study. It indicates very clearly the highly scientific character of the Alphabet and the attention which has been given to phonetics. The classification given by Indian grammarians has been adhered to; but it seems to the writer that τ and τ are more strictly Palatals than Cerebrals; the cerebral r is τ , Again, τ is perhaps rather a Palatal than a Labial.

14. Classification of letters.

. Rather, perhaps, Palatals.

VARIOUS.

15. The Hindi Syllable.

It is important to understand the divisions of words in Hindi which roughly correspond with our Engish syllables. This matter of syllables or **HIET** is of chief importance in Prosody but is well to briefly notice it here.

The Hindi **Hist** consists of a vowel alone or of a consonant, simple or compound, with its accompanying vowel. To make the distinction between the English and Hindi method as marked as possible, take the following word, insuppressible. In English, the division would be in-sup-pres-si-ble, in Hindi i-nsu-ppre-ssi-ble. Apart from its being a closed letter, no syllable ends in a consonant, one, is not one syllable, but two **u+a** (e-ka); **that**, narrow is not sak-râ, but sa-ka-râ. We should be tempted to divide **Eagl** thus—i-kat-thâ, it is i-ka-tthâ.

16. Closed consonants. Viram.

When a consonant is not followed by a vowel, it is said to be closed, हल, and the fact is indicated by the sign called विराम, being written under the closed consonant. Thus हल is not ha-la, but hal.

The hal has another use besides that of being written under a final consonant. It is sometimes written under the first of two consonants which form a conjunct consonant when they are not compounded into

one form, thus indicating that there is no vowel sound between the two letters, but that they are to be regarded as a conjunct. कुल्हाड़ी, axe, may be printed कुल्हाड़ी or कुलहाड़ी.

17 Use of the Initial and Medial or Final forms of the Vowels.

The fuller forms of the vowels are used when they commence a word or follow a vowel; when following a consonant, the contracted forms are used. Thus 1.

Altitude and the contracted forms are used. Thus 1.

Altitude and the contracted forms are

No contracted form for \mathbf{x} exists. The full form is used in the same way as the full form of the other vowels. \mathbf{x} is understood in all cases where a consonant bears no other vowel, where the consonant is not the first member of a conjunct consonant, and where it has not the sign of virâm under it. In all these cases, though unwritten, the \mathbf{x} is understood and sounded. Thus $\mathbf{x} = a$ forest, $\mathbf{x} + \mathbf{x} + \mathbf{x} + \mathbf{x}$; $\mathbf{x} = a$ cremation

Where the fuller form of a vowel follows a consonant, this fact indicates that the \overline{x} is understood between the consonant and the vowel, otherwise the short form would be used. Thus $\overline{\eta} = \overline{\eta} + \overline{x} + \overline{\xi}$, If the word were simply $\overline{\eta} + \overline{\xi}$, it would be printed $\overline{\eta}$.

In many cases, the क्र sound is very slight, but, with care, can be distinguished; उनका, their, is not sounded exactly like उंका, nor लगता like लगता.

It should be noted that an anusvâr and the following consonant constitute a conjunct consonant, therefore \mathbf{x} is not understood between them. $\mathbf{x} = \mathbf{x} + \mathbf{x} + \mathbf{x}$, not $\mathbf{x} + \mathbf{a} + \mathbf{x} + \mathbf{a} + \mathbf{x}$.

18. Note that the contracted form for ξ is written before its consonant, although read after it. Thus $\tan = \tan + \xi$; $\xi + \tan = \tan \xi$ would be printed $\xi \tan \xi$. The forms $\xi + \xi$, are written after the consonant; ... are written under, and above.

Where a consonant has anusvar or the shortened form of **र** above it, the upper part of **ो** or **ो** is thrown back a little, e.g., लों, पर्वों (प+अ+व+ओं+...).

This also applies to ...and...., which are written above their consonant.

CONJUNCTS.

- 19. When two consonants are to be sounded together without the occurrence of any vowel between, they must be joined together, otherwise an inherent x would be understood after the first. The only two exceptions to this are:—
- 1. When there be an Anusvâr on the first consonant. That and the consonant following are regarded as a conjunct, although the two letters are not joined together, e.g., i.e., sant not sanat. But it should be noted that there is the inherent \mathbf{x} between the \mathbf{x} and the Anusvâr.
- 2. If the Virâm be found under the first consonant. In this case, the consonant marked with Virâm and the following consonant become a conjunct. Thus **ugfa** would be read as though written **egfa**, (praise.)

In being joined with another consonant, the letter $\overline{\xi}$ entirely changes its form. If the first member of the compound, it assumes the form..... (called then $\overline{\xi}$ and is written over the following letter; if the second member, a small stroke is joined to the letter after which it is sounded. \overline{x} \overline{x}

Attention should be directed to the letters **a**, **v**, **v**, the forms of which are considerably modified when they appear in conjuncts. The conjunct **g** appears as though it must stand for **v** + **c**, instead of, as it is, **c** + **v**.

In two other conjunct letters the forms are so changed as not to be recognizable, $\mathbf{a} = \mathbf{a} + \mathbf{b}$ and $\mathbf{a} = \mathbf{a} + \mathbf{b}$. Some Grammarians print these with the alphabet as separate letters. The conjunct $\mathbf{a} = \mathbf{a} + \mathbf{c}$.

20. A list of the principal conjuncts is appended, arranged in alphabetical order. To save space, illustrative words are not given:

Initial an. an kk, are kkh, th kt, are km, are ky,

क्र kr, क्र kl, क्र kw, त or स ksh, च्या

or इस kshm, ह्या kshy.

- ,, ख. ख्य khy, रुव khw.
- ,, ग. ग gg, ग्ध gdh, ग्ल gn, ग्य gy, ग्र gr, ग्ल gl, ग्व gw.
- " च. घ्र ghn, घ्र ghr.
- ,, জ nk, জ্ব nkh, জ্ব ng, জ্ব ngh (The জ, however, is generally printed as anusvâr on the previous letter) thus, স্থাৰ, স্থাৰ, ত্ৰাঘৰ.
- ,, च. ञ्चor चच chch, चळ chh., चय chy.
- .. ব. বনjj, বৃদ jjh, রুor র (র + স. This con-

junct is pronounced like स्य gy, and is not infrequently so written and printed.) इस jm, इय jy, ज jr, इव jw.

- " ञ, ञ्च nch, ङळ nchh, ङज nj, ङभ njh. The ञ, however, is generally printed as anusvâr on the previous letter; thus, ग्रांच, पंछी, ग्रंजन, भंभट.
- ,, ट. हांt, हांth, त्यांप्र.
- ,, ड. इ dg, हु dd.
- ,, ण. गठ nt, गठ nth, गड nd, गय ny. The ण is often printed as anusvor over the previous letter.
- ,, त. त्क tk, त्ता tt, त्या tth, त्वा tn, त्या tp, त्मा tm, त्या ty, वा tr, त्वा tw, तस ts.
- ,. **य.** या thy, रव thw.
- ,, द. ह or द्द dd, द्ध ddh, द्भ dbh, द्य dy, द्र dr, द्ध dw.
- ,, ध. ध्यdhy, ध्र dbr, ध्व dhw.
- ,, न. नत nt, नत्य nty, नत ntr, नय nth, नद nd, नद ndr, नध/ndh, नध्य ndhy, त nn, नस nm, न्य ny, न्य nw, नग nsh, नस ns. The न is often printed as anusvâr over the previous letter.
- " ч. н pt, н pn, чрр, си ру, н pr, сы ps.

- ,, ৰ. ভবা bj, ভহ od, ভঘ bdh, ভৰ or ভ্লু bb, ভথ by, ল br.
- ,, भ. भ्य bhy, भ bhr.
- ,, म. मप mp, मू mn, म्ब mb, म्म mbh, म्म mm, म्य my, मू mr, म्ल ml, म्ह mh. The म is occasionally printed as anusvár over the previous letter.
- "These conjuncts are numerous, but need not be enumerated; they are all written in the way already explained a, i, etc.
- ,, ल. रक lk, रुप lp, रुम lm, रुय ly, रुल or ल्ला ll, रहा lh.
- ,, व. व्य wy, व्व or व ww.
- সু shr, মূল shl, মূল or श्व shw. ~
- shph, **5H** shm, **5U** shy.
- ,, स. स्क sk, स्त st, स्त्य sty, 程 str, स्थ sth, स्न sn, स्प sp, स्फ sph, स्म sm, स्य sy, स्न sr, स्व sw, स्स ss.
- ,, 表 hm, 親 hy, 禹 hr, 禹 hl, 禹 hw.

Some of these conjuncts are only necessitated by words derived from the Arabic and Persian. Others are being formed and brought into use as occasion demands.

Thus क्च may be met with to do service in लेक्चर (Lecture).

SANDHI.

21. Sandhi means junction, combination, and is used technically to indicate those changes which occur in the last letter of one word and the first of a second when the two words are combined into one. In Sanskrit such euphonic changes occur not only in the formation of compound words, but may more or less apply to all the words in a sentence. Whole lines assume the form of one long compound word, and apart from some knowledge of the rules of Sandhi it is impossible to know where one word terminates and another commences.

These Sandhi changes are found not only in, strictly speaking, compound words, but in cases where a prefix or suffix is added to a simple word.

Most of these changes are effected in the Sanskrit before the words are imported into Hindi, but this is not always the case. This being so, though it may not be necessary for the student of Hindi to enter upon the full consideration of all the elaborate rules of Sandhi found in Sanskrit grammars, yet it is wise to understand the general principles and gain some knowledge of the fundamental rules which operate in effecting the changes. Apart from other considerations, it is a distinct advantage

to be able to recognize the constituent elements of a word, to know, e.g., that Himalaya is from हिम:, frost, ice and आलय, abode.

The changes are mainly of three kinds.

- 1. A letter may disappear, being merged into another, e.g., परमात्मा, the supreme spirit; the inherent आ at the end of परम has been merged in the initial आ of आत्मा.
- 2. The two letters brought together may be combined into another letter, e.g., in **परमेश्वर**, the Supreme God; the inherent **अ** in **परम** and the initial **ई** of **ईश्वर** are combined into **ए**.
- 3. One letter may be changed so as to euphonize with the other, e.g., जगनाय from जगत्, world, and नाय, lord. The त being changed into न, so as to accord with the following न

A few of the principal Sandhi changes are given below. The full rules and their numerous exceptions are far too elaborate to be included in a small Hindi Grammar.

22. Changes of vowels.

Two similar vowels, whether both short, both long, or one short and one long, become the corresponding long vowel, e.g., 頭+頭 or 頭+勁, or 頭+勁 become 勁. Similarly with 夏, 夏, 禹, etc. Thus 到日十年三里刊一定;

xy + z or z = v, e.g., z = v.

Lord of the world.

आ + 3 or ज = आं। पर + उपकार = परोपकार, Help of another.

ग्र + श = ग्रर. परम + शृषि = परमिष, Chief Saint.

ज़ or ज़ा + ए or ऐ = ऐ ,, हित + एषी = हितेषी,

Well-wisher.

ख्र or ख्रा + ख्रो or ख्रो = ख्रो ख्रा + इ or ई = ऐ

" ,, उ or ऊ= आ or औ

" " च = अर or आर, e.g., महा + चाषि = महर्षि,

Great Saint.

इ or ई followed by a different vowel is changed to य

 उ or ऊ
 व

 मृ
 ...

 ए
 ...

 ऐ
 ...

 ग्रो
 ...

 ग्राव
 ...

e.g., इति + आदि = इत्यादि, et cetera; प्रति + एक = प्रत्येक, each one; मनु + अन्तर = मन्वन्तर, an age of 4,320,000 years. It will be noticed that, according to the "Classification of Letters" table, य has

close affinity with इ, ई, ए, ऐ, and व with उ, ऊ, आं, आं; र and च are closely related. Thus in the case of many words such as नैन and नयन, eye, and आंतार and अवतार, incarnation, both forms are found.

23. Changes of Consonants.

Nothing beyond a few general principles can be given under this head, as the consonantal changes are very numerous and complicated and belong more properly to Sanskrit Grammar.

- a. It is generally the last letter of the first word that is assimilated to the first letter of the second, or moderated in some way, not the reverse, e.g., মন্+
 जন = মত্ত্বন, a good person.
- b. A hard consonant may be changed to its corresponding soft letter before a soft consonant, e.g., दिक + विजय = दिग्विजय, world-wide conquest; षट् + दशन = षडदर्शन, the six systems (of philosophy).
- e. Or it may be changed to its corresponding nasal before another nasal, e.g., जगत्+नाथ = जगजाय, Lord of the world.
- d. In numerous cases the changes are greater than those indicated above, a letter being changed to one of another class. A few examples are appended:

सत् + चित् + ज्ञानन्द = सच्चिदानन्द Existence,

thought, joy.

निस + सन्देह = निःसन्देह

निस + कपट = निष्कपट

निस + धन = निर्धन

निस + शंका = निःशंका

Without doubt.

Without hypocrisy.

Without wealth.

Without doubt.

The above paragraphs must suffice to indicate the general principles. The English reader may be reminded that such changes are not foreign to the English language, though they are perhaps more commonly found in the addition of prefixes and suffixes than in the formation of compound words. It may be also remarked that the euphonic changes are not so scientifically worked out. We have unmoved, but immaterial; impolite, but unproved.

OTHER CHANGES OF LETTERS.

24. Many other changes of letters occur in Hindi, which are neither sanctioned by Grammar nor subject to grammatical rules. These are common in colloquial speech and are also found in literature. It is often used for u; a for a; u for u; a for u;

Sometimes τ is substituted for e.g., बारना, बालना, to light; ∞ or $=\infty$ for $=\infty$; अन्वय. अस्य, indestructible. The letters $=\infty$ and $=\infty$ are sometimes interchanged, e.g., खड़ी बोली, खरी बोली, commonly used of the language freed from provincialisms.

Among the illiterate, letters are sometimes reversed in a word, thus **श्रामदी** for **श्रादमी**, man. Other corruptions are very frequent, but have perhaps no right to a place in a Grammar.

ABBREVIATIONS, PUNCTUATION, ETC.

25. Abbreviations.

The sign of indicates that the word is contracted, just as in English tr. for translation, or etc., for et cetera, so in Hindi दो° stands for दोहा, Doha; ई° for ईस्वी, the Christian Era (A. D.); प° for परिस्त, Pundit, etc. In a book where any word is repeated again and again, a contraction may be adopted, though it may not be a widely recognized one, e.g., उ° for उदाहरण (example).

A figure printed after a word indicates that the word is to be repeated that number of times, e.g., किसी २ का यह मत है...... i.e., किसी किसी का, the view of this or that one is......The words श्री ५ signify that the honorific title श्री is to be repeated five

times after such a person's name. At the limit in this matter. It is suggestive of so many guns.

26. Punctuation.

Until recently the only marks of punctuation commonly used in Hindi were I and II, called varue and and ciura. The latter is placed at the end of a line of poetry or couplet, the former is less intensive and marks the conclusion of the first half. In prose the double line marks the end of a paragraph, the single that of a sentence.

Of recent years there has been an increasing readiness to adopt many of the English signs for punctuation, etc. The comma and full-stop (प्राच इस्टाप) are very much used, the semi-colon and colon very much less. The note of interrogation is widely used. Perhaps still more popular is the note of exclamation; a few writers appear to have a perfect passion for !!!!!s. Inverted commas and parenthetical marks are not uncommonly used, sometimes the latter not very correctly.

ACCENT.

27. Accent in Hindi is not so common as in English, but is by no means absent. Very misleading statements have been sometimes made on this point by writers and teachers, and the writer must confess to have been

guilty in this matter in his Grammar written years ago. As a matter of fact, accent, both on words in sentences and on syllables in words, is quite common. Possibly no rules can be formulated for the latter, as we recognize that in English no rule can be relied on. In manly, dentistry, pungent, the accent is as clearly on the first syllable as it is on the second in indent, restrict, domain. The general rule about the accent being on the antepenultimate in polysyllabic words, is by no means universal in its application. Under these circumstances, there is no reasonable ground for complaint if the accentuation in Hindi has to be learned by practice, not by rule.

Accent of words in sentences. In Hindi, as in English, this largely depends on the meaning to be conveyed, e.g., at with an attitude and attitude attitude and attitude and attitude at

The use of accent or stress on words in sentences varies greatly. Some speakers go evenly on their way

and leave their sense to be elucidated by the structure of the sentence; others pursue the exactly opposite course and, so to speak, underline and italicize very many of their words. In some cases tone and emphasis are very necessary, if the exact meaning of the speaker is to be conveyed to the hearer, e.g., in at the will do (it), and at actif ? the meaning depends more on tone; but if the point be as to whether he or somebody else will do the work, then stress or accent comes in. at actif may be so pronounced as to indicate very plainly that it is he who will do it, not another person. In printing, as underlining is little used, the sentence would probably appear at actif.

28. Accentuated syllables in words.

That accent on syllables exists widely cannot be questioned. In Atl, Atl, mine, thine, the accent is distinctly on the first syllable; in Etit, gett, ours, yours, as distinctly on the second. In atl, I will do (it), He will die, however, although these are three-syllabled words, the accent is not on the second, but on the first syllables. The matter of long and short vowels evidently does not decide the matter as to which syllable is to receive the accent. In Etit, to be contained, the accent is on H; but in the word Etit, it is not on H, but on the H that the accent falls.

In Verbs the general tendency is for the accent to fall on to the stem rather than on to the termination. Thus in कहंगा, I will do; मरा, He died; रोएगा, He will cry; गायेंगे, They will sing, the accent is on क, म, रो, गाः

In Causal Verbs the accent generally falls on the second syllable of the stem. Compare ना, It was affixed, with ना (Imperative from नगना), or नगता है, He affixes it. In the first the accent is on न, in the second and third on गा Compare also बेठो, sit down, and बेठाओ, seat (another person). In the first, the accent is on बे, in the second on ठा.

The ear at once distinguishes between the non-accented $\hat{\mathbf{c}}$ in $\hat{\mathbf{a}}$ riddle. In $\hat{\mathbf{v}}$ and the accented $\hat{\mathbf{c}}$ in $\hat{\mathbf{v}}$ in $\hat{\mathbf{v}}$ and the accent is on $\hat{\mathbf{v}}$, in $\hat{\mathbf{v}}$ in $\hat{\mathbf{v}}$ on the $\hat{\mathbf{c}}$.

Accent on.

Accent on.

समाचार, good news स	मसाला, spices, etc. सा
कुशल, prosperous कु	कुचाल, disorderly walk चा
लदा, laden ल सदा, always स	सहारा, help हा
,	
	दयानु, a merciful one या
बोलूंगा, l will speak बो	लूगा, I will take लू पौराणिक, connected with
dioi:	the Purans

Illustrations need not be multiplied. The student must exercise his ear and imitate. To say आएगा, with

a strong accent on $\overline{\mathbf{v}}$, is about as indicative of ignorance or carelessness as to say ini-mic-al instead of in-im-i-cal in English.

The accent in Poetry will arise for consideration in the special chapter on Prosody.

OTHER ALPHABETS.

29. Besides the Någarî alphabet, used generally in writing and printing Hindi, modified forms are in use, e.g., the Baniouţî used by Baniyas or shop-keepers, the Mahâjanî, adopted by bankers, and the Kaithî, very widely used by patwaris and others, especially in Bihar. The Kaithî is a rough script modified from the ordinary Någarî, with the upper line omitted. Like handwriting in English some of the letters may vary. Note, e.g., how differently g,k,p,s, etc., are written by different people. For speed and ease of writing Kaithî has distinct advantages. The writer has used it for many years and found it a real saving of labour. It means re-writing for the Press, but a copyist can generally be easily procured.

Several books have been published in Kaithî. Quite well printed books may be obtained from Macmillan & Co., Calcutta, the Kharg Bilas Press, Patna, and other presses. There is quite a good specimen of Kaithî to be obtained at the Bible Society, 23 Chowringhee Road, Calcutta, viz., The Psalms. I—XLI. Price 1 pice. Some books have been published as Kaithî which are not genuine Kaithî; let the student beware of such.

30. The Kaithi Alphabet.

ग्र	શ્ર	च	4 8	प	Ч
न्या ।	શ્રા ા	亵	ध्	फ	Ya .
इि	ર ૧	<u>ज</u>	N	ब	વ
ई ी	ξ . ٦	भ	3	भ	N 1

या	2)	द	3	स	स
घ	ધ 2	घ	ਖ		
ङ		न	۵	ह	ξ

1.	It is safer perhaps to use the ordinray Nagari .	
2.	घ.	

- 3. This too much like 4, 4 is preferable.
- 4. It is important to begin H well to the left and, H well to the right H H, otherwise H and H are easily mistaken for one another

CHAPTER III.

DIVISIONS OF HINDI GRAMMAR. PARTS OF SPEECH. SUBSTITUTES FOR THE ARTICLE.

31a. Grammar. व्याकरण.

Prefix and Suffix.

- Part I. Letters. वर्णविचार. उपसर्ग, प्रत्यय.
 - " II. Words. शब्दविचार.
 - " III. Sentences. वाक्यविचार.

Etymology. व्युत्पत्ति.

Composition and Syntax. रचना, वाक्यों की

रचना.

The three divisions of the Parts of Speech:

- 1. संज्ञा Including Nouns, Pronouns and Adjectives.
 - 2. क्रिया..... Verb.
- 3. अव्यय..... (Uninflected). Including Adverb, Postposition, Conjunction and Disjunction, Interjection. Noun.

Pronoun. सर्वनाम.

Adjective. विशेषण.

Verb. Small.

Adverb. क्रियाविशेषण.

Postposition. सम्बन्धबोधक.

Conjunction & Disjunction. संयोजक, विभाजक.

Interjection. विस्मयादिवाधक.

31b. As this is a Hindi Grammar for English-speaking students, it would be unwise to attempt to write it from a purely Hindi standpoint; at the same time it is believed that it will prove of considerable assistance to the student to have his attention directed to the divisions of Grammar recognized by Indian Grammarians, to adopt, in some measure, their order in the presentation of the various matters to be considered and to give the technical terms which they use. The knowledge thus gained will be helpful in later reading and study.

We are not disposed to follow their method too closely, nor adopt all their divisions and sub-divisions, which are sometimes traditional, fanciful and conventional and of small practical service. Too much attention has been given by many of the writers of Hindi Grammars to Sanskrit Grammar and too little consideration to the actual principles and rules which prevail in modern Hindi.

32. The 3 main divisions of Hindi Grammar are: 1. वर्णावचार — the consideration of the letters. 2. शब्द विचार —the consideration of words. 3. वाक्यविचार

-the consideration of sentences. Under 2, might come च्युत्पत्ति, Etymology. Under 3, comes रचना, making, or वाक्यों की रचना, which may be considered to cover both Composition and Syntax. Prefixes and Suffixes, उपसर्ग and प्रत्यय, may be included under 2. A short chapter will be devoted to this important subject.

For the most part, the Syntax of Hindi will not be dealt with separately, but included in the various sections as the subjects arise with which the different rules of Syntax are connected.

- 33. The Parts of Speech are divided into 3 classes: 1. संजा, which includes the Noun, Pronoun and Adjective.
- 2. क्रिया, Verb, and 3. ख्रव्यय, (i.e., unchanging, not liable to inflection), in which are included Adverb, Preposition, (or better, Postposition), Conjunction, (or, as the Hindi Grammarians wisely put it, Conjunction and Disjunction), and Interjection.
- 1. Hall. Noun. There is a growing tendency among Indian Grammarians to confine the use of this word to mean Noun and not to include Pronouns and Adjectives under the term. It is not difficult to understand how the Pronoun should have been included in the term HIII (that which names or designates), as the Pronoun takes the place of a Noun, but it is not so

so easy to find the ground for the Adjective having been included. Possibly the fact that many Adjectives are used as Nouns may give some clue.

- 2. सर्वनाम, Pronoun. सर्वनाम, etymologically, means all+name, i.e., a common name applicable to all. Pronominal Adjectives will also be treated under the Pronoun. प्रतिनिधि (substitute) is sometimes found for Pronoun.
- 3. विशेषण, Adjective. That which distinguishes. The Hindi गुणवाचक is also found to designate the Adjective.
 - 4. mai, Verb. (the doing).
- 5. क्रियाविशेषण, Adverb. (that which specializes or discriminates).
- 6. **सम्बन्धबोधक** (that which indicates connection), corresponds in many respects with the English Preposition, but, as in Hindi it does not precede but follows its Noun or other word, it is more appropriately called Postposition.
- 7. संयोजक and विभाजक that which connects and that which separates). These may well be called Conjunctions and Disjunctions.
- 8. विस्मयादिबोधक, Interjection. (That which indicates dismay, or wonder, etc.)

as

SUBSTITUTES FOR THE ARTICLE.

- 34. There is not only no term for the Article in Hindi, but no words which correspond with the English a and the. Equivalents for them are, however, found.
- 1. Very frequently the Noun is used without any addition, e.g., His mother was a widow, would be simply उसकी माँ विधवा थी. A good man never lies, ग्रन्था मनुष्य कभी भूठ नहीं बोलता. What was the cause of it? उसका क्या कारण था? He was the greatest of them all, वह सब में मे बड़ा था. The king began to enquire, राजा पूछने लगे.
- 2. Not infrequently va (one) is used where "a" would occur in an English sentence. va unjust a said. curva in va university and said. curva in va university and an english sentence. va university and said. curva in va university and said. curva in va university and said. curva is university and said. curva university and said. curva university and said.
- 3. Occasionally, कोई may be about the equivalent of "a." e.g., कोई स्त्री स्नाकर कहने लगी, A woman came and said. But this might also be rendered, A certain woman. कोई has generally something of the force of, a certain one, or some one, or anyone कोई नहीं स्नाया, No one came: lit., Anyone did not come.

4. For the Definite Article यह, this, or वह, that, that one, may sometimes be used, but only in cases where the English the carries somewhat of the same force. There are sentences in which the English the is quite definite, and yet any equivalent in Hindi might be unnecessary, e.g., The house is far from here, might well be rendered चर यहाँ से दूर है : the fact that some particular house was being referred to, would be understood from the context. On the other hand, in such a sentence as, the man is a fool, meaning some particular man, the Hindi would probably be यह मन्ष्य मूर्ख है or वह मनुष्य मूर्ख है. Similarly, वह राजा जिसके पुत्र शास्त्र में ज्ञान नहीं रखते थे, The king whose sons did not possess a knowledge of the sacrei book. Here the English rendering might equally well be, that king. In Hindi, the more usual construction of the sentence would be. जिस राजा के पुत्र शास्त्र में ज्ञान नहीं रखते थे वह....., Of which raja the sons.......he.......Such a phrase as, The man who went, died, would be जो गया सा मर गया. In both the English and the Hindi it is not perfectly clear whether the man referred to is some particular man, or whether the statement is a general one.

CHAPTER IV.

DECLENSION OF NOUNS, PRONOUNS AND ADJECTIVES

THE EIGHT CASES.

35. The Eight Cases. कारक

Nominative.

कत्ती, (the doer.)

लड़का (boy.) लड़के ने (Sometimes called the Agentive Case.)

Accusative.

कम (that which is

Dative

सम्प्रदान, (to whom, or for लड़के के।

Instrumental.

(producing, करण. causing.)

लड़के से

Ablative.

अपादान, (taking from.) लड़के से

Genitive.

सम्बन्ध, (bound up with, related.) लड़के का. की. के

Locative.

ख्रिधकरण, (placing upon.) लड़के में, पर, etc.

Vocative.

सम्बोधन, (calling to.)

36. Much in the way of detail regarding the forms and uses of the Cases, must be left for consideration until the following chapters, but, inasmuch as the broad principles apply equally to Nouns. Pronouns and Adjectives, it seems wise to deal with these broad principles at once.

37. The Cases are indicated by the addition of suffixes. Taxon, or postpositions. Late. The original form may or may not undergo change before such addition be made. This Case declension may not be carried out with complete consistency, but is carefully worked out, and presents a striking contrast with the elements of declension to be found in Pronouns and Nouns in English. In Nouns, the "'s" is all that can be brought forward. In Pronouns, we are better off, but far from complete. My, thy, his, its: our, your, their; me, us, thee, him, them. It is true that in Hindi we have not a special form for each Case, but there is a complete system, by the use of the Taxon.

The form with \overline{a} , given under the Nominative, is sometimes reckoned a separate Case, and called the Agentive. There is some justification for such a course, as the use of the form with \overline{a} leads to a reconstruction of the sentence in which it occurs; but, in spite of this, it is practically the subject of the sentence and so, in

common with Indian grammarians, we include it with the Nominative, regarding it as a special form of that Case.

- 38. That form of the Accusative which is identical with the simple form of the Nominative will be explained in the chapter on the Noun.
- 39. The form of the Dative is identical with the form of the Accusative with at. This leads to some confusion at times. In not a few instances a word which is regarded by some as a second Accusative is in reality a Dative.

के लिये (for, for the sake of) is used sometimes with the Dative instead of का.

40. The forms for the Instrumental and Ablative are exactly the same and, in instances not a few, to decide whether the $\hat{\mathbf{H}}$ indicates the Instrumental or Ablative Case is not easy. In $\mathbf{visital}$ and $\mathbf{visital}$ and $\mathbf{visital}$ and $\mathbf{visital}$ are also in the season of th

- 41. For the Genitive Case, the Hindi name **HEAFY** is peculiarly suitable, signifying any relation or connection which may exist between two or more persons or things.

 3441 321, His son; are all under the all years, This is a one pice book; are all are simple illustrations of the use of the Genitive. The relations covered in the use of this Case are exceedingly numerous.
- 42. The Locative with $\overrightarrow{\mathbf{H}}$, in, and $\overrightarrow{\mathbf{UT}}$, upon, sweeps a wide area. It has reference to place, time, and logical sequence.
- **43.** The Vocative is the Case used when a person or persons are directly addressed.
- 44. The following sentence includes all the Cases. है गुरु मैंने राजा के सेवक के। श्राच्चा दी कि तुम नगर से घोड़े के। लाकर घर में रस्सी से बान्धो, the gurn! I gave command to the raja's servant to bring the horse from the city and fasten it up by a rope to the house.

45. Inflectional changes.

A special form of the word does not exist for each Case. With some Nouns, no change of form occurs at all in the singular, the Case being indicated by the addition of the Case-suffix or attack. In all Nouns, the Plural has an inflected form differing from the Nom. This may be called the oblique stem,

or inflected stem. The same name is appropriate for the stem in the sing, when such a changed stem is used. The inflectional changes are greater with the Pronouns than with Nouns.

46. Case endings.

Some of the Case endings may be regarded as words, such as \overrightarrow{H} , in; $\mathbf{U}\overline{\mathbf{U}}$, upon; others partake more of the nature of suffixes, having no meaning by themselves. It might, of course, be urged that the postpositions also are incapable of expressing an idea unless joined to other words in a sentence. It will, however, be felt that there is a distinction between $\overline{\mathbf{H}}$, $\overline{\mathbf{H}}$ and $\overline{\mathbf{H}}$, $\overline{\mathbf{U}}$; even as in English we should not call "'s" in "dog's" a word, nor "...ship" in "partnership," but we do call "in," "upon" words.

47. Case endings. How written.

The opinion of Hindi scholars as to the correct way of writing the Case endings is not unanimous. Should they be joined to their word or written separately?

It will be found that generally the following rules are accepted. In the case of Nouns, the Case endings should be printed separately from the words, but should be united with the Pronouns. Thus:—सरकार ने, पुस्तक का. राजाकी, नगर को, धन से, परीक्षा में,

चेष्टा करने पर; but उसकी. उन्होंने, इसमें, जिसका, उनके, etc.

Details concerning the Cases will be given in the several chapters dealing with Nouns. Pronouns and Adjectives.

CHAPTER V

THE NOUN

48a. Noun संज्ञा

Word शहद

Word with its Case suffix पद

Case arta (see for list, previous chapter.

Case suffix विभक्ति

Affix उपसर्ग, प्रत्यय

Gender लिंग

Masculine पुँक्तिंग Feminine स्त्रीलिंग

Neuter (not used in Hindi.) नपुंसक लिंग

Number वचन

Singular एकवचन

Plural बहुवचन

Dual (not found in Hindi. द्विवचन

Compound word समास

48b. The various divisions of words and Nouns adopted by Indian Grammarians is not a matter of supreme importance for the foreign student, nor of great practical moment, but is well worthy of some consideration.

Sounds are said to be of two kinds: 1. Earlithm, i.e., mere sounds as made by animals. 2. autrha, i.e., composed of letters. This definition must be taken for what it is worth; words exist long before letters are invented to make a record of them possible. This 2nd class of sounds is again divided into: 1. Hisam, possessing meaning, and 2. Artuan, without meaning.

Grammar, of course, only deals with this second class, with Words. Words are classed according to their origin or the character of their formation.

- 1. रूढ़ि. A word which is a simple original sound: an arbitrary sound possessing a definite meaning. as मनुष्य, a man.
- 2 योगिक. A word formed from combined roots. Here the word is no longer an arbitrary sound, its meaning rests on its etymology, e.g., यूजक, a worshipper, from यूज, relating to worship and क contracted from करना, to do. Thus यूजक means, one who does worship.
- 3. **These** words are **Tilas** for a smuch as they are derived from roots giving meaning according to etymology, and are **E**[c, because the meaning of the word when it has been formed is attached arbitrarily to some special object, e.g., **van**, a lotus, from **van**, mud, and **n**, born of. The meaning is plain from the etymology; but to attach the word to the lotus must

be regarded as arbitrary, as there are other mud-born things besides the lotus.

4. समास, Compound word, is not always included in these divisions, but appears to belong here. It differs mainly from योगिक words, in that it is formed from two words rather than from two roots. Example, महा-राजा, a great king, from महा, great, and राजा, a king.

49. Nouns

A three-fold division of Nouns is generally adopted.

- 1. जातिवाचक, Common Noun. One of a class as पशु, animal: पद्मी, a bird: वृक्ष, a tree.
- 2. **व्यक्तिवाचक**, Proper Noun. From **व्यक्ति**, an individual, e.g.. विष्णु, the god Vishnu: गंगा, the river Ganges.
- 3. **Hiadian.** More or less corresponding with the English Abstract Noun, but covering more than can be strictly included in that term. **jacon**, beauty, is abstract, but another example given, viz., **HIT UIZ**, striking and cudgelling, must be regarded, by at least the recipient, as not strictly abstract.

There are various other divisions of Nouns adopted by some Indian grammarians such as those indicating rank or office, e.g., चाधरी, a head man: those indicating relationship, e.g., भाई, brother: measure or weight, भेर,

a weight of about 2 lbs.; occupation, वहर्ड, carpenter: Collective Nouns, सभा, an association or assembly.

There are many Verbal Nouns in Hindi, e.g., the Infinitive is a Noun in very frequent use, aren, to do, the doing. This is called in Hindi the faure time. Another group bears the name of percan. These include such words as area and, a doer.

The Infinitive is fully capable of inflection as regards Case, Gender and Number.

50. There are four matters calling for special attention in connection with Nouns. These will now be dealt with: 1. Gender. 2. Number. 3. Cases. 4. Compound Nouns.

GENDER.

importance and of about equal difficulty. Its importance rests on the fact that the gender of the Nominative often affects the form of the Verb; also the gender of the Noun affects the form of the Adjective or Participle. The difficulty arises from this that, as there is no neuter gender in Hindi, every noun is either masculine or feminine, though so many must obviously be quite devoid of any sex distinction. The termination of the Noun may at times afford some help, but no reliable rule can be formulated on that basis. For instance, from the fact that

and $\frac{1}{3}$ are the characteristic terminations, respectively, of masc. and fem. Adjectives and Participles, and also of many parts of the Verb, one might naturally be led to conclude that Nouns ending in $\frac{1}{3}$ and $\frac{1}{3}$ would likewise be masc. and fem. Such a conclusion would be very misleading; probably something like 75 per cent. of Nouns ending in $\frac{1}{3}$ are not masc. but fem., and a very large number of Nouns ending in $\frac{1}{3}$ are masc.

52. After stating that living creatures of the male sex are masc, and of the female fem., the only general principle or tendency that can be laid down is this, that larger things are commonly masc, and smaller things and abstract nouns fem., but this is only a broad principle, not a rule.

Indian writers often set forward this statement as a help to the student,—Nouns which require the masc. form of the Adjective are masc., those which require the fem. form are fem. This statement is obviously correct. but, we are at first inclined to conclude, as obviously futile, as it begs the whole question. The statement, however, is quite serviceable for the Indian student and yields a suggestion for the foreign student of considerable value. The Indian student will try words by his ear. He will say "asizing," a large island. "aizing," and will decide that the former is right, the second im-

possible, in the same way that we repeat a sentence and by the ear conclude what is correct and what incorrect. The suggestion that is forthcoming is this: Let the foreign student, instead of attempting to commit to memory the genders of long lists of words, learn to associate with each Noun an Adjective, or to connect it with other words in a phrase, in which the form of the Verb or some other word will settle the gender of the Noun. In this way, he will not only be fixing the gender of the Noun in his memory but, at the same time, enlarging his vocabulary, e.g., अच्छा फल, good fruit: परिडत का आदर करना , Shew honour to the man of learning; ईशवर के ग्रनुग्रह से , By God's grace: लम्बी भुजा, A long arm: लडके की आँखें खुल गयीं, The eyes of the boy opened: राजा की दया, The king's mercy. This is a far more effective method of learning that फल, आदर and अनुग्रह are masc. and भुजा, आँख and दया fem. than the bald memoriter system.

53. Some general rules about genders may prove of some service, but the student must remember that they are only general,

MASCULINE.

54. According to ending.

1. Ending in \(\frac{1}{2}\). Many of these are somewhat adjectival in their formation and meaning. Not a few of

them can be used as either Adjectives or Nouns. e.g.. लोभी, an avaricious man: लोभी गुरु, an avaricious teacher. So again, बंगाली, a Bengali: वंगाली मिठाई, Bengali sweetmeat. This remark applies to many other Nouns as well as those ending in ई.

a. Many Nouns in which ξ is added as a suffix to a Noun signifying some quality, and thus means the possessor of that quality, e.g.,

पापी a sinner. मन्त्री a counsellor.

प्रेमी one who loves. ऋपराधी a transgressor.

द्रोही an enemy. शास्त्री a learned man.
लोभी an avaricious man.

One exception may be noticed. उदामों is dejection. उदास, a dejected man. This is similar to the Urdu in which it is the quality which ends in ई; the possessor of the quality has not the ई at the end. Thus:—
गरीबों कंड, poverty; गरीब, a poor man.

Such Urdu words ending in ξ are fem., and retain their Urdu gender when used in Hindi.

ख्राजिजी عاجرى , helplessness : ख्राजिज, a helpless one.

b. A Class of Nouns used of members of castes or trades.

It should be borne in mind that membership of a

caste does not necessarily involve that the member should follow the occupation of the caste. Mr. Glover is not in all cases a maker or seller of gloves. To a large extent, however, the members of the caste do follow the occupation, and identification with the caste cannot be evaded.

द्विवेदी, तिवारी two classes of Brahmans.

पुजारी a temple priest.

धोबी a washerman.

तम्बाली a betel-leaf seller.

माची a shoemaker.

c. Indicating nationality, place of residence of the person, etc.

बंगाली, कश्मीरी, कमाउनी, a native of Bengal, Cashmere or Kamaun.

रचुवंशी, One who belongs to the race of Raghu.

वासी, A resident of, as काशीबासी, a resident of Kashi. As we may say, "He is a Plymouthian," i.e., a resident of Plymouth.

d. A class of Nouns of which the second part is formed from a verbal root and conveys the idea of a possessor of, or doer of, that which is contained in the first part of the word.

वलात्कारी, An oppressor (doer of violence.)

उपकारी, A benefactor (doer of help.)

अपकारी, An injurious person (doer of injury.)

बकवादी, A chatterbox (a garrulous person.)

सत्यवादी, A truthful person (a speaker of the truth.)

सहगामी, A fellow-traveller (a goer with.)

सहकमी, A fellow-worker (a worker with.)

दु:खदाई, A troubler (a giver of trouble.)

सुखदाई, One who gives happiness to others.

55. 2. Ending in **契1**.

স্থা is a very characteristic masc. termination, but of Nouns ending in স্থা probably not less than about 75 per cent. are fem.

a. Verbal Nouns formed by adding वाला or हारा to the inflected form of the Infinitive. These become fem. by changing आ into ई.

करनेवाला A doer.

जानेवाला One who goes, or is about to go.

आनेवाला One who comes, or is about to come.

देनेवाला A giver.

The termination **EITI** is little used in modern Hindi.

b. Nouns indicating family relationship.

पिता, father: बेटा, son: दादा, नाना, paternal and maternal grandfather; पोता, grandson: पर्पाता,

great grandson; anan, aan, min, grui, min, various kinds of uncles, according as they are on the father's or mother's side, actual uncle or only the aunt's husband.

As will be pointed out in the section on Number, many of these Nouns are not inflected in the singular.

c. A few ending in इया, indicating occupation.

गवइया, a singer; छवइया, a thatcher;

मुखिया, headman; करवड्या or करवेया, a doer.

d. Many others which it would be difficult to classify, e.g.,

राजा, a king; उल्था, a translation; खम्भा, a pillar; चाला, a body; बुटकारा, deliverance; डेरा, a tent; मेला, a festive gathering of people; सहारा, help; मेाना, gold; लोहा, iron.

56. 3. Ending in 4.

This **क** is connected with **करना**, and conveys the idea of a doer of. Thus **शिक्षक**, both tutor and pupil, one who either imparts or receives **शिक्षा**, instruction. **पालक**, one who nourishes or protects. **लेखक**, a writer; **सेवक**, a servant.

Not all these Nouns are personal. We have, for instance, राचक, that which is tasty; वन्धक, a pledge.

57. 4. Ending in त्व.

These are Abstract Nouns. **graca**, manliness. prowess; **H**-greates, the quality of humanity: **H**-greatness; **c**-the condition of servitude. A few end in **Ta**, e.g., **A**Ta, essence, element.

58. 5. Ending in आव.

These are of the nature of Verbal Nouns, and have a meaning somewhat similar to that conveyed by the use of the Infinitive as a Verbal Noun. Examples: भूकाव, bending; विचाव, attraction, tension; पञ्जाव, regret: बचाव, being saved; as in such a sentence as उसका बचाव नहीं बनेगा, It will not be possible to save him; हटाव, the being thrust back.

59. 6. Ending in 3.

Sometimes this ending conveys much the same meaning as the **आव** given above.

उपजाऊ, productiveness; खाऊ, eating ravenously, or a glutton; गिराऊ, falling; ढलाऊ, sloping.

Words ending in And and masc. and EE fem. have much in common.

60. 7. Ending in **पन**.

These also are Abstract Nouns. भेलापन, simplicity; लड़कपन, childhood; पागलपन, madness; माटापन, thickness; कालापन, blackness.

61. According to meaning.

1. Many natural objects, especially if large, are masc. सूर्य, सूरज, the sun; चान्द, चन्द्रमा, the moon; संसार, the universe; जगत, the world; तारा, a star: आकाश, the firmament; स्वर्ग, heaven; वायु, the air; द्वीप, a continent; देश, a country; टापू, an island; समुद्र, a sea; ताल, तालाव, पोखरा, lake, pond; नद, a river.

But पृथिवी, the earth; नदी, a river; भील, a shallow lake, are fem.

62. 2. Minerals and precious stones, e.g., धातु, a mineral; सेाना, gold; रूपा, silver; लोहा, iron; ताम्बा, copper; पीतल, brass; रत्न, a precious stone: हीरा, a diamond; माणिक, a ruby.

But चान्दी, silver, and words for earth, मही, मिही, मृत्तिका, are fem.

63. 3. Parts of the body.

तन, तनु, शरीर, चोला, body; धड़, trunk; सिर, शिर, head: मुँह, मुख, face; खेापरा, skull; बाल, (generally plural.) hair; कान, ear; गाल, cheek; होंठ, lip; दांत, tooth; नेत्र, लेाचन, eye; कन्धा, shoulder: हाथ, कर, पाणि, hand; पेट, belly; पाँव, leg; चरण, foot; शव, a corpse; and many more are masc.

But किट, किरिहाँव, loins or waist: द्याती, breast: बाँह, भुजा, arm: ग्रीवा, neck. आँख, eye: जीभ, tongue: नासिका, nose, are fem.: लीथ, corpse t खापरी or खापड़ी, skull, also are fem. देह, body, is generally fem., but occasionally masc.

64. 4. Divisions of time.

काल, समय, time: युग, an age: बरस, a year:
मास, महीना, a month; ऋतु, a period of two months:
पक्ष, half a lunar month: दिन, दिवस, a day:
बिहान, morning: पहर, a period of three hours, are all mass.

But रात, रात्रि, night: सांभा, evening: घड़ी, a period of 24 minutes, are fem.

65 5. Some emotions and mental states.

प्रेम, स्नेह, love: क्रोध, रोष, anger: घमगड, ग्रहंकार, ग्रिभमान, गर्व, pride: लालच, avarice: ख्रानन्द, हर्ष, सुख, joy, pleasure: दु:ख, pain; श्रोक, grief.

But many such qualities, especially those representing the more tender feelings, are fem.

FEMININE.

66. I. Ending in $\frac{2}{3}$. The termination $\frac{2}{3}$ is characteristic of the fem., even as $\frac{2}{3}$ is of the masc.; but Nouns

ending in $\frac{1}{3}$ are by no means exclusively fem. Probably quite as many are masc.

A. The fems. of corresponding Nouns in masc., ending in **MI**.

a. Indicating relations. दादी, नानी, paternal and maternal grandmother. बेटी, daughter: पाती, grand-daughter (son's daughter).; काकी, चची, aunt (father's brother's wife.); मामी, aunt (mother's brother's wife.); मुफी, aunt (father's sister.): मोसी, aunt (mother's sister.)

It is interesting to note that, while a son's daughter is **पाती**, a daughter's daughter is not (generally) **नाती** but **नातिन**. The word **नाता** is reserved for the meaning of a relative of any kind, a kinsman. The form **नाती** is appropriated for daughter's son, and the fem. of this is **नातिन**.

- b. Nouns of Agency.

 करनेवाली, a doer.
 सुननेवाली, a hearer.
- c. Other Nouns.

लड़की, a girl: द्योकरी, a lass: चेली, a disciple: कुत्ती (or कुतिया), a bitch: बकरी, a she-goat; चोड़ी, a mare.

These Nouns are not very numerous, nor are they

consistently worked out. Hit is a buffalo, but the fem. is not Hit, but Hit. हाथी is not a female elephant but a male. The fem. is हथनी. दासी is a female slave, but there is no masc. दासा, it is दास.

So the masc. of **प्र**ज्ञी, daughter, is **प्र**ज्ञ, son.

,, ,, भेड़ी, female sheep, is भेड़.

,, ,, हिर्सी, female deer, is हिर्सी.

A few Nouns for inanimate things are found with a masc. in sq and a corresponding fem. in sq. These latter are generally diminutives, or regarded as inferior in some way.

रस्सी, rope; masc. रस्सा. कुल्हाड़ी, hatchet: ,, कुल्हाड़ा. जूती , shoe; ,, जूता. नाली, a drain; ,, नाला.

Often a masc. in **M** is not found, e.g., **नदी**, river, corresponds with **नद**, a very large river. We have **a small** window or door, but no such word as **a a a a a** is in use.

67. B. A certain number of words ending in आई, having, in many cases, an abstract meaning.

सच्चाई, truthfulness: भलाई, brosperity: बड़ाई, greatness; बुराई, depravity; लम्बाई, length: चै।ड़ाई, breadth.

Such forms as सुन्दरताई, heauty; पविचताई, holiness, should be avoided; the ई is quite redundant, the ता already fully conveying the abstract idea.

68. C. A number of words indicating cost of labour of various kinds, and sometimes the work itself.

धुलाई, price of washing, washing.

हुलाई, price of carrying, porterage.

कटाई, price of reaping, cutting.

सिलाई, price of sewing, sewing.

कमाई, earnings.

पकाई, cooking.

जुताई, tillage.

Also बिनाई, बनवाई, पिसाई, cost of weaving, making, grinding, and many other similar words.

69. II. Ending in इ.

भक्ति, religious fervour: पुष्टि, bodily fitness; शक्ति, power: उन्नति, advancement: अवनति, decline; बुद्धि, wisdom: मृष्टि, creating: दृष्टि, vision; शान्ति, tranquillity; स्तुति, praise: रीति, भांति, method: भूमि, the ground.

A few mascs. in इ are found. ऋषि, मुनि, saint; कपि, monkey: राशि, a heap, etc.

70. III. Ending in II.

A. Some of these are the names of moral qualities.

A few are Collective Nouns; a considerable number must be classed miscellaneous.

- a. कर्णा, compassion: दया, mercy: कृपा, favour: घृणा, contempt; आशा, expectation: अभिलाषा, कांक्षा, desire: लज्जा, shame: ईषी, envy: शंका, doubt.
- b. सभा, an association or assembly : प्रजा, subjects of a king. cf. the English "this people." सेना, an army.
- c. विद्या, learning: प्रशंसा, praise: निन्दा, abuse, insult: महिमा, glory: दिशा, direction.

आजा, command: भाषा, language or dialect: सेवा, service; मूर्च्छा, a swoon: रक्षा, protection: चिन्ता, thought, anxiety; धारा, flow (of a stream): बाधा, hindrance: टीका, a commentary: मदिरा, intoxicating drink.

बालिका, a giri; महिला, कमला, ग्रवला, woman; कथा, a story: पीड़ा, pain: चेष्टा, effort; प्रथा, custom; प्रतिज्ञा, promise; संख्या, number.

71. B. There is a very large class of Abstract Nouns ending in $\overline{\mathbf{AI}}$. Indian writers tack this $\overline{\mathbf{AI}}$ on to well night innumerable words. The suffix has much the force

of "ness" in English, as in sweetness, goodness, freshness.

A few examples are given:—

अञ्चानता, ignorance.

एकता, oneness.

अधिकता, excess.

कोमलता, softness.

अमूल्यता, pricelessness.

चतुरता, ability.

ञ्रावश्यकता, indispensableness. नम्ता, softness.

उत्तमता, excellence.

प्रसन्ता, pleasure.

उदारता, liberality.

योग्यता, fitness

72. C. A considerable number of fem. Nouns ending in \blacksquare , including a few in \blacksquare . These Nouns have generally somewhat of a verbal force, the doing of. Examples:—

ITALLE, brayer, supplication. \blacksquare , make, workmanship.

श्राराधना, worship.

कल्पना, thought, imagining.

उपासना, worship.

सम्भावनां, possibility.

कामना, desire.

सचना, information.

घटना. occurrence.

स्थापना, placing.

ताडना, chastisement.

प्रेर्णा, instigation.

विवेचना, discrimination.

73. IV. Ending in इन, ख्राइन, नी or ख्रानी.

These are mostly formed from masculines. Very many of them are caste designations.

A. a. From mascs. ending in §.

धोबिन fem. of धोबी, washerman.

मालिन ,, माली, gardener.

तम्बोलिन ,, तम्बोली, betel-leaf seller.

b. From mascs, ending in AI.

Sometimes the आ is retained before the addition of इन; sometimes dropped.

बनियाइन fem. of बनिया, shopkeeper.

धुनियाइन ,, ... धुनिया, wool-carder.

ठठेरिन " ... ठठेरा, brass-worker.

कसेरिन " कसेरा, copper-worker.

c. From mascs, ending in a consonant.

सानारिन fem. of सानार, goldsmith.

चमारिन " चमार, leather-worker.

लाहारिन " ... लाहार, blacksmith.

This इन may be अन in some instances: c.g., चितरन for fem. of चितरा (painter), लोहारन for लोहारन fem. of लोहार (blacksmith).

d. In some cases, there is an alternate feminine, e.g., चमाइन for चमारिन, and a few more.

74. B. Ending in आद्न. These are from mascs. of various endings.

गुरुआ इन or गुरुआनी

fem. of

गुरु, a religious teacher.

पिखताइन.....

परिडत, a learned man.

ठाकुराइन......

also ठाकुरानी, ठकुरानी ठाकुर, a landowner, etc.

75. C. Ending in नी, इनी and आनी.

It should be noticed that a long vowel in one of the syllables of the masc, is sometimes shortened in the formation of the fem.

These Nouns are not only the names of castes, but for other classes of words, relatives, animals, etc.

a. Many are from mascs, ending in \vec{s} , the \vec{s} being changed into इनी.

भिखारिनी fem. of भिखारी, a beggar. अपराधिनी.....

पापिनी

अपराधी, a transgressor.

पापी. a sinner.

गजगामिनी, or गजगमिनी, a woman whose stately walk is compared with the gait of an elephant.

b. From mascs, ending in a consonant, etc.

कल्वारिनी fem. of

कल्वार, a distiller.

शुक्रानी

nertain class of Brahmans.

सिठानी

सेठ. a banker.

जलाहा, a weaver.

जेठानी, wife of a woman's husband's elder brother

(जेठ) देवरानी... ,,younger.... (देवर)

नागिनी fem. of नाग. a snake.

जॅटनी , ... जॅट, a camel.

सिंघनी " सिंघ or सिंह, a lion.

हयनी ; स्था, an elephant.

76. D. Ending in Z.

These have often somewhat of an abstract meaning, e.g., उसकी सजावट देखने योग्य है, Its make up (or ornamental get up) is worth looking at.

चबराहट, perturbation.

सड़ाहर, rottenness.

वनावट, make.

यकावट, weariness.

चिकनाहर, smoothness.

आहर. sound of a footstep.

77. The above general rules and illustrations must suffice. As is natural, where no neuter gender exists, uncertainty attaches to the whole question of gender. Any rules framed can only be of a general character. having many exceptions. Indian writers differ as to the gender of various words. This is partly due to local usage, e.g., tody, is generally fem.; but in some

parts masc. The word **year**, book, used to be masc. It is now invariably fem., probably owing to the fact that the Urdu word for book, kith, is fem. Again, the word **xiett**, spirit, though still generally masc., is used as fem. by some writers. This, likewise, is probably due to the influence of Urdu, the word "rûh," spirit, being fem. in Urdu.

One word, dis, is both masc. and fem., and the meaning differs as the masc. or fem. is used. As masc., it means "trace," as fem. "search." उसकी खाज करा, Search for it. खाज नहीं मिला, no trace of it was found. The word श्रोर, direction, is used both as masc. and fem.; a note on this will be found later in the Grammar

Careful observation and frequent recourse to the Dictionary is the only course. In accordance with the suggestion already made, let the student train his ear by associating other words with Nouns and thus accustom himself to feel what gender a Noun is.

78. A few words are given below as worthy of special note:

Masculine.

Feminine.

आसरा, hope. (but आशा of somewhat similar meaning.)

पानी, water.

राटी, bread.

प्रश्न, question.

माला, rosary, garland.

Masc.

Fem.

उत्तर, answer.

महिमा, glory.

जी, life.

पीड़ा, pain.

विश्वास, faith.

मृत्यु, death.

स्रात्मा, spirit.

आग, fire.

माती, pearl.

जड़, root.

युस्तक, book.

चिड़िया, bird, and बिल्ली, cat. are both fem.; but are commonly used for birds and cats, regardless of sex. The same might be said about certain other words.

79. Gender indicated by different words.

In some cases, a feminine Noun, pairing off with a corresponding masculine, is not a modified form of the latter, but a distinct word, e.g.,

father, पिता

mother, माता

brother, भाई

sister, afen

man, युक्ष

woman, स्त्री

Another word for man, **मनुद्य**, is often used with a generic force as including woman, in the way that man is used in such a phrase as "man is mortal."

king, राजा

queen, रानी or राणी

A masc. राना or राणा is used for king in some parts of India.

bullock, बेल

cow, गाय

81

NUMBER.

लाल and मुनिया, male and female of a certain small bird.

80. Gender of Compound Nouns.

The last word in a Compound Noun decides its gender, the earlier word simply qualifying the latter. Thus **प्रजापति**, king, etc.; **सभापति**, president of an assembly; **प्रानिकृ**ण्ड, a fire-pit, are masc., although **प्रजा**, सभा and ग्रान्न are fem.

In the same way, राजधानी, capital: जलयाचा, !a voyage, are fem., although राजा and जल are masc.

81. Urdu words do not come under the general rules given above; they retain their own genders when brought into Hindi. Very many Urdu words ending in 31 and 3 are fem.

NUMBER.

82. There are two Numbers in Hindi, Singular and Plural. A Dual Number exists in Sanskrit but has not been brought into Hindi.

Only the Nominative Case will be referred to in this section; the forms of Oblique Cases will be dealt with in the section on the Cases.

The majority of masculine Nouns do not possess a different form for the Nominative Plural; consequently, it is only by the forms of other words in the same sentence, or by the context, that it can be decided

whether a Noun be sing. or plural. In not a few instances it is the context alone that can make the matter clear. In the sentence, राजा आये हैं, it is impossible to tell whether the translation should be "the king has come" or "the kings have come." The verb is in the plural, but this would be quite appropriate if only one king were referred to, the plural verb being honorific.

83. The Four Declensions of Nouns.

In dealing with Number and Cases of Nouns, we may place the Nouns in 4 classes:

- I. Some mascs. ending in 羽1.
- II. All other mascs. Some ending in 到 must be included in this class, those ending in any other vowel, and those ending in a consonant.
- III. Fems. ending in इ, ई, उ, ऊ.
- IV. Fems, ending in any other letter.
- 84. For deciding whether a masc. Noun ending in II, should be included in the 1st or 2nd class, the rule has been given that Tadbhavas in II belong to Class I. Tatsamas to Class II. It is evident, however, that such a rule is worthless to any but an advanced scholar. The best course to take is to try and fix the mascs, ending in II that belong to II (and they are quite limited in number), the rest may then be regarded as belonging to Class I.

85. I. Mascs, ending in II belonging to Class II.

a. A few indicating relationship:

पिता, father;

दादा, paternal grandfather;

नाना, maternal grandfather;

पुरुखा or पुरखा, ancestor;

चचा or चाचा, uncle;

काका.

मामा.

पोता. grandson;

and a few others.

b. Other Nouns not easily classified as regards meaning:

राजा. a king.

चाता, a learned man.

राना or रागा, a king.

दाता, a giver.

विधाता, creator or disposer. कता, a speaker.

कर्ता, doer, Creator. श्रोता, a hearer.

देवता. a god.

रचियता, an author

आत्मा. spirit.

योधा. a warrior.

परमात्मा. great spirit.

सखा. a companion.

भर्ता. protector.

युवा, a young man.

alai, a term of respect to

the aged.

नेता. a leader.

अगुआ, a guide or fore-

runner.

86. II. Mascs, ending in other vowels come under this Class II. (See sections 54 and 59.)

Under this come such Nouns as पापी, धोबी, बंगाली, बकवादी, मुनि, डाकू, a robber: गुरु, a teacher; अतिथि, a guest.

87. III. Mascs. ending in consonants. Such as :-

नाम, name: कुल, race: पत्थर, stone: स्थान, place; श्रोक, sorrow: रोग, disease: तीर, arrow; पाँव, leg; पाप, sin: कुराड, pool: कोट, fort: नेच, eye; उपाय, arrangementor device.

With all these Nouns in Class I, the Nom. Pl. is the same as the Nom. Sing., and the form does not undergo any change in the oblique cases in the singular.

88. Class I. Mascs. ending in II.

This Class is so miscellaneous as regards meaning that no classification is attempted:

बेटा, a son; लड़का, boy; कुत्ता, dog; पता, trace, clue; धोखा, deception; नेवता, invitation; टोना, spell;

and the numerous words ending in aim, such as देनेवाला, a giver: करनेवाला, a doer.

These Nouns make their plural Nom. by changing आ into ए, i.e., बेटे, लड़के. कुत्ते, etc. The same inflection is made before adding the Case endings in the oblique forms of the singular.

88b. Class III.

This class includes feminine Nouns ending in ई and इ. They form their Nom. pl. by changing both ई and इ to इय and adding आँ.

स्त्री, woman स्त्रियाँ, women.
लड़की, girl. लड़कियाँ, girls
नदी, river. नदियाँ, rivers.
रीति, method. रीतियाँ, methods.
संखी, companion. संख्याँ, companions.

Occasionally, the termination एं, is found. Thus संख्यें. companions: स्त्रियें, women: कहानियें, stories.

Nouns ending in **इया** generally form their Nom. pl. by the simple addition of anunasik. Thus **alexa**, little daughter, pl. **alexa**. For **alexa**, bird, both plurals are used **alexa** and **alexa**.

89. Class IV. All other teminines must be included in this class.

The oblique cases of the singular are uninflected: the Nom. pl. is formed by adding \$\vec{v}\$ to the sing. Nom.:

पुस्तक,	book,	plural	पुस्तके
बात,	word,	,,	बातेँ
तरंग,	wave,	"	तरंगेँ
जड़,	root,	,,	जड़े
सेना,	a _{rmy} ,	,,	सेनाएँ
यात्रा,	journey,	22	याचाएँ
वस्तु,	thing,	1)	बस्तुएँ

89b. Irregularities.

There are many inconsistencies to be met with in the formation of plurals. The form राज, Nom. pl., instead of राजा, is to be found in the works of thoroughly good Hindi writers. बस्ते for बस्तुमं is occasionally met with, and for the stem of the oblique cases in the plural बस्तुन instead of बस्तुमों. It has been noticed in the last paragraph that the forms स्थिं, कहानिये (and so with, other similar Nouns), are used by some writers.

A measure of uncertainty exists with reference to some mascs, ending in **M** as to whether they should be included in Class I or Class II, e.g., **पोता**, a grandson; aland measure.

All Nouns are inflected for the oblique stem of the cases of the plural. The forms will be found in the next section, that on the Cases.

90. Special uses of Singular and Plural.

Singular form with Plural meaning. In Hindi, it is not uncommon to find the sing, form used where the meaning is evidently plural. This principally occurs with the Nominative Case, but not exclusively so. Ha स्त्री चिक्त हो गयों, All the women became greatly bewildered. कुछ घड़ी योंही बीतों, Some hours passed in this way. सोलह २ माजा होती हैं, There are sixteen instants (in each line). बहुत सी बस्तु ऐसी हैं, There are many things like this.

उस ने अनेक भाषा सीखों, He learned several languages. चार फल के दाता, The giver of the four fruits. बहुत सा रुपया चाहिये, Many rupees are needed. योड़े दिन में, In a few days. छही महीने पीछे, After exactly six months. उसका हाथ पाँव बान्धकर, Having bound his hands and feet.

Occasionally, the Verb remains in the sing. where the Nom. is evidently to be understood as pl., e.g., आँमू वह रहा था, Tears were flowing. जिन २ राजा- आं का नाम आया है, Whatever kings' names are mentioned. कई लाख रूपया उसमें खर्च हा गया, Several lakhs of rupees were spent in that.

91. Plural used where sing would be used in English.

In some of the instances given as illustrations it will be noted that in English the plural is intended, though the singular form of the Noun is retained. With articles of food where the names of grain are referred to:

चाँवलों को घोकर, Having washed the rice. धानों के खेत, Fields of rice. The plural is used also with the word खीलें, parched grain. उन चनों को भुँजवा कर, Having had the gram roasted. With this compare the English, "Having had the chick-peas roasted."

माण, life, is generally used in the plural, possibly with the idea of vital functions, centres of life. उसके माण बच गये, His life was saved. राजा का माण बेंग्ड़ने पड़े, It fell to the king to give up his life. न जानें मेरे भाग कैसे हैं, What sort of a life mine is, is not to be understood. मैंने तेरे भाग बचाये, I saved your life.

Similarly, with **tit**, breath. **3tah** titi an tell with the was panting for breath. The word to the same way. The word to the word to the same way. The word to th

बाल, hair, is generally used in the plural. उसने वाल बढ़ा रखे हैं, He has let his hair grow long.

दाम, price, is often in the plural. बड़े २ दामां पर वेच डाली, He sold (the wood) for a high price.

दर्शन, sight. हमका श्री रामचन्द्रजी के दर्शन होंगे, We shall get a sight of Ram Chandra ji. This word is generally used with this sense in the plural, but not invariably so. Probably the variation in use depends upon the idea as to whether there is to be one peep or a more prolonged "look" or "looks."

equivalent to the use of the English word "news:" that is only plural in appearance. **HHIGI** is used both in the sing, and plural, though more often in the latter **3HA** caused Raja Bhoj to hear all the good news. Later, in the same story, we have the sing. "**an HHIGI**" (Cf. the Eng. tidings.) **HIGH**, food, is sometimes used in the plural, **AA** HIGH fail, You have not taken food.

भूख, hunger. वे भूखें। मरते हैं, They are dying of hunger. As though repeated fastings 'unwilling fastings' were referred to.

भाग, fortune. This is occasionally used in the pl. अपने भागों का देख लगाने लगा, He began to throw blame on his fortune.

92. The formation of plurals by the use of गण and लाग.

The words **1**¶, multitude, and **1**¶, people. are sometimes added to Nouns as suffixes, giving them a plural meaning, with something of a collective force. **1**¶, person, is occasionally found similarly used.

पाठकगण, readers. पाठक-पाठिकागण, readers, men and women. महिलागण, women. सुग्रीव ने सीता खोजने के। कपिगण भेजे, Sugriva sent the monkeys to search for Sita. बड़े बड़े देवगण ऋषिगण और मुनिगण निमंत्रित किये गये, Great gods and saints and holy men were invited. दे। चार लोगों ने उसके। पहुँचाया, Two or three caused him to reach his destination.

A fem. of लोग, viz.. लुगाई, is occasionally used. लोग लुगाई सब उनकी निन्दा कर, All the people, men and women, having abused them. पापोजन, sinners. स्त्रीजन, women. बन्धुजन, kinsfolk.

Notice that these are not true Collective Nouns; they generally take a plural verb.

THE CASES.

93. The classification already made for Nouns under Gender holds for the Cases also.

The names of the eight Cases have been already given in Ch. IV. Under Gender, the Nom. plural has been considered. We have now to note the inflectional changes made for the Oblique Cases, and the use of these Cases. The Vocative Case will be referred to under its own head, as regards the inflection as well as its idiomatic use. The following particulars apply to the remaining six Cases.

In Classes II, III and IV there is no inflectional change in the sing. In Class I the आ is changed to ए—लड़का, लड़के.

In the plural, the termination **x** is common to all the 4 Classes: some slight modification in the stem may occur.

III. The \(\frac{1}{2}\) and \(\frac{1}{2}\) are changed in the same way as indicated under Class II.

IV. In words ending in a consonant, and in आ, the आं only is added; the ending ज is changed to आं, e.g., बहू, daughter-in-law, बहुआं.

This classification probably covers nearly all the ground. Possibly a few words do not conform to the foregoing remarks, and inconsistencies occur among writers and speakers.

It will be seen by the table of Cases here given that there are two forms of the Accusative, and a second form of the Nominative for some Verbs, in some of their Tenses.

94. Declension of Nouns.

	Class I.	Class II.	Class III.	Class IV.	2
	(Masc.)	(Masc.)	(Fem.)	(Fem.)	
Singular.	लंडका, a boy. पिता, a father. ह्यी, a woman.बात, a word.	पिता , a father.	ह्यी, व woman	.बात, a word.

THE NOMINATIVE.

95. There are two forms of the Nominative Case. The second with ने is often called the Agentive Case : but for all practical purposes it is a second Nominative. It is not, like the second form for the Accusative, an alternative form which may be used or not at the discretion of the speaker or writer; with certain Tenses of certain Verbs it must be used. With all the Tenses formed from the Perfect Participle of Transitive Verbs, its use is compulsory. Further particulars concerning this very important matter will be found in its appropriate place in the chapter on the Verb. By some writers on Grammar this form is regarded as a Case quite distinct from the Nom., its Verb being used with an impersonal or passive force. Thus मन्त्री ने राजा को देखा. would mean, By the minister there was a seeing of the raja: but it is far simpler to look upon सन्त्री ने as a Nom. Case. Thus we have for the Present Tense मन्त्रो राजा का देखता है. and for the Past मन्त्री ने राजा का देखा. The minister sees the king; The minister saw the king. The minister is the subject and the Nom, in both cases,

This form of the Nom. is used with the following

Tenses:—

Indefinite

He saw his

Perfect. उसने अपने भाई की देखा, He saw his brother.

Perfect. उसने अपने भाई के। देखा है. He has seen his brother.

Past Perfect. " " , देखा या. He had seen his brother.

Contingent
Perfect. ", ", ", देखा हो Should he have seen his brother.

Presumptive
Perfect. ", ", देखा होगा. He must have seen his brother.

PastContingent Per- ', ', ', देखा होता- If he had seen his fect. brother.

96. The Nominative Case is much used, but little explanation concerning its use is necessary, as, apart from the Nom. with 🖣, its use is exceedingly simple.

- 1. As the Subject of the Verb. दोनों भाई चलने के ग्रम से यक गये थे, Both brothers had become tired through the toil of travelling. उन्हों ने ऐसा किया, They did so. राजा कल जाएँगे, The king will go to-morrow. पिंडत की बुद्धि मारी गयी है, The pundit's wisdom has been smitten, i. e., He has lost his senses.
- 2. Predicatively. Either with the Verb "to be," with a Passive Verb, also with some other Verbs. मैं पापी हूँ, I am a sinner. रामसिंह ख़पराधी गिना जाता है, Ram Sinha is reckoned a transgressor. कुछ दिन पीछे एक दूसरा मनुष्य मन्त्री ठहराया

गया, After a time another man was appointed prime minister. तीनों दास चोर निकले, The three servants turned out to be thieves लड़ते २ वे बीर बन गये, Fighting on they became warriors.

The question of agreement between Subject and Verb, as regards Number and Gender, will be considered in the chapter on the Verb.

THE ACCUSATIVE CASE.

97. The Accusative Case may take the form of the Nom... or the form to which is attached. To form a rule, or rules, by which it can be decided which form should be used in each individual instance is impossible. No rule exists on the subject, and not in all cases can it be said that the matter is regulated by idiomatic usage, for sentences could be, given which in other respects thoroughly correspond, yet is used in one, but not in the other. It is, in not a few sentences, a matter of taste, one writer affecting a larger and another a smaller use of this or that form.

Having made such a statement, it must be carefully guarded and restricted in its application. It should be fully recognized that in many cases idiom does decide that not only is one form distinctly better than the other, but that one is right, the other practically impossible.

There are certain broad principles which may be helpful.

a. With Pronouns, the form with an is very generally used.

मैंने उसका देखा, I saw him, is right; मैंने वह देखा, it would be difficult to find in, perhaps, any writer.

- b. The form with को is very widely used with proper names. रामदत्त को बुलाओ, Call Ram Datta.
- c. The form without को is found more often with lifeless things and with animals than with persons, e.g., राजा ने पैर पूजे, The king worshipped his feet. मैंने घोड़े चलाये थे, I had driven on the horses. On the other hand, we find दु:ख को, प्रार्थना को, वंश को.
- d. Where a Dative is used in the same sentence, and no other equivalent takes the place of the with the Dative, the Accusative is generally used in the Nom. form, thus avoiding the occurrence of two the same sentence.
- e. Where the connection between the verb and the Noun is very close, the shi is often omitted. Ral hard are and the word. Many words joined closely up with area have the Accus, without the shi and the Noun indicating the person struck, with the shi. This is probably a Dative. though many prefer to call it a second Accusative.

घोड़ ने लड़के को लात मारी, The horse kicked the boy. According to Hindi, it is the "kick" that the horse strikes, not the "boy." The boy is the recipient of the kick and, therefore, in the Dative. Compare the English phrases, "He struck a bargain with the man" and "He struck the boy a blow."

f. While the omission of an may suggest closeness of connection between the Verb and Noun, the use of has a tendency to indicate stress and emphasis.

98. Double Accusatives. Double Accusatives do occur; but in many sentences which might be brought forward as illustrations, careful consideration will possibly lead to the conclusion that one of the so-called Accusatives is more strictly speaking a Dative.

Take the following as illustrations of the genuine Double Accusative: राजा ने अयोध्या को अपनी राजधानी बनाई, The king made Ayodhya his capital. उसने ज़तुबुद्दीन रेवक को अपना अधान नियत कर. Having appointed Kutub-ud-din Aibak his chief man. In such sentences, the principal Acc. bears the को. In the two sentences printed above, it is Ayodhya and Kutub-ud-din which are the principal Accusatives; "his capital" and "his chief man" are, in a sense, predicated of these.

In sentences like the following, the word with an is more strictly a Dative than a second Accusative:

য়पने २ लड़के लड़कियों को उत्तमोत्तम वस्त

য়ौर য়ाभूषण पहिना कर, Having had his sons and daughters clothed with the very choicest clothes and jewels. What the king had put on was the clothes and jewels—on to his children. सेवक ने लड़के को जूते पहिना दिये, The servant put shoes on to the boy's feet. Here the दिये shews that लड़के को is a true Dative. उसने चौरासी राजाओं को नेवता भेजा, He sent an invitation to 84 kings. "To the kings" is clearly Dative. So, again, in राजा ने राज ऋपने भतीजे को सौंपा, He entrusted the kingdom to his nephew.

It is similar with the two Nouns after such words as **teamin**, **fumin**, **another**, etc. What is caused to be eaten, or drunk, or explained, is the food, the drink, the matter, these are the Accusatives, the people who do the eating and drinking and have the matter explained to them are the recipients, they are in the Dative Case.

99. Where there are two Accusatives, one complementing the other, the Case sign, the and, is used only after the second; the first is generally written in the Nom. form. Taking his four sons and daughters-in-law with him.

Notice that **ya** is not only in the Nom. form, but in the singular, although the meaning is plural.

100. Accusative of place.

The Accusative is often used of the place to which motion is directed or the place which is reached.

उन्हें उसने युद्ध में मार यमपुर को भेज दिया, Having slain them in battle, he sent them to the realm of Death.

एक ग्रोर को ले गया, (He) took him off in a certain direction.

Sometimes the Case sign is omitted, e.g., सब अपने अपने घर चले गये, They all went off, each to his own house.

101. Accusative of time.

The Accusative is similarly used with reference to time. लोगों को ग्रागे को दुःख पहुँचने का डर है, There is the fear of trouble coming to the people hereafter. ग्राज रात को तू छिप कर बैठ जा, Sit carefully concealed for the night.

With time also as with place, the को is sometimes omitted. इस समय कोई नहीं है, At this time there is no one (here).

THE DATIVE CASE.

102. The usual sign of the Dative, as of the Accusative Case, is को. The Dative, however, may be indicated in other ways, e.g., by के लिये, के निमत्त, के अर्थ.

There is one use of the Infinitive with a Dative of the Noun in which the and may be omitted, although the construct. stem is retained, e.g., वह देखने गया, He went to see. This might also be expressed—वह देखने का—or देखने के लिये—गया.

Another form for the Dative of Pronouns exists, but the consideration of that will come in the chapter on Pronouns.

The Dative has various uses, but they may probably be fairly comprised under three headings.

103. The Dative of the recipient

राजा ने दोनों भाइयों को बहुत ग्राम दिये,
The king gave many villages to both the brothers.
उसने पाँच रुपया एक लड़के को ख़ीर दस रुपया
उसके बड़े भाई को दिये, He gave five rupces to one
boy and ten to his elder brother.

104. The Dative of Possession or Acquisition.

This covers not merely material possessions, but also mental and moral qualities and responsibilities. Many of these uses are met in English by the word "has" or "had." We can say that a man has a cat, or a cold or a conscience, a garden or a bad temper, a great joy, a sense of responsibility, a suspicion.

The following illustrations will suggest the wide use of which the Dative is capable: पहले पहाड़ों के पंख होते थे, In the days of old the mountains had wings.

किसी के। काम मिल जाय, If any one get work.

उन रानियों में से किसी के। भी बालक न हुआ,
No child had been born to any of the queens. ले।गों के।

बड़ो सहायता मिलती है, People are greatly helped.

प्राचीन भारत के विद्वानों के। इतिहास से विशेष

प्रेम न था, The learned men of ancient India had no special love for history. लोगों के। उनके कहने पर सहज

ही विश्वास न आवे, On their testimony people will not readily believe (it). हम लोगों के। ऐसा मालूम होता है, It seems so to us. उन के। मन ही मन पर
सानन्द हुआ, A great joy filled his soul. (Lit. to him, in his heart of hearts great joy became.)

If an Accusative with an occur in the same sentence, and find may be used for the Dative. लड़के उसकी देखने के लिये गये हैं, The boys have gone to see it. Or the Dative sign may be dropped altogether, thus, रत्न किसी की ढूढ़ने नहीं जाता है, A jewel does not go in search of anyone.

Very occasionally, two Datives with के। may be found in the same sentence, c.g., उनका खाने के। चारा भी नहीं मिलता चा, They could not even get any fodder to eat. Many writers would avoid the two के।'s by writing the sentence thus—उन्हें खाने के।, etc.

THE INSTRUMENTAL CASE.

106. The particle is used with both the Instrumental and Ablative cases. It is probably this fact and the difficulty of deciding in many instances under which case a word should be classified that has led to the two cases being united under the name "Ablative" by some There appears, however, no sufficient justification for adopting this course. Undoubtedly, it is not easy to decide in all instances under what case a certain word with should be placed, but it is perfectly clear that the two cases are not identical. There are many instances where a word is Instrumental (are many instances where a word is Instrumental (are many instances).

Under the Instrumental may be included such sentences as the following:—

a. By means of a person. ऐसे मूर्ख से बहुत हानि होगी, Much harm will come through such a fool. लड़के से तो कोई अपराध नहीं बन पड़ा, No fault was committed by the boy. लड़की से नहीं किया जाएगा, It can't be done by a girl.

b. By means of other than a person. उन्होंने बड़े परिश्रम से किया, They accomplished it with great labour. उस पर ध्यान देने से, Through carefully considering this. धन-विज्ञान श्रादि नामों से कह सकते हैं, We can speak of this by such names as "Science of Wealth." खोज से यह बात भ्रममूलक सिद्ध हुई है, Through investigation it is proved that this is founded on a delusion. उसने अपने हाथ से किया, He did it with his own hand.

c. Various; answering to English "with," etc. धनी
पुरुष बड़े कष्ट में धन इकट्ठा करते हैं, The rich
amass wealth with great difficulty. वे उसे तुच्छ दृष्टि
से देखते थे, They looked at him with a contemptuous
glance. युधिष्ठिर ने बहुत ही प्रेम के साथ भीमसेन

का गले से लगा लिया, Yudhishthir with great affection clasped Bhimsen to his neck (lit. by the throat.)

The following is a very good illustration of the use of the Instrumental: धनी पुरुष की, राजा से, चोरों से, शबुआं से, स्वजनों से, पशुपक्षियों से, भिखा-रियों से, भृत्यु से और अपने से भी नित्य भय बना रहता है, A rich man is always living in fear either of the king or of thieves or enemics or his own people, of birds and beasts or of beggars, of death or of himself.

Instances where it is doubtful whether they should be assigned to the Instrumental or Ablative Case, will be noticed under the Ablative.

Sometimes the a is omitted. आप क्या अपनी आँ कों नहीं देख रहे थे, What, were you not observing (it) with your own eyes? इस कारण वे भाग गये, On this account they fled. अपना काम अपने हाथों ही करते थे, He did his work with his own hands.

THE ABLATIVE CASE.

sentences in which the idea of "ablation" can only be reached in a very roundabout way, and yet seem to be more connected with the Ablative than with the Instrumental Case. As a matter of fact, the alone seldom represents the true and full sense of the Ablative; it

only corresponds with the English "from" or "than." The full "Ablative," i.e., "out of" is generally expressed in Hindi by the combination of the Case endings for both the Locative and Ablative, i.e., by $\overrightarrow{\mathbf{H}}$, as will be seen under division "a" following.

a. The true Ablatice. Rini enii Hi Rinaenan है, Gold comes out of mines. जिस तरह कीचड़ में से कमल की उत्पत्ति होती है, In the same way that the lotus springs up out of the mud. इन तीनों में में किसी के विषय में उसे पक्षपात नहीं, He has no partisanship for any one of the three. उसने जेब में से में।तियें की माला निकाली, He took a pearl necklace out of his bocket.

Sometimes $\hat{\mathbf{H}}$ alone is used to convey this full ablative meaning, e.g., \mathbf{T} $\hat{\mathbf{H}}$ $\hat{\mathbf{H}}$

In the following sentence both idioms are used: यह धरती में से निकलता है परन्तु हमारे देश में कोई ऐसी जगह नहीं जहाँ से यह निकलता है।, This comes out of the earth, but there is no place in our country whence it can be obtained.

b. "From," with reference to place, etc.

कहाँ से तुम आये हो ? Where have you come from?

वह सदा उससे दूर ही रहती है, She always dwells far from him. वहाँ से कुछ दूर, Some distance from there. मुभसे आज चारपाई से उठा नहीं जाता, I can't get up from my bed to-day.

- c. Applied to time. "Since." बहुत दिनों से, ince many days. तब से आज तक, From then until to-day. आज से पहले, Before to-day.
- d "From" as received from a person. जिस गुरु से हमने क्या शिक्षा ली है—यह सुनिये, What teaching I have received from which teacher,—Listen to this. किसी के किसी से कुछ माँगना नहीं पड़ता था, No one had to ask anything from anyone.
- e. With Verbs of asking, etc. ईश्वर से मेरी यही प्रार्थना है, This is my prayer from God. उसने अपने सेवक से पूछा, He asked his servant. कंगाल किससे कुछ माँगे ? From whom can the poor fellow ask anything ?
- f. For marriage with. **Hans it aaie fau,** He married Sitaji.
- g. Separation from, दे। चार सिपाही सेना से स्नान हो। गये, Two or three soldiers became separated from the army.
 - h. से is regularly used with the Verb कहना,

to speal:, though the ablative idea is not at all obvious.
गुरु ने अपने चेलों से कहा, The teacher said to his pupils.

- i. Of manner, used Adverbially. क्रम में, In order. आनन्द से स्वीकार किया, He accepted it joyfully.
- j. Indicating the logical ground. इसी से मैं कहता हूँ, Therefore, I say.
- k. Various. anu shiula the teat. Having become free from passion, anger and the rest. that tion the set. all fear the king. Got the sing. The suring agent the anula the rest. In going beyond which there is danger of the work going wrong. Got that the standard the standard that the standard the standard the standard that the standard the standard the standard that the st
- 1. For comparison. जंगली जानवरों का संग नीच की संगत से अच्छा है, Association with wild animals is better than fellowship with the despicable. नामी से भी नामी किव की कीर्त्ति, The fame of even the most renowned poet. उत्तम से उत्तम, The best of all. (lit. best than the best.)

The uses of this and the Instrumental Case are very numerous and various. The foregoing illustrations will indicate the general lines of those uses.

THE GENITIVE CASE.

108. There are three forms for this case, viz., an, an, an, an. The form assumed depends on the word which follows, not on that which precedes. In an ut, The woman's house (lit., of the woman, the house), the form of the Gen. affix depends on the gender of house; the matter is not affected by the gender of the possessor of the house.

is used when the following Noun is Masculine, Sing., and Nominative.

is used when the following Noun is Feminine, Sing. or Pl. of any Case.

is used when the following Noun is Mas. Pl. of any Case, and also when a Sing. Masc. Noun in an Oblique Case follows.

Thus:-

देनेवाले or देनेवाली का बेटा, The giver's (mas. or fem.) son.

., or ,, को बेटी, The giver's daughter.

., or ,, की बेटियाँ, The giver's daughters.

" or " की बेटी से, From the giver's daughter.

., or ,, की बेटियों से, From the giver's daughters.

., or ,, के बेटे, The giver's sons.

" or " के बेटों को, To the giver's sons.

देनेवाले or देनेवाली के बेटे की, The giver's son's book.

The **देनेवाला** or **देनेवाली** being in the Genitive Case, the **वाला** is changed to the construct. stem before adding the Case sign. In the case of **वाली**, there is no change of stem, as in fems, the stem is the same throughout in all the Cases in the sing. The form of the Case sign **an**, **an**, is regulated by the Gender and Number of the following word.

Perhaps the clearest way to regard the matter is to treat the first related word with its affix as an Adjective, and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects. As we say, and and such it is in some respects.

109. An exception to the rule about changing the all to a before a Noun (or Infinitive used as a Noun) should here be noted.

It not infrequently happens that the form an remains unchanged, where a change to the construct. form

might be anticipated. Take some instances. चन्द्रमा का न देखे जाने का कारण. The cause of the nonappearance of the moon; but उसके चले जाने पर. Upon his going. Again, नियम का पालन करने में, In observing the rule. धर्म का ठीक २ पालन करने में. In the exact observance of duty (or righteousness). पराक्रम का त्याग करने पर शतु अवश्य ही हमें जीत लेंगे. Upon our giving up our prowess the enemies will of a surety conquer us. जैचे कुल स्रोर जैंची जाति का होने से बड़ाई नहीं खाती, Greatness does not come through being of a high race and high caste. On the other hand, we find उसके चड़ियाल के मुख में पड़ने की बात टीक जँच गई, The idea of her falling into the mouth of crocodile was judged to be correct. Both idioms are used by writers of good standing.

It would appear that where the an is not changed, the whole phrase is regarded as one piece and only the last case sign is changed, the other words in the phrase being not interfered with. In such a sentence as the second one quoted above, we can quite see that, as the qt throws the preceding an and into the construct. form, that again throws the separation we can offer for the

alternative idioms.

110. When it is remembered that this Case is called in Hindi सम्बन्ध कारक, i.e., the Case of relation or connection, and not merely Possessive or Genitive, as in English, it will be seen at once that it must necessarily cover a very wide ground.

To attempt to classify all the relations for which the Case can be used, is practically impossible. All that we can attempt is to point out some of the principal classes, to give a few illustrations of others which may suggest the variety of relations which may be covered by this Case, and to note some special idiomatic uses of the Case.

111. The Genitive of Possession.

- a. This may be the possession of material things.
 tim a un and and and grandeur.
 no limit to the king's wealth and grandeur.
 no limit to the king's wealth and grandeur.
 no limit to the king's wealth and grandeur.

- b. It may refer to parts of the body. उस के हाथ में एक पुस्तक है, There is a book in his hand. राजा ने उस लड़की के मुँह की ख़ोर ध्यान से देखा, The raja looked thoughtfully towards the girl's face. स्त्री की ख़ाँखें खुल गयीं, The woman's eyes opened.

ट. Or. to mental qualities, good or bad. उसका यह डर ख्रकारण भी नहीं, His fear is also not without cause. राजा के उदार और स्तृत्य गुणों का प्रभाव ऐसा है कि, The power of the king's generosity and praiseworthy qualties is such that..... उसका क्या अप-राध है? What is his fault? रामलाल का यह देख स्वाभाविक है, This fault of Ram Lal is natural to him.

112. The Genitive of Relationship Kinship.) Alfai ense va anim a ya है, The three boys are sons of a poor man. God all three hoys are sons of a poor man. God all three mothers. are stall all electric ensembles. are stall three hoys who have mothers. are stall all three hoys brother had pled. The boy's brother had pled. cool all three hoys brother had pled. cool all three hoys brother had pled.

113. Genitive of Office, etc. रामपुर का केटिवाल, The head police officer of Rampur. राजा के दोनों मन्नी आकर कहने लगे, The king's two ministers came and said. मैं तुम्हारा सेवक हूँ. I am your servant. राजा की प्रजा वहाँ आनन्दपूर्वक रहने लगी, The king's subjects lived there with great joy.

114. Genitive of Price and Quantity. दे। पैसे की

पुस्तक है, It is a two-pice book. चार बीघे की बखरी, It is a piece of land of four bighas. बड़े २ माल के वस्त्र, Very expensive clothes. एक एक बक्स दे। २ ऋढ़ाई २ मन का होता है, Each box weighs 2 or 2½ maunds. उसकी कितनी लम्बाई चौड़ाई है? What is its length and breadth? वह दस बारह रुपया का होगा, That must be worth ten or twelve rupees.

115. Of Material of which made, or maker. वह पियाला साने का या, It was a gold cup. पान के पत्तों के दोनों में, In baskets made of leaves of betcl. मिन्दर का घाट पत्थर का बना है, The steps of the temple are made of stone. पूलों की माला, A gardand of flowers. तुलसीदाम की रामायण, The Ramayan written by Tulsi Das. यह किम का बनाया है? By whom was this made? लोहे की कील, An iron nail.

116. The Genitive of Time. ag दस बरस की लड़की थी, She was a girl of ten years of age. यह दे। बरस की बात है, This happened two years ago. कई बरस के परिश्रम का फल, The fruit of the toil of several years. कालिदास का समय, The time of Kali Das, i.e, In his days. यहाँ के आजकल के लीग, The people of here and now.

117. Of Residence. देश २ के लोग इकहे हुए, The people of various countries assembled. काशी के जितने पुजारी होते, As many officiating priests as there are in Benares. वह किसी गाँव का कुनबी है, He is a Kunbi from some village.

118. Various. उसको लाने की आ़चा दी गयी. The order was given to bring him. प्रजा का उपकार करना उनका मुख्य काम था, To help his subjects was his chief work. उसकी बहुत हानि हुई, He was much injured, or suffered much loss, वे अपने देश और धर्म का सुधार कर सकते हैं. They are able to reform their country and religion. इतने प्यार का क्या कारण है. What is the reason of so much love? उपदेश देने की याग्यता, Fitness for imparting instruction. उन्हीं में कालिदास की गिनती थी, Among them was reckoned Kali Das. राजा की उदारता का वर्णन, An account of the king's liberality. पिता जी का वह प्यार का हाथ कहाँ है ? Where is that loving hand of my father? यह बड़े दुःख की बात है, This is a matter causing great trouble. सर्जू नाम की एक नदी है, There is a river called the Sarju. ऐसे के आने से क्या लाभ होगा, What good will result from the coming of such? उसके करने को चेहा को, He endeavoured to do it.

119. Intensive. To give the idea of completeness or

thoroughness, a word is followed by an ior and or an, and then repeated. Ha an Ha, all. Ugen an Unit, wholly exposed. Que an Que with unit unit, the water pure water. In an animal, In a moment. House and House, Swarms of (flies or any Fem. Noun). With a masc. Noun an or an must be used. House an House would rather mean, the whole swarm. House an House, Many swarms.

120. Separation of related words. Not infrequently, one related word may be separated from the other.

पूरा डर उस भेद के खुल जाने का है, There is great fear of the secret getting out. ये सबजापही के हैं
दूसरे के नहीं, These are yours, not another's. भूमिका में चन्द का तथा उसके ग्रंथ का संक्षेप में वर्णन रहे.

In the Introduction there will be a short account of Chand and of his book. मुफे उनकी अवस्था का लग भग अस्सी वर्ष की होने का पक्का प्रमाण मिला है,

I have obtained a clear proof of his having been about 80 years of age.

122. The use of an where and or any might be expected. Probably, closely connected with the above is an idiom which may present some difficulty to the beginner. Not infrequently, are is found where are or and is looked for. राजा के चार राणियाँ थीं. The king had four queens. The explanation generally offered is undoubtedly the correct one. Some word, understood, must be regarded as omitted. In the foregoing sentence, probably चर में. i.e., In the house of the king were four queens. So उसके एक स्त्री थी, He had one wife. के ाई पुत्र उसके नहीं है, He has no son. दोनों में से एक के बेटा है श्रीर दूसरे के बेटी, Of the two, one has a son, the other a daughter. उस बिचारे के कोई भी नहीं, The poor creature has no one belonging to him. काई कन्या नहीं है. He has no daughter. जिसके इतना धन था, He who had so much wealth. उनके काई सन्तान न थी, He had no offspring. जैसे चक्रवर्त्ती शर्मिष्ठ के हुआ तैसा ही तेरे होगा, You shall have a world conquering son as Sharmishtha had. Infinitive as Noun. One of the related words is frequently an Infinitive used as a Noun. दास के आने

पर, Upon the arrival of the servant. उसके करने का यह कारण या, The reason of his doing so was this. मन्त्री के ऐसा करने का अभिप्राय यह होगा, The purpose of the minister so doing must be this.

124. Alternative of Genitive or Accusative. In some sentences, an alternative construction presents itself, the Genitive may take the place of an Accusative. The two following sentences are taken from one book, from the same page. उन्होंने प्रतिहारी को पक्षी के लाने की आजा दी. He ordered the chamberlain to bring the bird. माना गगनमएडल का नापने के लिये हाथ फैलाये हो, As though he had stretched out his hands to measure the heavens. In the first sentence, we might have का instead of के, and in the second. म गडल के नापने, would be quite idiomatic. There are instances where the meaning might be dubious, e y., उसके बुलाने से क्या काम, might be translated, "What is the good of calling him?" or, "What is the good of his calling? i.e., calling someone else. If the former be the meaning intended and this be not perfectly clear from the context, the Accusative construction should be adopted.

One or two additional illustrations are given:

उसके जगाने के लिये पिता ने सेवक के। भेजा. The father sent a servant to wake him. स्रापने जो पिता की इस स्राज्ञा का भंग करना स्रधर्म समभा, The breaking of this command of your father which you regard as wrong. इस लड़के के बचाने के लिये, To save this boy. धैर्य के छोड़ देने से, Through giving up steadfastness. उधार लेना स्त्रीर उस के चुकाने के लिये यत न करना, To borrow and not strive to pay it off.

The following sentence illustrates the fact that in such sentences the and and are not always alternative:

In a aga at an aumini guid und explaining for a long time. Kekayi said. The Hindi might mean, after Kekayi had explained to the King, etc., but does not. Had that been the meaning, an would have been the safer idiom; because an could only have yielded one meaning. a could not have replaced it.

125. Where the question of agreement of the Case ending with two or more words is involved, the general rule, perhaps, is for it to agree in gender with the nearest, but it may be in the plural and masc., so as to cover all the words involved. Thus **3441 All 18** This might equally well be written, or better. **343 A** In in accordance with the idiom mentioned in Sect. 122.) **343 A** In Turn 444 All 347 All

Their father and mother and relatives lived in great fear.

In the following two sentences, the **EIFTONIX** and **HICTORIA** are probably regarded by the writer as Compound Nouns and therefore have the gender of the latter. **EXTINITIONIX** and therefore have the gender of the latter. **EXTINITIONIX** and therefore have the gender of the latter. **EXTINITIONIX** and injury or advantage to others. **SOUND HICTORIA** and injury or advantage to others. **SOUND HEALTH AND THE SET OF THE PROPERTY O**

127. The Genitive with Postpositions.

The inflected form a is much used with Postpositions. The chapter on Postpositions will give fuller particulars about this point.

128. Much more might be written about the Genetive Case, but the above must suffice. To be able to use freely, but discriminately, the various idioms connected with the Genetive is a good test of a student's grasp of Hindi.

THE LOCATIVE CASE.

129. The word Locative very inadequately defines the functions of this Case. The Hindi term, श्रिधकरण, also

falls short. **ऋधि** means "over" or "upon." The case with its two Case signs **में**, in. and **पर**, on, upon, has to do not only with place but with time, with mental qualities and with logical relations and conditions.

Other Postpositions are said to put their accompanying Nouns into the Locative Case. These must be left tor consideration until the chapter on the Postpositions Some of the Postpositions certainly appear to be as closely connected with the relations covered by this Case as do the Case signs $\vec{\mathbf{H}}$ and $\mathbf{U}_{\mathbf{U}}$, e.g., $\mathbf{SU}_{\mathbf{U}}$, above. \mathbf{II} , \mathbf

A rough classification of the uses of the Locative with $\vec{+}$ and $\vec{-}$ must be attempted, and illustrations given.

130. A. With में.

- 1. (If place. "in." इस देश में लोग ऐसी बात नहीं मानते हैं, In this country people do not accept such a thing as this. राजा दशस्य पुरी में आये, King Dasharath arrived in the city. घर में काई नहीं है, There is no one in the house.
- 2. Of mental states. अर्जुन में भी कैसी दया है. In Arjun also what merey there is. वह क्रोध में ऐसा पागल हो गया, He became so mad in his anger. पराक्रम में धीरता में वह सुमेरु पर्वत के तुल्य था.

In ralour, in steadfastness, he was like Mount Sumeru. यह बात सहज ही समभ में आ जाती है, This is easily understood. विद्या में उनके समान काई न या, In learning none was his equal.

- 3. Of time. va el att i ait uia ti zuia ti zui
- 4. Various. नाटक में ऐसा लिखा है. It is so written in a play. उस उपन्यास में सुखिनी नामक एक स्त्री की कथा है, In this novel there is a story of a woman named Sukhini. ऐसा करने में यह हानि होती है, In so doing there comes about this harm. यह जब हमारे श्रीर सूर्य के बीच में श्रा जाता है, When this comes between us and the sun. gual इश्वर में सच्ची प्रीति थी, He had a true love jor God. चारों भाइयों में परस्पर बड़ा ही स्नेह था, There was great mutual love between the four brothers. इनमें सब से बड़ा पुत्र दुर्योधन हुआ, Among them the eldest son of all was Duryodhan. सरल हिन्दी में लिखा है, It is written in simple Hindi. जिसके हाय में ऋधिकार है, In whose hand there is authority. वह पैरों में खड़ाऊँ पहिने ची, She wore sandals on her feet. पत्तों के दोनों में नारियल का मद्य पिया,

(They) drank toddy from vessels made of leaves.

- 5. Adverbial. गुप्त में, secretly. प्रगट में, openly. संक्षेप में, briefly.
- 6. Sometimes **\(\delta\)** and **\(\delta\)** occur together, with the meaning, from among. Thus. **उनमें से यह उत्तम है**, This is the best of them.

131. Omission of

Sometimes the # is not expressed, though understood.

एक विधवा है जो भाई के घर रहती है, There is a widow who lives in her brother's house. इन दिनों, In these days. यह इच्छा पूरी करनी पाठकों के हाथ है, The accomplishment of this desire is in the hands of the readers. उस झण दे दी, Gave it on the very instant. धोवी के घर हुआ, This took place at the dhobi's house.

132. B. With पर.

1. Of place. चबूतरे पर दो मनुष्य खड़े होकर वातचीत कर रहे हैं, Standing on the platform two men are carrying on a conversation. नाव पर कोई नहीं मिला, No one was found on the boat. दोनों भाई नदी के तट पर रहने लगे, The two brothers took up their abode by the bank of the river. चोड़े पर सवार होकर, Having mounted a horse. उस पर दृष्टि करके,

Haring looked at him. क्या मैं भूमि पर हूं या स्वर्ग में.
Am I on earth or in heaven.

- 2. Of mental states, etc. इस बात पर विचार करना चाहिये, It is necessary to consider this matter. राणी उसपर पूराभरोसारखती थी, The queen placed full reliance on him. प्रजा जन अपने राजा पर अनुरक्त नहीं, उसकी सेमा भी उससे बहुत प्रसन्न है. Not only are his subjects devoted to their king, his army also is pleased with him.
- 3. Various, including temporal sequence. इस पर वह कहने लगा, Whereupon he began to say दिन पर दिन, Day after day. उसके चले जाने पर वे कमरे में आये, On his going away they came into the room. रस्सी खींचने पर टूट जाती है, A rope on being pulled breaks. टूटने पर नहीं जुड़ता, On being broken cannot be joined. दस पैसे पर मिल सकता है, It can be obtained for ten pice. वह आने पर होगा, He must be on the point of arriving. उसके जाने पर यह हुआ, As he was about to go this happened. (Or, it might be "just after he had left.")
- 4. Sometimes से follows पर, as is the case with में. मेज पर से उठाकर ले आओ, Take (it) from the table and bring (it) along.
 - 5. Omission of पर

Occasionally, we must conclude that **ut** or some similar word has been omitted from a sentence (being understood). **Ht Hiv asi Muaic will rest on my head.** At fear must a superior and talk for hours together. **utlt all wills** for a few days.

THE VOCATIVE CASE.

133. $\hat{\xi}$ or some other Interjection may be used to indicate the Vocative Case, but this is not essential: very frequently the Vocative is used without any Interjection.

When the Noun belongs to Class I, the xi may be changed to v for the Vocative, but this is frequently not done. In the other three Classes of Nouns, no oblique form exists in the singular. Thus in a great majority of instances, in the singular, the Locative is the same as the Nominative.

In the plural, however, the Vocative form is in common use. The form is the same as the oblique stem for the other Cases, with the exception that the anusvar is dropped. Thus we have **लड़को**, Oh boys. **राजा**न्यो, Oh kings. **लड़किया**, Girls! **बहिना**, Sisters!

COMPOUND NOUNS. समास

134. The first point to consider is,—What Nouns should be included under this heading? Some would

include all Nouns which are in any way compounded, that is to say, which are made up of any addition or additions to the basis modifying in any degree the meaning of the original word. According to this, such a word as Asilian would be considered a Compound Noun, forasmuch as the privitive As changes the meaning of signal. Similarly, signal itself might be regarded as a Compound, because the suffix as given an abstract meaning to the original.

Undoubtedly all such words are Compounds but, on the whole, it seems better to leave words compounded in such a way for consideration in the chapter on Prefixes and Suffixes and to confine our attention here to those Compounds which are made up of two or more or less complete words, as, e.g.. **TITHAT**, king's house, palace. **THE WORSHIP OF THE FEET OF THE MOTHER IN-LAW and father-in-law.**

There still remains the difficulty of deciding whether words placed in juxtaposition, but not modified in any way as regards form and meaning, should find a place under the heading of Compound Nouns; such pairs of words, for instance, as The fact, night, day. Its fact, thought, consideration. The fact that the Conjunction has been dropped between such pairs of words, does constitute some small ground of justification for their inclusion, and we therefore give them a place.

Mention may be made also of some other words which have a feebler claim to be called Compound Nouns, but for the consideration of which no more suitable place may be found.

The Compounds which are to be considered may consist of two, or more, Nouns, or of a Noun, compounded with an Adjective, an Adverb, a Verbal Noun, or some other Part of Speech.

Some of the words so compounded, are strictly speaking Adjectives, but are also used as Nouns.

135. I. Compounded of two Nouns.

गैशाला, cow-house. मुक्ताहार, pearl-necklace. भव-सागर, the ocean of existence.

The words which make up these Compounds may be variously related.

a. - The first word may be of the nature of a Genetive in relation to the second word, as रामकहानी, A story of Ram (commonly applied to any long "yarn.") सची-कुल-द्रोही, Enemy of the tribe of the Kshatris. भुमगडल, The globe of the earth.

b .-- The first word may stand in an Accusative relation to the second. Aragini, He who gives grain, i.e., God as the giver of our daily food. जगवाता, He who delivers the world. अग्रियुजक, A fire-worshipper. मुक्तिखोजक, A seeker of salvation. मक्खोचूर, A miser. A man willing to suck a fly which has fallen into the milk or similar substance, so as not to lose anything.

- c. The first word may stand in a Dative relation to the second. as **दीनद्यानिधि**. The treasury of mercy for the distressed.
- d. These and various other relations are tound between the two words. grain, A dweller in Bran.

 ywataa, A giver of good qualities. awyaz.

 An ear-ring. araayus, The abyss of hell. saat.

 zaat, Fish. animals, i.e., Goer in the water or on the earth. gsac, Horseman.
- e. Perhaps under this head should be mentioned pairs of words which, owing to the omission of the Conjunction between them, may be regarded as loosely compounded.
- (1). Some of these pairs of words are practically identical in meaning. **mगड़ा रगड़ा**, Quarrelling and mrangling. **कीट पतंग**, Insects and flies. **माचिचार**, Thought, consideration.
- (2). Others are pairs of Nouns closely related in meaning, the second conveying something of the idea. "and such like."

मातापिता, Mother and father. भाईबन्ध, Brothers and kinsmen. And Tood and drink, lit., grain and water.

- (3). Some are contrasted words, carrying somewhat of the idea of inclusiveness. [दनरात and रातदिन, Day and night; continually. सांभ विहान. Evening and morning. Tellet, Moving and unmoving, i.e., the entire creation, things which have life and movement and those which do not move.
- 136. II. Compounded of a Noun and Adjective, or Participle, or a second Noun used with Adjetctival force. In some words, the Adjective comes first, in others last.

दुष्ट जन्तु, Evil creature. कपटवेष, Disguise, lit., deceptive dress. राजिष, King of sages. भूतग्रस्त, Demon-seized, possessed. मनरंजन, Captivating the mind. श्रीयुत, One possessing great glory. श्रीहत, One whose glory has been smitten.

137. III. Compounded of a Noun and one of the ब्राट्यय. i.e., the undeclinable Parts of Speech. These should be, perhaps, included under Compounds formed by adding Prefixes and Suffixes, but may be mentioned here.

धर्महीन, A man deroid of righteousness. यथाकाल, The suitable time. अतिशक्ति, Great strength. 138. IV. Compounds whose meaning derived from the words has been appropriated to some special person or thing. ज्ञातिरोग, Consumption, lit., severe disease. मृगतृषा, Mirage, lit., deer-thirst. द्यानन, Râvan, i.e., the ten-faced one.

139. V. Compounded of a Noun and some numeral.

The four ages. The four ages. The four-faced. The four ages of Brahmans: one who knows two of the Vedas. The three worlds.

140. VI. Jingling words thrown together, because of similar sound or meaning. **मारपीट**, Striking and thumping. **लड़िमड़**, Fighting. **पासपरोस**, Neighbour. **नामधास**, Name and residence.

In some of these words, the second has practically no meaning: it is simply added to jingle with the first. There are a great number of such words current in Hindi. Not infrequently, the second is a repetition of the first word, with and or a substituted for the first letter. auserwise, Breaking. Hishis, A crowd. A letter. auserwise, Breaking. Hishis, A crowd. A hat, or hats. And, tables and such things. auserwise, Clothes. I have heard the word natas, for the English "girder," iron beam.

This classification is neither exhaustive nor detailed, but may serve to indicate the line upon which the Compound Nouns are constructed and the place they take in Hindi. They are greatly used both in literature and in current speech. Indians have a peculiar relish for assonance and alliteration.

CHAPTER VI.

SYNTAX. वाक्यों की रचना.

AGREEMENT. ORDER OF WORDS. ORATIO DIRECTA. REPETITION.

AGREEMENT OF NOUN, ETC., WITH VERB.

141. To treat of the Syntax having reference to the Cases of Nouns alone is quite impracticable, as it is only when Nouns are brought into relation with Verbs and other Parts of Speech that any question of Syntax arises. Accordingly, in this chapter, some points will be brought forward which are as closely connected with the Verb and with other Parts of Speech as with Nouns. Furthermore, some matters may be touched on which do not properly belong to Syntax.

142. I. Agreement of Nominative and Verb.

a. Where there are two or more Nominatives, the Verb may agree with the nearest in Gender and Number.

हर्ष और आश्चर्य हुआ, Joy and astonishment arose. सब देवता और प्रजा अत्यन्त प्रसन्न हुई, All the gods and the subjects of the kingdom became greatly pleased. चार लड़के और तीन लड़कियाँ हुई, Four sons and three daughters were born. समा

masculine

स्रोर अनन्त जीवन और मुक्ति प्राप्त हो गयी, Forgiveness and eternal life and salvation were secured. मी पुत्र और एक कन्या होगी, A hundred sons and a daughter will be born. सभ्यता की उन्नति और मस्तिष्क की उन्नति साथ ही साथ होती है, The progress of civilization and the development of the

brain go together.

143. b. Or, the Verb may be in the plural, agreeing in Gender with the nearest Nominative, or being made

मेरे माता पिता भी रहते थे, I had a mother and father, i.e., My parents were living. हवा और पानी भी वहाँ विकते हैं, There even air and water are sold. मुन्दर (a man's name) और हीरा मालिन आते हैं, Sundar (m.) and Hira, the woman gardener, are coming along. एक वेटा और दो वेटी उत्पन्न हुए, One son and two daughters were born. एक पुरुष और एक स्त्री रचे गये, One man and one woman were created.

In the following sentence, although the two Nominatives are gathered together under the **सब**, yet the Verb is made to agree with the nearest Nominative in Gender: जितने मुनि और उनकी जितनी स्त्रियाँ यों सब उन्हें बहुत चाहती यों, As many saints and their wives as there were, they all loved them much.

c. In modern Hindi, the most usual course to take,

where there are two or more Nominatives, is to gather hem up into a **दोनों, तीनों, सब,** or some such word, and then use the masculine plural Verb.

मरे मन में एक बेर भय श्रीर विस्मय दोनों उत्पन्न हुए, Immediately fear and astonishment both sprang up in my mind. उनकी कोशिल्या, सुमिना श्रीर कैकेयी ये तीन रानियाँ थीं, He had three queens. Kaushilya, Sumitra and Kaikeyi. मुनि मनुष्य देवता श्रीर दैत्य सब तुम्हारी सेवा करते हैं, Sages, men. gods and demons, all serve thee. ऐसे अच्छे लड़के पाकर राजा और रानियाँ सब बहुत खुश हुए, Having obtained such good sons, the king and the queens were all very glad. धनी दिरद्र ऊँच नीच सभों ने ऐसा किया, Rich and poor, high and law, all did so.

d. Where there are two Nominatives, the second of which is more or less predicative of the first, the Verb agrees with the first in Gender.

धूल में मिल जाना एक सहज बात था,
To mingle with the dust was an easy matter. वह (f.)
भीष्म की मृत्यु का कारण हुई, She became the
cause of the death of Bhishma. यह बात द्रोण के
असन्तोष का कारण हुई, This became a cause
of discontent to Dron. उसी समय से आगरा नगर

मुग्ल सम्राटों की राजधानी गिनाजाने लगा,

From that time Agra began to be regarded as the capital of the Moghal Empire.

e. Sometimes, at the conclusion of a sentence, where the Verb requires a Nominative with $\overline{\mathbf{q}}$, this Nominative remains unexpressed, being understood from a Nominative without $\overline{\mathbf{q}}$ in an earlier part of the sentence.

कुछ लोग इकट्टे हुए और विचार कर यह ठहराया, Some people came together and, having thought over the matter resolved, that.....i.e., लोगों ने ठहराया. In the following sentence, the last Verb requires ने, but the वह of the earlier part of the sentence has to suffice. वह बहुत रोई बहुत सिर धुना बहुत विलाप किया, She wept much, beat her head violently and gave way to lamentation.

144. II. Accusative and Verb.

In most instances, no difficulty arises, as the Number and Gender of the Verb is regulated by the Nominative, not the Accusative: but with Transitive Verbs, in those Tenses which require the Nominative with \overline{A} , difficulties may arise.

(1) a. If there be only one Accusative, and that be used in the form without and, the Verb agrees with it

in Number and Gender. स्त्री ने ग्रपना घर छोड़ा, The woman left her house. उसने एक पुस्तक मोल ली, He bought a book. मैं ने तीन घोड़े भेज दिये, I sent three horses.

b. If there be two Accusatives, the verb is generally made to agree with the nearest in Number and Gender.

उसने वडा पराक्रम और वीरता दिखाई, He manifested great prowess and valour. आप के साथ कुटिलता और कपट करना उसने अब तक नहीं छोड़ा, He has not yet left off his crookedness and deceitful dealing with you.

(2) Where the Accusative form with $\overline{\mathbf{a}}$ is used, the Verb is always in the singular Nominative form. $\overline{\mathbf{a}}$ $\overline{\mathbf{a}}$ $\overline{\mathbf{a}}$ $\overline{\mathbf{a}}$ or $\overline{\mathbf{c}}$ $\overline{\mathbf{a}}$ $\overline{\mathbf{a}}$ or $\overline{\mathbf{c}}$ $\overline{\mathbf{a}}$ $\overline{\mathbf{a}}$ or $\overline{\mathbf{c}}$ $\overline{\mathbf{a}}$ $\overline{\mathbf{a}}$ $\overline{\mathbf{a}}$ or $\overline{\mathbf{c}}$ $\overline{\mathbf{c}}$ $\overline{\mathbf{a}}$ $\overline{\mathbf{c}}$ $\overline{\mathbf{c}}$

If there be more than one Accusative, the Verb is not in any way affected, but the form of the Accusatives may be. Generally, only the last is changed to the construct. form of the stem, the earlier Accusative remaining in the Nominative form. 347 अपने लड़के लड़कियों को बेड दिया, He forsook his hoys and girls.

(3) With the Accusative, as with the Nominative,

it is usual, when there are more than one, to gather them up into an inculsive **Ha**, or other appropriate word. This may assume the form with **an**, or remain without it.

In such construction, the Accusatives included are in the Nominative form, not the inflected. उसने काम क्रोध लोभ मोह मद और मत्सर इन छहों शबुओं के। जीत लिया है, These six enemies, lust, wrath, covetousness, infatuation, mad passion, envy, he has comquered इन्होंने राम के लिये माता पिता भाई स्त्री राज सुख स्त्रादि सभी कुछ छोड़ दिया, For the sake of Ram, they have forsaken everything, mother and father, brothers, wife, the pleasures of the royal court, and the rest. जीवन स्रोर नयन दोनों के। कृतार्थ करूँगा, I will satisfy both my life and my eyes.

(4). Where a second Accusative is predicative of the first, it does not affect the form of the Verb, that is regulated by the principal Accusative. The air in air in all particulars. The Goswami has made Bharat to be the very reflection of Rum in all particulars. The air in all particulars. The air in all particulars. The made Pataliputra, the capital of his wide empire.

145. III. The gender of Predicative Adjective or

When an Adjective or a Participle is used predica-

Participle after Accusative.

tively of Nouns in the Accusative, with an, it is generally made singular and masculine, irrespective of the Number and Gender of the Nouns, but not invariably so. Thus:— जिन बातों का मैं पहले अच्छा समभता या अब मुभे बुरी मालूम होती हैं, The things which I at first regarded as good now appear to me as bad. हम लोग इन तारों का आकाश में चमकता हुआ देखते हैं, We see these stars shining in the heavens. बाहुओं का तना हुआ रखकर, Having placed both the arms in an outstretched position.

But:—इस विषय की घटी के। पूरी करने के लिये,
To fill up the deficiency of this thing हम अपनी
आवश्यकताओं के। पूरी कर लेंगे, We shall satisfy
our needs. राजिंसह ने कुल की लाल पताका के।
कार्यसेच में खड़ी किया, Rajsinha again creeted the
red standard of his race in the field of active work.
उसने उन तीनों के। अपने सेवक बनाया, He made
the three of them his servants.

When the Accusative form without $\frac{1}{2}$ is used, the Adjective is generally made to agree with it in Gender and Number. $\frac{1}{2}$ $\frac{$

पक्की बना दिया है, Her mother has made her thoroughly well prepared.

146. IV. Nouns in the Oblique Cases and their Case signs.

a. When two or more co-ordinate Nouns, in Cases requiring the oblique form, occur, one Case sign generally suffices, and the earlier Nouns are kept in the Nominative form.

Ha gic wit asi a si h, In the minds of both great and small. Evel vis view of visit and small. Evel vis view of visit and hards of music and banners clarge and small). Fauf visuality the followers of one's own and other religions.

b. Very often the Nouns are gathered up into a

चित्त स्रोर ज्ञान दोनों का नाश हो जाता है,
The destruction of both mind and knowledge takes
place. ज्ञान तो उसने भली स्रोर दुरी दोनों
प्रकार की नीतियों का प्राप्त कर लिया,
He acquired a knowledge of both kinds of policy,—
good and had. लिखना पढ़ना कुश्ती लड़ना तीर

e. Not infrequently, however, the Case sign is repeated to give distributive force.

(Ram and Sugriva are entering into a covenant; Ram is to establish Sugriva as king: Sugriva is to go in search of Sita.) That the animal anima

meaning, a free translation is given to make the meaning clear). Those who do not deliver others from trouble and give them sound advice are their foes. The one who so acts is neither a true teacher nor a good kinsman, is not a good father or mother or god-like friend or husband.

उमने मीताहरण की ख्रीर रावण से अपने युद्ध की कथा कह सुनाई, He related the story of Sita's abduction and of his own fight with Ravan.

THE ORDER OF WORDS IN SENTENCES.

- 147. 1. The Nominative comes first, the Verb follows it. Generally speaking, the Verb is the last in a sentence. लड्का भाग गया, The boy fled.
- 2. The Accusative comes between the Nominative and the Verb. लड़का पुस्तक पढ़ रहा है, The boy is reading a book. So with an Accusative of place. लड़का घर गया, The boy has gone home.
- 3. Where there is a secondary Accusative, this follows the principal Accusative. राजा ने बलराम कें। चेनापति ठहराया, The king appointed Balram general.
- 4. A Dative generally comes before the accusative.

 1. The teacher gave the boy a book.
- 5. A second Noun, used predicatively, follows the first and comes before the Verb. रजवन्ती उसकी पत्नी है, Rajwanti is his wife. उसकी पत्नी रजवन्ती

- Rejwanti. There is, of course, a very great distinction between these two sentences. In the first, Rajwanti is referred to, what her status is; in the second, the subject considered is, Who did the man marry?
- 6. The Instrumental Case ordinarily comes immediately before the Accusative. राज पक्के मसाले में चौखट लगाता है, The mason is fixing the door-frame with mortar.
- 7. The Ablative holds a similar place in the sentence. वह अपने घर से यहाँ आया है, He has come from his house here.
- 8. The position of the Locative Case cannot be defined. The tendency is, perhaps, for the Locative with it to come early in the sentence, for that with ut to come late. It is only a tendency, the position will depend on the relation of the Nouns in the Locative Case to other Nouns in the sentence. 344 as aff it, There is nothing in this. ut grand.
- 9. As in English, an attributive Adjective is commonly placed before its Noun, when used predicatively, after it. दो लाल घोड़े बिक गये, Two roan horses were sold. रयामलाल का घोड़ा लाल है, Shyam Lal's horse is roan.

10. Relative and correlative. In English, the correlative often comes before the relative; in Hindi it is exactly the reverse. Eng. "The man will be punished who steals." The Hindi for this would be at att an will be punished. This matter cannot be enlarged on here, but it is one that should have the very careful attention of the student. It is one of those matters where it is very easy for a learner to get into the way of writing English-Hindi and not realising that it is so. Unfortunately, many a teacher would not point out a matter of this kind, for there is no absolute rule on the subject. In thoroughly good Hindi, the correlative does sometimes come before the relative.

Let us take one more sentence. "The man whose house is near mine is my brother." The Hindi of this is not as मनुष्य जिसका, etc., but जिसका घर मेरे घर के पास है वह मेरा भाई है.

- 11. This must suffice for the present in the way of rules about the order of words in a sentence. It must be clearly understood that the order indicated is only a "general instruction." There is no absolutely fixed order.
- 12. In some interrogatory sentences and under circumstances in which special stress is to be laid upon a word, the order of words in a sentence may be completely changed, even to the extent of placing a Verb before

its Nominative, e.g.. and actually is "Who will do it?" In actually do it?" In actually do it? In actually do it? In actually do the business.

Two or three illustrative sentences may be useful. वे गये ये छ: महीने रहने. He went with the idea of staying for six months. The idea conveyed is that he went off long before, or long after, he had intended: he intended to stay for six months, but only stayed for perhaps a few days. उनकी वही दशा होगी जो दशा साँप के सिर से उसकी मिण छीनने वाले की होती है. His condition will be that of the man who goes to take the jewel from a snake's head. करने याग्य तुम्हारे पक्ष में है कीन. Who on your side is sit todo it? The order of words suggests the answer, "No one." मेरे वराबर आज तक कोई राजा हुआ ही नहीं, Up to the present time there has been no king my equal. यदि आप का कोध न आवेगा ता फिर आवेगा कब. (Under such circumstances) if you don't get angry, then when will you?

Very frequent changes from the ordinary order of words occur, and often they are very forcible as regards their meaning. A considerable familiarity with Hindi, however, must be acquired before bold ventures are

made in this direction. Some changes of order may prove disastrous.

DIRECT AND INDIRECT NARRATION.

148. A matter of no little importance in the construction of Hindi sentences is the use of the Oratio directa. This is far more used in Hindi than in English. Where we should say, "He said he would come," the Hindi would be उसने कहा कि मैं ख्राऊँगा, He said that I will come, for, as we should print it, He said, "I will come." The fan takes the place of the inverted commas, the English quotation marks.

Take two Hindi sentences as illustrations: उसने उससे पूछा कि क्या बात है, He asked him, "What is the matter?" In English, we should generally say, "He asked what the matter was." Again, उसने अपने भाई से कह दिया कि भाई क्रोध का समय नहीं है. He said to his brother, "Brother, this is not a time for anger."

In reporting conversations or sending messages, it is necessary to exercise considerable care if misunderstanding is to be avoided. In reporting that we sent a servant yesterday to tell someone to come to-day, we might be tempted to say in Hindi, सेने कल मेवक का भेज दिया किसी से कहने के लिये कि श्राज श्रावे. This is English-Hindi, not Hindi. The

sentence should run something like this, कल मैं ने मेवक से कहा कि जाकर किसी से यह कह देना कि कल आओ.

At the present time, some modern Hindi writers have been so influenced by their English education that they are more inclined to use the *oratio obliqua* than was the case in days gone by. Again, some use the quotation marks instead of the **a**; some use both. A few writers have adopted the use of —. The following are from Hindi books:—

हनुमान जी कहने लगे— मातु मोहिं दीजे कक्कु चीन्हा

Hanuman said, "O mother, give me some token."

राजा ने कहा—"देखो दीवान," The king said, "Look here, Diwan."

The use of a is not confined to quotation; it is used also in narrative. Hi a salar and a

THE REPETITION OF WORDS.

149. This subject is connected with Idiom rather than with Syntax, but may be allowed a corner in this chapter.

this section to other Parts of Speech.

The repetition of a word—Noun, Adjective, Pronoun, Adverb, Participle or Verb—plays quite an important part in Hindi composition. The repetition of the Verb may be left for the present and reference only made in

It should be remembered that the matter now treated of is quite distinct from the doubling of words referred to in the section on Compound Nouns. Here we are speaking of the repetition of exactly the same word. This repetition has a force of considerable power. The force differs with different words, and in different sentences. The following rough classification and illustrations will perhaps sufficiently indicate the main principles of this idiomatic repetition of words.

150. I. Giving Distributive Force.

यदि प्रत्येक पीढ़ी के लिये पञ्चीस पञ्चीस वर्ष का समय रक्खा जाय, If 25 years be allowed for each generation. ध्रुवजी ने एक एक यस के शरीर में तीन तीन बाण मारे, Dhruva pierced the body of each Yaksh with three arrows. मी २ दा २ मी एक साथ होकर चली जातीं, They go off together a hundred and two hundred at a time. जा जा जाएगा सा सा पावेगा, Whoever goes will obtain. जहाँ २ कोई जाए वहाँ २ यह देखा जाएगा, Wherever any one may go, this will everywhere be seen.

घर २ में दस दस बारह बारह जन बीमार हो कर पड हैं, In every house, ten or twelve people are lying ill. an a Hit mit. They wandered about in forest after forest.

The following also belong to this group, but are limited in their scope owing to the words used :-

प्रान्त से

कहीं कहीं कुछ कुछ काई काई

इस देश के किसी २ In one or another province of this country.

Here and there. In some places.

To a small extent. A little

One here and there.

151. II. Giving Intensive Force

This includes exactitude, magnitude, multiplicity and the reverse of these. हरे २ पत्तों के योग से वह भी हरा मालूम होता है, From the proximity of the very green leaves that also appears to be green. बड र नगरों में, In very big cities. बोडा २ चाहिये, Just a rery little is needed. छोटे २ बच्चे यह कर सकते हैं, Little mites of children can do this. साथ २ चले जाते थे. They were going along sticking close together. They were going along sticking close together. वंट गया, It was all distributed. बाटिका के बीचर में, In the very middle of the garden. इस बात चान ठीक र नहीं होता, What is known concerning this matter is not exact knowledge. पास २, Very close. लँगड़ाते हुए वह धीरे २ चलने लगा, He went limping along very slowly.

152. III. Sometimes the sign of the Genitive, at, is inserted between the first and second writing of the word; sometimes is so written (or spoken.) These belong to Class II rather than to I.

सारे का सारा, सारा का सारा, The whole, the entire lot. कुछ का कुछ, Somewhat. समूह के समूह, Great quantities, e.g., पोधों के समूह के समूह देख कर, Having seen the great numbers of newly planted out trees. फुएड के फुएड, Whole herds. तोतों की पाँति की पाँति, Whole lines of parrots. घोड़ों को पाँतियाँ हो पाँतियाँ, Whole lines of horses. दुःख हो दुःख, Intense pain. धूल हो धूल, Dust, dust; completely reduced to dust. मन हो मन में, In his heart of hearts, i.e., his real thought or feeling. मांस या लहू का नाम हो नाम था। (Over her bones) there was just the bare name of flesh and blood.

CHAPTER VII.

THE ADJECTIVE.

153. For Adjective, the Hindi is **and an Junates** is also sometimes used; this word, however, is applicable to other Parts of Speech, besides the Adjective, meaning simply any word that predicates quality.

Many Adjectives have the masculine and feminine terminations and and are then inflected in accordance with the Nouns they agree with in Gender. Number and Case, with some modifications. Other Adjectives are not subject to any inflection, e.g., elever.

154. Class I. Adjectives subject to inflection.

These end in AT for the masculine, $\frac{2}{3}$ for the feminine, and are inflected in the same way as Nouns masc. of Class I and Nouns fem. of Class III, with this exception that 1. the Case sign is attached to the Noun only, not to the Adjective, and 2. the $\frac{2}{3}$ of the fem. remains unchanged throughout; thus we have $\frac{2}{3}$ and $\frac{2}{3}$ and $\frac{2}{3}$ and $\frac{2}{3}$ and $\frac{2}{3}$ and $\frac{2}{3}$ and $\frac{2}{3}$ are the book belonging to the good girls, not a $\frac{2}{3}$

The changes by inflection may be thus tabulated .-

Masc. Nom. Sing. अच्छा लड़का, a good boy.

,, Oblique Cases Sing. ∫ग्राच्छे लड़के to a good का, में, से, boy, etc., etc.

,, Nom. Pl. अन्वे लड़के, good boys.

" Oblique Cases Pl. अन्त्रे लड़कां, to good boys, का, में, में, etc., etc.

Fem. Nom. Sing. अच्छी लड़की व good girl.

" Oblique Cases Sing. (ग्रन्द्यी लड़की, to a good का, में, से, girl, etc., etc.

., Nom. Pl. अच्छी लड़िक्याँ good girls.

" Oblique Cases P. अन्द्री लड़िक्यों to good का, में, मे, girls, etc., etc.

Participles and the Nouns of Agency, formed from the inflected Infinitive by the addition of area and are, for all practical purposes, Adjectives, and are inflected in the same way as indicated above.

When these are used as Nouns, they are fully inflected. Thus चलनेवाले मनुष्यों के लिये, but चलनेवालों के लिये; so also with an Adjective used as a Noun. e.g., asi की समभ में यह क्या है, What is this in the estimation of the great?

Some Adjectives, ending in a consonant, possess a form for the fem., ending in \mathbf{x} , or \mathbf{z} , e.g.—

दुष्ट,	evil.	fem.	दुष्टा
प्रियतम,	beloved	1,	प्रियतमा
मुन्दर,	be autiful	,,	मुन्दरी
सुशील,	of a gracious	,,	मुशीला
	disposition.		

Such fem. forms are affected by some writers, but more generally the masc. form is used as a common gender and made to do service for both genders. Not infrequently, the form in the fem. ending in \(\frac{1}{2}\) is used as a fem. Noun.

155. Class II. Uninflected Adjectives. All other Adjectives may be regarded as not subject to inflection; such are —

उत्तम, excellent.

ग्रेष्ठ, supremely excellent.
दैनिक, daily.
कठिन, difficult.
वलवान, strong.
दूढ़, firm.

There are a few endings in vowels; in fa, as fa, as

ई becomes इस्मी for fem., e.g., अधिकारी, ruler; fem. अधिकारिसी; उपकारी, helper; fem. उपकारिसी.

156. Adjectival use of सा (सी, से), सरीखा and नामक

These cannot strictly be called suffixes, for a smuch as they are usually not joined to the words which precede them, yet they have very much in common with prefixes. They convert the words with which they are used with into Adjectives.

157. सा, सी, से. This सा with its fem. सी and plural से (this form being used also for the oblique Cases of the masc. sing.), is declined in the same way as Adjectives of two terminations, agreeing with the Noun which follows it, and which it qualifies, e.g., चित्र सी स्त्री, a picture-like woman, i.e., what we should call "like a statue," devoid of movement or other indications of life. The सी agrees in gender with the fem. स्त्री which follows it, not with the masc. चित्र, to which it is added. If the word qualified were सनुष्य, it would become चित्र सा सनुष्य, or pl. चित्र से सनुष्य.

A few illustrations are appended:

तुम सा मनुष्य इस काम के योग्य नहीं है, lit., A you-like man is not ft for this work, i.e., a man like

you. उसने अपने भाई के। अधमरा सा पडा पाया, He found his brother lying as it were half-dead: धुन्नाँ सा कुछ दिखाई देता है, Something like smoke appears. तस्वीरें मिट सी गयी थीं, The pictures became as though blotted out. सिस सी हाकर, (She) becoming angry-like, i.e., pretending to be angry. Etal हुई सी, (She) as it were laughing. आप से पवित्र, Holy as nou. देखने में तो ये झिचय से मालूम पडते हैं. In appearance they are like Kshatriyas. कुम्भकरण सा भाई, इन्द्रजीत सा पुत्र, A brother like Kumbhakaran, a son like Indrajit. The idiomatic use of the HT is slightly different in the following sentence: उसकी सी भभक कर उठ बैठी ख़ीर बौडही या भूत लगी सी आँखें फाड, Having started up like one suddenly aroused, she sat up and having opened her eyes wide like one mad or bewitched.

158. There is another use of **HI** which must be referred to. Dr. Kellog considers this to be derived from another root. In use it certainly differs somewhat from that already given, but there are also great similarities. It is to a large extent pleonastic, adding little or nothing to the meaning of the word to which it is added. Take two illustrations: **चाड़ी सी भूमि**, A little land. **वे** अपने साथ बहुत सी चीज़ें ले चले, They passed along.

force be added to the words **चाड़ी** and **बहुत**, it is of the nature of intensive force.

Occasionally, this **\(\mathbf{H} \)** has the meaning of "... ish" in English, e.g., **and \(\mathbf{H} \)**, blackish.

159. सरीवा (ई, ए). The form and force of this is practically the same as that of सा.

In the following two sentences the use differs slightly, approximating more to the Postposition:
के समान or की नाई. सब लोग कमल सरीखे खिल उठ, All the people blossomed out like lotuses.
वह तरे ही सरीखे मरेगा, He will die like you.

 नामक पुत्र हुए, A son named Mithi was born to Nimi, and to Mithi a son named Janak. बम्बई के पास बसई नामक गाँव, In a village called Basai near to Bombay.

Occasionally, the form नामी is found, with two different forms for the fem. नामी and नामा.

When नाम is used instead of नामक, it is generally

in the Genitive Case, whith an an ear to tion, A king of the name of Bhimsen. Heat an ear and ear and ear. A damsel of the name of Sundar. Alsan and the analysis and this word suggests a doubt as to whether it should be noticed under Adjectives. As an earn "form" or "shape," one might naturally expect that and would be an Adjective, meaning, form-possessing, and that animally expect t

which is like riches. प्रजारूपी पुत्रों का पालन करो,
Care for your subjects who are as sons. मन शरीररूपी

नगर का राजा है, Mind is the king of the body which is like a city.

Occasionally, a writer may be found using the words in the reverse way, e.g., अमृतस्पी उपदेश, where, apparently, the author's meaning is not, Nectar which is like good teaching, but, Good teaching which is like nectar, and should, therefore, according to the generally accepted idiom, be उपदेशस्पी अमृत.

In a recent book, by a very good writer, is the following: ज्ञान पुरुषह्रपी है श्रीर भक्ति स्त्रीह्रपी,
Knowledge is manlike and devotion womanlike.

162. Comparison of Adjectives.

No system of the Comparison of Adjectives exists in Hindi corresponding with that in use in English, but there are idioms by which the results of a comparison can be readily expressed.

A few Sanskrit Comparatives and Superlatives are imported ready-made into Hindi, e.g., aforat, more difficult: **धनिष्ठ**, most wealthy; **प्रियंतम**, most beloved; but these are stray words, and do not indicate any such system in Hindi.

The most general way of expressing the Comparative is by throwing the person or thing with which the comparison is made into the Ablative Case, with से, and using the simple Adjective. Thus पुरुष स्त्री से बलवान है, A man is stronger than a woman. यह घर उस से जैंचा है, This house is higher than that.

Other idioms also are current, e.g., by the use of açat, the Conjunctive Participle of açat, to go beyond. इस नगर में उस से açat काई जानी नहीं है, There is no more learned man in the city than he. By the use of अपेक्षा, उसकी अपेक्षा यह बड़ा है, This is greater than that, or, lit., In comparison with that this is great.

Perhaps the most common way of expressing the Superlative is by adding He to the Noun with which the comparison is made and converting it into the plural form, retaining the Ablative a, as with the Comparative. Thus Comparative. यह राजा उस राजा से बड़ा है, This king is greater than that. Superlative: यह राजा सब राजाओं से बड़ा है, This king is greater than all kings. This is not peculiarly satisfactory, as it is inexact; for it involves logically that he is no longer a king or that he is greater than himself. A more correct idiom is also employed: is used instead of it, thus, सब राजाओं में यह राजा बड़ा है, This king is among all kings the great one, i.e., the greatest. For fulness and exactness, the following is perhaps the best idiom of all: सब राजाओं में, उस राजा से कोई बड़ा नहीं है, Among all kings there is none greater than he; or Ha राजाओं में इस राजा के बराबर काई नहीं, Among all kings there is none his equal.

There are other ways of expressing something equivalent to the Superlative, e.g., by the use of such words as—

ग्रन्थे से ग्रन्था, Good than the good, i.e., best of all उत्तम से उत्तम, do......do. and all areas and all. श्रीधकाधिक, Most exceedingly.

बड़े से बड़े, Very great (pl.)

कारे से कारे, Very small (pl.)

Or, by the addition of an adverb before the, adjective. e.g., ऋति, ऋत्यन्त, बहुत, e.g., ऋति ऊँचा Very high. ऋत्यन्त ऊँचा, Exceedingly high. बहुत बड़ा, Very large.

CHAPTER VIII.

PRONOUNS 163. Pronoun. प्रष्वाचक सर्वनाम Personal Pronoun 1st person ("I") उत्तम पुरुष 2nd .. (" Thou ") (बह) अन्य पुरुष 3rd .. (He, she, it.) Remote (Demonstrative Pronoun.) प्रथम पुरुष Near Demonstrative Pro- निश्चयवाचक or संकेतवाचक सर्वनाम noun Indefinite Pronoun(कोई) स्निश्चयवाचक सर्वनाम Interrogative Pronoun(कोन) प्रश्नवाचक सर्वनाम Relative Pronoun (जो) संबन्धवाचक सर्वनाम Honorific Pronoun(स्राप) ख्रादरप्रदर्शक सर्वनाम Reflexive Pronoun(स्राप) निजवाचक सर्वनाम

164. Hindi has an advantage over English in possessing an Interrogative Pronoun, and a Relative, in whereas in English "who," has to answer for both. On the other hand, Hindi possesses no Personal Pronoun for the 3rd person. is simply "that tone" and has to do duty for he, she, it. In the same

way, यह, the Proximate Demonstrative Pronoun, corresponds with this man, this woman, this thing.

FIRST AND SECOND PERSONAL PRONOUNS.

165. में, I, and तू, Thou, are thus declined:
Singular.

Dative. To me. " " To thee. " " "
Instrumental. By me. मुभ से By thee तुभ से

Ablative. From me, ", From thee. ", "

Genitive. My, mine, मेरा, मेरी Thy, thine, तेरा, तेरी,

मेरे तेरे

Locative. In me, on me, etc. In thee, on thee, etc.

मुभ में, पर, etc. तुभ में, पर, etc.

Plural.

 Nom.
 हम, हमने
 तुम, तुमने

 Constr. Base.
 हम
 तम

Acc. हमें, हमका तुम्हें, तुमका

Abl. "
Gen. हमारा, री, रे तुम्हारा, री, रे

Loc. हम में, पर, etc. तुम में, पर, etc.

166. In the plural, there are some additional forms which are little used:

Nom. हमाने, तुम्होंने Acc. and Dat. हम्हों का, तुम्हों का

Instr. and Abl. हमें। में, तुम्हें। से Locative हम्हें। में, तुम्हें। में

167. The Constructive Base—When the Pronoun is in apposition with another word or loosely compounded with it, the Constructive base alone is used, the Case sign being appended to the second word.

मुभ कंगाल से क्या हो सकता है ? What can a poor wretch like me do ? मुभ अपने पुत्र के। निकालेंगे ? 'Will you turn me, your son, out? हम तीनां भाइयां के। उसने बुलाया, He called us three brothers.

Instances occur where the Genitive, instead of the Constructive base, is used in this way, निश्चय कोई हमारा सा दुखिया है, Verily there is some one as great a sufferer as I. हमारे ऐसे मन्द्रभाग्यों का, To those as ill-fated as we are. Even such forms as मेरे की, मेरे से, हमारे का are occasionally met with; but such forms should not be imitated,

Scholars differ as to which is the better form for the Nom. with ने when compounded with another word, e.g., मैं राजा ने यह आचा दी, or मुक्त राजा ने यह

आज्ञा दो, I, the king, gave this order. Opinion appears to be about equally divided.

Sometimes ξ is joined to this Constructive base. This is equivalent to the addition of ξ , giving stress to the Pronoun, but not quite as strong as the full ξ . Thus ξ the mini and ξ the fight ξ that even we had to take flight. ξ the mini ξ that even we had to take flight. ξ the blame will fall. ξ the fight ξ the blame will fall.

The Accusative and Dative.—The forms for the Accusative and Dative are identical. Whether there be any difference in the uses of the two forms, and what the difference be, if any exist, it is not easy to under-The forms without are used for the Accusative, but probably it will be found that there is a tendency to use these forms more for the Dative, and the forms with का for the Accusative. राजा ने तुम्हें ठहरने के लिये घर दिया , The king gave a house for you to stay in. वह तुम्हें पारिताषिक देगा , He will give you a reward. मुक्ते अनेक मित्रों से सहायता मिली, l have received help from many friends. हमें दु:ख भोगना पड़ेगा, We shall have to endure trouble. In the following, this form is used for the Acc. तुम्हें भी साथ बेते जाएंगे, They will go, taking you along with them.

169. The Genitive.—It will be noticed that for the Genitive, the Constructive base is somewhat changed; in the sing., it becomes \$\frac{1}{2}\$, \$\frac{1}{3}\$, in the plural \$\frac{1}{2}\$ in the sing., and to these bases are added \$\frac{1}{3}\$, \$\frac{1}{3}\$, \$\frac{1}{3}\$. Thus formed, the Genitives are inflected exactly the same as Adjectives of two terminations. They are, in fact, to all intents, Adjectives. It must be remembered that this termination as regards gender is regulated by the gender of the person or thing possessed, not by that of the possessor. It is \$\frac{1}{3}\$, \$My horse. It gender \$\frac{1}{3}\$, \$My book. The gender of horse and book determine the gender form of the other cases require no special notice.

Pronouns. A matter of special importance is the right use of the Pronouns in addressing persons, or in speaking and writing about them. It will be well to anticipate slightly and to consider here not only the use of the Ist and 2nd Personal Pronouns, but also the Demonstrative, so far as it has to do for the 3rd Personal Pronoun, and the Honorific Pronoun, ATT.

As regards the 1st Person, the Plural may be, and is, to no small extent, used for the singular. Thus, हमारी समभ में, In my judgment; हम जाएंगे, I will go; हम को चाहिये, I need it. There is an increasing ten

dency, however, among the more cultured and educated classes, to use the singular form in speaking about oneself, and it may be taken as an utterly safe rule to always use the singular in referring to oneself. Let it be recognized, at the same time, that the use of the forms **EH** and **EHIT** is not at all equivalent to the "we" in English used as the "plural of majesty," or the "editorial we." In past days, the plural forms were far more used for the singular than they are at present; and this accounts for the fact that in many places **CIT** is added to **EH**, to indicate the plural, where the context might not clearly shew whether the singular "I" or plural "we" were meant.

For the 2nd person, there are three Pronouns available, a, and, will will is really a 3rd person, necessitating the Verb in the 3rd plural, but is nevertheless greatly used in direct address for the 2nd person. In English, we have a similar idiom, but such uses are generally reserved for those persons who possess special dignity, "Your Majesty," "Your honour," "Your reverence;" whereas the will is used in Hindi for very ordinary people.

त् is very little used, and, when it is used, has often in it something bordering on contempt for the person so addressed. It may be wisely excluded from the foreigner's

working vocabulary. There is a use for the word far removed from that indicated above. A man may use it to his wife or child with as much kindliness and affection as a Quaker would use "thou," In Hindi, however, the use of the word is confined to those who are younger or in a more "protected" position than the speaker. It may sometimes be used to a servant, indicating a certain familiar relationship of the patriarchal type rather than contempt. A teacher may also use the word to his disciples, indicating something of the nature of paternal affection and care.

तुम and आप are the alternative words, in the discriminating use of which the foreigner may experience some difficulty. To adopt तुस, where आप is the appropriate word, is to be guilty of a great breach of etiquette; to use आप where तुम would be the right word, may be taken for sarcasm, even as, "Will you be graciously pleased to . . . " might be so taken, if addressed to your butcher or baker.

may be used to servants and to children and young people who would be addressed by their Christian names in English. It may also be used in speaking to workmen and petty shopkeepers. Among Indians of equal standing it may be used in familiar intercourse, in somewhat the same way that the "Mr." is dropped

among Englishmen where there is considerable familiarity. The foreigner will, however, need great care in venturing on the use of the **g** in this way. **XIV** may be regarded as the general Pronoun to use towards equals, towards those in a superior position and also to subordinates, with whose names we should retain the "Mr." in English. If in doubt, use **XIV**.

171. Pronouns to be used in addressing God. What Pronoun should be used in addressing God, or in referring to Him? Should it be आप and a with the Verb in the 3rd plural, or and as with the 2nd and 3rd singular? Hindi is only discussed here. a in Urdu is perfectly correct and needs no discussion.

In this paragraph, the writer uses "I," as he is fully aware that, on this important question, a considerable majority of missionaries differ from him. As regards the translation of the Bible, I regard it as perfectly sound to retain the singular. The attempt to discriminate between the adoption of and and and would continually be involving the translator in the responsibilities which belong to the commentator. A simple translation of the Pronouns for God and for all persons is the easy and safe course. When, however, the question arises of how to address God in prayer and worship, and how to write or speak concerning

God, it seems as appropriate to use and in direct address and a in writing or speaking, in Hindi, as it does to spell "Him" with a capital "H" in English. In my reading for many years, I have given particular attention to the matter; and the conclusion which I reached a long time since has been fully confirmed. The matter stands thus. Most missionaries, and, following them, the majority of Indian Christians, use तू. Some, however, of the well-read Indian Christians do not approve of this, and a few missionaries do not. By some Hindus, probably through education in Mission Schools, a has been adopted, but speaking generally of Hindus, the view is clearly that तू is very inappropriate, तुम is slipshod and lacking in reverence, आप and वे are the correct Pronouns to use. I have accepted and adopted this for many years, and to me तू and वह sound as grating as does "you" when used to God in prayer in English.

I could easily produce very many quotations to back up the statement made. I will satisfy myself with giving just some few. भगवान ग्राज क्या करनेवाले हैं! What is God about to do to-day! है परम दयाल परमेश्वर! ख्राप मेरी शुभ इच्छाख्रों को पूर्ण कीजिये, O most merciful God, fulfil my desires that are right.

हे परमेश्वर! आप प्रकाश रूप हैं, O God, Thou art the image of light. And on the same page, को जिये and दीजिये in address to God. हे प्रभु! ऐसी कृपा कीजिये, O Lord! Grant such grace. ईशवर क्या करेंगे, What will God do? ईश्वर से मैं प्रार्थना करता हूँ कि वे सब को तुम्हारे ही सदूश बेटा दें, I pray God that He may give to all a son like you. I note in one book: हे ईप्रवर! तुम अपने नाम को कलङ्कित न करो, O God, do not bring any stigma upon your name; but on the same page, उसकी रहा भगवान करते हैं, God protects him. And a few pages away, अन्तर्यामी भगवान आप के पवित्र हृदय का भाव नहीं समभते हैं, Does not the heart-knowing God understand the disposition of your holy heart? Exac ते। सब का विचार करते ही हैं, Verily God thinks of all.

In one book, in which the plural is elsewhere used, we meet in one place with the singular, ईश्वर उसका रक्षक है, God is his protector.

I give one more quotation from a writer on Hindi composition. Having stated that आप is for great respect, तुम to indicate equality or relationship and familiarity, तू to indicate disrespect, he proceeds: कहीं तू को भी बराबरवाले श्रीर छोटे लोगों के लिये

बोलते हैं, कहीं कहीं भक्त लोग ईप्रवर के लिये भी तू कहते हैं, जैसे :—

हे ईश्वर ! आप हमारी रक्षा करो ; हे नीच ! तू क्या करता है, चन्द, तुम कहाँ जाओंगे.

Here and there people use "tu" for equals also and for the little folk; here and there devotees use "tu" for God also, e.g.—

"Oh God! protect us." "What are you up to, you scoundrel?" "Chanda, where will you go?"

Whether it is a misprint, or whether a slip on the part of the writer, is not clear, but **ATU** should certainly have **an square**, not. **art**. Occasionally, such loose writing is met with: but one would not expect it in a book on Composition.

172. Omission of Pronoun.

The Pronoun is sometimes unexpressed. In Hindi, this is in many cases quite safe, as the form of the Verb in many of the Tenses indicates the Gender and Number of the subject. Take the following examples: दो तीन मील चलकर एक भील के किनारे पहुँचे, Having gone two or three miles, (we) arrived at a piece of water. इस पहाड़ी को पारकर जब दूसरी और पहुँचे, Having reached the other side of this hill, when (we) reached the other side. कहा जिस काम को गये थे

उस का क्या किया, Say, what did (you) do about the work (you) went (to do)? प्रच्छा, तब राजिसंह को ही मन्त्री बनाऊँगा, Very well then (1) will make Rajsinha minister. कहो तो मैं जाऊँगा, If (you) will speak the word, I will go.

DEMONSTRATIVE PRONOUNS AND 3RD PERSONAL PRONOUN.

173. In Hindi, there is no Personal Pronoun for the 3rd person, but the two Demonstrative Pronouns, near and remote, quite efficiently supply the place. That these Demonstrative Pronouns (**u** and a and a

These two Demonstrative Pronouns not only render service as Personal Pronouns, but also as Correlatives.

Proximate.

Remote.

Singular.

Nominative. यह (यह, यही, वह (वुह, वही) यही)

... इसने उसने

Proximate Remote. उस (उसी) Constr. base. इस (इसी) इसको, इसे, यह उसको, उसे, वह Accus. इस को. इसे उसको. उसे Dat. Instr. & Abl. इससे उससे उसका, की, के इसका, की, के Gen. उसमें. पर इसमें. पर Loc. Plural. वे. उन्होंने Nominative. ये, इन्होंने उन. उन्हों Constr. base. इन. इन्हों Acc. & Dat. इन्हों का, इन्हें उन्हों को. उनको इनको Instr. & Abl. इन्हों से, इनसे उन्हों से, उनसे इन्हों का, की, के उन्हों का, की, के Gen. इन का, की, के उनका, की, के इन्हों में, पर, or उन्हों में, पर, or उन Loc. में. पर इन में. पर

This addition of $\frac{1}{2}$ may be added to all the Cases in the sing., except the $\frac{1}{2}$, $\frac{1}{3}$ forms of Acc. and Dat. It corresponds with the $\frac{1}{6}$ in the plural. It may indicate a measure of emphasis, but not necessarily so. The additional $\frac{1}{6}$ in the plural is more commonly used in some of the Cases than in others, e.g., it is

much preferred in the Nom, with a The form उनने is practically not used.

Such forms as इन्हों, इन्हों लोगों ने, are also met with; these must be regarded as the addition of the emphatic ही to इन।

When these Pronouns are used with Adjectival force before another word, in a Case requiring the oblique form, the Constr. base is used, but not the Case ending, that is added to the later word, e.g., उस मनुष्य ने कहा, That man said. इस पुस्तक का दाम, The price of this book. उन मनुष्यों ने कहा, Those men said. इन पुस्तकों का दाम, The price of these books.

174. Use of Singular and Plural. When used as Personal Pronouns, ये and वे may be substituted for यह and वह as honorific, and the Verb will then be in the Plural, e.g., of a king, ये अब आये हैं, He has now come; of a rishi, वे कल जाएंगे, He will go to-morrow.

On the other hand, in the Nominative, the singular forms us and us are sometimes found with a plural meaning, this being indicated by the plural form of the Verb being used. This is due to the influence of Urdu, in which this idiomatic (and sometimes catchy) use of use and use greatly prevails. In Hindi, this idiom is of quite recent times, and is by no means generally accept-

ed. It is just a trick of fashion and serves no useful purpose.

175. Idiomatic uses of यह and वह.

यह and वह, as this and that, are used in reference to a very wide range of subjects, यह referring to the present, or historic present, वह to the past. They may refer not only to a person or thing, but to an incident, a whole group of circumstances or a logical argument, also to time, e.y., उसके अनन्तर, After that. इसके बाद, After this. इससे यह मालूम होगा, From this it will be evident.

In reporting conversations and incidents, $\mathbf{z}_{\mathbf{z}}$ and $\mathbf{z}_{\mathbf{z}}$ are conveniently used for two persons or things, as "one," "another," or "the other," in English. When so used, the terms "proximate" and "remote" largely lose their significance. It is by no means uncommon to find that a person referred to early in a paragraph as $\mathbf{z}_{\mathbf{z}}$ is referred to later on as $\mathbf{z}_{\mathbf{z}}$, in a biography, we have the father's name given, then \mathbf{z} and \mathbf

It has already been mentioned that these Pronouns are much used in the Const. base form, before other words with Adjectival force. यह मनुष्य, वह मनुष्य, this man, that man. इन दिनों, उन दिनों, In these days, in those days.

176. Honorific and Reflexive Pronouns.

These two must be very carefully distinguished. Exactly the same in form, one is a Pronoun of respect used in speaking to, or of, a person; the other is merely a reflexive, applicable to all three persons, corresponding to the English "self" or "own." मैं आप, I myself. तुम आप जानते हो, You yourself know. अपनी पुस्तक लेते आओ, Come, bringing your own book.

177. The Honorific **ATT**. This has already been referred to in Sect. 170, In construction, it is 3rd person, and necessitates the Verb in the plural, but is used for a single individual person, being either addressed to him, or referring to him. It corresponds, in use, with "your honour" in English, as regards grammatical form, but not in meaning, as it is far more generally used.

The word is subject to no inflectional changes. The plural is expressed by the addition of नाग; e.g., आप नागों ने सुना होगा, You people will have heard.

It is used in all the Cases, the word itself remaining unchanged, but taking the Case signs. आप का कहना ठीक है, What you say is correct. आप का मिलेगा, You will get it. आप लोगों के बीच, Among you.

The principal use of आप is in direct address, but it is used, in referring to the same person, to a third person (present) or to another person not present. Thus, while at all times, in form and construction, it is a 3rd person, it is used for both 2nd and 3rd persons. आप का कहना, would more commonly mean, What you say, but it also may mean, What he says. एक बार महाराजा ने आप को बुलवा भेजा, may either mean, The Maharaja on one occasion sent to call you, or, to call him. In the following, आप is used for the 3rd person, आप का जन्म संo १९०६ में हुआ था, He was born in 1706 (i.e., A. D. 1763). लोग आप का विशेष आदर करते हैं, People render special honour to him.

As already stated, the principal use of situation in direct address, but this second use, for the 3rd person, must not be overlooked. In modern Hindi, this second use is more general than it was.

आप, in direct address, is occasionally found with the second person of the Verb. आप करो, Please do (this), This is careless writing and not grammaticially defensible.

178. The Reflexive आप.

The consideration of this Pronoun raises some difficulties, both as regards its forms and its uses.

Nom. आप, अपने आप.

,, श्रापने, or श्राप alone after the subject, with ने.

Acc. and Dat. अपने का, अपने तई, अपने आप का.

Instr. and Abl. अपने से, अपने आप से.

Gen. अपना, अपनी, अपने, occasionally

Loc. अपने में, पर; अपने आप में, पर.

In both forms of the Nom., that with, and that without, $\hat{\mathbf{a}}$, it generally follows the true subject of the sentence, much the same as in English we have, "He himself went." Thus, राजा आप दृतां से पूँचने

लगे, The king began to question the messengers himself; or, राजा ने आप देखा, The king himself saw.

The form, अपने आप, is not much used in the Nom. In the following sentence, अपने आप has probably more affinity with the Iustrumental or Ablative Case than with the Nominative: संसार की अद्भुत रचना अपने आप स्वयं हो गई है, The marvellous order (lit. make) of the universe has come about of itself.

Both अपने आप and अपने, with the Case signs, are used in the Oblique Cases. We have अपने आप की भूलना, To forget oneself. राजपूत वीर अपने आप की भूल गये The Rajput warriors forgot themselves, i.e., were so engrossed in fighting as to lose all concern about their own safety. उसे अपने आप से बाहर कर रखा था, He had driven him crazy. Lit., Had placed him outside of himself. वह उन्हें अपने में खेंच लेता है, It draws them into itself. दोनों राजकुमार अपने से बड़े लोगों का आदर करते थे, The two princes rendered honour to those who were greater than themselves.

आप से आप means "spontaneously." अपने आप may be similarly used. Thus, यह बाजा अपने आप बज रहा है, This instrument is playing of itself. Connected with this Pronoun is the word आपस, mutual. आपस की फूट देख कर, Having seen that they were quarrelling among themselves. वे आपस में बहुत प्रेम रखते थे, They loved each other very much आपस की सन्धि उन्हों ने तोड़ डाली, They broke the treaty that had existed between them.

179. The Genitive अपना. This अपना may, in all respects, be treated as an Adjective of two terminations, agreeing in Gender and Number with the Noun which it qualifies. It must be remembered that it has no connection whatever with the Gender and Number of the subject. लड़की अपने भाइयों के। बुला रही है, The girl is calling her brothers. लड़का अपनी बहिनों के। बुला रहा है, The boy is calling his sisters.

ज्ञपना is used with all three persons, and generally refers to the subject of the main Verb in the sentence, उन्होंने ज्ञपने नौकरों के। भेज दिया, They sent their own servants. This sentence remains the same, whether उन्होंने refers to a masc. or fem. "they," and the latter part of the sentence would remain the same if "he," "she" or "it" took the place of "they." If the servants belonging to some other person be intended, then some other Pronoun. or Noun, must replace the ञ्रपना, e.g., if A sent the servants of B, then the sentence

must run. उस (i.e., A) ने उस (i.e., B) के नौकरों के। भेज दिया, A sent B's servants, or उसने मेरे नौकरों के। भेज दिया, He sent my servants.

belong to a secondary Verb. उसने उनका अपने लड़कां के। साथ लेकर आते हुए देखा, He saw them coming along bringing their children with them. Here the अपने refers not to the main Verb of the sentence, but to the subject of the participial form of लेते आना. In the following sentence, although as regards construction, the अपनी might refer to कामिनी मोहन, it does not but to the subject of the main Verb. The man was not staring at himself, but at the Pundit. परिडत ने कामिनी मोहन का अपनी और निरासा भरी डीठ से बार बार ताकते देख कर कहा, Having seen Kamini Mohan looking towards him again and again with a look full of despair, the Pundit said.

Note also such sentences as the following: जब मज़दूरों के। अपना वेतन कम मालूम होता है। When their wages appear to the workmen to be too little इसे अपनी भी सुध नहीं है, He takes no thought o himself. हार जीत अपने हाथ में नहीं है, Defeat an victory are not in one's own power (lit. hand.) जब रात की राजा महलों में आये तब रानी की अपनी जगा

न पाया, When the king, at night, came into the chambers, he did not find the queen in her own place. Here the अपनी has no Verb to the subject to which it refers, but the meaning is quite evident. So, in the following, हम राजा का अपनी करनी का फल चखावेंगे, We will make the king taste the fruit of his own doings. These instances, and many more of a similar character, do not, however, diminish the general value of the rule given about the अपना referring to the subject of the main Verb.

180. निज. Occasionally, निज is added to स्रपना to strengthen it, giving to it something like the force of the English "one's very own." स्रपने निज देश में पहुँचते ही उसे बहुत स्नानन्द हुस्ना, On arriving in his own country he experienced great joy.

Sometimes निज is used without ग्रापना, e.g., वह मेरी निज की है, She is my very own. वे ग्राप के निज के लोग हैं, They are your very own people.

181. पराया. This word is an Adjective, not a Pronoun; but its right to mention in this chapter is quite as strong as that of अपना, and its consideration here is quite as appropriate. As अपना means one's own, so utian stands for another's. It is declined as an Adjective of two terminations. utifular it जिसका कलेजा

नहीं कसकता, He whose heart does not suffer at the pain of another. एक न एक दिन तो पराये घर जाना ही है, One of these days she will have to go to the house of another. पराये हाथ से, By the hand of another. (If it were "another hand," the Hindi would be दूसरे हाथ से). िकसी का अपना पराया न पड़ा था, No one recognized what was his own, what another's.

Occasionally, a writer is found using an additional Genitive sign. (It must be remembered that **पराया** is already a Genitive "of another"). Thus **पराय** की हिंसा अथवा निन्दा नहीं करते, They do not injure or abuse another. This is incorrect, unless the meaning of the writer be (which is quite possible) that they do not injure or abuse the people of another person's household. That would then equal **पराये घर के किसी की हिंसा**, etc.

RELATIVE, INTERROGATIVE AND CORRELATIVE PRONOUNS.

182. It may be well here to call attention to the fact that related groups of Pronouns, Pronominal Adjectives and Adverbs are characterized by initial letters which mark them off with considerable distinctness.
indicates Relative;
both Indefinite and Interrogative;

a or a kindred vowel, Proximate Demonstrative; a or a kindred vowel, Remote Demonstrative.

According to the Paradigms printed in some Grammars, a might be taken as indicative of the Correlative; but all the paradigms must not be taken too seriously. Many of such forms are added to adorn the pages of the Grammer, but may be seldom met with in the pages of literature. The Demonstrative Pronoun and kindred words largely discharge the duties of Correlatives.

As Relatives under ज, may be noted जो, जितना, जब, जैसा, जहाँ. .. Indefinite काई, कुछ, कितना, कई, कहीं. कौन, क्या, कितना, ,, Interrogative कैसा, कहीं, कब. " Prox. Dem-यह, इतना, ऐसा. यहाँ, यहीं, ख्रब. onstr. वह, उतना, वैसा. .. Remote Dem-वहाँ, वहीं. onstr.

It is interesting to note that we find characteristic initial letters for similar groups of words in English. Thus, for Demonstrative "th," as in the, this, these, those, them, then, there, thence, thither. For Interro-

gative "wh," who? what? whose? where? whence? when? why?

RELATIVE AND INTERROGATIVE PRONOUNS.

183. Relative. Interrogative.

Nom. si, who, which and, who?

जिस ने किस ने

Const. Base. जिस किस

Acc. जो, जिसे, जिस की (कै।न), किसे,

किस के।

Dat. जिसे, जिस के। किसे, किस के।

Instr. Abl. जिस से किस से

Gen. जिस का, के, की किस का, के, की,

Loc. जिस में, etc. किस में, etc.

Plural.

Nom. जी कौन.

जिन्हों ने, जिनने किन्हें। ने.

Const. Base. जिन, जिन्हें। किन.

Acc. & Dat. जिन्हें, जिन केा, किन्हें, किन केा,

जिन्हें। के। किन्हें। के।

Instr. Abl. जिन्हें। से किन से, किन्हें। से.

Gen. जिन का, जिन्हों किन का, किन्हों का, के, की का, के, की

Loc. जिन में, जिन्हें। में किन में, किन्हें। में.

The plural forms of कान are little used.

184. The Relative.

It has already been pointed out that, whereas in English the Correlative comes first, followed more or less closely by the Relative, in Hindi the Relative usually holds the first place, the Correlative coming later and in a separate sentence. Eng. He who has been to a place knows what can be obtained there. Hindi. I कहीं गया है। वहीं जानता है कि वहाँ क्या मिल सकता है.

The Relative Pronoun जो must not be confused with जो used as a Conjunction, e.g.. जो आवें तब मालूम होगा, If they come, it will be known; but जो आवें सा जानें, They who come will know. The Conjunction जो is often followed by तो or तब.

185. The Correlative. The one true Correlative is **दो**, e.g., जो जानता से कहे, Let the man who knows speak. Usually, the Correlative is a Demonstrative Pronoun. जो जानता है वही कहे, Who knows let him speak.

Occasionally, a Correlative is altogether wanting. It wanting are some all the state of the stat

In some Grammars is given a full paradigm of the various Cases of **\(\frac{1}{41}\)**, singular and plural; the stem of the sing. being **(\hat{A}\)** and of the pl. **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**. As regards modern Hindi, such paradigms are largely fictitious. In old Hindi, however, and in poetry, forms moulded on these or similar stems occur, c.g., for Rel. and Correl. in Acc. sing., we have in the Ramayan, **(\hat{A}\)**; for the Gen. **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, and Acc. pl. **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, and Acc. pl. **(\hat{A}\)**, **(\hat{A}\), (\hat{A}**), **(\hat{A}\)**, **(\hat{A}\), (\hat{A}**), **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{A}\)**, **(\hat{**

186. The Interrogative. The various forms given in the paradigm are, by analogy, probably correct; but some of them may be looked for in vain in modern literature. For the Nom. pl., the sing, is sometimes repeated, and analogy. This carries something of a distributive force as well as being for the plural. Some of the other pl. forms are also current.

कान may be used alone as a Personal Pronoun, with the meaning, Who?, or it may be used in conjunction with a Noun, कीन मनुष्य ऐसा करता है, What man does so? कीन कीन मनुष्य ऐसा करते हैं, What men do so?

कौन सा means, What sort of ? e. g., यह कौन सी स्त्री है, What sort of a woman is this ? इस पर्वत की कौन २ सी शाभा का मैं उल्लेख करूँ, Of which kind of the splendours of this mountain shall I write?

The Nom. form of कैन is sometimes found for Oblique Cases e.g., कैन कैन कारणों से, From what causes? कैन काम करने ग्रीर कैन न करने योग्य है, Which work is fit to be done and which is not?

Besides the purely interrogative use of this Pronoun, it is sometimes found carrying the meaning of a loose Relative Pronoun (with or without a Correlative). The number of the people he has gone, this no man knows.

187. The Interrogative क्या. This indeclinable word should be considered in connection with कान, as the uses of the two words overlap one another. The distinction between the two words is sometimes said to be that कान is appropriate for persons, क्या for things (and animals.). This is largely true, but does not appear to reach the essential difference in the use of the two words. The real distinction seems to be that कान individualizes, क्या is more indefinite and groups things, e. g., कान आया है, Who has come? यह कोन प्रतक

है, What book is this ? यह क्या पुस्तक है rather suggests, What class of literature does this book belong to? What is it about? कीन काम वह करे ग्रीर कीन यह, What work shall that man do and what this? But व क्या काम कर रहे हैं, What work are they doing?

Sometimes क्या is very vague. हम क्या कर, What can we do? At times, it is more of an exclamation than an interrogation. क्या खब, How good! Now and again, it conveys a relative force. वह क्या करेगा काई नहीं जानता, What he will do no one knows. Sometimes, in writing, it simply expresses what would be done by a tone in speaking, or by the "?," in English. In printing, simply व आवंग, would not necessarily mean a statement or a question: it might mean either. If the context does not indicate which should be understood and a question be intended, then the sentence should be क्या वे आवंग, Will they come? At the present time, it might often appear as वे आवंग.

The occasional use of such phrases as ani का,

काहे वास्ते, Wherefore? are certainly not classical.
They do not come within the range of Grammar.

188. The Indefinite Pronouns काई and कुछ.

The Indefinite Pronoun कार्द is thus declined :--

Nom. केाई, किसी ने

Cons. base. fati

Accus. & Dat. किसी के।

Instr. & Abl. fatl t

Gen. किसी का, की, के

Loc. किसी में, पर

This Pronoun has no plural form. To express the pl. कोई is sometimes doubled. कोई कोई मनुष्य स्त्रीशिक्षा के प्रतिकृत हैं, Some men are opposed to female education. यूरोप के कोई कोई विद्वान कहते हैं, Some of the learned men of Europe say. In this pl. use of the word, there is no small distributive force.

Somewhat similar in sound and use is कई or कई एक, Several.

Very frequently two काई's are used in following clauses, meaning, "one"......" another." काई अपने देश में रहे, काई परदेश चले, One may remain in his own country, one may go to another country.

Sometimes the two काई's are used in the same

sentence without a plural meaning, but distinctly distributive, उस पर किसी किसी सखी का मुँह कुछ कुछ लटक गया, Whereupon the face of this or that one of her companions began to droop somewhat.

Somewhat similar is the use of the two anta's, with in between. The meaning is then, exactly, if not one. then another. anta anta anta anta anta anta other will do it.

कोई followed by a negative equals the Eng. no one. किसी ने उसके। नहीं देखा, No one saw him.

189. The Indefinite कुछ.

generally, a small part; as an Adverb, partly. Although principally applied to a part of a mass of material, it may also be applied to parts of masses of men in both cases signifies some part of the whole. (cf. the Eng. "the one part were Sadducees," "of the Pharisees' part," Acts 23:6,9.)

उसका भी कुछ देना चाहिये, Give some to him also. कुछ मनुष्य स्वीकार करना चाहते थे, कुछ विरोधी थे, A part of the men desired to accept (the terms), a part was averse (to doing so).

The following uses may be noted: कुछ नहीं, nothing. कुछ भी नहीं, nothing whatever. कुछ कुछ, a very little. कुछ न कुछ, a very little, or, something or other.

COMPOUND PRONOUNS.

190. Two Pronouns used together, or one closely connected with some other Part of Speech, often yield very idiomatic and useful meanings. A few such combinations are appended.

जो कोई Whoever. In the Oblique, जिस किसी का, etc.

जा कुछ Whatever.

श्रीर काई Another (Additional).

काई ग्रीर ... (Somewhat adversa-

tive).

Similarly, with श्रीर कुछ and कुछ श्रीर

सब केाई All.

हर केर्डि Each one. Every one.

सब कुछ The whole. बहुत कुछ, A great

amount of.

काई दो चार Some few. (lit., some two or four.)

CHAPTER IX.

PRONOMINAL ADJECTIVES.

191. Pronominal Adjectives of Quantity. परिमाणवाचक.

Pronominal Adjectives of Quality. सादूर्थवाचक.

The Pronominal Adjectives are, as the name signifies, Adjectives formed from the Pronouns. In many instances, they are used alone, with a Noun understood; in such cases, they are declined as Nouns, otherwise as Adjectives of two terminations. In not a few instances, these words are distinctly Adverbial in their use.

The first series of these Pronominal Adjectives indicate Quantity or Number, the second Quality. Their initial letters are characteristic of their meaning, in the same way as those of Pronouns, referred to in section 182.

192. Quantity or Quality.

Number:

Proximate De- इतना This much, or ऐसा This-like. monstrative this number.

Remote De- उतना That much, or वैशा That-like. monstrative. that number.

Correlative. तितना So much, or तैसा Such-like. so many.

Generally supplied by उतना and वैसा).
Interrogative. कितना How much? or कैसा What-like?
How many?

(fanniand at have sometimes a loose Relative meaning).
193. Pronominal Adjectives of Quantity or Number.

When Quantity (How much), is referred to, the singular generally suffices: for Number, the plural form is necessarily required.

आप इतना डरते क्यों हैं? Why do you fear so much! 3 मे कितना मिला? How much did he obtain? क्या! दिन भर ऐसा परिश्रम किया और अब इतना देते हो, What! I've laboured so the whole day, and now you give me just this much. जितना मिला उतना लेकर जास्रो. Take what you have received, and go. जिसका जितना भाग्य होता है, फल भी उसे उतना ही मिलता E. Just what measure is written in the fortune of any one, that measure of fruit he obtains. fand पर मिला? How much did you obtain it for? जितने योधा ये उतनें। के। हार खाकर अपने अपने देश लौटना पडा, All the warriors there were being defeated had to return, each one to his own country. कितनी पुस्तक होंगी, How many books do you suppose there are? केवल इतनी. Only so many.

In colloquial speech, fand is occasionally contracted into a, and जितने into जै, e.g., के दिन हुए, How many days have elapsed? जै दिन वे रहे, उतने दिन सुख आनन्द से बीते, The days they remained there passed in great comfort and happiness.

The Adverbial use of these Pronominal Adjectives will be referred to in the Chapter on the Adverbs.

194. Pronominal Adjectives of Quality. The Hindiname, Highly, like to, correctly describes the general scope of the meaning of this second class of Pronominal Adjectives. The Hindinamia Adjectives of this second class of Pronominal Adjectives. The Hindinamia of this second class of Pronominal Adjectives. The Hindinamia of the What sort of a man is he? When the idea of manner or method is more prominent than that of resemblance, the words are more strictly Adverbs. Probably in more than half the occurrences of these words they are Adverbs, e. g., The Hindinamia of the Hindinamia of

The following sentence affords a good illustration: जा बात मैंने जैसी देखी है वैसी ही कहूँगा,

I will tell the matter just as I saw it. That the words
जैसी and वैसी are Adjectives, is indicated by the fact
that they agree in Gender with बात. Had the words
been Adverbs, they would have appeared as जैसे and वैसे

जैसा वह, वैसा उसका भाई, बरन उसके घर के जितने हैं वे सब के सब वैसे ही हैं, His brother is just like him, in fact, every member of his household is like him. जैसे बानी, वैसे भरनी, As is the sowing, so is the gathering. यह कैसा घोड़ा है, What sort of a horse is this? This sentence might also mean, What a fine horse!

ऐसें पर द्या न करनी चाहिये, It is not fitting to shew mercy to such (men).

The following sentences present special, but not uncommon, idiomatic uses of these words:—

or जनक जैसे महात्मा के घर हुआ, That her birth) took place in the house of such a mahatma as Janak. वे जैसे के तैसे तीन साल तक रक्खे रहे, They (the notes for a book) were laid aside just as they were for three years. सञ्चाटा फिर जैसे का तैसा हुआ, There became again just such a silence (as there was before). ऐसी वेसी बातों में दिल बहलाता है, He diverts his mind in such things. भगवन्तिया ऐसी वेसी स्त्री नहीं

यो , Bhagawantiya was no common-place woman. तुम्हारे ऐसा मिच , Such a friend as you.

195. Other Pronominal Adjectives. A few other words may be given which may be regarded as Pronominal Adjectives, though, strictly speaking, the "Pronominal" should be omitted.

एक ... एक cf. Eng. One says (one thing), one

एक ... दूसराOne says (this), another (that).

श्रीर ... श्रीर यह ते। श्रीर वह श्रीर, This is one thing, that is another.

A certain one. About equivalent to "such and such an one."

अनेक Several. Lit., "more than one."

प्रत्येक All, with distributive force, each one, one by one.

कई, कई एक Several.

बहुत , बहुत Many. So also बहुतेरे,

सब के सब All. "The whole lot."

सकल, समस्त All. With a collective force.

The whole. Used also in the plural,

सारे

समूचा The whole (of a thing, in the sense of unbroken, undivided).

श्रादि, श्रादिक And the other, the rest.

इत्यादि Ditto, etc.

CHAPTER X.

THE VERB.

Tense. **काल** (**काल** means "time.") There are no "Moods" in Hindi Grammar. Generally, any part of a Verb is referred to as such and such a **किया** (Verb), not such and such a **काल** (Tense).

Stem. For this, **sig** or **to** is commonly given. Hindi Grammarians have been very loose in dealing with this matter. They very often use these words to signify the form of the word, when the **t** termination of the Infinitive has been cut off. This is, however, not the "root" of the Verb, but only the "stem." Thus for

"stem," there is no suitable equivalent in use. The words used, **ung** and **ung**, should be retained for their true meaning, viz., Etymological root.

Infinitive.

(खाना, to eat) क्रियार्थक संज्ञा, i.e., A Noun which gives a Verbal meaning.

Imperfect Participle. (खाता or खाता हुआ, eating.) क्रियाद्योतक संज्ञा, i.e., A Noun (or Adjective) which displays a Verbal idea.

Perfect Participle.

(खाया or खाया हुआ, having eaten, or having been eaten.)

कर्मवाचक संज्ञा, i.e.. A Noun (or Adjective), indicating the idea of the Passive Verb.

Some confusion exists with reference to the name and function, or functions, of this Participle. Some would give two names, and are a part and are a part, the 1st for the Past Part. of Intransitive Verbs, which have often an Active meaning, and the 2nd for the Past Part. of Transitive Verbs, which have frequently a Passive meaning. Note the possible difference between are gar and and are gar or frag for the first is Active, the second frequently Passive.

Conjunctive Participle.

(खाकर, etc., Having eaten) पूर्वकालिक, Indicating that which is past or completed.

Noun of Agency.

(खानेवाला, An eater) कर्तृवाचक संज्ञा, The Noun indicating the doer.

Contingent Future.

(बाए, He may eat) सम्भान्य भविष्यत्, That which may possibly happen. A Contingent Future.

Absolute Future.

(खाएगा, He will eat) सामान्य भविष्यत्, Ordinary Future.

Imperative.

(खा, Eat) विधि, Injunction, command.

Indefinite Imperfect.

(**बाता**, he eats) No general Hindi equivalent

Indefinite Perfect.

(खाया, he ate) सामान्य भूत, Ordinary Past.

(खाता है, He is eating) सामान्य वर्तमान, Ordinary Present.

Present Perfect.

(खाया है, He has eaten) आसन्न भूत, Proximate Past.

Past Imperfect.

(खाता था, He was eat- अपूर्ण भूत, Incomplete Past. ing)

Past Perfect.

(खाया था, He had eat- पूर्ण भूत, Completed Past.

Contingent Imperfect.

(खाता हो, Should he be सम्भाव्य वर्तमान, Possible eating) Present.

Contigent Perfect.

(खाया हो, Should he have सम्भाव्यभूत, Possible Past. eaten)

Presumptive Imperfect.

(खाता होगा, He must be संदिग्ध वर्तमान, Doubtful eating) Present.

Presumptive Perfect.

(खाया होगा, He must संदिग्ध भूत, Doubtful Past. have eaten)

Past Contigent Imperfect.

(खाता होता,) Were he (at अपूर्ण हेतुहेतुमद्भूत,

some past time) eating)

Incomplete cause & effect Past.

Past Contigent Perfect.

(खाया होता,) Had he eat- पूर्ण हेतुहेतुमद्भूत,

en)

Completed cause

& effect Past.

197.

PARADIGMS.

For future reference, Paradigms of the conjugation of some typical verbs will be given.

- 1. The two special Tenses of the Substantive Verb " to be."
 - 2. Full Paradigm of the Verb होना, to become.
 - do. Intransitive Verb चलना, do. 3. to move, to go. Stem ending in a consonant.
 - 4. Concerning the Transitive Verb देखना, to see. Stem ending in a consonant.
 - Intransitive Verb श्राना. 5. do. to come. Open stem, i.e., ending in a vowel.
 - Transitive Verb दिखाना. 6. do. to shew. Open stem.
 - 7. do. देना, to give. do.

Open stem.

करना, to do. ending in a Stem consonant.

do.

8, - . . do.

- 9. Concerning the Passive Verb. **किया जाना**, to be done,
- 198. In reference to these Paradigms, a few explanatory notes are furnished.
- 1. **ETAT,** in the sense of "to become," is complete in all its parts. This Verb serves, generally, also as the Substantive Verb "to be," "to exist;" but for this latter, two special additional Tenses exist which do not appertain to **ETAT**, in the sense of "to become." These two Tenses are a Present **E**, he is: **ETAT**, he was. These are not interchangeable with the two corresponding Tenses of **ETAT**, to become, which are **ETAT E**, he becomes: **ETAT ETAT E**

है and **या** and certain parts of the verb **होना** are used as Auxiliaries in the conjugation of other Verbs.

- 2. It is worthy of notice that throughout the Tenses the 2nd and 3rd person singular are exactly the same in form, also the 1st and 3rd plural.
- 3. In some Grammars, 1st and 3rd persons are given under the Imperative. This appears to be incorrect. The Imperative can be used only in the 2nd person. The nearest approach to an imperative for the 1st or 3rd person is "let me do so and so," "let him do so and so." This is not Imperative but Optative, and the

forms of the Contingent Future meet the need. To print these forms a second time, under the Imperative, is misleading.

The only approach to a 3rd person under the Imperative are the special "respective" forms provided to use with the honorific **AIU**. This has the 3rd person in construction, but with the meaning of the 2nd person.

- 4. In the Paradigms, the English translation is only given for one person, and that the 3rd person, this often being more simple and more commonly in use than the 1st person. The student will know that if the 3rd person be "he will go," the 1st and 2nd sing. and pl. will be "I will go," etc., etc.
- 5. Full Paradigms are only given for **हाना** and **चलना**. In the case of other Verbs, only the differences from the normal forms are referred to. As a matter of fact, the conjugation of the Hindi Verb is exceedingly simple, offering comparatively few exceptions to the general norm.
- 6. The so-called Adverbial Participle (चलते हो, upon (his) going, or some similar meaning) is not included in the Paradigms. This is merely one use of the Imperfect Participle, and has no claim for demanding separate mention in the Paradigm of the Verb.

199. (1). The two Tenses of the Substantive Verb " to be."

Present

Singular. Plural.

- 1. **ң** हूँ I am. **हम** हैं We are.
 2. तू है Thou art. **तुम हो** You are.
 3. वह है He is. वे हैं They are. Past. He was.
- 1. मैं या, fem. यी हम ये, fem. यीं
- 2 तू या यी तुम ये यी
- उ. वह या ... यी वे ये ... यीं

200. (2). The Verb होना, to become. This Verb is also used, in many of its parts, as the Substantive Verb " to be."

Infinitive होना. to become.

Imperfect Participle. होता (fem. होती; pl. masc. होते ,) he who is becoming.

Perfect Participle. हुन्ना (fem. हुई; masc. pl. हर्), he who has become.

Conjunctive Participle. हेा, हाकर, हाके है। करके, having become.

^{*} Throughout these Paradigms, many alternative forms are given. Generally speaking, the earlier forms are the most common and the best approved. Each alternative form is not always repeated in each Tense and in each Paradigm, but in corresponding Tenses, etc., it may be understood.

Noun of Agency. होनेवाला, होनेहारा, होनेहार, होनहार f...वाली, etc.), he who is about to become.

Tenses formed from the stem (है।).

Contingent Future. He may become.

1. मैं होऊँ

- ा हम हैं।, होवें, हेाएँ, होंय
- 2. तू हो। , हो। ए, हो। व. तुम हो। or हो। प्रो
- 3. वहां होवे 3. वे हों, होवें, होएँ, होयँ

Absolute Future. He will become.

- ा मैं हूँगा, होऊँगा हम होंगे, होएँगे, (मगी) होवेंगे, होयँगे (मगी)
- 2. तू होगा, होएगा, 2 तुम होगे, होस्रोगे होयगा, हो- (f गी)
- 3. वह विगा (f. गी) 3. हम हेाँगे , हाँगें , हावेंगे,हाँयँगे (f. गी)

Imperative. Become.

2. तू हो।

2. तुम हो।

Respectful forms used as 3rd p1. with the honorific आप, हजिये, हजियेगा, हजिये।

TENSES FORMED FROM THE IMPERFECT AND PERFECT PARTICIPLES.

Indefinite Imperfect. He becomes.

1. 2. 3. मैं, तू, वह, होता 1. 2. 3. हम,तुम, वे, होते (f. होती) (f. होतीं) Indefinite Perfect. He became.

1. 2. 3. मैं, तू, वह, 1. 2. 3. हम, तुम, वे, हुए हुआ़ (f. हुई) (f. हुई)

Present Imperfect. He is becoming.

मैं होता हूँ (होती हैं होती हैं (होती हैं)

2. तू होता है (f. हो- 2 तुम होते हो (f. होती ती है) हो)

3. **व होते** हैं (八 होती हैं)

Present Perfect. He has become.

- 1. मैं हुआ हूँ (१ हुई हूँ) 1. हम हुए हैं (१ हुई हैं)
- 2. तू हुआ है (म हुई 2. तुम हुए है। (म हुई है।)
- 3. वह हैं (हिर्द हैं)

Past Imperfect. He was becoming.

1. 2. 3. मैं, तू, वह, हो। 1. 2. 3. हम, तुम, वे, ता या (बिहोती होते थे (बिहोन थी) ती थीं)

Past Perfect. He had become.

1. 2. 3. सें, तू, वह, 1. 2. 3. हम, तुम, वे, हुए हुआ था (१ हुई थें (१ हुई थीं) थी) The next six Tenses are given in Hindi; but no English translation is attempted. It seems impossible to give a bald translation of some of these Tenses which will yield any clear meaning, though in actual composition these Tenses, even in the Verb "to become," become distinctly possible, e.g., take such a sentence as the following: ac as as a very size and a sentence as the following: ac as a very size and a sentence as the following are an are a very size and a sentence as a very size and a very size and a very size and to endure punishment.

Contingent Imperfect.

- े में होता हो जँ (f. होती कि हम होते हैं। (f. होती हैं। (f. होती हैं।)
- 2. तू होता हो or होए, यो (f. होती हो)
- 3. वह | etc. (f. होती हो) 3. वे होते हों (f. होती हों)

Contingent Perfect.

- 1. में हुआ होजँ (f. हुई 1. हम हुए हाँ (f. हुई हाँ) होजँ)
- 2. तू 2. तुम हुए हो (f. हुई हुआ़ हो (f. हो)
- 3. वह हुई हो। 3. वे हुए हों (१. हुई हों)

Presumptive Imperfect.

ा मैं होता हूँगा (/ हो-होती हूँगी) ती होंगी)

2. तुम होते होगे (म. होती होता होगा (/. होती होगी) 3. वे होते हेंगे (म होती होंगी)

Presumptive Perfect.

- मैं हुआ़ हूँगा (म. हुई 1. हम हुए हैं।गे (म. हुई
- 2. तुम हुए होगे (f. हुई हुआ होगा (f. हुई होगी)
 3. वह हुई होगी)
 3. वे हुए होंगे (f. हुई हों-

Past Contingent Imperfect.

 1. 前
 ま

 2. 点
 ま

 3. ag
 (f. 言) 而 言) 元

 1. 長井
 ま

 2. 点サ
 ま

 3. ag
 (f. 言) 而 言) 元

 3. ag
 (f. 言) 元

Past Contingent Perfect.

- 3. **वह**
- 201. (3) Intransitive Verb चलना, to move, to go

Stem ending in consonant.

Infinitive. चलना

चलता or चलता हुआ (f. Imperfect Participle. चलती: m. pl. चलते)

Perfect Participle. चला, or चला हुस्रा (f. चली; m. pl. चले) Conjunctive Participle. चल, चलकर, चलकरके, चलके

Noun of Agency

चलनेवाला, चलनेहारा (म. चलनेवाली)

Tenses formed from the stem (चल) Contingent Future. He may move or go.

1. में चलू

1. हम चलें

2. तुम चलो

3. वे चलें

Absolute Future. He will move or go.

मैं चलूँगा (f. चलूँगी)
 इम चलेंगे (f. चलेंगी)

2. तू चलेगा (f. चलेगी)
 3. वह चलेगा (f. चलेगी)
 3. वे चलेंगे (f. चलेंगी)

Imperative. Move or go.

2. **चल**

2. **चलो**

Respectful forms used as 3rd pl. with the honorific

म्रापः चलिये, चलियेगा, चलिये।

Tenses formed from the Imperfect and Perfect Participles. Indefinite Imperfect. He moves or goes.

ा. सें ी. हम 2. तू चलता (f. चलती) 2. तुम चलते (f. चलतीं) 3. वह

Indefinite Perfect, He moved or went.

Present Imperfect. He is moving or going.

 मैं चलता हूँ (/. चलती हूँ) 1. हम चलते हैं (म. चलती हैं) 2. तुम चलते हो चलता है (म चलती है) 3. वे चलते हैं

(म. चलती हैं) 3. **व**ह

Present Perfect. He has moved or gone,

- 1. भैं चला हूँ (म चली हूँ) 1. हम चले हैं (म चली हैं)
- 2. तू 3. वह चला है (/ चली है) 2. तुम चले हो (/ चली हो) 3. व चले हैं (/ चली हैं)

Past Imperfect. He was moving or going.

Past Perfect. He had moved or gone,

Contingent Imperfect. Should he be moving or going.

- 1. मैं चलता होऊँ 1. हम चलते हों or होएँ, (f. चलती होऊँ) etc. (f. चलती हों)
- 2. तू चलता हो or 2. तुमचलते हो or होस्रो हाये (j. चलती हो)
- 3. वह (म. चलती हो) 3. वे चलते हीं में चलती हों)

Contingent Perfect. Should he have moved or gone.

- मैं चला होऊँ । हम चले हों, etc.
 (f. चली होऊँ) (f. चली हों)
- 2. तू चला हो or 2. तुम चले हो, etc. होए (f. चली हो)
- 3. वह (f. चली है।) 3. वे चले है।, etc. (f. चली है।)

Presumptive Imperfect. He will be moving or going.

- 1. मैं चलता हूँगा 1. हम चलते होंगे (/ चलती हूँगी) (/ चलती होंगी)
- 2. तू चलते होगे चलता होगा (f चलती होगी)
- 3. वह (£ चलती होगी) 3. वे चलते होंगे (£ चलती होंगी)

Presumptive perfect. He will have moved or gone.

- 1. मैं चला हूँगा 1. हम चले होंगे (/ चली होंगी) (म चली हॅगी)
- 2. तुम चले होगे चला होगा (/ चली होगी)
- 3. वह (१. चली होगी) 3. वे चले होंगे (त. चली होंगी)

Past Contingent Imperfect. Should he have been moving or going.

चलता होता 2 तुम चलते होते (f. चलती होती) (f. चलती होतीं)

Past Contingent Perfect. Should he have moved or

1. हम
चला होता 2. तुम चले होते (f. चली
(f. चली होती) होतीं)

202. (4) Transitive Verb देखना, to see. ending in a consonant.

The only parts of a Transitive Verb differing from an Intransitive Verb having a similar stem, are the six Tenses formed from the Perfect Participle.

Something further will be explained about the rules of agreement between these Tenses of Transitive Verbs and their Accusatives, when the Nominative with a is used, later on. For the present, the following statement may suffice.

When the Nom. with $\hat{\mathbf{q}}$ be used and the Accusative with $\hat{\mathbf{q}}$, then we have the following forms for the Tenses under consideration:—

Indefinite Perfect मैंने, तूने, उसने, हमने, तुम्हेंाने, का देखा उन्होंने.

Present Perfect do. do. do. ... **का देखा है**Past Perfect do. do. do. ... **का देखा या**Contingent Perfect do. do. do. ... **का देखा हा**Presumptive Perfect do. do. do. ... **का देखा होगा**Past Contingent Perf. do. do. do. ... **का देखा होगा**

If the Accusative without an be used, that is, the Nominative form, then the Verb will agree with it in Gender and Number. उस ने देखा, उस ने देखी, उस ने देखी, and so on, to उन्होंने देखा होता, देखी होती, देखे होते, etc., etc.

203. (5). Intransitive Verb ग्राना, to come. Open stem.

Infinitive **ञ्चाना** Imperfect Participle **ञ्चाता** Perfect Participle **ञ्चाया** Conjunctive Participle स्राकर, स्रा, स्राकरके, स्राके Noun of Agency आनेवाला, etc.

Tenses from the Stem (591)

Contingent Future zie, he may come.

- हम आएँ, आवें.
- 2. तू
 तू

 3. वह
 आए, आय, आवे
 2. तुम आओ

 3. वे आए, आवें, आयें

 Absolute Future.
 He will come.

- 1. में आऊँगा (स्याऊँगी) । हम आएँगे, खावेंगे, (म आएँ, आवंगी)
- 2. तू । ख्राएगा, खावेगा, 2. तुम खाख्रागे (ह्याख्रोगी)
- 3. वह आयगा (त आए, 3. वे आएँगे, आवेंगे, स्रावे, स्रायगी) स्रायंगे (/ स्राएं, स्रावें, आयंगी)

Imperative.

2. 契丁

Respectful forms, used as 3rd pl., with the honorific आप. आइये, आइयेगा, आइये।

Tenses formed from the Imperfect and Perfect Participles:

The six Tenses formed from the Imperfect Participle श्राता are in every respect the same as those of चलना. already given. The six Tenses formed from the Perfect Participle are as follows:-

Indefinite Perfect. He came.

1.2.3. आया (f. आयी) 1.2.3 आये, आए (f. आयीं, आई)

Present Perfect. He has come.

ा मैं आया हूँ (त्यायी हूँ, कि हम आये हैं or आई हूँ) (त्यायी हैं)

2. तू आया है

3. वह (१. आई है)

2. तुम स्नाये है। (f स्नायी हो)

3. वे ख्राये हैं (f. ज़ायी हैं)

Past Perfect. He had come.

1. 2. 3. **स्राया या** (/ स्रायी यी)

1. 2. 3. **स्नाये ये** (म. स्नायी यीं)

Contingent Perfect. Should he have come.

1. मैं स्नाया होऊँ (१ स्नायो होऊँ)

2. तू आया हो or हीस् (/ आई हो)

3. **वह**

हम आये हैं।, etc.
 (f. आयी, or आई हैं।)

2. तुम आये हो (f. आयी, or आई हो)

3. वे स्राये हैं (/ स्नायी, or स्नाई हैं)

Presumptive Perfect.

ा में आया हूँगा (/ आयी हुँगी) He will have come.

ा हम आये होंगे (१ आयो हेंगीं) 2. तू आया होगा 2. तुम आये होगे (f. आयी होगी) 3. वह (f. आयी होगी) 3. वे आये होंगे (f. आयी होंगी)

Past Contingent Perfect. Had he come.

1. 2. 3. ख्राया होता 1. 2. 3. ख्राये होते, (f. ख्रायी होती) (f. ख्रायी होतीं)

204. The very common Verb, **जाना**, to go, is conjugated in the same way as **श्राना**, with the exception that the PerfectP articiple is irregularly formed, being **गया**, instead of **जाया**, as might be expected.

The six Tenses formed from the Perfect Participle are, of course, all affected by this, and we have गया, गया है, गया था, etc.

205. (6). Transitive verb दिखाना, to shew. Open stem.

This corresponds with the conjugation of **श्राना**, except in the six Tenses formed from the Perfect Participle. These are conjugated in the same way as the same Tenses in **देखना** (No. 4.), the Perfect Participle being **दिखाया**.

206. (7). Transitive Verb देना, to give. Open stem, ending in ए.

Contingent Future. He may give.

- ा. मैं दूँ, देऊँ
 - 1. हम दें, देवें
- 2. तू 3. वह दे, देवे
- तुम दो, देख्रो
 वे दें, देवें

Absolute Future. He will give.

- 1. मैं दूँगा, देऊँगा 1. हम देंगे, देवेंगे (f. दें, देवेंगी) (f. हूं, दें**ऊँगी**) 2. तुम दोगे, देख्रीगे
- 2. तू देगा, देवेगा (देश देख्रोगी)
- 3. वह (f. दे, देवेगी) 3. वेदेंगे, देवेंगे (r. दें, देवेंगी) Imperative. Give.

2. **दो. दे**खी

Respectful forms, used as 3rd pl., with the honorific आप. दीजिये, दीजियेगा, दीजिये।

The six Tenses formed from the Imperfect Participle देता. are quite regular.

The six from the Perfect Participle follow the same rules as apply to corresponding Tenses in देखा (No. 4.), excepting that the Perfect Participle is दिया, fem. दी, pl. दीं; plural masc. दिये.

207. (8). Transitive Verb करना. To do.

This Verb, though the stem ends in a consonant, like देखना, differs in the formation of its Perfect Participle, and respectful forms of the Imperative. The Perfect Participle is faral.

Imperative.

2. **कर**

2. **करो**

Respectful forms, used as 3rd pl., with the honorific आप. कीजिये, कीजियेगा, कीजियेग

The six Tenses formed from the Past Participle are conjugated in the same way as those of **[21]**.

208. (9). The Passive Verb. The Passive Verb is formed by adding जाना to the Perfect Participle of the Active Verb. Thus देखना, to see, becomes देखा जाना, to be seen. It is conjugated exactly the same as जाना (see Sections 204 and 203). The form of the Participle changes with the change of the जाना, as regards Gender and Number. Thus देखा जाऊँ, देखी जाऊँ, देखी जाऊँ, देखी जाउँ, देखी जाउँ,

209. CLASSIFICATION OF VERBS.

1. Classification according to meaning and usage.

The first point to engage our attention is this classification, according to the general scope of the meaning and uses. There are, at the very least, the following classes:—

- (1) Transitive. (2) Intransitive. (3) Neuter.
- (4) Passive-Neuter. (5) Impersonal. (6) Passive.(7) Causal. (8) Compound.
- (1). Transitive. (Haha). This class needs no special explanation. They are Active Verbs which re-

quire an object or Accusative (expressed or understood to complete their meaning, e.g., ताड़ना, to break: **फाड़ना**, to tear; देखना, to see. Apart from something to break, to tear, or to see, there can be little meaning of such words in a sentence.

- (3). Neuter. A Neuter Verb is not only intransitive. but, strictly speaking, implies a state for which the subject is not responsible on account of any activity of his, e.g., as him is, he is sleeping: as as using there.
- (4). Passive-Neuter. The Verbs belonging to this class must be dealt with in a separate section, as they play a very important part in Hindi. They are Neuter, they are also truly Passive, but in structure and force distinctly differ from the ordinary Passive Verbs.
- (5). Impersonal (भावप्रधान क्रिया). Though this is not a very numerous class, it is of real importance.

and has special features. It demands a paragraph to itself, and one is given later on.

- (6). Passive Verbs. These are much used in Hindi. They correspond very much with Passive Verbs in English, and require little notice. What would be the Object, with an Active Verb, becomes the Subject, and what would be the Subject, is thrown into the Instrumental Case, करण, e.g., Act. भगवानप्रसाद ने घर का देखा, Bhagawan Prashad saw the house, becomes, घर भगवानप्रसाद हे देखा गया, The house was seen by Bhagawan Prashad.
- (7). Causal Verbs. These Verbs constitute a very large class, and will need careful and full treatment later. These Causal Verbs convey the idea of causing that to be done which is expressed by the simple Verbs from which they are formed. In English, we say, The child eats, The mother feeds the child; or, The child fell, A man threw the child down; or, A man caused the child to fall. In Hindi, the Causal Verbs meet all such cases in a very neat and effective way, e.g., egan ticlicant, The child eats bread. Hi egan and with bread. egan fitt, The child fell. eats and effective way and with bread.
- (8). Compound Verbs. These are very numerous in

Hindi, and are made up in various ways. This matter also must receive full treatment later on.

210. 2. Classification according to form. The conjugation of the Hindi Verb is remarkably simple and regular. Apart from the changes effected in the structure of those six Tenses which are from the Perfect Participle, the irregularities are very few. Even in the case of the Passive Voice, the endings of all the parts are quite regular, conforming closely to the Active Verb.

As, however, some modifications do occur in the conjugation of certain Verbs, owing very largely to the final letter of the stem, some classification seems to be called for. The following division appears to fairly cover the ground:—

	Verb.	Stem end-	Example.	Paradigm.
		ing in—		
1.	Intransitive	a consonant	वलना	3
2.	Transitive	do.	देखना	4
3.	Intransitive	a vowel	स्राना	5
4.	Transitive	do.	दिखाना	6
5.	General	the vowels)	
		ए, ई, ख्रो, ऊ.	देना	7
6.	Irregular	होना, जाना,		
		करना, मरन	т	. 1.2.5.8.

- खाला Passive * - 9 7.
- Passive-Neuter ... 9 खुल जाना

Spread out in this way, the list may appear somewhat formidable; but any such impression will be dissipated on an examination of the very slight differences in the structure of the various classes given.

The only difference between 1 and 2 is that effected in the six Tenses formed from the Perfect Participle. Nos. 3 and 4 only differ from Nos. 1 and 2 in the formation of the Perfect Participle, at being added to the stem, instead of AT alone.

Under 5, the list of Verbs is not large. देना. to give : लेना, to take; खेना (or खेवना), to row; पीना, to drink: सीना, to sew: जीना to live, रोना, to cry; होना, to sleep; बीना, to sow; खीना, to lose; धीना, to wash; होना, to carry: छना, to touch. These are probably nearly all the Verbs to be included in this class. Such modifications as occur, are few and simple. These modifications are mainly in the formation of the Perfect Participle.

In देना and लेना, we have दिया and लिया for the Perfect Participle; and in those parts of the Verb where the stem is followed by a vowel, the T of the stem and the following vowel are compounded into one vowel. Thus, instead of देजँगा, i.e., दे, जँगा, we have often दूँगा; so दोगे for देख्रोगे, etc. See Paradigm No. 7.

In **dai**, the **v** is not changed in this way, but remains **v**. Frequently, the form **daal** for this Verb is used, in which case it comes under the rules for the conjugation of a Verb, the stem of which ends in a consonant.

Verbs, the stems of which end in $\frac{1}{2}$, have the $\frac{1}{2}$ shortened into $\frac{1}{2}$ and a $\frac{1}{2}$ inserted between this $\frac{1}{2}$ and the following $\frac{1}{2}$, in the formation of the Perfect Participle. Thus $\frac{1}{2}$ Thus $\frac{1}{2}$ (not always shortened). The other parts are regular.

With Verbs, the stems of which end in \mathbf{x} , a \mathbf{z} is inserted between the final \mathbf{x} of the stem and the \mathbf{x} , in the formation of the Perfect Participle. Thus $\mathbf{\hat{t}}$ becomes $\mathbf{\hat{t}}$ \mathbf{z} is the other parts of the Verb are conjugated regularly.

With ळूना, the vowel ज is shortened in the formation of the Perf. Part.; thus we have जुआ.

The four Verbs mentioned under No. 6 are not very irregular. The full paradigm for **are** is given (Paradigm Nos. 1 & 2). Particulars concerning **are** will be found under Paradigm No. 5 and Sect. 204. Those

concerning at at, under No. 8 Paradigm. **Htal** becomes **H** yr for the Perf. Part. In the case of both at and **Htal**, the forms at and **Htal** are in use as well as **faul** and **Hyrl**. This is especially true of **Htal**.

The conjugation of the Passive Verb has been already referred to under Paradigm No. 9.

When the Passive-Neuter Verbs have the **sini** combined with them (and they very largely do), then they are conjugated in all respects in the same way as the Passive Verbs. The only difference between these and the Passive Verbs arises before there is any question of the conjugation of them. The Verbs come up for conjugation in a different form, e.g., **gen sini** and **diminish** is not used with one of these Passive-Neuters, then it is conjugated as an ordinary Intransitive Verb, e.g., **gen sini**, **gen u**, **gen i**, etc., etc.

211. It will be noticed that the great majority of Verbs have a stem consisting of only one consonant and its vowel, or this plus one additional consonant. Thus n—, u—, u—, u—, d; u—, en—, en—, en—, etc., to which the en is added to form the Infinitive. Some stems, however, have

three consonants, e.g., Zहलना, to walk to and fro; चिटकना, to be strewed; पुकारना, to call out; चहलाना, to amuse, divert; घकेलना, to push. There is also quite a large class of Causal Verbs which have a second vowel (आ) added to the original stem. Thus लगना, लगाना; उठना, उठाना; चलना, चलाना. Sometimes an additional consonant is brought in: खाना, खिलाना; सोना, सुलाना.

VERB: MOODS, TENSES, NUMBER, PERSON, GENDER.

212. Moods. That Moods are represented in Hindi, cannot be questioned, but the Tenses are not arranged with reference to any Moods, and there is in Hindi no equivalent for the word. The matter may therefore be dismissed from consideration.

Tenses. In Hindi, there is a term, and, which corresponds in meaning with the English "Tense," but the word is not largely used. A Tense is generally referred to by the word fat, Verb. Thus we have such terms as "Imperation Verb, Possible-Future Verb, Absolute-Future Verb, etc.

The order and nomenciature of the Tenses adopted is that found in Dr. Kellogg's Grammar, with the ex-

ception that, whereas Dr. Kellogg gives first the 6 Tenses formed from the Imperfect Participle and then the six formed from the Perfect Participle, the twelve Tenses are here given in six pairs, Indefinite Imperfect, Indefinite Perfect, etc. The names given to the Tenses well represent the functions of the respective Tenses, though for each one no single name could be found which would fully indicate the scope of its use.

Number, Person and Gender. The Hindi Verb has two Numbers, singular and plural: three Persons: and two Genders, masculine and feminine. In most parts of the Verb, the form is affected by Number. Person and Gender; but in some parts, the influence of one or more of these does not affect the form: e.g. The Infinitive may be affected by Gender and Number, but not by Person. The Contingent Future is affected by Person and Number, but not by Gender; so with the Imperative. The Conjunctive Participle is not affected by any of the three.

Attention is again called to the fact that the 2nd and 3rd Persons singular of each Tense assume the same form, also the 1st and 3rd plural. In the 6 Tenses, Indefinite Imperfect and Perfect, Past Imperfect and Perfect and Perfect and Perfect and Perfect, all three persons of the singular are the same, likewise the three persons of the plural.

Generally, the subject of the Verb, is expressed by a Noun, Pronoun or some equivalent, but, in certain sentences, may be omitted, the person being indicated by the form of the Verb or by the context, c.g., the English, "Will you go? I will go," may be in Hindi **SIRIT!** thus omitting both "you" and "I."

213. Tenses formed from the Perfect Participle, and the Nominative with $\widehat{\mathbf{A}}$. This subject has already been referred to in sections 95 and 202. The construction only affects Transitive Verbs, and of these only the six Tenses in which the form assumed by the Perfect Participle occurs, viz:—

Indefinite Perfect, देखा. Present Perfect, देखा है, Past Perfect, देखा था, Contingent Perfect, देखा हो, Presumptive Perfect, देखा होगा, and Past Contingent Perfect, देखा होगा.

No attempt will here be made to account for the origin of this peculiar construction. It may be that the Verb is, in this construction, really passive, and that what would ordinarily be the Nominative Case becomes the Agentive, and what would have been the Accusative is changed into the Nominative, and remains Accusative, or is the Dative. For all practical purposes, however, it may be understood that what was the Nominative

with the other Tenses, remains still the Nominative, though with a special form, viz., the addition of $\overline{\bullet}$.

Sir George Grierson points out to me, and Dr. Kellogg takes the same view, that these Tenses have been formed from the Sanskrit Past Participle, and that the construction found came over with them from the Sanskrit into Hindi. In Hindi, however, the Passive force of the Participle appears to have been lost in these Tenses, and, on the whole, for practical purposes, it is simpler to treat this construction, as has been indicated above.

With these six Tenses, the use of this construction of the Nominative with \overrightarrow{a} is compulsory, but there is a choice in dealing with the Accusative. (1) the form with \overrightarrow{a} may be used, in which case the Verb retains the form of the 3rd person, sing. masc. throughout, quite unaffected by the Gender, Number or Person of either subject or object, or, (2) the form of the Accusative without \overrightarrow{a} (or, as some would prefer to say, the Nominative), may be used, and then the Verb will agree with this in Gender and Number.

Thus, whether the Nom. be भैंन, तूने, उसने; हमने तुमने, उन्होंने (or their equivalents), the form of the

Verb is quite unaffected, but will agree with the Accusative without an in Gender and Number, thus:—

ने घर देखा, देखा है, देखा था, देखा हो, देखा होगा, देखा होता॥

... ने पुस्तक देखी, देखी है, देखी थी, देखी हो, देखी होगी, देखी होतो।।

... ने घर का देखे, देखे हैं, देखे थे, etc

... ने पुस्तकों देखीं, देखी हैं, देखी थीं, etc.

By the alternative construction, these would all be देखा. Thus... ने घर के। देखा, etc.: पुस्तक के। देखा; घरों के। देखा, पुस्तकों के। देखा.

As regards choice of these alternative constructions, nothing more definite can be stated than was given in considering the choice of the two alternative forms of the Accusative, in section 97.

214. There are just a few Verbs, with reference to which some uncertainty exists, as to whether this special construction should be used or not. One of these is **सममना**. Sometimes the **न** is used, sometimes not, e.g., मैं नहीं सममा, I did not understand. तुमने सममा नहीं, You did not understand.

With the following Verbs, this construction is not used, viz.-

anni. to chatter. and to make a sound, to sbeak.

भूलना, to forget. जनना. to give birth to.

लाना, to bring. लेजाना, to take.

This last is not one Verb, but parts of two; it is the Verb sial, preceded by the Conjunctive Participle of लेना. Thus, वह लड़के के। ले गया, He took off the boy, is वह लड़के के। लेकर गया, written in a contracted form. In the case of office, we have a similar construction, with this difference, however, that, whereas the construction of the rest of the sentence has been retained, the form of the Verb has been contracted in all its parts from ले + आना to लाना.

With reference to the two Compound Verbs ... ने देना, e.g., करने देना (Permissive Verbs), and... ने पाना. e.q., करने पाना (Acquisitive Verbs), it should be noted that, in one case, this construction comes into use, in the other, not. With देना, the ने is used, but not with पाना. Thus उसने उसका जाने दिया. He permitted him to go; but वह उसका देखने न पाया, He did not get a look at him.

GENERAL VIEW OF THE TENSES.

215. The Stem. The Stem of the Verb is obtained by cutting off the **ना** of the Infinitive. Thus the stems of **देखना**, **करना**, **देना**, **जाना** are **देख**, **कर**, **दे**, **जा**. Stems ending in a consonent are called closed, those ending in a vowel, open. In a dictionary, a Verb is found under the form of the Infinitive.

216. Parts of a Verb. The verbal forms may be conveniently divided into three groups:

- I. Those having the force of Verbal Nouns or Adjectives.
 - (1) The Infinitive. देखना, to see.
 - (2) The Imperfect Participle. देखता or देखता हुआ, seeing. This may be used as a Noun, the person seeing, or, as an Adjective, भूकता कता, the bark ing dog. It is also used in the formation of six of the last twelve Tenses of the Verb.
 - (3) The Perfect Participle. देखा or देखा हुआ, having seen, or, that which has been seen. This is used in the remaining six of the twelve Tenses coming under No. III group.
 - (4) Conjunctive Participle. **देख कर**, etc., having seen.

 An explanation of the difference between the force of this "having seen" and the same words

given under No. (3) above, will be given later on.

- (5) Noun of Agency. **देखनेदाला**, etc., the one who sees. This is generally used as a Noun, but may also be an Adjective.
- II. This group of three obtains its forms from the stem of the verb, supplemented by Tense endings, indicating Person, Gender and Number in some places, but not in all.
 - (1) Contingent Future. देखूँ, I may see.
 - (2) Absolute Future. देखूँगा, I shall see, formed by the Addition of $\overline{\mathbf{n}}$, $\overline{\mathbf{n}}$ or $\overline{\mathbf{n}}$ to the forms of the Contingent Future.
 - (3) Imperative. देख, see. The respectful forms are 3rd pl. in construction, but 2nd sing. in meaning.
- III. Under this head come the six pairs of Tenses formed from the Imperfect and Perfect Participles, assisted in ten of the Tenses by parts of the Auxiliary Verbs and "to be."

The names of the Tenses are given in the Paradigms, and fuller explanations of their forms and meanings in the detailed examination of the various parts of the Verb which will be given in the following sections.

TENSES AND OTHER PARTS OF THE VERB.

217. We must now deal with the Tenses and other parts of the Verb, one by one, noting the forms they assume, their functions and idiomatic uses.

The Infinitive. क्रियार्थक संज्ञा.

218. The Infinitive is formed by adding $\overline{\mathbf{n}}$ to the stem of the Verb. The Infinitive is called by Hindi Grammarians $\overline{\mathbf{m}}$ $\overline{\mathbf{n}}$ $\overline{\mathbf{$

Sir George Grierson points out that this form in **না** is not only an Infinitive, but also a Future Passive Participle. This may account for the fact that the idea of futurity is markedly present in some of the idiomatic uses of this form ending in **না**.

As a Verbal Noun, it may sometimes be translated by the English Infinitive, e.g., and sometimes be translated by the English Infinitive, e.g., and sometimes be translated by the English Infinitive by one of the series of English words ending

in "ing," such as speaking, talking, singing, coming, going, etc., these being equal to the Infinitive in meaning. In the above sentence, the English translation may be as given, or "Going there is not good for you." In many instances, however, no such alternative is open in translating into English: e.g., ena talting. Here "writing" could not be replaced by "to write." The form of the English Infinitive is not so pliable as that of the Hindi.

The uses of the Hindi Infinitive may be divided into three groups:

- As a Verbal Noun. II. Compounded with other Verbs. III. As an Imperative.
- 219. I. As a Verbal Noun. As stated above, the Infinitive may be used as a Noun in all the Cases (except the Vocative).

Nominative. ऐसा करना अच्छा नहीं मालूम होता है, To do thus does not seem good. इन के सच २ कह देने ने मेरे मन के। ठंडा कर दिया, His utterance of the exact truth cooled down my mind.

Accusative. दूसरों के घर जाना उसने छोड़ दिया, He gave up going to other people's houses.

Dative. पहले वह व्याह करने के। राज़ी न हुई,
At first she was not willing to marry. The की is not infrequently omitted: वह देखने गया, He went to see.

Instrumental. चारी करने से कुछ मिले तो मिले, पर अन्त में अपयश है। जाएगा, By thieving something may perchance be obtained, but at the last disgrace will come.

Ablative. agi via देन करने से उसे aga धन प्राप्त हुआ, By trading (or money-lending) there, he gained great wealth. (Attention is again directed to the way in which the Instrumental and Ablative Cases overlap one another. In this latter instance, the Case might be regarded as Instrumental or Ablative, according to the working out of the exact meaning. If the wealth be regarded as having come by means of the trading, the Case would be Instrumental: if the trading be regarded as the source of the wealth, then the Ablative.)

Genitive. उसके आने जाने का यह परिणाम हुआ, The result of his coming and going was this. उसने कुछ देने की प्रतिज्ञा की, He promised to give something.

Locative. प्रार्थना करने पर उसने जाने की आजा पाई, Upon (her) entreaty, she obtained permission to go.

The Infinitive is sometimes used in the fem. form. उनका सुनानी चाहिये, (You) must cause them to hear (this word). विदेशियों की श्ररण लेनी पड़ती है,

(We) have to take refuge with foreigners. दे बातें कहनी हैं, There are two things to say.

Also in the plural form. कैंगन २ गुण होने चाहियें? What qualities are needed? उनका भी अनेक कष्ट उठाने पड़े, They also had to endure great hardships.

Very closely connected with this use of the Infinitive, is its idiomatic use with चाहिये, in which futurity is necessarily implied. तुम का जाना चाहिये, You must go. ग्रमी लड़ाई ग्रीर होनी चाहिये, It isnecessary for more fighting to take place immediately.

Though used as a Verbal Noun, the Infinitive still retains its verbal power to govern another Noun in the Accusative Case. यह सब विद्या प्रकाश कर देनी, To display all this learning. This might equally well have the form of the accus. with का; thus. इस सब

विद्या के। प्रकाश कर देना. Or, the Genitive may be used with a similar meaning: thus, इस सब विद्या का प्रकाश कर देना. In the following sentence, we have both constructions. जो तू उस बात के जानने से

जिसे अवश्य जानना चाहिये डरता नहीं, If you are not afraid to know that matter which it is very necessary to know.

220. II. Compounded with another Verb. The Infinitive, in its inflected or uninflected form, is found loosely compounded with other Verbs, especially in the Inceptive, Permissive, Acquisitive and Desiderative groups. As this use of the Infinitive will come up for consideration in the sections on Compound Verbs, the following summary may suffice here:—

- a. With the Inceptives the inflected form is used. वह कहने लगा, He began to speak.
- b.Permissives..... वह कहने देता, He allows (him) to speak.
- e.Acquisitives..... वह कहने पाता, He obtains permission, or, the opportunity, to speak.
- d.Desiderative...uninflected..... वह कहना चाहता है, He desires to speak. This sentence may also mean, He is about to speak. Formerly, the inflected form was used वह कहने चाहता है; but it is now practically

always used in the uninflected form. When the Verballian is in the plural form, the previous Infinitive may assume the same form: that is probably because both are made to agree with the plural Noun, e.g., a sind algae, They are about to depart. In the same way, both may be found in the fem. form. and probably for the same reason. Thus as (f.) and algae, She is about to arrive. Even in such sentences, however, the forms sind and and and will would often be found.

The use of the Infinitive with चाहिये was mentioned in sect. 219 and will be touched upon again in sect. 221.

221. III. As an Imperative. The Infinitive is often used as an Imperative. Its force lies somewhere between the other two forms generally in use. also is the very polite form, at is an ordinary command. The Infinitive att lies somewhere between the two. In some sentences, the element of futurity is stronger than in others. Of course, a measure of futurity must be involved in every order or request, by the nature of the case. In some sentences also there is a suggestion of continuity or repetition. The use of the Infinitive as an Imperative does not, however, necessarily carry the idea of either futurity or repetition.

वहाँ न जाना, Don't go 'there आज नहीं कल करना, Do it to-morrow, not to-day.

What exact difference there is between करना and करना चाहिये it would be difficult to say.

IMPERFECT AND PERFECT PARTICIPLES.

222. Imperfect Participle. fautilina time or agera, i.e., the Noun setting forth the Verbal ideaPerfect Participle. angular or annual time or agera, i.e., the Noun which explains the doing, or that which is done or being done.

Possessing much in common, these two Participles, differ considerably. One very important difference is this that, while the Imperfect Participle is Active, the Perfect Participle, with हुआ, is often Passive, e.g., सिवाई हुई बात, the taught word. Though, according to the form, this might be active, it is as unmistakeably passive as though it were written सिवाई गयी बात. In the following sentence, the Participle of the same form is very probably active. वह अपने पूर्वों का राज्य पाया हुआ देखकर असत हुई, She, seeing that her sons had obtained the kingdom, was pleased. It may be safe to conclude that we have not here merely two different uses of one form, but two words which, though identical in form, are not so in origin, one having probably been a Sanskrit Passive Participle.

The Imperfect Participle is formed by adding at to the stem of the Verb, the Perfect by the addition of III. With both Participles, IIII may be added. In the case of the Imperfect Participle, it changes the meaning but very little, if at all. Similarly, the addition to the Perfect Participle affects the meaning little in many cases; but, in some sentences, there is a distinctly passive meaning. Both Participles are declined like Adjectives of two terminations: masc. III, pl. II.

The names, Imperfect and Perfect, fairly represent the essential difference between the two Participles. The former, in AI, represents an act or state as in process of being done or experienced, i.e., as not concluded. The Perfect Participle represents it as completed. The Perfect Participle represents it as completed. The letter. The is seated writing a letter. The latter sentence illustrates also the tendency for the Perfect Participle to assume a passive meaning.

Mr. Platts, in his Hindustani Grammar (sections 418-427, in the 1904 edition), has an exceedingly carefully worked out note on the Participles, which, in the main, applies to Hindi as well as to Urdu. It may be doubted, however, if, in all cases, the exact force of the various uses of the participles, as there explained, can

be maintained. It would rather seem that, frequently, the adoption of one or other of alternative forms or constructions,—the agreement of the Participle with its subject in Gender and Number, or its use in what is generally called its Absolute form, with हुआ or without, etc.depends upon the fancy or taste of the writer or speaker, and not on any rigid rule, just as, in English, one writer may prefer to write, "Going on his way, he was attacked," another chooses to write, "As he went on his way, he was attacked."

223. With or without हुआ. Agreeing with subject or in Absolute form. A careful consideration of the numerous illustrations of the use of the Participles which will be found in the following sections, will, it is believed, tend to confirm the statement made in the last paragraph. Possibly, the forms with हुन्ना do tend to suggest something in the way of continuousness, but it is certainly not more than a tendency, and the same idea of continuousness is often present where the हुआ is not present, e.g., भेरे लिये खर्च करते श्रीर मेरा सुख देखते तुम का बुरा लगता है, Spending money on me and seeing me happy, displeases you. The spending and seeing him happy refer not to one item of expenditure and one look at the happy youth, but to a continuous expenditure, etc.

With the Perfect Participle of a Transitive Verb, the same frequently carries with it the passive meaning; but its use does not involve this, nor does it have any such effect on the Imperfect Participle.

It would be impossible, we believe, to formulate any rule or rules stating under what conditions one idiom would be more correct than another. Undoubtedly, in some sentences, certain constructions are preferable, in some probably absolutely necessary; but in many instances alternatives are open, and the choice depends not on

rule, but on taste and custom. Different authors have their preferences.

224. Various uses of the Participles. Perhaps the following represent the main uses of the Participles:—

- 1. As attributive Adjectives.
- 2. As predicative Adjectives (see paragraph below).
 - 3. As Nouns.
 - 4. As Verbal Nouns.
 - 5. Compounded with other Verbs.
 - 6. Special uses and idioms.

Frequently, the Participles do not assume the functions of Adjectives, but retain their verbal force, e.g., **H**-al a stail urul that is the Adjective, whilst the Participle, that is the Adjective, whilst the Participle in the other sentence.

As the idiomatic uses of the Imperfect and Perfect Participles differ considerably in some cases, it may be well to consider them separately.

THE IMPERFECT PARTICIPLE. Imalian

- 225. To avoid multiplication of the divisions of our subject, we may now dismiss from consideration the question as to whether each Participle is attributive, predicative, or something else.
- 1. The Participle in agreement with its subject in Gender and Number.
- (a) With the Nominative. राती हुई लड़की घर पहुँची, The weeping girl reached home इन सब कामों के। करता हुआ सनुष्य धीरज धरे, Doing all these things let the man remain steadfast. इन कामों के। करता हुआ सनुष्य घर में रहता हुआ भी भगवान की भक्ति से मुक्ति पा सकता है, Doing these things, a man, even while living in his own house, by devotion to God, can secure salvation. यह भी राती चिल्लाती उनके पास दें। ड़ी, She also weeping and crying van out to them. राजा की कीर्त्त अब तक अपनी प्रजा की उपदेश देती हुई मौजूद है, Up to the present time, the fame of the king abides, giving teaching to his subjects. वे दोनों प्राणी जीते हुए भी मरे से हो जाते हैं,

They both, even while still alive, become as though dead. (Notice that with one participle the gv is used not with the second).

(b) With the Accusative and other Cases. ऋष्नि की चमकता हुआ या दीपक जलता हुआ देखा, (He) saw a fire shining or a lamp burning. उसने होते हुए निरपराध बालकों की मारा है, He has slain the sleeping innocent children. आप की हमने कभी कोई काम करते नहीं देखा, I never saw you doing any work. (करते is pl., to agree with आप).

In the two following sentences, the Participle in a very true sense has for its subject the subject of the principal Verb, and yet it is an Adjective belonging to the word समय, and, as such, agrees with it in Gender and Case. It is the construct, form, sing, masc., because समय is the Accuse, of time. स्त्री जाते समय वाली, The woman at the time of her going away swid. चलते समय वह साचने लगा, At the time of his going, he began to think.

- 2. The Participle in its Absolute form, not agreeing with its subject in Gender and Number.
- (a) With the Nominative. **किसी ने अपने गुरु की मर्श्यमा करते हुए कहा**, Some one in praise of his religious teacher said. The sentence is, literally, praising

his teacher said, and might mean, while he was praising his teacher, he said something about some other subject; but the context would probably show that what he said was the very praising of the guru. यह कहते कहते वह फिर रोने लगी, Saying this again and again, she once more started crying. अवधि पूरी होने आई, The limit appointed was reaching its completion.

(b) With the Accusative and other Cases. जबराजाने उसके आते हुए देखा, When the king saw him coming along. शास्त्रों में लिखी हुई बातों पर विश्वास करना, llave faith in the words written in the holy books. उसने देनिंग लड़कियों के। साते हुए पाया, He found both the girls asleep.

3. Not infrequently, the subject of the Participle is not the same as the subject of the main Verb in the sentence. (This, of course, is also true of 2b, but not in the same way). These instances correspond with the usually accepted meaning of the word "Absolute," as applied to the use of Parts of Speech.

कहते कहते उसकी बात रक गई, He went on talking, and then his words ceased. Or, more lit., He talking talking, his word stopped. ऐसे कहते कहते बूढ़ी का अन ईश्वर के ध्यान में मग्न है। गया, Talking on thus, the mind of

the old lady became absorbed in the thought of God.

जान पड़ता है कि भेरे लिए खर्च करते श्रीर भेरा

सुख देखते तुभ के। बुरा लगता है, It appears to me
that in spending money on my behalf and in seeing me
happy you find unhappiness. जब बहिन के। श्रकेली

श्राते देखा, When he saw his sister coming alone.

श्रपने साम्हने एक नयी बात होती हुई देख रही है,
She sees a new state of affairs coming about before her
very eyes.

- 4. The Imperfect Participle with हो. This has sometimes been called the Adverbial Participle. It is, however, just one use of the Part., the हो conveying the idea that at the very time that the act was taking place.....e.g.. सुनते हो सबके सब देखे आये, As soon as ever they heard it, they all came running. भेरे भरते ही, Upon my death. यह सुनते ही जहाँगीर कें। वड़ा क्रोध आया, On hearing this, Jahangir became very angry.
- 5. Occasionally, the Participle becomes about equal to a Noun or the Infinitive. The following sentences illustrate these and similar points:—

में स्रभी स्रोत से भी नहीं उठी हूँ, I have not yet risen from sleep. मरता क्या न करता, What will not a dying man do? इसी के मिलते मुभे तेरी सुध आयी, On receiving it, the thought of you came to me.

कैसे जाते बनता है, How can you go? करते भी सुना है, Has (anyone) heard of (anyone) doing (it)?

6. Compounded with other Verbs. Sometimes, the Impferf. Part. is compounded with रहना or जाना, and then conveys the idea of continuativeness, e.g., वे ऐसाकरते रहते हैं, They keep on doing so. वह गिरता जाता है, He keeps stumbling.

There is one use of **जाता रहना** which is distinct from the above, being an idiomatic way of expressing the idea of something having come to an end, e.g., **चाँदी की सारी चमक जाती रही**, All the brightness of the silver passed away.

THE PERFECT PARTICIPLE. कर्नृवाचक or कर्मवाचक संज्ञा.

226. As already stated, one principal difference between the Imperfect and Perfect Participles is that the latter have often a passive meaning. The Participles are so important in Hindi composition that illustrations of the use of the Perfect Participles are given even where the use does not materially differ from the use of the Imperfect Participle.

1. a. The Perfect Participle agreeing with its subject in Gender and Number. Nominative.

जनका मन तो ईश्वर में ही लगा हुआ़ था, Their mind was set on God. वह रावण से युद्ध करके मरा

हुआ पड़ा था, He having fought with Ravan was lying dead. वायु से उड़ाये हुए वादल जहाँ तहाँ घूमा फिरा करते हैं, The wind-driven clouds are wandering around in various directions hither and thither. (Notice that here the Part. is passive in meaning.) सिर पर हाथ रक्खे सिर फुकाये बैठे हैं, He is seated with his hands to his head and bowed head. (Lit., having bowed his head). दो चार मनुष्य हाथ में लाठी लिये बैठे देख पड़ते हैं, Two or three men appear to be sitting there with long staffs in their hands.

1. b. The Participle agreeing with the Accusative. etc., in Gender and Number. 3-fin soly glad ut att using Gender and Number. 3-fin soly glad on the ground. They saw Jatagu lying dead on the ground. The fire the fire grant like gold purified in the fire. (Passive meaning of Part.). The same upon his life. (Notice the use of the pl. simil for "life"). The same will suffer the fruit of his own doings. The suffer the fire grant fileted on them by God (Pass.). They suffer the sufferings inflicted on them by God (Pass.). They suffer the sufferings inflicted on them by God (Pass.). They will be gain at the line will they suffer the sufferings inflicted on them by God (Pass.). They will be gain at the line will be g

his door for alms. **can agin age ant**, Seeing that the day had broken.

It should be noted that, in addition to this use of the form of the Active Participle with a passive meaning, the true passive Participle is also used. आरम्भ कियेगये किसी कार्य के सिद्ध होने का समय आ जाने पर, When the time comes for any work that has been commenced to be completed. अपने जपर किये गये अत्या-चारों का वर्णन उसने किया, He gave an account of the injustices which had been inflicted on him.

In the following sentence, the Participle is in the

singular, although the subject is plural. This is in accordance with the rule about an Adjective used predicatively and following an Accus. with an equal tively and following an Accus. with an equal tively and following an accus. We find them lying in a field amidst dust and dirt.

- 3. The following sentence furnishes us with a good illustration of the full Absolute use of this form. 11 if with sied go in in it with sied go in it with a halter thrown round his neck and with his face east down.
- 4. Sometimes, the Perfect Participle is found having much of the force of a Verbal Noun or of the Infinitive. **[a 1] [a 1] [a**

- 5. In some cases, the Participle becomes practically a Noun. Help are it gan, He hears not my spoken (word), i.e., He does not obey me. Words formed from a jingle on a Verb, in its simple form, and its Causative, are used in this way. gal galge (and) equals "rumour," "hearsay." an aniii, more strictly speaking, an Adjective rather than a Noun, the article referred to being understood. The word means readymade, as contrasted with something made to order.
 - 6. The Perfect Participle, or another word bearing that form, is used in the formation of Compound Verbs. It is found with **चाहना** and **करना**. With the first, we have, e.g., **वह किया चाहता है**, He wishes to do it, meaning very much the same as **वह करना चाहता है**. With the second, **वह किया करता है**, conveying the idea of continuousness or repetition, He keeps on doing it.

Sir George Grierson and Dr. Kellogg consider that these forms are not Participles, but Verbal Nouns. दस बीस स्त्रियाँ सुनीय का दर्यन किया चाहती हैं, Ten or twenty women are desirous of saluting the saint. मैं उससे कुछ कहा चाहता हूँ, I wish to say something to him. गाड़ी आया चाहती थी, The train was on the point of arriving tia दिन बहुत से लोग आया जाया करते हैं, Day and night many people keep coming and going. यह किया करी, Keep on doing this.

Note the following also. At aut stan agi usi रहना चाहिये, What! ought he to remain there doing nothing?

- 7. A few other sentences are given to illustrate some further uses of the Perfect Participle or of forms identical with those of the Perfect Participle.
- a. दस पन्द्रह बरस हुए यहाँ आकर रहने लगा, It is some ten or fifteen years since he came and took up his abode here. This is a common and very useful idiom. दस दिन हुए कि, It is ten days ago that...
- b. **an Hi and min E**, They are going along in the forest. **ag Hth she** was (slowly) dying. Probably, neither these nor the forms in the following sentences are Participles.
- c. वह चले जाता है, He is going along. मैं तुम से यह कहे देता हूँ, I say this to you.

conjunctive Participle. पूर्वकालिक क्रिया.

227. Forms The Conjunctive Participle may consist of the stem of the Verb alone, or may have added to it at, a, or ata. Thus, from sin, the forms are si, siat, siah, siah, sometimes forms are met with ending in a, aa and z, e.g., sia, siah, aft. These must be regarded as dialectical forms, rather than as standard Hindi.

Of the forms given, that terminating with at is the one most widely and commonly used at the present

time. The form with a was far more used some 40 or 50 years ago than at present. The simple stem form is by no means uncommon, and the arta form is occasionally found. If there be any difference in the use of these various forms, it is this, that the stem form is preferred when the Conjunctive Part is very closely related to the following Verb. In some cases, the two might be taken for a Compound Verb, e.g., a yial. This, we have seen, does become a Compound Verb in the contracted form art. Notice a tari, having taken, go: here, frequently, the meaning is, Take (it) along.

The Conjunctive Participle finds its main use in the avoidance of two Verbs in the same sentence. Where we should say, "He went there, called a servant, and said," the Hindi would neatly express it by वहाँ जा नाकर का बुलाकर कहा.

228. Idiomatic Uses.

Temporal. The Hindi name, qaanlea fau, the verb which deals with past time, is, on the whole, more correct than the English name, Conjunctive, for, generally speaking, the fact referred to in this Conjunctive Participle is something which precedes the action of the main Verb, not something which occurs at the same time, e.g., ari mat sur Having gone there, he gathered them all together. ut Having gone there, he gathered them all together. ut Having cone into the house, what did he see? Here an against yard and, Having called the minister, he began to enquire on the house of the participant of the house, what did he see? Here an against yard and have come.

This is the more common force of this Conjunctive Participle, but at times it does indicate something which takes place contemporaneously with the act indicated by the main Verb, or in another way declares what is conveyed by the main Verb. Thus, **34ai 444i at at at this is the more common force of this Conjunctive Participation

This is the more common force of this Conjunctive Participation

This is the more common force of this Conjunctive Participation

This is the more common force of this Conjunctive Participation

This is the more common force of this Conjunctive Participation

This is the more common force of this Conjunctive Participation

देकर बतलाया, In his answer he explained. He did not give him an answer, and then explain; the answer was the explanation.

229. Adverbial The Conjunctive Participle is not infrequently used with Adverbial force. **HIBLIT ETAIL**ati, Do it ecutiously, or with great care. **Invau**ata sin **Invaire**ata in **Invaire**ata in **Invaire**specially about this.

230. One idiom is worthy of notice, viz., the use of बढ़कर, with the force of the comparative degree, e.g., यह मुफ से कहीं बढ़कर है, She is ever so much better than 1. इस दे बढ़कर काई किव नहीं मिलेगा, You will find no greater poet than he. माँगने से बढ़कर काई अधम काम नहीं है, There is no meaner occupation than begging.

A pleonastic use of **a**(**a**), greatly affected by writers, now and again, especially some commentators, etc., is only noticed to warn the student against the adoption of it. **un** ata **yth ythra ythra an aga tru against** the adoption of it. **un** ata **i** in a lie attached to the performance of one's duty. Such ungrammatical affectations should be shunned.

Where a double Verb be used, जान बुभ, समभ

बूभ, etc., in this Conjunctive Participal form, the suffix is only added to the second Verb. जान बूभ कर उसने ऐसा किया, He did it knowingly, i.e., deliberatety खा पीकर वे सा गये, Having eaten and drunk, they went to sleep.

Two or more phrases, constructed in this way, may be used in the same sentence. In such cases, different forms are commonly employed, e.g., tinata a same sentence of the same sentence. In such cases, different forms are commonly employed, e.g., tinata a same sentence of the same form a same form the bow from his hand and having strung it, fixed an arrow on the string. Sometimes, however, the same form is repeated. Use the same form is repeated in the same form is repeated. THE NOUN OF AGENCY. कतृवाचक संज्ञा.

The form with **EIII** is not much used, that employing the suffix area is the one generally current, This suffix is added to the inflected form of the Infinitive.

The Noun of Agency, in the case of Active Verbs, indicates the "doer;" with Neuter Verbs, the one who experiences the state expressed by the Verb. This Noun of Agency is used for both persons and things, for masc. and fem., वाला and वाली Thus, लिखने-वाला. लिखनेवाली. a writer : सानेवाला. सानेवाली. a sleeper.

Actually, these words are Adjectives of two termi-

natians, e.g., उसके जानेवाले दास, His servants who were going. But, in common with many Adjectives, they may become Nouns, and are then fully declined as Nouns. These Nouns of Agency retain their verbal power of governing other Nouns in the Accusative Case, e.g., अनेक देश की भाषा पहिरावा चाल व्यवहार जाननेवाले. Those whe know the languages, dresses, manners and customs of many countries.

One special use of this Noun of Agency calls for notice. It often carries with it the idea of immediate futurity. वह जानेवाला है, He is about to go. ग्राप इसी मास में शिमले की यात्रा करनेवाले हैं, He is about to make the journey to Simla this month.

It may be mentioned here that **aim** is not only added to the inflected Infinitives, but to Nouns also, e.g., **uraname**, Westerners. **ariami an**, To the people of that place. **graname**, that ... who lives at Brindahan. **3-a uraname**, His later books. Some may not approve of these forms, but they are at times used by quite good writers.

EITER (contraction for **EITER**) is idiomatically used to express what must inevitably come to pass. It is also used of a person in the sense that, he's a coming man, i.e., destined to become great.

THE CONTINGENT FUTURE. समान्य भविष्यत्. 232. This Tense is formed from the stem of the Verb, with the additional endings given in the Paradigms. With open root, य is often used instead of ए, e.g., जाय, pl. जायँ, for जाए, जाएँ. The ऐ for ए, as in चले, चलें, is a somewhat dialectical form, but is in frequent use by some writers.

The Hindi name for this Tense, सम्भाव्य भविष्यत्, the Possible Future, well represents its general character. It expresses that which may be.

Its main uses are probably included in the following division. It may express:—

- 1. A condition.
- 2. A possibility.
- 3. A wish.—Optative.
- 4. An interrogation.

5. With the force of an Absolute Future.

In modern Hindi, there is a very marked tendency to use either two Contingent Futures or two Absolute Futures in a sentence where logical exactness would demand one Contingent and one Absolute Fut., e.g., आवं तो देखेंगे, If they come, they will see. The said is conditional and quite problematical. This uncertainty is rightly expressed by the Contingent Future, but the statement made, that if this conditition be fulfilled "they will see," has no uncertainty involved; and therefore in this case, the use of the Absolute Future seems perfectly correct. Most writers, however, at the present time would in this sentence use either two Cont. Futures, आवंती देखें, or two Abs. Futures, आवंगे तो देखेंगे . One is led to compare the corresponding disinclination in England to employ the Subjunctive, e.g., If he comes, I will see him, instead of, If he come. I will see him.

233. 1. Conditional. The conditional clause may be introduced by यदि, जो, if; जब, when, or some similar word, or may stand alone. यदि जाए तो उसे मालूम होगा, If he go, he will ascertain. जब ग्रावें मुफे खंबर देा, When he arrives, let me know. जाऊँ तो देखूँ, If I go, I shall see.

This Contingent Future in the protosis may be followed in the apodosis by an Imperative, an Absolute

Future, or by another Cont. Future. अगर बोलने में इन पाँच बातों का विचार रक्खा तो बहुत आफ़तों से बचे रहो, If in speaking you be eareful about these five things, you will be saved from many troubles. (Notice that the second Cont. Fut. is equal in meaning to an Absolute Fut.). यदि तुम्हारा क्रोध शान्त न हो तो अपने मन से कहो, If your anger does not calm down. then say to yourself, कहूँ तो क्या कहूँ, If I speak, what shall I say? जब तक उसका पकड़ कर नाश न करें तब तक सुख से दिन न कटें, Until he seize and destroy him, the days will not pass happily.

Sometimes, the conditional clause comes second in the sentence. इस लिये दूसरों के साथ वैसा ही बरताव करो जैसा कि तुम चाहते हो कि वह तुम्हारे साथ करे, Therefore deal with others as you desire that they should deal with you.

234. 2. Possibility. That which may happen. Hin that all and and are the graded have I performed that I should have the possibility of passing my time in happiness? The king may take his life are will will all are today or after a few days. Elements whether it be so or not. Here a family and are the some today or after a few days.

मावे, It is possible that the pundit may come. बात खुल जाए, This may mean, Should the matter become manifest. or, it may about equal the force of the Absolute Future, and mean, The matter will out. जहाँ तक बन पड़े, As far as possible.

235. 3. Optative. Hi चाहता हूँ कि पुत्र यशस्वी हो, I desire that my son may become illustrious. Hi नहीं चाहता कि उसकी उन्नित रुक जाय, I do not wish that his progress should be hindered. यह तथा हमारी अन्य नुटियाँ यदि समा की जाने याग्य हों तो समा की जायँ, This and my other failings, if they be fit to be forgiven, then may they be forgiven. जितने दिन तुम अपने भाई बन्धुओं से अलग रहोगे उतने दिन देवता तुम्हारे साथ साथ फिरें और तुम्हारा कल्याण करें,

As long as you remain separated from your kith and kin, so long may the gods be with you in your wanderings and prosper you. **जो काम करे विवेकपूर्वक करे,** Whatever work he do, let him do it with discrimination.

236. 4. Interrogative.

हम कैसे करें, How shall we do it? हम तुम्हें ख़केली कैसे ब्रोड़ दें, How can I leave you alone? उसकी क्या शक्ति है जा यहाँ तक ख़ा सके, What power has he that he should be able to come here? मैं क्या संदेश लिख भेजूँ, What news shall I write and send? मैं कहूँ, Shall I speak? अब वह जाए, May he now go?

237. 5. Equal to Absolute Future. It has been stated above that the Contingent Future is very largely employed in the apodosis where the Absolute Future might be expected, and where the meaning is that of the Absolute Future. There are other cases also where the Contigent Future appears to carry the force of the Absolute Future. He also are if I get (it), I will give (it to you). Et Heat un and if if We will join together and acquire riches. (Unless this be taken as Optative, Let us acquire wealth).

In some instances, an immediate future appears to be indicated. जो बुरा न माना तो एक बात कहूँ, If you will not take it ill, I will speak one word. मैं जा कर देखूँ, I will go and see.

THE ABSOLUTE FUTURE. सामान्य भविष्यत्.

238. This Tense also is formed from the stem of the Verb. \mathbf{m} , masculine singular, \mathbf{n} , feminine, and \mathbf{n} , masculine pl., are added to the forms of the Contingent Future.

The uses of this Tense may be grouped as follows:-

- 1. The Definite Future.
 - 12. The Interrogative.

- 3. The Conditional.
- 4. Special use of होगा.
- 239. 1. The Definite Future. Little explanation is needed concerning this. It is the simple statement that a certain thing will happen. Necessarily, there is uncertainty about the future, but when this is intended to be made prominent, it is generally indicated by a subordinate phrase, e.g., if offers in a subordinate phrase is the subordinate phrase in a subordinate phrase in a subordinate phrase is the subordinate phrase in a subordinate phrase in a subordinate phrase is the subordinate phrase in a subordinate phrase is the subordinate phrase in a subordinate phrase is the subordinate phrase in a subordinate phrase in a subordinate phrase is the subordinate phrase in a subordinate phrase is the subordinate phrase in a subordinate phrase in a subordinate phrase is the subordinate phrase in a subordinate phrase in a subordinate phrase in a subordinate phrase is the subordinate phrase in a subordinate phrase in a subordinate phrase is the subordinate phrase is the subordinate phrase is the subordinate phrase is the s

One or two illustrations are given. यदि लोग मेरी आर देखेंगे तो मैं उसे न कर सकूँगा, People will look at me (lit., in my direction), and then I shall not be able to do it. हम तुम्हारे साथ चलेंगे, We will go with you. हम सेना के वीरों से युद्ध करेंगे, We will fight with the warriors of the army. वेकार लोगों के लिये काम ढूँढ़ने की चिन्ता दूर हो जाएगी, For people out of work, anxiety in seeking work will be far removed.

Generally, where this form is used to express the presumptive Future, the presumption is expressed in some way. **ue signated** and **any any equilibriant form** and **any equilibriant form** also mean, Thinking that you must be in trouble.

240. Intorrogative. The simple interrogative calls for little in the way of illustration. वे क्या करेंगे, What will they do? वह कव आएगी, When will she come?

इतने पर मिल सकेंगा ? Can it be obtained for that?

Often, the use of the interrogatory form indicates a strong negative to the question asked. राजा ऐसा करेंगे? Will the king do such a thing? The intended meaning is, Certainly not. ऐसे पूरवीर भाग जाएँगे? Will such doughty warriors fly? Never. भरत जैसा भाई जगत् में मैं कहाँ पाऊँगा? Where shall I find a wrother like Bharat in the whole world? The implied answer is "Nowhere."

241. 3. The Conditional. This use of the Absolute Future has been referred to in treating of the Contingent Future (Sect. 232). यदि कोई उस समय उन्हें देखेगा तो उन्हें बिलकुल ही जंगली समभेगा, Should anyone see them at that time, he will regard them as altogether uncivilized. में जब तक जीती रहूँगी छोटी बहिन की तरह तुम्हारी सेवा कहँगी, As long as I live, I will take care of you as I would of a little sister. In both these sentences, the meaning of the first Future is that of the Contingent Future.

242. 4. Special use of होगा. The form होगा is frequently used with the force of the Presumptive Imperfect or Perfect. Often it may be considered as a contracted form of one of these Tenses. देरी होने

an कोई कारण तो होगा, There must be some reason for the delay. देश देश में ऐसे कंगाल हें।गे, Such poor people there must be in many countries. उसके समान कोई दूसरा विद्यावान् न होगा, No other man of learning can be his equal.

Not infrequently, होगा is used in an answer with similar force, e.g., वह घर में है ? होगा, Is he in the house? He will be, i.e., I expect he is. क्या किसी दूसरे देश में ऐसे पापी होंगे ? होंगे Will there be such sinful beings in any other country? Yes, there will be.

IMPERATIVE. विधि.

243. This also is from the stem of the Verb. The simple stem for the singular जा, go, for the pl. आरे, is added, जाओ, go.

It has been pointed out that the forms often given in Grammars for the 1st and 3rd persons do not belong to the Imperative. They are simply the forms of the Contingent Future copied out. They belong to the Contingent Future, not to the Imperative, being hortatory, not imperative in their force.

The respectful forms, **कीजिये, कीजियेगा, की-**जिया, though rightly included in the Imperative, are, strictly speaking, not imperatives. They convey not a command, but a request. In **कीजिएगा**, there is ap-

parent affinity with the simple Future as well as with the Contingent Future form, suggesting a comparison with such an English phrase as "Will your honour be pleased to do so." All three respectful forms presuppose the use of MTT, or some similar title of respect.

What has been written about the use of the Pronouns applies fully here, and practically covers the matter of the use of these Imperative forms. The 2nd singular may be wisely neglected as regards using it, although, as already stated, among Indians themselves, it is often used with children, pupils and others, as indicating affection and paternal regard rather than conveying any idea of contempt. The plural and may be used in addressing servants and others in a similar position. Of the respective forms, को जिये is the one most commonly used; कीजिएगा is generally reserved for persons of great dignity; को जिया is but little used. In form, it suggests a 2nd person plural, and appears to be sometimes used in addressing numbers of people together. It is by no means, however, confined to this. I find it used by a girl to her elder sister, and with तू. तू भी चलिया, You go (with me) also. Again, it is used by a king to his prime minister, and with him also a is used, evidently indicating familiarity and regard, the forms दोजिया and (हिया being used.

One or two illustrations of the other forms are

given. जब आप का जी चाहे चल दीजिएगा, Be pleased to go whenever you are inclined to नाव पर चढ़िये, Be pleased to go on board.

A servant speaking to his royal master says, ज्ञाप सुन लीजिएगा, Hear me. मेरी कठोर बातों के लिये मुफे समा कीजिएगा, Pardon me for my harsh words.

It should be remembered that the 3rd plural of the ordinary Contingent Future is also used hortatively. आप मेरी सहायता करें, Render me help.

The Infinitive is also used as a gentle Imperative. **यह करना**, Do this, please.

With **at** and **atl**, and corresponding forms of all the Verbs, for the negative, **an** is used. With the respectful forms, **a** is the correct word, though **an** is occasionally found.

THE TWELVE TENSES FORMED FROM THE PARTICIPLES.

244. We have now to consider the twelve Tenses formed from the Imperfect and Perfect Participles, six from each. These twelve Tenses naturally fall into six pairs, the first of each pair representing the act as incomplete (the Imperfect Participle), the second as complete (from the Perfect Participle). In either case, the time referred to may be past, present or future, but

the action is either complete or incomplete, respectively, at the time referred to. The point can be easily illustrated by English sentences. He was making it; He is making it; He will be making it; He had made it; He has made it; He will have made it. These sentences in Hindi would be rendered by Tenses formed from the Imperfect and Perfect Participles, though, as a matter of fact, there is no Tense in Hindi exactly corresponding with the English Future-Perfect. It is true there is a literal equivalent, उसने उसका बनाया होगा, and the literal translation of this might deceive one and give the impression that we had here an exact equivalent. The literal translation of the sentence is, "He will have made it," not, however, with the meaning of the Future-Perfect, but of the Presumptive Perfect. The sentence does not mean in Hindi that at some future time he will be in the position of one who has done the work, but that the conviction of the speaker is that he has already made whatever is being spoken about. This point is thus elaborated to make the student realize that the Hindi Tenses do not always exactly correspond in meaning and scope with English Tenses which are their nearest equivalents. The student will, however, find that Hindi is capable of giving very full and exact expression, through its Verb, of many niceties, as regards time, etc. When not capable of expression by the Tenses of the ordinary Verb, there are always available various Compounds, very pliable and effective. Take an illustration. We wish to say that a person is coming, meaning that he has already left his house and is actually on the way. The is coming, might express this, but does not necessarily do so, as the sentence is ambiguous, as ambiguous as the English, "Christmas is coming." The Hindi may might express what we wished it to, but might also mean that, he is about to come, or that, he is in the habit of coming. We have, however, only to use the phrase, The is actually on the road.

As we consider the twelve Tenses one by one, it will become manifest that each one does not exactly carry out the functions which are arranged for it in the admirable scheme presented. The symmetry is not quite so exact as at first appears, e.g., the Past Perfect is not exactly equivalent to the English Pluperfect, "he had gone," etc. It may mean that, often it does not. Recognizing these facts, the statement may still be maintained that the Hindi Verb is very scientific in its

arrangement and most efficient. The twelve Tenses under consideration may be thus tabulated:

From the Imperfect From the Perfect Participle. Indefinite Imperfect. Indefinite Perfect.

Participle.

वह खाता, he cats. उसने खाया, he ate.

Present Imperfect.

Present Perfect.

वह खाता है, he is eating. उसने खाया है, he has eaten Past Perfect. Past Imperfect.

वह खाता था, he was eating. उसने खाया था, he had eaten Contingent Imperfect. Contingent Perfect.

वह खाता हो, should he be eating, उसने खाया हो, should he have eaten.

Presumptive Imperfect. Presumptive Perfect.

वह खाता होगा , he must be cating उसने खाया होगा, he must have eaten.

Past Contingent Imper fect. Past Contingent Perfect.

वह खाता होता, had he been उसने खाया होता , had eating. he eaten.

THE INDEFINITE IMPERFECT.

245. That difficulties exist with reference to this Tense may be inferred from the fact that Indian Grammarians appear to be unable to agree about its name. Much of the difficulty possibly arises from this, that the form of this Tense is often used as a contraction for other Tenses.

Some Hindi scholars have gone so far as to take the position that there is no such Tense as the Indefinite Imperfect, but that this form is always a contraction to express some other Tense and that its place is only assigned to it in the scheme of Tenses, for the sake of symmetry. We shall, however, see that the Tense is a real one and quite a serviceable one.

The Tense refers to an action (or experience) as actually proceeding, still unfinished, but contains no reference to the time when the action takes place; it might have been going on in the past, it may be proceeding in the present, it may belong to the future. An English sentence may help to show how reference may be made to an action as actually proceeding, with no reference to the time of its occurrence. "A man speculates, he becomes involved in financial difficulties, he grows desperate, he blows his brains out." It is a suppositious case 'of what may have happened, what may be happening, what may happen at some future time. Somewhat similarly with this Indefinite Imperfect, but with important difference. It is seldom used in a sentence like the above; the Hindi has two clauses, the first conditional, the second indicating something in the way of the outcome from the condition referred to in the first clause, the Indefinite

Imperfect being used in both clauses. **जो जाता वही जानता**, He who goes knows. There is no reference to time, let the condition be carried out, at any time, let a man "go," and the knowledge will be gained. It is in such sentences that this Tense is mostly employed; the application may be to universal truths or to circumstances arising in the life of an individual.

जो जन अपने राजा के। हितापदेश नहीं करता वह मित्र नहीं (होता understood in the second clause, but unexpressed, unnecessary with नहीं), He who does not give his king sound advice, is not his friend. In the following sentence it is not a general truth that is given but the circumstances in an individual life. इनका जो अच्छा परिडत मिलता उसी से ये यह प्रश्न करते, Whenever he comes across a good pundit, he asks him this question. A man speaking of the trouble that "clever" people bring about says, संसार में बुद्धिमान् बहुत न होते तो संसार के कितने काम सुगम हो जाते, If there were not so many clever people in the world, how many matters would become easy.

In the following there may be a reference to the past: if so, the Indef. Imperf. would be used for the Past Contingent, but the statement is fairly general and the Tense is probably the Indef. Imperf.; it means, on your 18

doing so and so, such and such a result would come about. यदि आप कुछ भी उद्योग करते तो शत्रु सब तरफ से विपत्तियों के फन्दे में फँसे बिना न रहते, If you only make the slightest effort, then the enemies will not escape from being entangled in a network of difficulties from all directions.

Not infrequently, the sentence does refer to some special time, but the indications of that reference are not contained in this Tense, but conveyed in some other way, e.g., 34 पिछले दिनों के कर्तव्यों में यदि म चूकते अथवा यों कही कि उस समय के। व्यर्थ न खोते तो आज पळताना न पड़ता, If in the doings of past days he had not failed, or, let us say, had not wasted the time, then there would not be the repenting of today. Here the fact that the reference is to past days is contained in पिछले दिनों, etc., not in चूकते, खोते, पड़ता.

The use of **at,...at,** in sentences similar to the above, is very common.

Occasionally, this Tense is used to express an earnest wish. हे ईश्वर, में भी यदि उनके सदूश हो जाता, Oh, God, if I also could become like him.

246. Sometimes the force of this Tense is not altogether unlike that of the Contingent Future, the writer evidently having in his mind something which has reference to the future and not to a matter which has no reference to any particular time. **uc E HITI GR TOWN**All the power,

I would make you happy this very day. **uc G HETT**The make you happy this very day. **uc G HETTT**The make you happy this v

247. Sometimes it is equivalent in meaning to the Present Imperfect. It should be noticed that sometimes the form practically stands for the Present Imperfect, because there is a नहीं in the sentence, and with नहीं the है may be idiomatically omitted. उससे जिसका मारते वह तुरंत दुकड़े दुकड़े हो जाता, Whoever he smites with this that man is immediately shivered to atoms. सत्संग से कान बड़ा नहीं हो जाता और कुसंग से कान नहीं विगड़ जाता? By companioning with the good, who does not become great, and who does not go astray who companions with the bad?

248. Now and again it is about equivalent to the Past Imperfect. तब तो जिधर से ताड़का की आवाज पाते उधर हो वे तीर चलाते, Then from whichever direction they were hearing sounds of Taraka, thither they were shooting their arrows. जूता बनाकर अपना

गुज़र करते और जा समय उस काम से बचता था उसे भगवतभजन में लगाते, He was corning his living by making boots, and the time that was left him from his work he was devoting to the worship of God.

249. Sometimes, the Indefinite Imperfect is equal to the Past Contingent Imperfect or Perfect in force. यदि वह चाहता तो काई अप्रिय बात न करता, दूसरे लोगों की तरह वह भी मीठी २ ठकुरसुहाती बातें angal, Had he so desired, he would not have given utterance to unpleasant words but, like others, would have said sweet things that would please his master. यदि उस समय काई ऐसा लेखक होता तो अवश्य अपनी भाषा में कुछ न कुछ लिखता ख़ीर हमें उस समय की भाषा का कुछ नमूना मिलता, Had there been such a writer at that time, he would surely have written something or the other in his own language and we should have possessed a specimen of the current language of that time. यदि मेरे राजा उसे न मार डालते तो यह तुम्हीं का अपना शिकार बना डालता, Had not my king slain him, he (this one) would have made you his prey. यदि में जानती तो मैं भी वैशाही करती, Had I known, I also would have done likewise.

250. Occasionally, this Tense becomes almost equal to an Infinitive or Verbal Noun. दो ही उपाय थे, या

तो मेल करते, या दग्ड देते, There were two expedients, either to conciliate or to punish (them).

251. Very often, when the Past Contingent Future is used, the full form is not repeated in the second clause; this Indefinite Imperfect takes its place. This will be illustrated under the Past Contingent Perfect Tense.

INDEFINITE PERFECT. सामान्यभूत

252. The most common use of this Tense is to express the simple fact that something was done, or that something occurred, in the past, without any indication as to the exact time when it occurred. The Tense might well be called "The Vague Past Tense." Any information about the time when, is indicated not by this Tense, but by some additional words of the sentence, e.g., gan all such English phrases as "he went," "he did it," "he said," etc.

The uses of the Tense may be given as below:

253. 1. Indefinite Past. वहाँ बहुत से लोग मर गये, Many people died there. किसी ने कहीं कहा, Somewhere or other some one said. प्रपने २ घर छोड़ कर भाग गये, They left their houses and fled.

Definiteness if often given by other words in the

sentence. **ag and and num** He went yesterday. **दस att gu tion a ago** that the king went up (against him).

- 254. 2. Sometimes this Tense about equals the Present Perfect. आप ने कब से जाना कि रामानन्द आने वाले हैं? Since when have you know that Ramanand was coming? The meaning is quite evidently, "have you known?" not "did you know?" क्या मेरी आजा तुमने मानी, Have you obeyed my order?
- 255. 3. Sometimes it bears a meaning in which the force of the Contingent Perfect plays some part. It really becomes a kind of Future Contingent Perfect, indicating the possibility of something that will have happened in the future.

 ale as in the future are as it is any way it should have been obtained, apart from devotion it will not remain firm. And when such a religious position shall have come about, then ignorance will have come in.

 are as in the future.

 become king, then no one will make the slightest fuss.
- 256. 4. Closely akin to the above, is the use of the Tense as found in Proverbs and similar pithy sayings. The force then is, should such and such a

thing have taken place. **जीत लिया तो हार गया**, **हार गया तो मर गया**, If a man has won he has lost, if he has lost he's a dead man (referring to the fate of those who go to law).

THE PRESENT IMPERFECT. सामान्य वर्तमान

257. In the case of perhaps all these Tenses which are formed from the combination of a Participle and some auxiliary, a consideration of the two parts separately often renders considerable help in understanding the exact force of the Tense. Take the present, e. g., as feed and some auxiliary, i. e., as feed and some auxiliary, i. e., He is. What is he doing? writing. He is the man who is at present writing.

With Neuter verbs. caution is necessary as to the exact meaning. **at sinit** may be correctly translated, "he is going," but what exactly does this mean? In English, the general meaning would be, "he is about to go," and it might be, he is actually moving on his way. In Hindi, the latter is the true idea involved in the Tense, though it might mean the former. **at sinit** may mean (1) He is actually on his way (2) He is in the habit of going (3) He is about to go.

The following uses may be noticed. One sentence

to illustrate each may suffice, as this is a very simple Tense.

- 1. The Actual Present. (The action going on at the present moment). वह सोता है, He is sleeping
- 2. The Habitual Present. वह क्या नौकरी करता है? What work does he do?
- 3. The Imminent Future. मैं स्नागे चलता हूँ, तुम सेना लेकर स्नास्रो, I am going ahead; you collect the army and follow.
- 4. The Historic Present. उन्होंने क्या देखा कि एक यह कहता है, एक वह, श्रीर सब के सब श्रापस में भगड़ा करते हैं, What did he see? One is saying this, another that, and they are all quarrelling among themselves.

Very occasionally, the Present Imperfect is loosely used for the Contingent Imperfect, e. g., **南 तरा गुरु** सब जानता है तो ... If your guru knows everything then.....(जानता है is evidently equal to जानता हो).

THE PRESENT PERFECT. आसन्भत.

258. Little need be said about this Tense; its use is quite simple. It has not the same variety of idiomatic uses which are common with some of the Tenses.

It is equivalent to the English Perfect. H आया हूँ, i.e., (Here) I am, having come, i.e., I have come. जो उसने लिखा है सा यही है, This is what he has written. आप की सब बाते उन्होंने मानी हैं, They have obeyed all your words. राजा अब आये हैं, The king has now come.

Occasionally, this Tense is used where we might expect to find the Indefinite Perfect. ज्यास वाल्मोकि के बाद हुए हैं, Vyas came after Valmiki. As Valmiki passed away many centuries ago, one might have expected to find हुए not हुए हैं. Similarly, हम इन से दो एक बार कानपुर में मिले हैं, I met him once or twice in Caunpore. We should, however, notice here that, in English, we might use this, e. g., I have met him once or twice, instead of I met him once or twice. Probably, the reason of the construction, both in the Hindi sentence and in English, is this that the point under consideration is not the actual meetings; but the present slight familiarity with the man that rests on the fact of having met him once or twice. The मिले has more of its distinctly participial force than is usual in the Present Perfect.

In many sentences in which the form at first sight appears to be the Present Perfect, a little consideration

will show that it is actually a Participle with the Present Tense of the verb "to be." Thus, at a thread una sure and about themselves before the house, but. There are five men sitting (ab ga) in front of the house. at years fat all fat get) in front of the house. at written? such a get gena fat gena fat get gena fat is the Participle (fat get). The sentence really means, at fat all fat get gena fat ? In the second sentence, we have the true Present Perfect.

THE PAST IMPERFECT. अपूर्णभूत

- 259. This is perhaps the simplest and clearest of all these twelve Tenses. It bears two shades of meaning.
- 1. वह यह करता था, 'At some past time he was actually doing it.
- 2. The same sentence may mean, He was in the habit of doing it. This would be more distinctly expressed by at ut faul at a tall.

Probably, all the uses of this Tense are included in the above, though slight modifications of meaning or force may be introduced by means of other words in the when did he ever give anything to anybody? The force of the Participle is here very weak, the meaning being that never did he do a generous act to anyone.

THE PAST PERFECT. पूर्णभूत.

260. According to the scheme of the Tenses, this ought to equal the English Pluperfect. As the Past Imperfect represented the subject of the verb in the past as actually engaged in the action indicated by the verb, so this Past Perfect should represent him as being in the position of one who had already completed the action, i. e., Past Imperfect, he was + writing, i. e., he was writing; Past Perfect, he was + having written, i. e., he had The Hindi guina, however, does not definitely, express this; it does not, generally, as does the English Pluperfect, express the fact that something had been completed before another event occurred, but simply states the fact that something did occur in the past. The main difference between this Tense and the Indefinite Perfect (सामान्यभूत) is this that this पूर्ण-भूत indicates a more remote past. This Tense may, and at times does, equal the English Pluperfect, but does not do so as a rule.

The following sentence illustrates the use of this Tense as a full Pluperfect. उनके बड़ा मानन्द हुमा क्योंकि जब से रामचन्द्र जनकपुर में माये थे तब से उन्हें देखकर सभां की यह लालसा हुई थी कि किसी तरह जानकीजी का ब्याह रामचन्द्र के साथ हो, They greatly rejoiced, for, since Ramchandra had come to Janakpur, having seen Ramchandra, the desire of all had been that in some way or other Janki might be married to Ramchandra.

In the following sentence, the addition of gannindicates that the writer recognizes that the Past Perfect alone does not necessarily carry the force of the Eng. Pluperfect. ucifu 344 HIT siend Hamilton, Although by killing him, the promise of Chanakya had been fulfilled, nevertheless he considered that.....

In the following, the Tense is evidently used as about equivalent to the ordinary Indefinite Perfect. We have, उन्होंने उनका समभाया था, and then, as the reply, उन्होंने कहा था कि हे नाथ. Evidently, both indicate simply a somewhat remote past. He explained to her... She said... Again, उसका हमने पढ़ा था और उसका ढंग भी हम के। बहुत पसन्द आया, I read that book,

contengent imperfect. सम्भाव्य वर्तमान.

261. The Hindi name, "the Possible Present," admirably expresses the functions of this Tense. The componant parts,—the Imperfect Participle and the Contingent Future,—clearly indicate its general force; the action indicated by the Participle may be taking place. Whereas the Contingent Future more often refers to the future than the present, this Contingent Imperfect more frequently has reference to something that may be occurring at the present time.

चाहिये जहाँ भगवान के भक्त रहते हों, Regard that country as holy where God's devotees may be living. In simple English, where God's devotees are living.

The principal uses of the Tense are as follows:-

- 1. It may refer to an action as possibly taking place now or in the future. The Dubious Tense.
 - 2. With a force closely akin to the Present Imperfect.
- 1. यदि मेरे प्राण देने से पित का मंगल होता हो तो में प्राण देने की तैयार हूँ, If by the giving of my life my lord's good may be effected, then I am willing to give my life. यह विचार तक मन में नहीं स्नाता कि वे सूरदासजी का कुल तक न जानते हों, I cannot frame the thought in my mind that they should not have even known what caste (or family) Sûrdâs belonged to चाहे वह स्नाप उस पर न चलता हो, Even though he should not be walking according to that (rule) himself. विरोध न होता हो, If it be not contrary to.....
 - 2. Sometimes, the Contingent Imperfect is used in Hindi, where in English we should use the Present Imperfect. ऐसे शब्द न आने पावें कि जिन का व्यवहार हिन्दी में न होता हो, That no such words may obtain a place the use of which may not exist in Hindi. We should say, in English, does not exist.

THE CONTINGENT PERFECT. सम्भाव्यभूत

- 262. This Tense sets forth the possibility of something having been done in the past, not of being done, as with the Contingent Imperfect, but as having been done. In the second place, as we have seen that the Contingent Imperfect sometimes about equals the Present Imperfect, similarly the Contingent Perfect in some sentences is about equivalent to the Present Perfect.
- 1. Dealing with the possibility of something having happened in the past. सम्भव है कि उन्हों ने साहित्य-लहरी सूरसागर के कुछ ही पीछे बनाई हो और सूरसागवली बनाने का विचार उनके चित्त में बहुत दिन परचात् उठा हो, It is possible that he may have composed the Súrsáyar shortly after the Sáhitya-lahari and that the thought of writing the Súrsáráwali arose in his mind a long time later. यह नहीं कहा जा सकता कि यह परिवर्तन एकाएक हुआ हो, This cannot be said that this change may have come about suddenly. जो कभी किसी ने देखे सुने भी न हों, Which (wonderful deeds) no one may have ever seen or heard of इस काम के उन्हों ने शायद पसन्द किया हो, Perhaps he may have approved of this work.
- 2. Very frequently this Tense occurs with similar force in conditional sentences. जो भाव उसके व्या

Hì हों उन्हों का वह वर्णन करे The sentiments which may have filled his mind, of these he may give a description. यदि उसके किनारे सीढ़ियाँ बना दी गई हों, If steps had been made by its side then.... उसका चाहे जितना बड़ा अपकार हो गया हो, No matter how great his wrong may have been. उन्हों ने इस तरह की बातें यदि कही भी हों, Should he even have uttered words of this character.

3. Occasionally, the Contingent Perfect about equals in meaning the Present Perfect. कोई बात ऐसी नहीं रह गई जो उसने न सीखी हो, There is no subject left which he has not learnt.

THE PRESUMPTIVE IMPERFECT. संदिग्धवर्तमानः

263. This Tense and the Presumptive Perfect express the inference that something is occurring, or has occurred. The two Tenses might be called the Inferential Present and Inferential Past Tenses.

THE PRESUMPTIVE PERFECT. संदिग्धभूत.

264. The explanation with reference to the use of this Tense has been given above (Sec. 263).

कोई जीव-जन्तु मार कर खा गया होगा, He must have killed some living creature and eaten it. यह जुन कितना दुःख हुआ होगा, Having heard this, how great must have been the grief. इसा के छठे शतक के पहले ही विद्यमान रहे होंगे, He must have lived before the sixth century of the Christian era. इसी से उसे दु:ख पहँचा होगा, From this he must have suffered great trouble. अब आप लोगों की समभ में पैसे की महिमा आ गयी होगी. Now the might of money will have reached your understanding. कोई बीस बरस का अर्सा हुआ होगा, An interval of something like twenty years must have elapsed. किसी ने सुना होगा, Some one must have heard.

Slight modifications of the force of this Tense occur when found in interrogative sentences and in various other circumstances, but the above illustrations fairly cover the general scope of the uses of this Tense.

THE PAST CONTINGENT IMPERFECT. अपूर्ण-हेतुहेतुमद्भूत.

THE PAST CONTINGENT PERFECT. यूर्णहेतु-

265. These two Tenses are conditional in their general use. In the protasis, the Tense is used to express the condition, and in the apodosis to indicate what would have been the result had the condition been, or not been, fulfilled. In the apodosis, the form of the Tense is frequently contracted and sometimes another Tense may be used. To illustrate:—

ate as a can sin and and variation sin to the sign of the sign of

These Tenses are apparently only used when the condition is represented as not having been fulfilled (or if there be a negative in the conditional clause, then having been fulfilled.) In the protasis, **atc** or some sisimilar word, expressed or understood, will be found.

266. Illustrations of the Past Contingent Imperfect,

मेरे समान जो तुम घर के लोगों को छोड़ दूसरी के साथ रहते होते तो तुम को जान पड़ता कि दो महीने दो बरस से बीतते हैं, Had you left your own people and been living with others as I have, then you would have thought that the two months passed like two years. यदि वह उस समय जागता होता तो प्रपनी बहन के पीछे छाया की तरह अवश्य चला जाता, Had he been awake at that time, he would assuredly have followed his sister like her shadow.

Occasionally, neither the Past Contingent Perfect, nor an equivalent, is used in the apodosis. **यदि कहीं उसकी** यह इच्छा भी पूरी हो गयी होती तो फिर क्या कहना था! If in any way this desire of his had also been fulfilled, then what was there to say?

Now and again, the Past Contingent Perfect is not fully written in the protasis. अगर में चाहता तो आज तक कभी का उसे यसलोक पहुँचा दिये होता, Had I desired, there would have been for him an arrival in the realms of death long enough ago.

THE IMPERSONAL VERB. भावमधान क्रिया.

268. The Hindi Impersonal Verb does not correspond with the English verb bearing that name, but cannot be denied a right to being so called.

In form, it is the same as the Passive Verb, the main verb assuming the form of the Perfect Participle and being followed by the Verb **site**. As there is no Nominative for the Participle or Verbal ending to agree with, the Verb always remains in the form of the 3rd person, singular, masculine. Practically, the participal part of the Verb is the subject, and is equal to a Verbal Noun. **344 GIVIN STATE STATE**, By him eating cannot be done.

A few illustrations of the use of this Impersonal Verb will probably be more helpful than further explanation. Here agi aoi aoi aoi annot sit here. (Lit. By me sitting here cannot be endured). In her alignification, The three of them cannot keep awake the whole night frace of them cannot keep awake the whole night frace of them cannot keep and a the whole night frace of them cannot keep awake the whole night fr

This construction with the Impersonal Verb is not a very common one, but cannot be called very uncommon. It is a construction which the student ought to be familiar with.

THE PASSIVE-NEUTER VERB.

269. We venture to give this name to a very numerous class of Hindi Verbs which are *Passive*, forasmuch as the state of the subject of the Verb is brought about by something other than any action on the part of that subject, and yet forasmuch as the instrument of the action is not generally stated, or indicated, the Verb is not a *true Passive*, in the ordinary acceptance of that term, but has more affinity with a *Neuter* Verb.

For the true Passive, we may have पेड हिलाया जाता है. The tree is being shaken. It may be mentioned, or not mentioned, that it is shaken by the wind or by some person, but the Verb is Passive and the indication clearly made that the shaking is caused by some person or thing; but in the sentence, पेड हिल जाता है (or feen is the form of the Verb is the Passive-Neuter, and attention is drawn only to the simple fact that the tree shakes. It may be logically inferred that the shaking did not originate without some cause, but the Verb makes no reference to any cause and has no concern with the fact as to whether there was a cause or not. The one single import of the Verb is to set forth the fact that the tree shakes. In English, there are a few Verbs which are both Transitive and Intransitive, and thus lend themselves to a similar double use, e.g. The pipe (No reference to, how.) The pipe was burst (suggesting that this was due to a sudden thaw, or something of the kind). Again, The papers were burnt; Passive, the mind of the reader naturally gathering that some one burnt them, or that in a general fire they had been burnt, or something of a similar character. The tire was burning. Here we have a pure Neuter Verb.

In Hindi, we need not use the same Verb in two

ways, forasmuch as a very large number of Verbs is provided for which there are two forms, an Active form, of which the Passive form can be used, and, from the same root as the Active, a Passive Neuter form. Thus खोलना and खुलना. Using the first, we may have the sentence खिड्की खोली गयी, The wicket was opened. We infer that some one opened it. खिडकी खुल गयी, The wicket opened. Here the thought is in no way directed to any consideration as to how the opening occurred, the one fact to which the attention of the writer and the reader is directed is that the wicket became open. So, again, लकड़ी जलायी गयी, The wood was burnt (l'assive). लकडी जल गयी, The wood burnt (Neuter). यह बात छिपायी गयी, This matter was concealed. यह छिप गया. This (man) was hidden. Attention is simply drawn to the fact that the man disappeared; no reference is made or suggested as to his being concealed by anyone.

With the one series of Verbs, the forms, construction and meaning are those of the true Passive Verb; in the other, the meaning has close affinity with the true Neuter Verbs, and the form and construction are not Passive.

One special feature of these Passive-Neuter Verbs demands notice. **STAT** is generally added to the Verb, though it is not invariably used in all the Tenses. With

this sin, however, the form of the Perfect participle is not used (as is the case with the Passive Verb) but the stem, e.g., significantly not significant. Thus we may have the two forms for the Passive-Neuter gently or gensie, to open. In the Indefinite Perfect, the form would almost invariably be gensie, but in the Future the form gensie would probably be more frequently found than gensies. But take another Verb, hard or har sien, the Indefinite Perfect would almost invariably be har neither, but in the Future hard siever would be far more frequent than hard. Speaking generally, we find that the sien is very much used with the Past Tenses, not so much with the Future.

It may be asked, Why this addition of the **siri** at all? Some might state, and do state, that the **siri** is intensive. A careful consideration of a large number of sentences in which this **siri** occurs with these Passive-Neuters, will make it evident that, in most cases, this suggestion about intensity, has no support whatever. A more plausible suggestion is that, as **siri** is indicative of the Passive, its addition to these Verbs is appropriate, for asmuch as they are in one respect Passive. This appears to be a reasonable suggestion. The question still remains, How is it that sometimes the **siri** addition

is used, sometimes not? To this question, the only safe and sound answer appears to be, "Because it is." It is a matter of usage. Why is it that in English we may say "a big house," "a large house," but, while allowed to say "a big girl," the phrase "a large girl" is not idiomatic (in England)?

. A few illustrative sentences of the use of these Passive-Neuter Verbs will now be given.

वह नीचे गिर जाती है, It falls down. (Were it Passive, it would be, गिरायी जाती है, is flung down). स्वभाव सचमुचही नहीं कूटता, One's natural disposition, of a truth, does not leave one. उन्हें शीच्र ही स्वीप्त प्रकार कि चिन्ता चिर आई, Immediately the thought of wife and son possessed him. The Neuter चिरना is used in preference to the Active चेरना, because thoughts come involuntarily. हाय, मेरा सर्वस्व जुट गया, Alas! my all has gone. उस की सूरत पल भर भी उस के मन से नहीं टलती, Her form does not for a single moment pass from his mind. वह भँवर की ओर खिंच गयी, She was drawn towards the whirlpool.

So general has become the use of these Passive-Neuter Verbs that they are sometimes found where the Passive would be more appropriate, as distinct reference unich are summing (the water in the cooking-pot), her hands and feet were scalded by the rice-water. Here, however, one can see a measure of appropriateness in the use of the Passive-Neuter, forasmuch as the instrument was not a conscious instrument. She suffered through the water, the water did not inflict the suffering. In your size in the use of the passive. Here, again, we notice the instruments are not conscious instruments.

Another indication of the favour which these Passive-Neuter forms obtain is found in the fact that some Verbs which are already Neuter assume a shortened form, more characteristic of the Passive-Neuters, e.g., जागना and जगना, e.g., जब वह सातीह तब भी उसके हृद्य में यह आशा जगी रहती है, When she sleeps this hope remains awake in her heart. So with भागना and भग जाना, to flee. भाग गया and भग गया are both used.

No attempt can be made to give a complete list of all these Passive-Neuter Verbs: their name is legion. A few, however, are given below, showing the Active Verb from the same stem, the Passive form of which can be used instead of the Passive-Neuter, when preferred. In considering the Causal Verbs an Active Verb may often be referred to as the Causal Verb from one of these forms, e.g., and, to make, the Pass.-Neut. form being and, to be made, to become made, this, of course, being distinct from the true Passive, to be made, and matter will be referred to again in the section on Causal Verbs.

270. Passive-Neuter. Active. Passive उखंड जाना. to be root-उखाडना उखाडा जाना ed up. बँट जाना, to be distri- बाँटना 99 huted सुधर जाना, to be put बुधारना सुधारा 59 right. राकना जाना. to be stopped. 99 रुधना हॅंध जाना, to be shut 99 in. कट जाना. to be cut. कारना कारा 99 उल्भ जाना, to be entan- उल्भाना उल्भाया 99 gled. उठना. to rise. उठाना उताया 99 जाना. to be dissolv-घोलना 99 ed.

Passive-Neuter. Active Passive. पिचल जाना, to melt. पिचलाना पिचलाया जाना to return to fanial चेतना. consciousness छिट जाना. to be pierced. छेटना 99 छिन जाना, to be picked छीनना 99 out जित जाना, to be conque जीतना 99 ered बच जाना, to be saved. बचाना बचाया 99

This list could be greatly extended. A little observation in the course of regular reading will show what a very important place this class of Verbs takes in Hindi. As indicated by one or two illustrations given above, the use of the Pass.-Neuters is not always sharply distinguished from the use of Passives, but, generally speaking, where the attention of the reader is directed to the state itself, and not to the means by which it is brought about, the Passive-Neuter form is used, the Passive thus being left for cases in which the agents are to have attention directed to them. Thus, us fat answering national, By whom was this ruined? But us fairs national for mothing.

CAUSAL VERBS. प्रेर्णार्थक क्रिया.

271. The first point to notice in considering the Causal Verbs is that many Verbs which are causal in form are not, strictly speaking, Causal Verbs, e.q., प्लाना is a true Causal, it means, to cause to drink, the first form of the Verb being vial to drink; but it is a misuse of language to call कीलना, the Causal of किलना or किल जाना. The former is an Active Verb, meaning, to pare, to scrape, to peel; and there is a Passive-Neuter form of the Verb ळिल जाना. which means, to be pared, etc. The true Causal Verb indicates the causing of another to do something, instead of doing it oneself, e.q., करना (Trans.), to do, कराना (Causal) to cause another to do; but to call a Verb a Causal because it signifies that something is caused to take place, is rather a twisting of language and likely to cause confusion. afiri is Causal in form. but not so in meaning; it simply means, to make. From the same stem there is a Pass.-Neut. Verb. बनना or an ording to be made. and is actually an ordinate nary Active Transitive Verb. And the Causal of this is बनवाना, to cause another to make, to have something made by another.

As in the present section, our chief concern is with the form of these so-called Causal Verbs, bearing in

mind what has been written above, we may accept the loose nomenclature and speak of Causal Verbs, even though they are not strictly so in meaning. We should, however, recognize that even as regards form it might be as correct, or more correct, to regard and, to he made, as a shortened form of and, as to insist on the latter being the Causal form from and. For convenience of treatment, however, we accept the latter course and note the changes of form on that basis.

272. For the sake of clearness, with reference to the force and meaning of these different classes of Verbs, it is suggested that the student might do well in the course of his reading to work out a tabulated list of Verbs on somewhat the lines adopted in the following table.

	SECT. 2/2	CAUS	AL VERBS.		303
Comments of the Party and the	2nd Causal.	gealth, to cause an- other to cause a third per- son to sleep.	चलवाना	करवाना	
	Genuine Causal.	gairtí, to cause an- other to sleep.	चलाना, to eausean- other to move.	actest, to cause un-	analnt, to cause to be made.
	Ordinary, Act. in meaning; Causal in form.	: :	: :	::	बनाना, to make.
	e ive		<u>:</u> :	करना , to do.	: :
	Active Intransitive.	: :	चलना, to move.		• :
	Neuter 1, or Passive- Neuter **	to sleep.			to be made.

304		CAUSAL VERBS.	SECT.	272
2nd Causal.	खिलवाना बिठवाना	भगवाना		
Genuine Causal.	feerial, to cause an- other to cat.	fuzarat, to cause to be beaten. Hutat,	other to flee.	
Ordinary, Act. in meaning; Causal in form.	: :		बिगाड़ना ा बिगड़ाना, to spoil. घरना,	to surround.
Active Transitive.	to eat.	: : : :	: ::	:
Active Intransitive.	ब ब हुन् 1,	HTTTT, to flee.	·	:
Neuter †, or Passive- Neuter **		* · Tuzat, to be beaten.	<u>विगड़ जाना,</u> to be spoilt. * चिर जाना,	rounded.

273. The most simple form of the Causal Verb is in the case of a Verb, the stem of which ends in a consonant preceded by a short vowel; the Causa is often then formed by adding [37] to the stem for the First Causal and [37] for the Second Causal. Thus:—

चढ़ना, to ascend. चढ़ाना, to cause to ascend. चढ़ाना, to cause another to cause a third person to ascend. उठना, to rise. उठाना, to make another rise. उठाना.

As will be shewn, other stems, and even the stems spoken of above, may have the Causal form formed in other ways.

In not a few instances, the idea expressed by the Causal form may be expressed by a single word in English, e.g., uean, to read; uein, to cause another to read, that is, to teach!; sinn, to wake up; sinn, to wake (another person).

With some Verbs in the Causal form, the meaning of the Verb is modified in other ways, besides being causal. e.g., and, to speak, or, to utter a sound; Causal, gener, means to call (34 an general, call him); the understand, the man man mean simply to explain, but probably more often carries somewhat of

the force of our slang phrase, "knocking a little sense into anyone."

Second Causals are not in use with all the Verbs. It will be noted that, what appears as a Second Causal in form, may only be a First Causal in meaning, e.g., again, and; the earlier forms, again and and are not truly Causals in meaning, but Active Transitive Verbs, meaning to play (an instrument), to make. again therefore, simply means, to cause another to play: analy: are not play: analy: are not play another to make. That is, they are, in meaning, only First Causals.

The question sometimes arises with regard to some of these Causals as to the Cases governed by them, e.g., in the sentences, लड़के की राटी विलाझो, or पानी पिलाझो, do विलाना and पिलाना take two Accusatives, or only one? If only one, which is the Accusative, what case is the other word? राटी and पानी are the Accusatives; लड़के की is Dative. The bread is the Accusative, whether I eat it or cause another to eat it. The use of another Causal Verb may help to clear this matter. मैं घर की देखता हूँ, I see the house; मैं लड़के की घर दिखलाता हूँ, I shew the house to the boy.

The idiomatic use of \mathbf{HIGH} involves a similar difficulty. We speak of striking a horse with a whip,

making the horse the Accusative. In Hindi, the whip is the Accusative, the horse Dative. a visit at a square and a visit at the horse with whips. The idiom really works out—They were striking the whips to the horses. Almost invariably, in Hindi, it is the instrument with which the striking is done, that is in the Accusative, the person struck in the Dative.

- 274. The changes made in forming these Causal forms will now be noticed and examples given. Again, the attention of the student is directed to the fact that it is the Causal forms that are now to be dealt with, not the meanings.
- 1. Some of the Verbs, the stem of which ends in a consonant, preceded by a short vowel, form the First Causal by the addition of to the stem, the Second Causal by the addition of to the stem.

वनगा	वगागा	वनवाना
to be made	to make.	to have made.
मुनना	सुनाना	सुनवाना
to hear	totell	to cause another to tell.

Other examples, जलना to burn, मिलना to meet, करना to do, उड़ना to fly, उठना to rise, गिरना to fall.

In the same way, words with an extra syllable.

पकड़ना

पकड़ाना

पकड्वाना

to lay hold of. to cause another to seize, to cause to have seized,

So also सम्माना to understand, भटकना to go astray, बदलना to change, चिपकना to stick (Neut.) चमकना

to shine.

ed.

司

There are exceptions to this rule, e.g.:-

to speak. to cause to speak, to name, to be called or to be named.

275. 2. Other Verbs, with root ending in a consonant preceded by a short vowel, form their First Causal by lengthening the vowel of the root. For the second Causal, the long vowel is again shortened and the usual added to the root.

कटना	काटना	कटवाना
to be cut	to cut	to cause to be cut.
बँटना	बाँटना	बँटवाना
to be divided	to distribute	to cause to be distribute
पिसना	पीसना	पिसाना
to be ground	to grind	to cause to be ground.
बिनना	बीनना	बिनवाना
1. to be woven	to weave	to cause to be woven.
2. to be picked	to pick	to cause to be picked.

चिदना चेदना

छिदवाना

to be pierced to pierce

to cause to pierce.

डलवाना

खुदवाना

खुलवाना

घुलवाना

फिरवाना

मिटवाना

खिँचवाना

फिँकवाना

or फेंकवाना

दबवाना

So also :—

बंधना to be bound

पिटना to be beaten पीटना

to move डलना

खुदना to be dug खादना

खुलना to be opened घुलना to be dissolved फिरना to be turned

मिटना to be effaced

खिंचना to be drawn

फिँकना to be flung

to be pressed

to be weighed

बाँधना बँधवाना पिटवाना

डोलना

वालना घालना

फेरना

मेटना or **मिटाना**

खींचना

or खेंचना

फेंकना

दाबना

or द्वाना

तालना

ा तौलना तौलाना

Similarly, words with an extra syllable :-

उखड़ना to be rooted up उखाड़ना उखड़वाना

दबना

बिगड़ना to go bad बिगाड़ना बिगड़वाना or विगडाना

So उत्तरना, to descend, निकलना, to be turned out, to go out, सम्भलना, to be supported or strengthened. बटरना, to be collected (Caus. बटोरना).

दीखना or दिख जाना to be seen: देखना to see; दिखाना or दिखलाना or देखाना to cause to see; with a second Causal दिखलवाना

276. 3. Verbs with root ending in a consonant, preceded by a long vowel

The Vowel shortened for both First and Second Causals, and an and an added to this modified root in the usual way.

जगवाना जागना or जगना

to awake (Neut.) to arouse or awaken to cause to be aroused.

बालना to speak ा बोलाना

बितवाना alant to pass (of time) बिताना जीतना to yoke

Some of these verbs do not shorten the vowel, some insert of before the xII and II, others have no first Causal in use (or, it would be more correct to say that the First Causal takes the form of the Second Causal) Other irregularities also occur.

Examples.

		दौड़ाना दौड़वाना
फैलना	to spread	फैलाना फैलवाना
बैठना	to sit	बैठाना, बिठलाना, or बैठालना
खेलना	to play	खेलाना वा खिलाना खेलवाना
बाना ं	to sow	बाम्रानाः
भेजना	to send	भिजवाना ०७ भेजवाना
डालना	to throw	डलवाना
मारना	to strike	मरवाना

Etymologically, **मारना** is First Causal from **मरना** to die. म्बीजना to be angry खिजलाना or खिजाना 277. 4. Verbs with an open root.

For the formation of the Causal forms, the vowel is shortened, and commonly **\(\)** is inserted before the **\(\)** and **\(\)** Many of these Verbs present some little irregularity.

पीना	to drink	पिलाना	पिलवाना
सोना	to sleep	मुलाना	सुलवाना
देना	to give	दिलाना	दिलवाना

More or less irregular.

खाना	to eat	खिलाना	खिलवाना
वाना	to sow	बाग्राना	
लेना	to take	लिवाना	
रोना	to weep	रुलाना or	रालाना
सीना	to sew	सिलाना	सिलवाना
ळूना	to touch	ञ्जवाना or	बुला ना

278. 5. Some few Verbs undergo a modification of one of their consonants when changed into Causals.

कूटना or	to be set free	ब्राड़ ना	कुड़ाना, कुड़वाना
कुट जान	रा	-	
टूटना	to be broken	ताड़ना	ताड़वाना or
			तुड़वाना
फटना	to be rent or tor.	ग फाड़ना	
कूटना	to be broken	फाड़ना	फाड़वाना
बिकना	to be sold	बेचना	विकवाना
		or बिका ना	ा बेचवाना
धुलना	to be washed	धोना	धुलाना

The total number of Causal Verbs is very large. Probably most of the methods of their formation are illustrated in the rules given above; but it is more than possible that some few may not conform to any of them.

VERBS FORMED FROM NOUNS, ETC.

279. Some few Verbs are found in Hindi formed from Nouns and other Parts of Speech. These Verbs are formed by the addition of **XITTI**, and remind one of such a phrase in English as "the play was staged," for "putting on the stage."

These Verbs are found most largely in colloquial speech or in verse, but must certainly be regarded as part of the language. A few of them are given below.

दुःखना ० दुखाना	To pain or to cause pain.	From	दुःख
टूढ़ाना	To strengthen, establish.	,,	द्रह
ग्रलगाना	To separate.	,,	अलग
अपनाना	To make one's own.	,,	अपना
नियराना	To draw near.	,,	नियर
नगिचाना	do.	,,	नगीच
	(a corrup	otion of	नज़दीक
पीड़ाना	To pain.	from	पीड़ा
गरमाना	To become hot, or angry.	,,,	गर्म
शरमाना	To feel shame, or make ashamed.	,, ,	गर्म

ONOMATOPOETIC VERBS.

280. Onomatopoetic words are abundant in Hindi. The Verbs are formed by the addition of AIGI to some word, or sound, representing the cry of an animal or some other sound. In this class of Verbs should be placed also the Verbs which do not attempt to imitate some sound, but seek to suggest by sound some special appearance, e.g., चमचमाना, to glitter; डहडहाना, to glow: **4EUZIAI**, to be in a flutter, or fluster. (Compare the similar English attempts in such words as, sparkle, glitter, dazzle, etc.). To what extent these words convey through the ear what is seen by the eye, may depend in some measure on the imagination of the hearer. Indians seem to possess a perfect genius for inventing onomatopoetic words. ytyntial strikes one as a very successful attempt to produce an imitative Verb for, to whisper. So with asasini or asasini, to grumble.

It is interesting to note how nearly identical some of these Hindi and English onomatopoetic words are, e.g., **मरमराना** in Hindi for expressing the murmuring of the wind in trees: in **हिनहिनाना**, we have the neight of English, only the "n" and "h" are in reverse order. As this is a Grammar, not a Dictionary, no attempt will

be made to give a list of the Onomatopoetic Verbs so numerous in Hindi. A few are appended as illustrations.

चहचहाना, To twitter, of birds.

खटखटाना, To rap at, to rattle, a door.

भूँकना, To bark.

चड्छाना, To rumble (as thunder).

मनमनाना, To whistle or whizz.

भनभनाना, To clang.

यरयराना, To shiver.

चिंघारना, To seream, or shriek (also of the trum-

peting of an elephant).

गुराना, To growl (of a tiger).

टपटपाना, To patter (as rain).

कड़कड़ाना, To crackle, or cackle.

compound verbs. संयुक्त क्रिया.

- 281. Compound Verbs abound in Hindi. They vary greatly in their formation and use, but it is not difficult to broadly classify them.
- I. In the first division may be included all those Compound Verbs in which two words are joined, giving, generally, one Verbal idea. The first Verb makes the main contribution to that idea, but the second may modify the force in some way. Of the earlier Verb only the stem is used. This is subject to no changes through-

out the conjugation, and thus the Compounded Verb becomes, both as regards meaning and conjugation, one compound word. Examples, **Hall देना**, to obliterate, to blot out; **मान लेना**, to obey; **जल उठना**, to flare up, either literally, as a fire, or metaphorically, in a rage.

This class may be called Close Compounds.

II. The second class may include those Compounds in which each Verb retains, more or less fully, its own proper meaning. The earlier is often used in its Infinitive form (inflected or uninflected), or the stem alone, the second member of the Compound only being subject to the usual inflectional changes. Examples, sin can to permit to go; tin entry, to begin to weep; are gamen, to finish speaking; 30 uninflection to be able to rise.

This second class may be called, Loose Compound Verbs.

III. The third class includes those Compounds in which the first member is a Noun, or, occasionally, an Adjective, Adverb or Postposition. Examples, समा करना, to forgive; दिखाई देना, to appear; पोछा करना, to follow; पोछे करना, to put behind; प्रच्छा करना, to heal, make well.

This third class may be called Noun-Verbal Compounds.

I. CLOSE COMPOUND VERBS.

282. Whether the origin of these Compounds must be placed side by side with that love of doubling a word which is a characteristice of Hindi, is a question which we need not attempt to decide. Certain it is that these doubles are widely prevalent in Hindi. The second member of the Compound may tone the force of the earlier word, or somewhat modify its sense, but it seldom makes any distinct difference to the meaning. In the partnership, the first word supplies the capital, the second is the working partner; for, although the first dominates the meaning and power of the Compound, the conjugational changes fall entirely on the latter. Perhaps the nearest parallel in English to this class of Compounds is in such colloquial phrases as, I'll give a look at it; I'll take a walk; I'll have a swim.

Dr. Kellogg takes the form of the first word in these Compounds as the Conjunctive Participle. It seems, however, simpler and safer to regard it as the simple stem, as there is nothing of the force of the Conjunctive Participle in the use of the first word. This may be illustrated by the following. This may be illustrated by the following. The two possible meanings, 1. Having eaten, go. Here the Conjunctive Participle, but the two Verbs do not constitute a Compound Verb. 2. Eat away.

This is the Compound Verb, and in this there is no suggestion of the Conjunctive Participle.

Sometimes, the second member of the Compound. may strengthen, intensify, or otherwise affect the force of the earlier word, but in many cases it does not, but can only be regarded as an alternative way of saying what would be expressed by the simple Verb. In Compounds with डालना, and उठना, the difference is frequently very apparent. e.g., वह बाला, He said ; but वह बाल उठा, He spoke up, or, spoke out. Take the following sentence also: रघपति मारे क्रोध के खाग बबूला होकर बाल उठे, Raghupati perfectly furious with anger burst out. In the following sentence, however, who can say that din adds any additional force? इसका वह पहले ही ठीक २ विचार कर लेता है. He gives, in the first place, a very careful consideration to this matter. विचार करता है. would give just the same meaning.

- 283. Some examples of these Close Compound Verbs will now be given, and, where possible, a suggestion as to the force indicated by the addition of the second Verb.
 - 1. and 2. देना and लेना. These roughly convey

the ideas of, giving out, and, taking, repectively. **The first** and **end one** are good illustrations. The first means, to return a thing; the second, to receive a thing back again.

दे देना, ले लेना. to give. to take. कह देना, सुन लेना, to say. to listen. गाड देना. मान लेना. to bury. to obev. to throw लाटा लेना. गिरा देना. to take back. down. to throw डाल देना. ताड लेना, to find out. away. भेज देना. र्ज्ञान लेना. to send. to sieze. चल देना. पकड लेना. to lav to go. hold of. (the meaning कर देना. कर लेना. to do. depends on the context.) ब्रांड देना, to leave. पहचान लेना, to recognize. to cause to सुना देना, समभा लेना. to understand. hear. मिटा देना. to efface, लूट लेना, to sack, to rob. जमा देना. to collect. बना लेना. to but right. खिला देना. to feed. पिला देना. to give to drink.

पहिना देना, to clothe.

284. 3. Jiel. In some instances, this may have a slightly intensive force, but its use in the Passive Verb probably accounts for its general combination with the Passive-Neuter Verbs already referred to. To say that no जाना is "intensive of, or equals, nor " appears to be somewhat futile. गल जाता है. गल गया. गल जायगा. will almost always be the forms found: it would be difficult to find गलता है, गला, गलेगा. The use of sigil differs somewhat with different Passive-Neuter Verbs, being invariably used with some, not so invariably with others.

With Verbs other than the Passive-Neuters, the addition of sign may suggest intensity, but not necessarily so.

Examples:-

जान जाना to get to know. भूल जाना to forget. मिल जाना to meet with. मर जाना to die. हो जाना to become. श्रा जाना to arrive. पी जाना to drink. सा जाना to go to sleep.

With such Verbs, the जाना is more frequently used with some than with others, e.g., Regi, It is obtained, is quite common; with सरना the जाना is generally used, मर गया. not मरा.

No examples of Passive-Neuter Verbs have been given. They may be seen in sufficient numbers in sections 269, 270.

285. 4. sign. This Verb, meaning, to throw, to fling, is compounded with Verbs with which the idea of throwing, or of the addition of force, is appropriate.

फेंक डालना to fling away. फोड डालना to smash. मार डालना to kill. फाड डालना to rend. खा डालना to squander. काट डालना to cut, to hack. तांड डालना to smash. दे डालना to give away (lavishly). खा डालना to devour.

286. 5. पड़ना. The word पड़ना means, to fall, to happen (cf., the English, befall, or "it fell out"), also, to lie. These meanings are echoed in Compounds formed by the addition of पडना.

समभ पडना to be understood.

सुन पडना to be heard.

देख पडना to come into view.

बन पडना to be made.

स्रा पडना to arrive.

जान पडना to be known.

हॅस पडना to fall to a laughing.

गिर पडना to fall. 287. 6. 337. Associated with the idea of, rising up, comes also that of suddenness.

चिल्ला उठना to cry out. जाग उठना to awake.

बोल उठना to speak up चैंाक उठना to start up.

रा उठना to break out काँप उठना to begin sudcrying. denly to tremble.

जल उठना to break out धधक उठना to blaze out.

288. 7. add suggests the settling down to something.

रे। बैठना to give way to grief.

बिगड़ बैठना to persistently go astray.

पूछ बैठना to set to work to interrogate someone.

बन बैठना to become something, and to remain so.

289. 8. 9. 10. रखना. भ्राना and निकलना. These three are somewhat similarly used in such Compounds, but are not so common as those given above.

रखनाः उठा रखना to take up cresponsibility).
रोक रखना to stop.
सज रखना to arrange (a room, etc.)
समक रखना to understad.

लगा रखना to affix.

ख्राना. निकल ख्राना to come out. लाट ख्राना to return. बन ख्राना to be made. हा ख्राना to become.

निकलना to come out. जा निकलना to go out. चल निकलना to start off.

The Compounds with **tent** will be noticed under Class II. Some of them belong to this Class I, but it may be well to consider them all together.

290. Synonymous and Alliterative Compound Verbs.

There may be mentioned under this Class I the Verbs Compounded of two stems, having similar meanings or similar in sound. Those brought forward here are generally used with the second stem having the addition of the sign of the Conjunctive Participle. It bears the meaning of this Participle also, and has Adverbial force in a sentence. Sometimes such Verbs are used in the Imperfect Participial form, and then the Participial termination is used with both stems, e.g.,

1. Two stems indentical or similar in meaning.

I wo stems indentical or similar in meaning.

I wowingly, deliberately.

देख भालकर, eautiously, looking carefully.

साच समभकर, with understanding, having thought it over.

सिखा पढाकर, having instructed (them) carefully.

2. Sometimes, similarity of sound, especially in the way of alliteration, is combined with similarity of meaning.

समभ बूभकर, Understandingly.

समभा बुभाकर, Having fully explained (to them).

Having broken and smashed things. (The Hindi of, "a bull in a China shop,")

291. Causal Compound Verbs. Somewhat similarly we find an ordinary Verb followed by its Causal form, the two thus combined conveying a comprehensive and general meaning, e.g., दे दिलाना, कर कराना, thus शरीर रहेगा तो कुछ प्राथिष्य कर कराके फिर शुद्ध हो लेंगे, If I remain alive (lit., if the body remain) then, having performed or effected some expiation, I shall again become (ceremonially) clean.

In such instances, the Causal is not usually pleonastic, the meaning intended and expressed being, whether done by the person himself or through another.

LOOSE COMPOUND VERBS.

292. These Verbs differ widely from those just considered, as regards their structure. The two Verbs in these Compounds are closely associated rather than compounded, and not only as regards structure but as far as meaning also is concerned, the union is not so close. One might say that each of the two Verbs retained its own full meaning, were it not for the fact that some of the Verbs used in these Loose Compounds do not possess or retain their definite meaning outside of those Compounds.

The two Verbs in the two Verbs retained its own full meaning, were it not for the fact that some of the Verbs used in these Loose Compounds do not possess or retain their definite meaning outside of those Compounds.

The two Verbs in the sense of the two Verbs retained its own full meaning, were it not for the fact that some of the Verbs used in these Compounds.

The two Verbs retained its own full meaning, were it not for the fact that some of the Verbs used in these Compounds.

The two Verbs retained its own full meaning, were it not for the fact that some of the Verbs used in these Compounds.

The two Verbs retained its own full meaning, were it not for the fact that some of the Verbs used in these Compounds.

The two Verbs retained its own full meaning, were it not for the fact that some of the Verbs used in these Compounds.

The two Verbs in the two Verbs retained its own full meaning, were it not for the fact that the fact that the two Verbs retained its own full meaning, were it not for the fact that the fact

293. In considering the Verbs used in these Compounds, we will at the same time note any other uses which are special to the words. The following Verbs will be considered.

Verb.	Form in which the associated Verb is used.	Name given to the Compounded Verbs.
(1) सकना	With the stem.	Potentials.
(2) चुकना	ditto.	Completives.
(3) . लगना	Inflected Infinit- ive.	Inceptives or Inchoatives.
(4) देना	ditto.	Permissives.
(5) पाना	ditto.	Acquisitives.
(6) करना	With Gerund (in the form of the Perfect Participle.)	Frequentatives.
(7) रहना	With the Imperfect or Perfect Participle.	Continuatives.
(8) जाना	ditto.	Progressives or Continuatives.
(9) चाहना	Uninflected Infi- nitive or Ger- undive form.	Desideratives.

294. (1). **HAFT**, Potentials. **HAFT** is added to the stem of the Verb with which it is associated, the earlier Verb remaining unchanged throughout, in the same manner as with the Close Compounds. **HAFT** yields the meaning, to be able, and is conjugated as an ordinary Intransitive Verb.

यह क्या कर सकता है, What can he do? वे नहीं चढ़ सकेंगे, They will not be able to go up. उसकी स्त्री नहीं जा सकी, His wife was not able to go. उसी से यह नहीं किया जा सकता है. This cannot be done by him.

Occassionally, the inflected form of the Infinitive may be found used in this Compound, but this is antiquated and should not be adopted. as as framed and, He is not able to get out.

Verb **gan of the used up**, is in use, also the Causal **ganon**, but the use of **ganon** is mainly confined to use in these so-called Completives, **ganon** being added to the stem of the earlier Verb. The Compound thus formed becomes an ordinary Intransitive Verb, and indicates the completion of the act signified by the first word of the Compound.

वह खा चुका, practically, He has finished his meal. अव वे कर चुके होंगे, They will have finished doing (it) by now. में कह चुका हूं, I have said my say. In many instances, the English "finished" represents a more definite statement than the Hindi चुकना often carries. It is frequently used where we might use a simple past tense of the earlier Verb, e.g., में सुन चुका हूं, would often mean only, I have heard (it). हो चुका, It's done.

296. (3) लगना, Inceptives, occasionally called Inchoatives.

even is not used alone, with the meaning of "to begin."

In these Compounds, the exact meaning is not, to begin, but, to become engaged in. The inflected form of the Infinitive with which it is used, is probably the Locative Case, with the H unexpressed, and therefore as used equals as used. He became occupied in reading.

These Compounds, in common with the two already mentioned, are conjugated as Intransitive Verbs, *i.e.*, the Nominative with \overrightarrow{a} is not used with them.

In not a few sentences, the **QUAT** though used quite idiomatically and correctly, is somewhat redundant, no

special force being indicated. In Hindi, anger offen, is often found where we should say, He said, not, He commenced to say. In the majority of instances, however, it does convey some idea of the commencement of some act, and in some cases has the full force of "commenced to." e.g., and if offen and go, i.e., to visit, some person or place.

297. (4 and 5) देना and पाना, Permissives and Acquisitives. These two sets of Compounds, though in one sense contrasted, have much in common, and may conveniently be considered tegether. They are used with the inflected Infinitive. This may be regarded as the Dative Case, with the an or a length unexpressed. Thus उसने उसका जाने दिया, might be more fully written, उसने उसका जाने के लिए...... दिया, He gave (permission) to him to go, and so as जाने पाया might, similarly, be more fully written उसने जाने के लिए...... दिया, He obtained (permission) to go.

An unexplained inconsistency is found in the use of these two Verbs, whereas the Nom. with $\hat{\mathbf{a}}$ is used in the case of $\hat{\mathbf{c}}$ with Tenses formed from the Perfect Participle.

though, in meaning, it is as transitive as देना, and takes the same construction when not in a Compound. We find तुमने अर्थ-गौरव के। हाथ में नहीं जाने दिया, You have not allowed profundity of meaning to escape from your hand, i.e., You have not allowed your fluency to carry you away, but रचना किसी स्थान पर शिथिल नहीं होने पाई, The composition has not in any place allowed slovenliness to obtain a place.

298. (6) **करना**, Frequentatives or Continuatives.

In this Compound, **करना** is used with the Gerund having the form of the Perfect Participle. **वे नित यह**

कहा करते हैं, They always go on saying this.

Frequentatives is a better name than Continuatives for this class of Compounds for even where the idea of continuity is present it is generally a continuity of repetition, e.g., af ut ut and at a sin the habit of coming to the house. And the house and the house are the coming to the house. In everything you thus go on crossing me.

299. (7). रहना, Continuatives.

This may be used with the Imperfect or Perfect Participle of the accompanying Verb. as साल भर

पढ़ता रहता था, He kept up his studies during the whole year. वह बैठी रहेगी, She will remain seated.

The question has been raised as to whether these are, strictly speaking, Compound Verbs, and not rather the ordinary use of ten in close proximity to the preceding Participle. The question is one deserving consideration; but, on the whole, the application of the word, Compounds, does seem justifiable: there is not only proximity, but very close connection. In the sentence, as variable, there are two distinct verbal ideas, namely, he is perplexed, there are two distinct verbal ideas, namely, he is perplexed, he goes on his way, he might do either alone. But in, as and teal the two Verbs have combined in one idea. If the two were separated, we should have the meaning, he goes, he remains.

Two or three examples of the use of this Compound are given. उसके उपरान्त ये महाराज गजचाट पर रहते रहे, After this, the Brahman continued living at Gaoghat. भगवान तुम्हारा धर्म बनाए रहें, May God continue to maintain your righteousness. शरीर का निवाह होता रहे, That there remain sufficient support for the body. उसके पीचे २० वरस जीती रही, After that she remained alive for twenty years.

as regards construction (viz., with the stem of the preceding Verb), it is a Close Compound, but in meaning it is somewhat akin to the Loose Compounds, as the tear retains its very distinct force. It indicates that the action referred to in the earlier Verb continues,—it has commenced, it is still incomeplete. The is coming, i.e., is actually on his way, has started but not yet arrived. The king was actually speaking when.....

In some sentences, the force of **ten** is weaker than in others, but the idea of continuation is generally present. **Fin** are you thinking about?

301. (8). जाना Progressives or Continuatives.

With **जाना**, the preceding Verb is joined in its Participial form, Imperfect or Perfect, and agrees with it in Number and Gender. It is not easy to distinguish the exact difference in meaning between a Compound in which **cen** is the second Verb and one in which **जाना** is used. It may be that with the former the emphasis, if emphasis there be, is on the continuation of the act

or the condition, with the latter there may be an underlying hint of persistence, something like the difference between The child continued crying, The child cried and cried. Examples, as as as a and a are a and a are a ar

302. (9). **चाहना**, Desideratives. The Verb compounded with **चाहना**, may be, 1, in the uninflected form of the Infinitive, or, 2, the Gerund having the form of the Perfect Participle. Formerly it was common to use the inflected form of the Infinitive. **बह मुनने चाहता या**, but of recent years the uninflected form is preferred, **बह मुनना चाहता था**.

Very often this **चाहना** with the other Verb forms a Compound rightly designated a Desiderative, but sometimes it is imminence, not desire, that is indicated, e.g., **मेरा लड़का मरा हो चाहता है**, My child is at the point of death. **एक बहुत बड़ी बुराई होना चाहती है**, A great evil is about to happen.

The Infinitive may be in the feminine form, उन लोगों ने कुछ बिनती करनी चाही, Those people

wished to ask for something. इसने क्यों प्राज प्राप पर दुरी चलानी चाही थी, Why did this man wish to thrust a knife into you to day? (Lit., get his knife to work on you). It is, however, more generally in the macs. sing. उसने चलना चाहा, He desired to go. वे लेना चाहते हैं, They desire to take it. मैं सुनना चहता हूँ, I (fem.) desire to hear it.

Very occasionally, an Infin. with को is used before चाहना, but this cannot be considered a very approved idiom. मेरा जी इन बातों के जानने का चाहता है, My heart longs to know these matters.

This चाहना is also used with the Perf. Participle form, or Gerund. मैं ग्राप का जी दुखाया नहीं चाहती. I (fem.) do not wish to trouble your life. वह... लिखाया चाहता या, He was wishing to get (something) written वह तुम्हें फँसाया चाहता है, He wishes to entangle you.

303. Reference has already been made to the use of **चाहिय** as an Impersonal Verb. It is a common and useful construction. The Infin. may be in the masc. or fem, form and also in the plural form. **तुम को पढ़ना चाहिय,** You must study (It is necessary for you

to study.) and उसके साथ सन्धि करनी चाहिये, When is it necessary to make a treaty with him? तुमका अपने ग्रन्थ पढ़ने चाहियें, You must read your own books.

Sometimes a Verb is added after this चाहिये, e.g., मुफे कुछ भी न बोलना चाहिये था, It was not necessary for me to say anything.

304. To complete the references to the special uses of **चाहना**, we may repeat that **चाह** **चाह** is used for, whether.....or...Thus, **विद्वानों का मत** है **कि चाहे काम छोटा हो चाहे बड़ा**, The view of the wise is that whether it be a little matter or a great matter.

NOUN-VERBAL COMPOUND VERBS.

305. These Verbs are also called Nominal Compounds. They are formed by adding a Noun, or other Part of Speech to the Verb att (or to some other Verb). As in English, we can say, to do penance, to do justice, to do homage or obeisance, so in Hindi they can say, to do worship, using attal; or survival attal; to do mercy, cui attal; to do protection, tal attal; to do food, also attal; and innumerable other do's.

These Compounds are of two kinds. In one Class, the Noun and Verb are so fully compounded that they become one Verb and can govern another Noun in the Accusative Case; in the second Class, the compounding is less effectively carried out, and the Noun remains related to the other Nouns in the sentence as though it were not compounded with the Verb, and is itself governed by that Verb. This distinction may be well illustrated by and att, which is used in both ways. As fully compounded, we find, उसने अपना और पिशाच का वृत्तान्त वर्णन किया, He related the story of himself and the goblin. Here and and have become one 'Verb, and this Verb governs अपना और पिशाच का वृत्तानत in the Accusative without a). More generally, however, वर्षान करना is not fully compounded, and we should then have उसने अपने और पिशाच के वृत्तानत का वर्णन किया. In the first case, we have, "he related the story," in the second, "he did a relation of the story."

A few of these Compounds are used in both ways, e.g., calant aten. We find भाइयों ने महर्षि की आज्ञा calant ah, The brothers accepted the saint's command. Here the Verb is a true Compound and is fem., because

of आज्ञा. In the following sentence, द् म ग्रन्थ का स्वीकार करें, Let them accept this book, the Verb is not fully compounded, and so does not govern ग्रन्थ in the Accus. The sentence runs literally, Let them do acceptance of this book.

Another illustration from an actual occurrence of sentences in a book is given, as it is most important to have a clear grasp of the differences of construction in the use of these two classes of Compound Verbs. पुस्तक के गुणों के। हम कहाँ तक वर्णन कर सकते हैं, How far can I describe the excellences of this book? Here au a tall Compound and governs गूणों का in the Accus. But in the following, from the same book and within a line or two of the previously quoted sentence. यदि उसके गुणें। का पूरा बणेन किया जार, If a full description of its excellences should be given (lit, "made"), the Verb is not fully compounded with वण्न; otherwise the sentence would run यदि उसके गुण.....वर्णन किये जाएं. The किये जाएं would be plural, agreeing with गुगा. As it is, it is sing., agreeing with aui-.

It is only a few of these Compounds which are used in both forms. **पालन करना** is another of them. We

may have उसने लड़के के। पालन किया, He nurtured the child. Or, उसने लड़के का पालन किया, He did nourishment of the child. So also, प्रजा का पालन कहँगा, 1 will cherish my subjects.

rain atti, to forsake; mith atti, to commence, and some others are used in both forms, but generally the Compound is either close or loose and used consistently in one way or the other.

यहण करना, to receive, or accept. बिदा करना, to farewell, to dismiss, समा करना, to forgive, are examples of the first Class, the fully Compounded Verbs.

In the case of the great majority of the Verbs now under consideration, the compounding is not fully carried out; the Noun which is more or less joined to the **arthritis** related to other Nouns in the sentence, as though it were not an integral part of the Verb, and in truth it is not so.

Among such not fully Compounded Verbs come words like **दया करना**, to display mercy: **रक्षा करना**, to afford protection; **पूजा करना**, to offer worship; **सहायता करना**, to render help. In English, we have what we consider an appropriate Verb to use with each Noun; but, in Hindi, in spite of its wealth of words,

have above, to do mercy, to do protection, to do worship, to do help.

Other Verbs are used in these Compounds, such as देना, लेना, होना, खाना, मार्ना, but करना is the favourite Verb for these Compounds.

Not only are Nouns joined up in this way; occasionally, an Adverb, or Adjective, or even Postposition may be joined up, e.g., near aten, to heal; hear aten, to do good; ulu aten, to hasten; ula aten, to put behind; ula aten, to pursue.

No attempt will be made to give lists of these Compounds. Dr. Kellogg, in his Grammar, gives quite long lists of some of them, with the right constructions (in sections 450-465), and Mr. F. Pincott, in his Hindi Manual, similarly, gives useful lists (pp 49-59 in the edition of 1882).

It is very important that the student should learn which form is correct of these numerous Compounds, and also what is the right construction. Possibly, seeing the phrase, मुक्त पर द्या कीजिये, Have mercy on me, it might be concluded that द्या करना was a full Compound, and that therefore उसने मुक्त पर दया किया,

would be correct; but it is not so. द्या करना, is not a full Compound, and the sentence should therefore be, उसने मुभ पर द्या की.

306. दिखाई देना, etc. One small class of Compounds demands a separate notice. A few Abstract Nouns, notably दिखाई, a seeing, सुनाई, a hearing (and a few others formed on the same principle), are formed with देना into Compound Verbs which are treated as Neuters, but have somewhat the force of Passives. Occasionally, पड़ना is found instead of देना.

तब चन्द्रगुप्त का राज गया सा दिखाई देता है,
Then Chandragupt's kingdom appears as though it had
passed away. वे जानवर से क्या दिखलाई देते हैं,
What are those (things) like animals which are visible?
जब काई पुरुष दिखाई न दिया, When no man appeared. जय शब्द सुनाई पड़ा, The shout of "Victory!" was heard. चाणक्य बैठा हुआ दिखाई पड़ता है,
Chanakya, seated, comes into view (i. e., when the curtain is-lifted).

SYNTAX OF THE VERB.

307. The matter of agreement between the Verb and its Nominative and Accusative, has already been dealt with in sections, 142-144, and the position of the Verb, in the sentence in section 147. Many other points

have also come under consideration in the various sections on the Tenses, etc. One or two other points, more or less related to Syntax, may now be noticed.

Subject of the Verb unexpressed. The emission of the subject is more common in Hindi than in English. This is natural when it is remembered that in many parts of the Verb the Verb itself indicates whether the subject is sing, or plural; masc, or fem. With those Tenses of Transitive Verbs which are formed from the Perfect Participle this is not the case. Another disability under which Hindi suffers is the lack of a 3rd personal Pronoun. The and The lack of a 3rd personal Pronoun.

In the English sentence, Will you go? I will, the Pronoun is used in the reply, the Verb is not repeated; in Hindi, the Verb is repeated, but (often) no Pronoun is used; तम जाओंगे? जाऊँगा. For the English, People say, the Hindi will be, in many cases, simply, asa, हैं. In the following sentence, the Pronoun, you, is omitted in Hindi. विवाह होने परसासननद की बात जानेगी, When (you) are married, (you) will know about mother-in-law and sister-in-law.

Such omissions are quite common in Hindi.

The position of the subject and Verb often does not

correspond with the position common in English sentences. e.g., The king pondered over it and became much perplexed. Hiera Hiera राजा बहुत घबरा गये.

308. The use of a Participle instead of a second principal Verb. A Conjunctive Participle, or ordinary Participle, very generally supplies the place which a second Verb would occupy in a corresponding English sentence. Eng. He stood up in the assembly and said. Hindi. Hindi. Hindi es and became very weary. Hindi. Hindi english on and became very weary. Hindi. Hindi english examined the cloth, asked the price and came away without purchasing anything. Hindi. Eng. He went to the shop, examined the cloth, asked the price and came away without purchasing anything. Hindi. Eng. He went to the shop, examined the cloth, asked the price and came away without purchasing anything. Hindi. Eng. He went to the shop, examined the cloth, asked the price and came away without purchasing anything. Hindi english e

309. Omission of Auxiliary. It has already been mentioned that, with some of the Tenses, the Auxiliary is sometimes omitted.

Again, one Auxiliary often does service for two or more Verbs. रोज़ रोज़ वह घर जाता और बहुत चेष्टा करता या कि... He went day by day to the house and tried hard to

310. Omission of है with नहीं. In a sentence in which नहीं occurs, the है is often, perhaps we may

say generally, omitted. Some are of the opinion that **nell** is a form **n** plus **e**. **h** ue nell are in a nell are

- 311. है, not an Auxiliary. Not, infrequently what at first sight may be regarded as a Present Imperfect Tense, etc., proves, on closer consideration, to be part of the Verb होना, preceded by a Participle. Thus, वे वहाँ वैठे हैं, will generally prove to be, not, They have seated themselves there, but, They are there, having seated themselves, i.e., वैठे हुए हैं; and so with other Verbs.
- 312. Repetition of a Verb. The repetition of a Verb generally indicates either repetition of an act, continuation of the action expressed by the Verb, or intensity. It is most commonly a Participle or the Conjunctive Participle that is repeated, not one of the ordinary Tenses.

Implying Repetition. arch arch ag fagu है।
गया, Doing it again and again he became very clever
(at it). पूछते २ उसका मालूम हुआ कि, By asking
many questions he became aware that.......

Implying Continuation. स्नान करते २ इसी प्रश्न का साचने लगे, As he went on bathing, he thought over this question. चलते २ दी पहर रात वह घर पहुँचा, Going right on he reached home at midnight.

Implying Intensity. **पैर की आहट बचा बचा कर** चलने लगे, They went forward, taking great care that the sound of their footsteps (should not be heard). **घोर अन्धकार में टटोल टटोल कर सीढ़ी पर पाँव रखते हुए नीचे जाने लगे**, In the thick darkness, feeling very carefully as they placed their feet on the ladder, they began to descend. **चुपके चुपके कुळ बात कर रहे थे,** They were speaking very very soft.y.

Sometimes, in the repetition of the Verb, its form is slightly altered the second time. नाव का खींच खाँच कर आगे बढ़ा ले गये, Dragging the boat this way and that, they carried it forward.

CHAPTER XI.

PREFIXES AND SUFFIXES. VERBAL AND OTHER COMPOUNDED NOUNS.

313a. उपसर्ग , Prefix.

प्रत्यय , Suffix.

क्रदन्त , Nouns formed from Verbs.

নাব্ধন, Nouns formed from other Nouns by the addition of a suffix.

This subject is a large and important one. To deal with it fully would not be possible in such a Grammar as this, as many difficult and intricate questions of etymology would have to be investigated. All that can be attempted is to give some of the more important and common prefixes and suffixes, to state their general force and meaning, and to illustrate this by giving a few examples of words thus compounded.

PREFIXES. उपसर्ग.

313b. These are arranged, in the main, in alphabetical order, but, where there are two or more prefixes having similar meanings or cases in which they pair off in the way of opposition or contrast, they are brought together for the sake of comparison.

Prefix. Meaning.

Examples.

अपन

negation.

unrighteousness.

अनुचित् unseemly.

अनमोल. priceless.

स्रन्तर inner, mind, soul.

अन्तर्यामी, अन्तर्जामी, pervading the spirit.

अन्तरज्ञानी, Knower of the heart.

ਗੇ negation. बेकाम . without work.

वेकार्गा, without cause.

यति excess. अतिशक . very powerful.

defect. अप

अपमान , disgrace.

अपगति . ill-conduct.

अद

अधपक्का, half-cooked, half-ripe. अधमुआ, half-dead.

आध

अधिकता , half-blown (of a flower.) अर्धांगी , a paralytic.

inferior, after, according to,

half.

अनुगामी , a follower, a disciple.

superior, before.

श्रिभुख, in the presence of.

अभिमान . pride.

अधि superiority.

स्धिराज . a great king.

Prefix. Meaning.

मति opposition, substitution, repetition.

Examples.

प्रतिकर्मा , retaliation.

मतिष्व , recompense, requital.
मतिदिन , day by day.

cordance with, and una-

This **प्रति** has various meanings.

ग्रन्यदेशी, a foreigner.

स्रहण्ज , one possessing little knowledge.

अवगुण, a defect, a vice.

Compare **प्रवगति**, going down, deterioration, and

उन्नति, rise, progress.

उत्कृष्ट , superior.

उद्वेग , perturbation.

उपवन, a garden, artificial forest.

उपकारी, a helper.

कुमार्ग, an evil course.

दुर्भाग्य, ill-fortuned.

दुश्चरित , ill-behaviour.

ख्रुन्य another.

स्रुल्प little.

अव diminution.

उद्। उत्

inferiority, nearness (also excess.)

कु bad. दुर, दुस, दुश, दुः सु

नि

Prefix. Meaning.

निर. निस.

निः निष

Examples.

दुःशोल , of bad disposition or conduct.

दुस्तर, difficult to be crossed. सुशील, of good disposition

or conduct.

निर्बल, निबल, powerless.

factorial, without offspring.

निःसन्देह , without doubt.

निष्कपट, without deceit.

This must not be confused with another , an intensive particle.

पर distant, ulterior, exceeding, beyond.

परदेशी, a foreigner.

परलोक, the next world.

परब्रह्म , the Supreme Being.

TII intensive, the reverse.

good.

negation.

पराक्रम, power.

पराजय, defeat.

परिक्रमा, circumambulation.

परिताप, great heat.

y excess, intensive.

पर around, excess.

fa disjunctive, intensive.

H conjunctive.

प्रयत्न, great effort.

विदेश, foreign country.

सबल, strong.

सफल, fruitful.

Prefix. Meaning.

Examples.

Compare विधवा, widow,

and सधवा, व woman whose husband is alive: also वियोग, separate and संयोग.

united.

equal like सम with.

सह

सम्दर्शी, impartial, one who looks equally on all. सहगामी, a fellow-traveller.

सहकर्मी, a fellow-labourer.

सर्व the whole, cf. सस

सर्वज्ञानी. the Omin-

scient.

स्व = अपना, one's own. स्वदेश, one's own country.

SUFFIXES. प्रत्यय

314. In dealing with Suffixes, it may be better to use another method than that adopted in the section on Prefixes. There we pursued the alphabetical order. It is proposed to throw the Suffixes into groups, so that some light may be thrown upon the systematic formation of the Compounds, which will now be considered, viz., Nouns and Adjectives (some of them used as Nouns) formed from a Verb or Noun base, by the addition of a Suffix.

There are two main groups: I, called by Indian Grammarians acon, which have a Verbal base, and II. तदित. which have a Noun as a base.

Indian Grammarians have worked out the divisions and sub-divisions with great elaboration and much ingenuity. Pundit Mádhava Prasád Páthak, in his "Hindí Bálbodh Vyákaran," has done a very useful piece of work in this special section, and I gratefully acknowledge the help I have derived from him in the order here adopted.

It has not been thought necessary to work out the details of the euphonic changes which often take place in the original word in adding the suffixes. They are interesting, but not absolutely necessary, for the student, who will hardly be expected to enter on the task of forming new words, but, for a time, at least, will content himself with ascertaining the meaning and use of those already formed.

Many of the changes, and the suffixes themselves, are Sanskrit, but they belong to Hindi, forasmuch as the words are widely current in Hindi, and new words are being formed from time to time.

VERBAL NOUNS. कृदन्त

315. These words are formed from a Verbal base. supplemented by what is called a कृतमत्यय, i.e., a Suffix which conveys a further verbal force to the word with which it is united. These कृदन्त are also called क्रिया-वाचक संज्ञा, i.e., Nouns setting forth verbal ideas.

Five classes are given.

- I. कर्नुवाचक संज्ञा. Nouns which indicate the Doer.
- II. कर्मवाचक संज्ञा.Act done.
- III. कर्णवाचक संज्ञा.that by which the act is accomplished.
- IV. भाववाचक संज्ञा.....the doing itself.
- V. क्रियाद्योतक संज्ञा.....the doer in the doing of the act.

II. and V. need no further explanation; they are the Perfect and Imperfect Participles, respectively, being formed from the stem of the Verb, by the addition of Imperfect Participle; and Imperfect Participle; and Imperfect Participle. These have been dealt with in Chapter X.

We have, therefore, now to consider classes I. III. and IV.

Class I. कर्नृवाचक संज्ञा. Nouns indicating the Doer.

Under this head come the Nouns of Agency, formed by adding aren or EIT to the inflected Infinitive. These have been explained in the chapter on the Verb, Chapter X.

Other Compounded Nouns are formed by the addition to the stem of the Verb of such suffixes as क, इया, वैया, etc.

पालक, a preserver. कारक, a doer.

जड़िया, a setter of jewels.

द्वेया, a thatcher. गवेया, a singer.

Class III. कर्णवाचक संज्ञा. Nouns indicating the Instrument.

Formed from the Infinitive by changing ना to नी.

चेरनी, a handle for turning a spinning-wheel.

धोंकनी, bellows.

वादनी, a spade.

Class IV. भाववाचक संज्ञा. Nouns indicating the action itself.

Some of these indicate the action, some the abstract idea of the action, and not a few words are found, formed in the same way, which stand for the price paid for work done.

- a. The stem alone, बाल, sound, utterance दोड़, running, a race. समभ, understanding.
- b. The stem lengthened. चाल, walk. पाठ, reading (from पठना, पढ़ना, to read.)
- c. The stem with आव, or आऊ, बढ़ाव, progress, increase. भुलाव, deception (fr. भुलाना, meaning to deceive.) दिखाव, shew, display. खिलाऊ, serving food.

d. The steam with आई. सिलाई, sewing; बाम्राई, sowing; बिनाई, weaving; जोड़ाई, joining, especially of bricks in masonry: बनवाई, making.

Many of these words are also used to signify the price for such work,

e. The stem with वट or हट. बनावट, make; सजावट, adornment; बुलाहट, calling, summons; चिल्लाहट, outcry.

Nouns (and adjectives) compounded of a noun and a suffix. a.g...

316. The word तद्भित is trom तत, that; i.e., the original Noun, and हित, that which relates to, or suits: तिद्भित is applied to those Compounded Nouns which are formed from an original simple Noun, to which a suffix has been added.

Such Nouns have been divided into five Classes,

- I. সমন্বাৰক. This word is from সমন্ব, offspring, and therefore is somewhat equivalent to the English, patronymic. In Hindi, however, this group not only includes descendants, but followers. Names indicating nationality, also, are included under this head.
- II. angaine. In this group are contained the Compounds indicating "doer of" and names identified with the workers in different trades and crafts.

- III. भाववाचक. Abstract Nouns expressing the nature or character of a person or thing.
- IV. **Junatum.** These are, as the name indicates, adjectival in character, describing persons by the qualities they possess. Some adjectives, not used as Nouns, must also be included in this group.

V. जनवाचक. From जन, deficient. Diminutives.

- 317. I. Patronymics, etc. These may be formed by-
- a. Lengthening the vowel, e. g., श्रेव, a worshipper of Shiva, fr. श्वि. वैद्यान, a worshipper of Vishnu, fr. विद्या. पाग्डव, the descendants of पाग्डु. बौद्ध. a follower of बुद्ध.
- b. Adding ई. गोरखनाथी, a follower of गोरखनाथ; यदुवंशी, belonging to the tribe of यदु; पंजाबी, one born in the Punjab.
- c. Adding इया or वाल े , भीजपुरिया, a resident of भोजपूर; अगरवाल or अगरवाला, an important caste, descendants of अगर.
- 318. II. A large class, indicating doer of. These names are closely connected with trades and occupations, though, as has already been pointed out, a man often enjoys the caste name, when no longer following the occupation special to that caste.

The Noun of Agency ending in aim or हारा has been included in the previous section, कृदन्त; but some words formed from a Noun, by the addition of aim or हारा, belong to this group. रोटीवाला, a baker; दूधवाला, a milleman; पनहार or पनहारा, a water-carrier.

(b). Formed by adding such terminations as **इया**, क, वान, आर, आरी, पाल, दाता, etc. The last two are perhaps rather words than suffixes.

लोनिया, a seller of salt; मखनिया, a dealer in butter; उपदेशक, a preacher or teacher; गाड़ीदान, a carter; सुनार or सानार, a goldsmith; लोहार, a blacksmith; जुआ़री, a gambler; द्वारपाल, a gate-keeper; अन्नदाता, a giver of grain.

319. III. Abstract Nouns, relating to both persons and things.

Formed by adding the suffixes, π 1, π 2, π 3, π 5, π 7, π 9, π 9,

320. IV. Adjectival Nouns and Adjectives. These describe the persons or things by the qualities they possess.

Formed by the addition of such suffixes as वान, मान, वत, वन्त, ल, लु, लू, आ, एला, नीय, अक, इक, ई, इष्ठ.

द्यावान, merciful; धनवान, we alt hy; बुद्धिमान, wise; पशुवत, animal-like, be stial. बलवन्त, an athlete, strong man; कृपाल and कृपालु, compassionate; दयासु, merciful; भगड़ालू, abrawler, quarrelsome person; भूखा, hungry; प्यासा, thirsty; घरेला or घरेला, and बनेला or बनेला, domestic and wild animals; विश्वासनीय, worthy of trust; प्रशंसनीय, worthy of praise; मासिक, monthly; दैनिक, daily; प्रमर्थक, injurious; प्रलगाई, aloofness; घनिष्ठ, very dense (of a forest); बलिष्ठ, very strong.

Many other words and suffixes might be added. e.g., ऐत, in such words as लठेत, भालेत, wielder of a बाठो or of a भाल spear: इत in words like शोकित, grieved; हरित, glad.

There are many suffixes also which are more akin to words than simple suffixes, e.g., मय, full of; आनन्दमय, joyful; दाई, giver of; पूर्वक, with; भर, full of: मात्र, just, only; युक्त, भीत; आतुर, etc.

321. V. Diminutives. With a final ई, replacing आ, etc.

रस्सी, a rope, smaller than रस्सा; दौरी, a basket, smaller than a दौरा; with the termination इया, e.g., लड़िक्या, a little girl: खिट्या, a small bedstead.

The lists of the suffixes given above are by no means complete, and lists of words have not been attempted, only a few illustrations given. The whole subject is a wide and important one. In Sanskrit, compounding is carried out to an extravagant extent, and that more than traces of this should have come into Hindi is not surprising. Many long Sanskrit Compounds are brought bodily into Hindi; others are manufactured. Tulsi Das' " [aru aru affords many illustrations of long Sanskrit Compounds.

CHAPTER XII.

322.	Adverb.		क्रियाविशेषण
	,,	of time.	कालवाचक.
	,,	,, place.	स्थानवाचक.
	25	, manner.	भाववाचक.
	"	,, quantity or degree.	े परिमाणवाचक.

323. The Hindi faulation corresponds very largely with the English word Adverb: it means the word which qualifies the Verb. As in English so in Hindi, the Adverb in use covers more than its name signifies. Fi and AFI, as affirmative and negative, words indicating time and place, such as UFI, AFI, AFI, do not appear in any special manner to qualify the Verb, and yet these and many other words do furnish information closely connected with that which the Verb conveys. To be informed when and where an act is done, is certainly related to the act itself.

Perhaps the use of the Adverb in which it is most true to its essential character is that in which the English words ending in ... ly are found, setting forth how an act is performed, e.g., He fought bravely. But

particulars connected with the verbal idea may be largely widened, and thus we meet with Adverbs of Time and Place, and even a whole sentence, called an Adverbial Extension.

It will be noticed that some words appear in lists of Postpositions which have already appeared as Adverbs, and some of these same words are Nouns also. Day is a Noun, and yet in the sentence, "He did it day by day," (daily), it is truly an Adverb. Words do thus change in their character, as they are used in different ways. In उसके नीचे क्या है, What is under it? नीचे is a Postposition. In the sentence, वह नीचे गिरा, It fell down, it is an Adverb. So, in आगे चला, Go forward, आगे is an Adverb. In उनके आगे घर और विशाम दोनें हैं, Ahead of them are both home and rest, it is a Postposition.

As in English so in Hindi, we may have :-

- 1. A simple Adverb. वह धीरे चलता या, He was walking slowly.
- 2. Another word used as an Adverb. वह आनन्द-पूर्वक रहता या, lle lived joyfully, or with joy.
- 3. An Adverbial sentence. वह इतनी शीघ्रता से चलता या कि कोई उसको नहीं पकड़

सकता या, He was going along so quickly that no one was able to lay hold of him.

- 324. Adverbs may be noticed under three headings:
 - 1. Pronominal Adverbs.
 - 2. Adverbs.
 - 3. Adverbial Phrases.

I. PRONOMINAL ADVERBS.

We have already noted the series of Pronominal Adjectives in which the characteristic letters of the Pronouns appear and modify the meaning. In a similar way, we have a series of words adverbial in their force, and these have been suitably denominated Pronominal Adverbs.

In the following lists, it will be observed that, 1. are related to the Proximate Demonstrative Pronoun **यह**.

2. to the Remote Demonstrative Pronoun **वह**. 3. to the Relative Pron. **31**. 4. to the Correlative **31**, under its somewhat obsolete inflected form **71**. 5. to the Interrogative **31**. and 6. to the Indefinite **31**.

In some cases, not all the members of the series are in use.

- a. Of Place.
 - 1. यहाँ, यहीं here.
 - 2. agi, agi there.

- 3. जहाँ where, (relative).
- 4. तहाँ there, (correlative).
- 5. **कहाँ** where?
- 6. angi anywhere.

b. Of Direction.

- 1. इधर hither.
- 2. 3ut thither.
- 3. (जिधर) whither) For जिधर and तिधर,
- 5. **almost** invariably used.
- Even for **इधर**, **उधर**, and **कहाँ** are commonly used. Even as, in English, where are you going? is far more commonly used than, whither are you going?
 - c. Of Time.
 - 1. अब now.
 - 2. तब or उस समये,
 - 3. **जब** when.
 - 4. तब then.
 - 5. **कब** when?
 - 6. **क**भी.
 - d. Of Manner.
 - 1. **यों**, यूं thus.
 - 2. वां obsolete, supplied by उसी तरह.

- 3. ज्यों, उद्दं as. These are generally used of time, Just as,.... at that moment. For manner, जिस तरह, उसी तरह are more common.
- 5. क्यों, क्यों, क्यूं how? why?
- 6. ———

Some of these Pronominal Adverbs are treated somewhat as Nouns, becoming subject to declension, by the use of Postpositions, e.g., **ue are an ie**, Of what place is this (man)? **ueï à anixì**, Go away from here. **and na ceì**, Until when will you remain? **ueï à ana.** In here. **yea à lat.** For the present.

By repetition and combination, these Pronominal Adverbs yield other modifications of meaning: जहाँ जहाँ.....तहाँ तहाँ, wherever.....in those places. जब जब.....तब तब, whenever.....then कब कब, whenever. कभी कभी, sometimes. ज्यों ज्यों.....त्यों त्यों, just as...so also (especially in reference to succession in time.)

जहाँ का तहाँ, Just the same as it was. उनका काम जहाँ का तहाँ रह गया, Their work remained just as it was. उत्तम ग्रन्थ जहाँ के तहाँ पड़े रहते हैं. Excellent books remain as they are (i.e., either unpublished or unsold)

कभी न कभी, or कभी कभी, occasionally. कहीं न कहीं, or कहीं कहीं, somewhere or other. यहाँ, वहाँ, here and there. जहाँ कहीं, wherever. इधर उधर, or इधर विधर, hither and thither. अब तब, now and again (अब तब करना is idiomatically used for "to procrastinate"). जब तब, occasionally. ज्यों त्यां, or ज्यों का त्यां. exactly in the same state or condition.

2. ADVERBS.

325. A. Adverbs of Place and Direction.

आगे forward, or forwards.

पोछे backward, or backwards.

जपर upward, or upwards.

नीचे downward, or downwards.

दहिने to the right.

बाएँ to the left.

वाहर outward, or outwards.

भीतर inward, or inwards.

पार, on the other side. Used after a Noun, followed by के or से, this word has very much of a prepositional force, but with a Demonstrative Pronoun in the construct. state, it has an adverbial force. इस पार, this side; उस पार, that side.

art on this side.

वार पार right through. Spoken, e.g., of cutting right through anything.

अनत (prop. अन्यत्र) in another place, elsewhere.

एकच in one place, or together.

सर्वत्र in all places, ubiquitous.

Final near, **पास** close to, **दूर** far, are not properly Adverbs, though sometimes used with an adverbial force.

326. B. Adverbs of Time.

Under these will come words indicating different parts of the day, and different periods of time, e.g., সাস to-day, কল to-morrow. The more common of these are mentioned in Chapter XVI.

stand for past or future time, formerly or hereafter. The English word "before" is somewhat analogous, e.g. They used to do this before, i.e., previously. In the years that lie before let us not do so.

पहिले before, previously.

पञ्चात subsequently.

निदान finally.

एकदा once upon a time.

इतने में meanwhile

नित or नित्य continually, always.

परम्परा continually, from generation to generation. Used of past time.

सदा always.

सदैव always (intensive of सदा)

सदा सर्बदा for ever and ever.

The once more, again.

बहधा often, generally.

अकसर Urdu equivalent, often used in Hindi.

art art or artart repeatedly, again and again.

327. C. Adverbs of Manner,

अचानक or अचानचक

अकस्मात

एकाएक or एकाएकी

एकबारगी

वेग

बेग बेग (intensive)

शीघ्र

तुरन्त or हुरत

भार

भटपट

सहसा

जल्द or जल्दी (Urdu)

suddenly.

quickly.

धीरे slowly.

धीरे धीरे (intensive of above).

सच or सत्य truly.

सचमुच truly. An intensive form of the above.

सही truly.

अल्बना Urdu equivalent.

अवश्य necessarily.

ठीक exactly, truly.

ठीक ठीक or | ठीक ठाक

Intensive forms of the above.

मेंत or सेंतमेंत gratuitously.

साज्ञात manifestly, openly.

सहज easily.

श्रनायास vasily, without effort

यथा or जथा just as.

तथा so. Correlative of the above.

यथार्थ as is fit, as is necessary.

निर्न्तर uninterruptedly.

वृथा vainly, uselessly.

हीले softly.

धडाधड boldly, with a crash.

मनमाने according to one's will.

ऐसे, वैसे, जैसे, कैसे. See Section 194, where

ऐसा. वैसा, जैसा, कैसा are treated of as Pronominal Adjectives. In their inflected form, these become Adverbs, and are much used. It is not uncommon to find the adjectival forms in III used where the adverbial forms in v would be more correct.

It may be pointed out that many Adjectives may be used as Adverbs of Manner. उसने अच्छा किया. उसने बुरा किया, He did well, He did badly.

328. D. Adverbs of Degree.

बहुत much.

कम little.

कर somewhat.

निपट

ख्रति bery.

बडा

वडा is an Adj. "great." but is frequently used as an Adverb.

स्ट्रान्त exceedingly.

केवल only, merely.

निकेंबल Intensive of केंबल.

निरा entirely.

एक बेर once.

दो वेर twice.

तीन बेर etc., thrice, etc.

As the Pronominal Adjectives of Quality are used in their inflected form as Adverbs of Manner, similarly the Pronominal Adjectives of Quantity, **Sacret**, etc., (see Sect. 193) are used as Adverbs of Degree, but are not generally inflected. Adjectives also may be used in a similar way.

हो, sometimes हों, is an intensive Adverbial Particle which may be added to many, if not most, words. The ह often disappears, or rather combines with the previous letter, converting it into its corresponding aspirate, e.g., अभी just now, from अव+ही. Where the previous letter is already an aspirate, the is omitted; thus मुभी from मुभ+ही, वहीं from वह+ही. This हो may be sometimes translated by "even," "indeed;" at others, it only corresponds to a word which would, in English, be italicized in writing, or emphasized in speaking. मुभी को सारोग, Will you strike even me? वह है ही नहीं, Indeed, he is not (here).

 going. With the Future, it is even inserted before the Conjugational termination, e.g., जायहाँगे, they will assuredly go. देहीगा, he will assuredly give.

329. E. Miscellaneous Adverbs.

The propriety of classing one or two of the following as Adverbs may be questioned, but no more suitable heading for their notice suggests itself.

हाँ Yes.

নৈ Yes. Not found in literature, but much used by villagers.

Other words also are used for expressing assent, अच्छा, very well; निस्सन्देह, without doubt, etc.

which would belong to the Indicative Mood, less commonly with Tenses of the Subjunctive; i.e., it is more common with the denial of a fact than the negation of a contingency or possibility. It is not used with the Imperative. It may be used absolutely, "No."

A No, not. Absolute "No," also with the Verb, more especially for Subjunctive Tenses, and for the polite forms of the Imperative.

Speaking generally, a seems to be more abrupt and less formal than agi, though it is less emphatic,

e.g., मैं कभी नहीं कहँगा, i.e., I will never do it. न would not generally replace नहीं in this sentence: न श्राजँगा न कहँगा, I will neither come nor do it, might be said; but नहीं in both places would be still more emphatic.

দন Not. Used only with the Imperative, মন, তামৌ, don't go. It must not be used with the polite forms of the Imperative.

जिन a colloquial equivalent for सत.

There are various idiomatic uses of these Adverbs of negation, नहीं तो, if not. ग्रभी जाग्रो, नहीं तो मैं दूसरे के। भेजूँगा, Go at once, if you don't (if not), I will send some one else.

न.....न..... neither—nor—, न करता है न न तो.....न..... कराता है, He neither does (it), nor gets (it) done.

क्यों नहीं Yes, lit. "Why not," used in much the same way as the English "of course;" though, in many cases, it is used where in English the simple "yes" would be used. Thus, if a man be asked if he can do a certain kind of work, he will answer, क्यों नहीं. This, of course, means literally "why not?" but idiomatically it is simply "yes."

कदापि possibly, perchance.

शायद Urdu equivalent. More common in Hindi than कदापि.

अर्थात namely, that is to say.

याने Urdu equivalent. Frequently used in Hindi.

उलटा on the contrary.

सारांश in short, briefly.

प्राय: probably, usually, for the most part. (In the form प्राय: करके, it means often, generally, and is equivalent to the Urdu अवसर).

मान merely. Only used after another word, combining with it into a semi-compound, e.g., वचन मान, merely a word. (This must not be confused with another use of मान। meaning, all, every, each, e.g., मनुष्य मान, all men, or every man.

3. ADVERBIAL PHRASES.

330. Adverbial phrases are very numerous, and are formed in various ways; not a few are simply some case of a Noun with its Postposition.

The Instrumental and Ablative Cases, with से, or से added to a word already used as an Adverb, e.g., गुप्न रीति से, secretly, सहज से, easily, क्रोध से, angrily, धीरे से, slowly, किस प्रकार से, how, in what manner?

नमुता से, gently. So for Adverbs of place, वहाँ से, यहाँ से, etc.

The Locative Case in में. श्रन्त में finally प्रगट में, manifestly, apparently, वास्तव में, in very truth.

The Accusative Case, with or without का, e.g.. अन्त का, finally, उस समय, at that time एक दिन, one day, i.e., on a certain day.

The Conjunctive Participle is very frequently used as an Adverb. जान बूभ के उसने किया, He did it wittingly. across, secretly. एक एक करके, singly.

Various other ways of forming Adverbial phrases are also met with, e g., सर्प की भाँति, in a snake-like way. एक साथ, unitedly. इसी तरह, in this way. वैसे ही, in the same manner.

CHAPTER XIII.

POSTPOSITIONS or सम्बन्धसूचक अन्यय

331. The Case-signs an, an, an, etc., partake of the character of Postpositions. These have a special name given to them by Indian Grammarians, viz., fatth. It is not apparent what essential difference there is between ut, as a Case-sign of the Locative, and and a Postposition. As a matter of fact, the fatth or Case-signs are as truly Postpositions as those dealt with in the present Chapter: it is only their identification with the Case system that has led to their separation.

These words correspond with the English Prepositions, but as they are almost invariably used after the word to which they are related, they have been appropriately called Postpositions. The Hindi name, सम्बन्धबोधक अञ्चर, the particle indicating relation, is excellent.

Dr. Kellogg has pointed out that many of these Postpositions were originally Nouns. This accounts for the fact that, with some of them, the related word is used in the masc. Genitive, with others in the fem.; the Postposition having been originally a masc. or fem. Noun. We have उसके नीचे, Beneath it, but उसकी सन्ती, In its place.

Occasionally, a Postposition becomes a Preposition, i.e., it may be used before the related word. This is optional with some Postpositions. **[af]** is the outstanding example of freedom in this matter: it may be used before or after the related word, with **a** or without.

In the following lists, the endeavour has been made to arrange the words according to meaning, so that synonymous words or those similar in meaning may be noted and differences of idiom pointed out. Many Urdu equivalents have been included, as they are so frequently found in Hindi books.

Postpositions marked -

*are preceded by a.

= are used without

are used without

are used without

are us

* † may be used with or without.

घर के पास, Near the house. उस पास, By him It has been mentioned in Chapter XII that several words are both Adverbs and Postpositions.

front of. In addition to its literal use, this word has two idiomatic uses also. 1. Equal to "in his estimation." परमेश्वर के साम्हने हम पापी हैं, We are sinners in God's sight. 2. To indicate comparison. श्रेर के साम्हने कुत्ता क्या है, What is a dog in comparison with a tiger?

Notice the difference between **साम्ह**ने and **आगे. साम्ह**ने means, in the presence of; **आगे** ahead. He stands before the king, is **aह राजा के साम्ह**ने खड़ा है, but, He walks before the king, i.e., ahead of the king, **a ह राजा के आगे चलता है**.

* श्रामे before. Used both of time and place. Notice in previous Chapter about the possible reference to either the past or the future. For time, # as well as # may be used.

*पहिले before. Used chiefly of time. Though constructed with its governed word as a Postposition, it is adverbial in force. Thus, इसके पहिले, before this, or previously. (This can also be used with से, e.g., उस से पहिले, before that, previously).

- * पूर्व hefore. Of time only.
- * पोके behind, after. Of place and time.
- *बाद Urdu equivalent of पीन्ते. Used of time.
- * अनेन्तर after. Used of time occasionally, of logical succession.
- * **3Utifa** after. Of time. Occasionally in the sense of "in addition to," "moreover."

* जपर over, above.

Notice the distinction between **पर** and **ऊपर**; the former is on, upon; the second, over. An ornament is on, or, upon the mantelpiece, a picture is over it. In the first sentence, the word is **पर**, in the second **ऊपर**. A man is on (**पर**) the roof of his house, a kite flies whove (**ऊपर**) it. This distinction is sometimes lost sight of, and quite recently it has become a fad to use **ऊपर** in many cases where **पर** is more appropriate, e.g., **उसके ऊपर द्या करते हैं**, He shews mercy on him, instead of using the word **पर** as was practically always done in such phrases in past days.

* नीचे beneath, under. Of place and also of status.

* ala between. Used of place and time, in the

latter case, it may often be translated "meanwhile." Commonly followed by one or more of the Particle Postpositions, e.g., उनके बीच में, among. घर के बीच में, in the centre of the house. उनके बीच में से, from among. बीच में. meanwhile.

*दर्मियान, Urdu equivalent of above.

के बाहर, outside the door. An idiomatic use of this word, with the governed word in the ablative, may be noted e.g., गिनने से बाहर हैं (They) are outside of counting, i.e., cannot be counted. जो आप की इच्छा से बाहर है, which is not according to your wish.

* भीतर inside, within. Used both of place and time, e.g., परदे के भीतर, inside the curtain.

एक महीने के भीतर, within a month.

अन्दर, Urdu equivalent.

* + uin by, near to. Used both of position and motion to, c.g., such uin as as it ing by him. such uin as used nul, He went to him. It is also used

idiomatically of possession. मेरे पास कुछ नहीं, I possess nothing.

- "निकट near.
- * समीप near.
- * नजदीक, Urdu equivalent.
- * नगीच, Corruption of the above.
- * परे beyond. (Used also with है)
- * लगभग near, round about.
- * 期報 पास near, round about. Used in such a phrase as the villages near the city. This can also be expressed by...... 帝 चारों ग्रोर, or ... की (or के) चारों तरफ, in the four directions, on the four sides.
- * गिर्द. Urdu equivalent.

† * श्रोर In the direction of, side.

A peculiarity of the word should be specially noted. In the sing, it is fem., in the pl. masc., e.g., मेरी और देखकर, Having looked in my direction. गंगा के दोनों और, On both sides of the Ganges. घर के चारों और, On the four sides of the house. Probably this arises from the word having two meanings. As fem., it means direction, as masc. side. (Compare the same peculiar-

ity with reference to the word **dis** noticed in Sec. 77). This suggestion receives some confirmation from the fact that with the meaning, side, this word is found in the masc. even in the sing, e.g., **34 va yit us**, On one side of that was Mangala's little shed.

† तरफ़, Urdu equivalent.

‡ लों

‡ लग

† पर्यन्त

† place and degree.

‡ तक

A special use of तक may be noticed, e.g., in the sentence, प्रवेश तक न करेगा, He will not so much as enter.

- * संग with * साथ with Very occasionally used without के.
- ‡ समेत with. Used without के, eg., स्त्री पुत्र धन समेत, With wife, son and wealth.

‡ * सहित with. Used in the same way as the above. It is also often used with adverbial force, e.g., [चन्ता सहित, with thought, i.e., thoughtfully. Occasionally found with के (e.g., ऋषियों के सहित, with the saints), but better without.

+ team without. The exact reverse of team, constructed generally in the same way, but occasionally with its Noun in the Ablative Case, e.g., ta urui ta team, Having become devoid of all sins.

Both सहित and रहित are not properly Postpositions, but their usage justifies their inclusion in this list.

‡ पूर्वक with. Used in much the same way as सहित and समेत. हापनक निरादर पूर्वक नगर में निकाला जाता है, Kshapunak is being expelled from the city with dishonour.

+* **fant** or **fan** without. When the governed Noun is not used with **a**, this Postposition may be used before or after its Noun. It is also used with some parts of Verbs.

पूरे विश्वास बिना, Apart from perfect (lit., full) faith. बिना भेस बदले, Without changing his dress (or appearance). जो अपने बल बिना और अनेक दुखें के भोगे बिना राज्य मिलता है, That kingdom which is acquired without one's own exertion, and without the endurance of many troubles. दूसरे पहिये के बिना, Without a second wheel. बिना

किसी परिश्रम या प्रयत्न के, Without any labour or effort.

The form and is mostly confined to poetry and proverbial sayings.

- बगर, Urdu equivalent of बिना.
- for the sake of, in order that.

 and on account of.

 Although the distinction is not always strictly observed, there is a very real and exceed-

ingly useful difference in meaning between these two words. Total rather looks to the future, in order that, कारण to the past, because of, e.g., वह देखने के लिये श्राया था, He came in order that he might see... निर्बं हाने के कारण वह नहीं आ़या या, On account of his weakness he did not come. This point is worth careful consideration.

With the phrase, इस लिये. equivalent to therefore. के is not used. In इस कारण, i.e., for इस कारण से on account of this, कारण is a Noun, not a Postposition.

- * * of for the sake of. Mostly used in poetry.
- * ! निमित्त for the sake of.
- † खातिर, Urdu equivalent.

- * हेतु for (this) reason, or with persons, on behalf of. (More generally used as a Noun, e.g, इस हेतु से, for this reason.)
 - * HIT on account of, by reason of.
- ‡ वास्ते, Urdu equiv. Generally used with Demonstrative Pronouns, etc., in the Oblique Case, as दस वास्ते, for this reason, किस वास्ते, for what reason?
- * विषय or विषय in the matter of, with reference to. Generally followed by में, e.g., इसके विषय में, with reference to this (matter). Where के is omitted, e.g., इस विषय में, in this matter, विषय is a Noun. It is a Noun in all cases, but has come to be numbered with the Postpositions, and is as much a Postposition as many others included in the list.
 - † बाबत † निस्वत Urdu equivalents, "with reference to."
- * द्वारा hy means of. Occasionally a pleonastic से is added, उस के द्वारा से, by means of him.
- * ‡ ये। ग्य suitable for. यह देखने के ये। ग्य है, This is worth seeing. Not infrequently, the के is omitted. देखने ये। ग्य है.

- समान | तुल्य | like, equal to.
- े सदूश्य

+ नाई in the manner of, e.g., पिता की नाई उसने बालक की सुध ली, He took care of the child as a father would. This word generally possesses an adverbial force.

- * बराबर, Urdu equivalent.
- * अनुसार according to, in conformity with.
- * अनुकूल according to.
- * प्रतिकृत, Adversative of the above.
- * मुद्राफिक, Urdu equivalent.
- * प्रति From its first meaning of Substitution, the meaning of the Postposition branches out into two uses: 1. with; सबके प्रति, i.e., सबके साथ, 2. for; रोगों के प्रति. For a sick person, such and such things are necessary.
 - † सन्ती in the place of.
 - * बदले | Urdu equivalents. बदले is often followed
 - * इवज by में, e.g., इसके बदले में, in the place of this.

े विरुद्ध or विरुद्ध े विपरीत or बिपरीत

opposed to, on the contrary.

विरुद्ध is very occasionally found with an Ablative.

आपकी इच्छा से विरुद्ध काई व्यवहार नहीं होने पावेगा, No custom shall be observed which is opposed to your wish.

* खिलाफ, Urdu equivalent.

There are two inseparable prefixes, **uith**, and **a** without, which have a prepositional force. **AUTCATT**, with (his) household. **auna**, without fruit. These might be equally well expressed by **UTCATT** and **una**

CHAPTER XIV. CONJUNCTIONS.

Conjunction संयोजक ख़ब्यय. Disjunction विभाजक ख़ब्यय.

332. The English name, Conjunction, is exceedingly unsatisfactory, as it by no means covers the scope of the words included under the name. Indian Grammarians extend the scope by using two names, Conjunction and Disjunction. Even this, however, does not fully meet the case.

In the following paragraphs, the endeavour will be made to group the words commonly included in this class and to offer a few words in the way of explanation as to their meaning and use.

333. 1. Cumulative Conjunctions.

श्रीर, and. This is the simple copula for connecting words or sentences. With pairs of words it is often omitted. e. g., ऊँचनीच, high and low; राजाप्रजा, king and subjects. Also with strings of words, e.g., माता पिता भाई बहिन सब के सब मर गये, Mother father, brothers and sisters, all are dead. Or, for the sake of emphasis, it may be used between all the words, माता श्रीर पिता श्रीर भाई श्रीर बहिन सबके सब मर गये हैं.

श्रीर is often found written श्री, occasionally ग्राप्त, and sometimes व is used.

It should be remembered that there is another use of ख्रीर, i.e., as a Pronominal Adjective. In the sentence, ललू आ गया है आर कौन आवेगा, Lailu has come, who else will come? ख्रीर is a Pronominal adjective: in the following, वह आ गया है ख्रीर रहेगा भी, lle has come and will also remain, it is a Conjunction. Care is sometimes necessary lest ambiguity should occur, one being understood for the other.

मी also, moreover. वे भी ख्रावेंगे, they also will come. उन्होंने ख्राने की कहा वे ख्रावेंगे भी, they promised to come, they will come also. Sometimes, it approximates in force to the intensive Adverb ही, and may then have to be translated by "even," or some such word: एक भी नहीं, there (is) not even onc. Somewhat similarly, it may occur in a sentence with another Conjunction, यदि ख्रावे भी, should he even come.

एवं, Occasionally the Sanskrit एवं takes the place of भी. Its meaning seems to hover between भी and फिर.

fut again. Used as the English "again," and in making an additional statement or be-

ginning a new point in an argument. Occasionally, this word assumes the form कर.

पुनर, the Sanskrit equivalent of the above. It is sometimes found in Hindi.

बरन. See the next section.

334. 2. Adversative.

पर परन्तु बरन or बरण or ब; Of these, **पर** is frequently used with the force of an exceptive rather than with an adversative force. **दा आये**

but. **Ut** aham var var, Two came, but only one remained. **Ut-g** is more strongly adversative, e.g., after relating how Ravan had tempted and

threatened Sita, a writer states, uten than... fatenater elating certain adverse circumstances, says, uten ufer relating certain adverse circumstances, says, uten ufer the matter be looked at thoughtfully. at has often more of a cumulative than adversative force, not only so, but also. a had at the att care is att care. Not merely for two days, I will remain for two years. Sometimes, however, it has an adversative force. The care is often equal to uten. Occasionally, it approximates in meaning to uten.

लेकिन, बल्कि (corrupted to बल्कन in the colloquial), मगर, Urdu equivalents. लेकिन especially is very common in Hindi.

तौभी nevertheless.

335. 3. Alternative.

These are used between alternative words or sentences. मेरी बातें अच्छी जगती हैं वा नहीं, Are my words acceptable or not? but in the case of

या, we may also have it in both sentences, या तो...या तो, or, या तो...या, e.g., उसका यत या तो उल्टा हो या निष्फल होगा, His effort will either produce an unexpected result (lit., will become turned) or become fruitless. (Cf. the old-English use of nor, "I whom nor avarice nor pleasures move.")

कि or. लोग चाहते हैं कि नहीं, Do the people desire (it) or not? See also the use of कि under No 6 Explanative.

नहीं तो if not; followed by तो then (cf. § 329.)

न...न.....neither, nor. न सुनता है न बोलता है, he neither hears nor speaks. Sometimes

only one \mathbf{q} is given for both sentences, especially in poetry. \mathbf{g} \mathbf{r} \mathbf{g} \mathbf{r} \mathbf{r}

चाहे.....चाहे ...whetheror (cf. § 304).

क्या...क्या...either.....or.

336. 4. Hypothetical.

जो if. Generally followed by तो then.

यदि गुं

ञ्जार Urdu equivalent.

337. 5. Concessive.

यद्यपि although. Followed generally by तौभी or यथापि, nevertheless, and occasionally by किन्तु. यद्यपि वह नाटासा है तौभी वह बलवन्त भी है, Although he is dwarfish, yet he is very strong. शकटार यद्यपि बन्दीखाने से छूटा किन्तु अपनी अप्रतिष्ठा का शोक उसके चित्त में बना रहा, Although Shakatâr was released from prison, yet the grief on account of the disgrace remained fixed in his mind.

जो.....भी even if, if also, followed commonly by

- तौभी, nevertheless. जो आवे भी, even if he come.
- चाहे should, though, even if, followed commonly by तीभी.
- 338. 6. Explanative.
- fan that, in such sentences as, "he said that....."

 "he saw that....." "it came to pass that....."
- fan is also used of purpose, "he went that he might see."
- क्योंकि or क्योंकि because, for, e.g., क्योंकि पूरे विश्वास विना...For apart from perfect faith.
- 339. 7. Dependent, indicating Result.
- तो then. Introducing what will result, if certain conditions be fulfilled. यदि मेरे प्राण की रक्षा होगी तो मैं प्रापका छुड़ाऊँगी, If my life be saved, then I will effect your deliverance.

CHAPTER XV.

Interjection, विस्सयादिबोधक ख्रव्यय (Lit., that which indicates astonishment, etc.)

340. The Hindi name for Interjection is very appropriate, as **विस्मय** signifies not only surprise, but also wonder and consternation.

The following are the principal Interjections:— **है** The common Vocative Interjection.

है। More used towards inferiors. है। तुम, Hallo

श्रजी is used alone, not as an addition to a Vocative. It is used to call the attention of some one, something like the English, "I say," or to indicate slight surprise, "Ah!"

assent or approval than as a pure Interjection; but it may be called an Interjection, as it is frequently used when no question has been asked. It somewhat corresponds to the "Yes, yes," with which some hearers encourage a speaker.

आरे (with fem. आरी) generally indicataes (1) surprise, sometimes impatience or anger, but may be used

- (2) as an ordinary Vocative Interjection. Though very commonly used, it is not regarded as an elegant word.
- (1) अरे ब्राह्मण क्रोध मत कर, (), you Brahman, don't get angry. अरे जाना, Ah! I see. "अरे!" uttered by a man to himself on receiving a letter containing some startling news.
- (2) खरी बहन, O sister! खरे कुमार ख्रापही श्रा गए. My prince! have you come? (Here there is some measure of surprise.)

t is a very different Interjection as regards usage: it is a Vocative Interjection, expressing contempt or disgust, e.g., रे मूढ याद रख कि, You fool! remember that..... वाह रे कौटिल्य वाह, spoken of a person as though present, Oh that Kautilya!

श्रहा or आहा expresses admiration or surprise.

expresses mingled surprise and sorrow.

ओःहा .. wonder and surprise.

अबे ,, contempt.

अहह (or अहहहह ad lib.) expresses sorrow (on receiving sad news).

हाहा, हाय or हाय हाय) ,, ,, ,, ,, हाए or हाए हाए ", ", Eng. " alas !"

हा questioning surprise.

अहो somewhat of surprise.

बि: or बीबी, avaunt! away with the thought!
बि: सूर्ख क्या तू गुरुजी से भी धर्मि विशेष
जानता है, Away with you, you fool! what, do
you know about religion better than the guru?
आफ disgust.

are or **are** may express nearly any emotion, the emotion being indicated by the *tone* in which the word or words are uttered. They may convey the idea of admiration, astonishment, grief, disgust, etc.

राम राम, in addition to being used as a salutation, is uttered on hearing any statement which the hearer would desire were not true, something like the English, "Don't say that!"

341. Other words also are used with the force of Interjections:—

दोहाई hear me! help me! or, more fully, आपकी दोहाई, I make my plaint to you.

बाहि mercy! Shield me!

भला well! all right!

बस enough!

Uan or **Uarant**, expressive of very strong disgust. With the Acc. of the person, almost equivalent to "a curse on him."

धन्य भन्य might almost be defined as a religious Hurrah! It indicates exalted admiration and praise. जय or जय जय Victory!

342. Of forms of salutation, the more common are:

(if the first which may be taken as about equivalent to "God bless you."

जय "good luck to you."

नमस्कार reverential salutations, addressed principally to Brahmans. The return salutation is कल्याण, prosperity.

नमस्कार has become a very common salutation among equals, of recent years.

- the present time by members of the Árya Samáj.
- सलाम peace! बन्दगी my obeisance to you, तस्ली-मात (connecte with सलाम) greeting! are Urdu, but are occasionally used by Hindus, especially to Europeans.

CHAPTER XVI.

343. NUMBERS, DIVISIONS OF TIME, WEIGHTS AND MEASURES.

In the present chapter, many mat ers are included which do not strictly belong to Grammar. As, however, the points may be very useful to the student, and as the information may not be available in compact form elsewhere, they have been brought together here.

NUMBERS.

up to a hundred, must be committed to memory. In English, after 20 is reached, only the tens need be learned, as the intervening numbers are added quite regularly: this is not so in Hindi: there is not one of the units which unites regularly with all the tens throughout; van, changed into zan, does indeed consistently preserve its form, but zan + alt becomes zanta (21) zan + alt becomes zanta (41), etc.

Numerical Symbol.

Name. Alternate form, and form used in compounds.

96 देई छियानवे छानवे
97 दे७ सत्तानवे सतानवे
98 देट अद्वानवे अठानवे
99 देदं निनानवे निन्यानवे
100 १०० सौ सै

345. Beyond 100, the numbers proceed regularly, the units are added to the hundreds as in English, but "and" is not inserted. एक सौ एक (101), एक सौ दो (102), एक सौ बीस (120), etc.

But सवा सी (125). डेढ़ सी (150), पौने दो सी (175). सवा दो सी (225), प्रढ़ाई सी (250), पौने तीन सी (275), सवा तीन सी, साढ़े तीन सी, साढ़े चार सी, and so on. This same idiom is used with the thousands in like manner, डेढ़ सहस्त्र (1,500), etc. (see § 352).

1,000 सहस्र (contracted sometimes into सहस), हज़ार.

100,000 लाख

100 **लाख, करोड़ or कड़ोड़,** (i.e., 10,000,000).

100 करोड़, ऋर्ब ा ऋरब

Numerical Symbol.	Name.	Alternate form, and form used in compounds.		
100	स्रबं	खर्ब or खरब		
100	खर्ब	नील		
100	नील	पद्म ा पद्म		
100	पद्म	संख, i.e., 100.000,000,000,000,000.		

The last three are seldom met with. Ra, wa, are used mainly to convey the idea of innumerable, much as "millions and millions," in English. aris, especially in the reduplicated plural form, arisi aris, is used in a similar way.

346. The Ordinals.

पहिला or पहला First. चैाया Fourth.

दूसरा Second. पाँचवाँ Fifth.

Third. छठवाँ Sixth.

or छठा

From **सातवाँ** onwards, the Ordinals are formed quite regularly from the Cardinals, by the addition of **शाँ**.

These Ordinals are Adjectives of two terminations, आ or आँ Masc. (with ए or ए Const. Sing. and ए Pl.) and इ or ई Fem.

347. Proportionals.

To express "two-fold, three-fold," or "twice as much," three times as much," etc., July or Jar is added to a

Numeral. As the form of the Numeral is sometimes modified in the process of union, a list of those so affected is given.

दुगुना (f. ई), दुगनी or दूना twice as much.
तिगुना or चिगुना, also तिगनी three times as much.
चैगुना four times as much.
पंचगुना five times as much.
छगुना six times as much.
अठगुना eight times as much.

The rest are formed quite regularly, सातगुना, नौगुना, etc. डोढ़ा or डेवढ़ा is, half as much again. There is a Verb, डेवढाना, to once and a half.

These proportionals are treated as Adjectives of two terminations.

Hum an gy and all ut and at, Having sold the goods for twice or four times (their price). and an an arms are times its (usual) price.

That, of which it is a proportional, is indicated by the Ablative Case. **चाश्चनी वेसन से चागुनी वा पंचगुनी हा**, The syrup must be four or five times as much as the meal.

348. दोहरा करना, तिहरा करना, चेहरा or चे। परत करना, पाँचपरत करना, etc., are used of doubling or folding up cloth, etc., into so many thicknesses.

For the number of strands in a rope, or number of lengths in which it is folded ("double it," etc., in Eng.)

ciett or nat may be used for two and three;
but the addition of **सर** to the numeral is the more appropriate word, ciet, alart, alart, aliter or alite, etc.

349. Collectives.

A few words are in common use, corresponding to our "dozen," "score," etc.

गरडा is "a four," e.g., बीस गरडा, twenty fours, i.e., 80.

This word is principally used in counting out cowries, also in reckoning the standard of a seer (weight): thus there is a **alt गएडे का सेर** and a **alalt गएडे का सेर**, etc., i.e., weighing 20×4 or 24 + 4, in other words, equivalent in weight to 80 or to 96 tolas.

भव्या or चाैवा, चाैकड़ी are also found for aggregates of four. the cakes of dried fuel brought into the towns for sale, also in connection with the buying and selling of mangoes, and in counting out quantities of small articles.

सत्ता " a seven."

- Among the villagers, large numbers are practically very little used (nothing above 20); it is always so many "fours," so many "fives." I am assured that many of them not only use these aggregates in speech, but think in them; forty mangoes are not even thought of as "forty," but as ATTO TIES, i.e., eight fives.
- कोड़ी "a score." बीस is also occasionally used in this collective way. केडियाँ बोलियाँ बोली जाती हैं, scores of dialects are spoken. There is a proverb, एक तीन बीस एक साठ, One three score and one sixty (Cf. "Six one and half a dozen the other").
- सेकड़ा a hundred. Used as we use hundred in such a phrase as "How much a hundred?" बीस आना सेकड़ा, means "at the rate of one rupee four annas the hundred.

- It is perhaps worth noting that सैकड़ा is a varying quantity in different parts of a district, and for different articles (Cf. Eng. baker's dozen). "A hundred mangoes" often means इज्जीस गाही, i.e., 130, and in some places it is अद्वादस गाही, and over and above that, 8 thrown in as चेलुआ, thus making 148.
- in the loose way that "couple" is sometimes used in English.
- दर्जन dozen, is gradually getting naturalized in Hindi.
- appropriately calls them Agglomeratives) by the addition of **wi**. Thus **ci**ni (in this case only, **a** is inserted before the addition), **al**i, **al**i, etc., the two, the three, the four. **a** is also used for **all**, as **a** is **wi**, in all four directions. These are used—
- (a) Of such persons and objects as have something of a collective unity, or are in some way closely connected. Thus, दोनों हाथ, the two hands. तीनों लोक, the three worlds. चारों

युग, the four ages of the world. पाँचों तत्त्व, the five elements. ऋश्रों रस, the six flavours.

- - (c) They are used also in a somewhat reduplicative sense, सैकड़ों श्रीर सहस्रों श्राने लगे, They began to come along by hundreds and thousands.
 - Occasionally, this form is reduplicated with the addition of the Gen. Postposition a, e.g., ciri a ciri, all three of them.

351. Idiomatic uses of the Numerals.

We say, ten or twelve, eight or ten, but for the lower numbers take successive numbers, two or three, four or five. In Hindi, the former idiom is commonly adopted throughout. Thus दो चार, पाँच सात, two or four, five or seven.

The following also are common combinations to indicate a few, etc. दस पाँच, ten or five; दस बारह ten or twelve; पंद्रह बीस, fifteen or twenty; सौ पचास, between fifty and a hundred.

Notice also such a phrase as काई दस एक, which means some ten or so. एक is frequently in this way placed after a round number, to signify "about."

उत्तीस बीस is used to indicate a slight difference. If enquiries be made about any one who is ill, the reply may be made, कुछ उत्तीस बीस, which means he is somewhat better, really one-twentieth way towards recovery.

Notice the following idiom: va and alt alt and and and and and and and and alt and and alt and alt alt out of one, and keep on telling it to others (i.e., spread abroad exaggerated tales).

The repetition of a number has a distributive force. इसकी टापियाँ दो दो तीन तीन आने को बिकने लगीं, The caps she made began to sell at two and three annas apiece. एक एक करके वे चले गये, They went away one by one. सब लोगों का दो दो तीन तीन मिले, They got two or three apiece.

When the number is a compound one, only one part of the number, generally, is repeated, e.g., अहाई

अढ़ाई सो पर मिलेगा You will get them for two hundred and fifty (rupees) apiece. पौने दो दो सेर होंगे, They must weigh about a seer and three quarters each.

The following idioms are worth noting:-

तीन तेरह करना, to scatter (transitive); तीन तेरह होना, to scatter, (neuter, i.e., to be scattered); सात पाँच करना, to shilly shally; नो दो ग्यारह हुए, They scuttled off; धर्म कर्म सबही नो दो ग्यारह हुए, all moral and religious restraints went to the winds.

352. Fractions.

चेाया, चेायाई, चेाया हिस्सा, पास्रो or पाव

1 less पौने or पान

1 more सवा

¹ स्राधा

½ more साहे

1 हे ह

 $2\frac{1}{2}$ ऋढ़ाई or ढाई

As पास्रो (commonly pronounced पीवा) is generally used for ‡ seer, it is safer to use चौथा or चौथाई or चौथा हिस्सा for the quarter of other things.

तीन चैाथाई ग्रन्थ हमारी प्रति में नहीं है, Three quarters of the books are not in the edition which I possess.

पोने signifies 1 less, and is placed before the number, thus पोने दो (14); पोने तीन सौ (275). When used with एक, the एक is commonly omitted, and पोन, not पोने, is often used; thus पोन गज, 4 of a yard. हिंदू प्रति सेकड़ा पोन ('99) बढ़े, The Hindus have increased at the rate of three-quarters in every hundred (77), i.e., 75%. It is not used before 100; 75 is पचहत्तर, not पोने सौ.

सवा alone is 14. Placed before numbers higher than I, it signifies 4 more, thus सवा सेर् 14 seer, सवा दो सेर् 24 seers, सवा तीन सो 325.

श्राधा is half of. श्राधा सेर ½ seer. श्राधा राज्य, half of the kingdom. When used with a word which is not a number, it is generally written after the word and has the Genitive Case sign, e.g., इसका श्राधा उसका दो, Give half of this to him.

साढ़े is a half more, and is placed before the other number. साढ़े तीन 3½, साढ़े पाँच सौ 550. Notice that साढ़े is never used with 1 and 2.

डेढ़ and अढ़ाई (or ढाई) are always used for $1\frac{1}{2}$ and $2\frac{1}{2}$. डेढ़ गज़ $1\frac{1}{2}$ yds. अढ़ाई हज़ार 2,500.

It is important to acquire facility in using these idioms; **दो सौ पचास** would sound to a Hindu as uncouth, as "two hundred and a half of one hundred" would to an Englishman.

DIVISIONS OF TIME.

353. General Names.

Year, **बरस**, also **साल**. For "about a year," **बरस दिन**, is a common phrase. **परसाल** is last year, or next year. **परित्रार**, the one before or after that.

For Century, the Urdu सदी is commonly used, less commonly शतक, शताब्दी, शत वर्ष

Month, महीना or सास.

- Half a Month (which may be 14 or 15, occasionally 13 or 16, days), **पस** or **पाव.**
- The first half, reckoned from the day after full moon, is called बदि; कुष्णपक्ष or अन्धियारा पाल, the dark half.
- The second half, from new moon to full moon, is सुदि; शुक्कपस or उजियाला पाख (Colloq. संजोरा;) the light half.

Although, for ordinary purposes, the months are reckoned from full moon to full moon, Pundits, for astronomical purposes, reckon from newmoon to new-moon.

Week, हफ़ता, occasionally अठवारा, or सप्ताह.

Day, दिन, is the ordinary term for a day of the week. दिवस also is in use, and the Urdu रोज or रोज. वार is used in the Compounds. सामवार Monday; etc.

- For the date, the day of the **प**; (1st, 2nd, etc.), fall must be used. It should be noticed that it is the day of the fortnight or **प**; that is always mentioned, not the day of the month.
- To-day, आज. Yesterday or to-morrow कल. The day after to-morrow, or, the day before yesterday, पसां (Colloq. परां). The third day from the present (i.e., next Friday, if speaking on Tuesday) is तरसां or चार्य दिन. The fourth day from the present is नरसां, also occasionally अंतरसां; but these are seldom used. The Hindus always reckon the two boundary, as well as the intervening days. Thus, if a man, speaking on a Thursday, says, चार दिन हुए में आया, he means, I came on Monday.

Night, रात. (also रात्र, रात्रि, रात्री, रैन)

Early morning, भिन्सारे, बिहान, तड़के, प्रात:-काल, प्रभात, सवेरे, etc.

Evening, साँभ, संभावेला, सायंकाल, etc.

therefore 3 hours. दे पहर means noon.

पहर रात बीते, about 9 p.m. (lit., when a pahar of the night shall have passed). पहर रात रहे, about 3 a.m. (i.e., when a pahar of the night remains). So पहर दिन रहे, of, 3 p.m. पहर दिन चढ़े is about 9 a.m. (lit. when one pahar of the day has ascended).

but is now largely identified with the English hour.

चड़ी was a still shorter period (22½ minutes?).
" आठ पहर चैंसठ घड़ी" The word घड़ी
is sometimes used for hour, more commonly
for watch or clock.

The idiom for the time of the day is now accommodated to the English method of reckoning, as (struck) being added to the numeral, दस

बजा, 10 O'Clock. नै। बज के बीस मिनट हुआ, 9 having struck 20 minutes have passed. i.e., 20 past 9. जब ठीक चार बजे, Exactly at four.

Sometimes the sing, is used, **aਗ**, sometimes the pl. **aज**, e.g., **रात को १० बज गया या**, At night, ten had struck. **नो बज गये** हैं, Nine has struck.

354. Days of the week.

Sunday इतवार or रिववार, रिववार

Monday सामवार

Tuesday संगल

Wednesday बुध

Thursday बीफै or बृहस्पति

Friday सुक or सुक्रवार, शुक्र

Saturday सनीचर or शनैश्वर, शनिवार

Other names also are found, but are mainly confined to literature. e.g., micraalt, Sunday; grant, Monday: himait, Tuesday; name, Thursday.

355. Months and Seasons.

Common	CORRECT	Corres-	Name
NAME.	Sanskrit	PONDING	OF
	NAME.	TO, ABOUT.	Ritu.
1. चैत 2. बैसाष	(चैचः) (वैशाख)	March. April.	वसन्त (Spring)
3. जेठ	(ज्येष्ठ)	May.)) ग्रीष्म (Hot
4. असाह	(आषाह)	June.	season)
5. सावन	(श्रावग)	July.	
6. भादों ,	(भाद्र 🗠		वर्षा (Rainy
भादवँ	भाद्रपद	August.	season)
7. कुआर	(आधिवन)	September.	
8. का तिक	(कात्तिक)	October.	श्रारद (Autumn).
9. अगहन	(मार्गशीर्ष)	November.	हेसन्त (Win-
10. पूस	(पौष)	December.	ter).
11. माघ	(माघ)	January.	शिशिर (Cold
12. फागुन	(फाल्गुन)	February.	or Dewy Sea-
			son).

The Year begins with the second half of चैत,

The Months are divided into six seasons, of two months each. The names of these are given above, but they are mostly confined to poetry. For practical purposes, there are three Seasons: जाडा or जडकाल coccasionally, श्रीतकाल), The Winter. गर्मी or धूप-काला, Summer. बरसात or बरखाकाल or बसकाला, The Rainy Season. These may be roughly reckoned as three periods of four months, beginning from कातिक.

The Hindi Months are Lunar Months; reckoned from the day after full moon to the next full moon. The year therefore is only about 354 days. To correct this inaccuracy, an extra month is added every three years or less. This extra month is known as **Hentle**, or **Xuatio**, or **Xuatio** (occasionally, or **Xuatio**), and may come in the first seven months, but not in the last five. For religious purposes, this month begins after the first **un** of the month in which it occurs, and is followed by the remaining half of that month; but, for ordinary purposes, the month is doubled, and thus there is a 1st Chait and 2nd Chait, or 1st Baisakh and 2nd Baisakh, or whatever the month may be which is doubled.

English reckoning is now very commonly adopted. The English months are written as follows (with variations):—

जनवरी फ़रवरी सार्च अभैल मई जून

जुलाई	स्रक्तूबर
अगस्त .	नवम्बर
सितम्बर	दिसम्बर

356. Days of the Month.

The days of the पृष्ण bear Sanskrit names, and not the ordinary Hindi Ordinals.

1st	परिवा		8th	अष्टमी
2nd	दूज or	टूइज	9th	नौमी
3rd	तीज		10th	दसमी
4th	चैाय		11th	एकादसी
5th	पंचमी		12th	द्वादसी or दुआदसी
6th	ब्रह			तेरस
7th	सप्तमी		14th	चतुर्दसी or चौदस

The day before the new moon is called **AMITIAN**, the day of full moon, **प्रनमासी** (occasionally, **प्नां** or **प्ना**). They may occur on the 14th or 15th, or very occasionally on the 13th or 16th of the **पस**.

It is perhaps worthy of mention that in the case of such a short or long **पस**, the day is not cut off or added at the end, but is arranged for, according to astronomical calculations, at its proper place, so that a **पस** may have no 2nd (or other day), or may have two 2nd's, etc.

357. Eras or Epochs.

There are now three Eras in common use for reckoning in India (exclusive of the Mahommedan or **हिजरी**, 1326 of which commenced in February, 1908). The word **सम्बत** (prop. **संवत**) is applied both to the Era, and to the year in that era.

- 1. The most common Era in use among Hindus is that of Vikramáditya 56—57 B. C. This is used for most transactions. The year begins at the second-half of and. The English January 1919 is **1175**, according to Hindu chronology.
- 2. Another Era, which is used for transactions connected with the payment of rents for land, is called **madl**. This year commences from the 1st of the month **mail**. The **madl** year 1316 commenced on October 5, 1908.
- 3. The Christian Era also is now used for all legal documents; for this the word, सम्बत, is not commonly used. It is written सन् इंस्वी १८१८ or सन् इं० १८९८, i.e., 1918 A. D.

An example or two of the way in which these dates are printed may be useful.

स्राषाढ़ शुक्क १२ भेगमवार संवत १८४३, On the 12th day, Tuesday, of the light-half of Asárh, 1943.

वैशाख शुक्क अष्टमी का विवाह है, The marriage is (fixed for) the eighth day of the light-half of Baisákh.

यह ईसाई सन् के ४९१ वर्ष पहिले हुआ,

There is still another Era, occasionally used, viz., 78 years later than the Christian era.

"...का जन्म १७८८ शकाब्द (वि० संवत १८३४)," i.e., 1877 A. D.

WEIGHTS AND MEASURES.

358 Weights.

5 तोला = 1 छटाँक A tola is the exact

4 छ्ठाँक = 1 पान्ना or पाव weight of a rupee,

16 छ्टाँक= or 1 सेर

4 पाव

4 सेर = 1 धरा

5 सेर = 1 पसेरी

 $40 \, \text{ fix} = 1 \, \text{ and}$

Considerable differences exist in different districts, and even in different markets in the same district, about weights. The **aim**, **azia**, **t** and **u**, as given in the above table, are reckoned as the standard, and are recognized as such even where they are not used. But, frequently for local purposes, other **t** are in use, and there is the same variety in **u**, **u**,

and **पसेरी**. The correct **सेर** is what is called the **alt गएडा का सेर**, *i.e.*, 20 times 4 tolas, the weight of 80 rupees, *i.e.*, 2lbs. and about $\frac{9}{10}$ of an oz., but in one district alone, known to the writer, there are current (in different parts) a 48, 72, 84 and 96 tola **सेर**.

The **तोला** and smaller weights are used mainly for precious metals, and the more valuable drugs, etc.

There is no Measure of capacity widely used. Milk, oil, grain, etc., are all sold by weight, though frequently milk and other liquids are actually measured, not weighed.

The word $\mathbf{H}\mathbf{t}$ idiomatically used with weights, etc., e.g., $\mathbf{H}\mathbf{t}$ $\mathbf{H}\mathbf{t}$ actually means full, but is purely idiomatic, giving no additional or exact force,

359. Measures of Length.

The **n** or **n** is a fraction over 40 inches, but the cloth-sellers take kindly to the English yard, and it is now largely used in the towns.

The η is divided into 16 η , or η , or η , about $2\frac{1}{2}$ inches.

The following are not standard measures, but are in common use for things not actually bought and sold:—

प्रमुत्त the breadth of a finger, something under an inch.

तस्मू the breadth of two fingers, about 1½ inches. बिता or बालिश्त a span, about 9 inches. चैवा or चहा is a measure of four fingers.

हाय from elbow to tip of middle finger, about 20 inches.

The following is found as a "table:"-

जव = a grain of barley.

8 जव =1 संगुल

24 ग्रंगुल=1 हाथ

For measuring the depth of wells, the word **पर्सा** is commonly used. It is the height a man can reach, including his height, *i.e.*, about 7 or 8 feet.

The कास (prop. काश) is about 2 English miles. गोली (the distance a bullet will travel) is generally used of any distance somewhere about half a mile, or less, or more.

Both words, however, are very broadly used, as a traveller has often to experience. **ATH HT** may be anything between 2 miles and 5, except when used by the driver of a hired conveyance, when it is very much less.

The following is given as a "table" by some:-

4 हाथ =1 द्राड

2000 द्एड =1 केास 4 कोस. =1 योजन

360. Land Measure.

The **area** in the U. P. (at least around Benares and Mirzapur), is 3025 sqr. yards, 55 yards, respectively, in length and breadth, *i.e.*, about $\frac{5}{8}$ of an English acre.

- 20 बिस्वांसी or धूर=1 बिस्वा
- 20 बिस्वा=1 बीघा

A **गहा** is $2\frac{3}{4}$ yds. in length, लहा,, $5\frac{1}{2}$,, ,, ,,

20 गृहा or 10 लहा = a जरीब, which is 55 yards in length. The Square of this is a बीघा.

361. Coinage.

 3 पाई = 1 पैसा
 अधेला is half-a-pice.

 4 पैसा = 1 आना
 टका
 '' two pice.

 16 आना = 1 रूपी
 दमड़ी
 may be ¼ or ⅓ of a pice.

For the exact English equivalent to the rupee, reference must be made to the daily paper.

There was a time when it was worth two shillings, it stood for some time at 1s. 4d., recently (1919) it has been between 1s. 5d. and 1s. 6d.

In some parts, two kinds of pice (येसा) are

current: the ordinary government coin, called negical unit, and an uncoined, one not a very shapely bit of metal, called the negation. The latter is less in value than the former, and has largely gone out of use during the last few years.

The **ansal** (a small shell, Eng. Cowrie) is used for buying small quantities of condiments, etc.

The rate of exchange varies, but **and nuess**, i.e., 80 for a pice, may be taken as their average value.

The names for a two-anna, four-anna, and eight-anna piece are, respectively, दुअनी (or दुइअनी), चौअनी (or चरनी, also सूका), अठनी (sometimes among villagers अधेली).

The following illustrate the method of writing down rupees, annas, and pice:—

For rupees, the number is written with this mark parter it. 4 > 5 Rs. 4 > 2 Rs.

For annas, a small horizontal or oblique stroke signifies 1 anna, a perpendicular stroke 4 annas, written in the same way before the mark).

Thus -) or -) is 1 anna, \equiv) or \equiv) is 3 annas, 1) is 4 annas, \equiv) is 6 annas, 111 \equiv) is 15 annas, etc.

2000 दगड = कास 4 कोस. = 1 याजन

360. Land Masure.

The **alu** in the U. P. (at lea and Mirzapur), is 305 sqr. yards, 55 in length and breadt, i.e., about § 0

- 20 बिस्वांसी ८ धूर=। बिस्व
- 20 बिस्वा=1 ीघा
- A ηg_1 is $2\frac{3}{4}$ ds. in length, ηg_1 , g_2 , g_3 , g_4 , g_5 , g_4
- 20 गहा or 10 गहा = a जरीब, in length. The Square of th

361. Coinage.

For annas, a small herizes signifies I anna

e only ap-

द्धा, Prose, if the 19th ground and ce of verse to the end erature was cts usually 1 so treated with. Not ealing with subjects, as During the nd though cts that an ing with in literature, is, is now reserved

> ns he

Pice are indicated by similar horizontal strokes written to the right hand of this . Thus II is 2 pice. It is 1 pice. III is Rs. 2-8-0.

It should be noticed that, in expressing Indian money in English, the number of pice is never written, but the number of pie. Rs. 5-4-3 means 5 rupees, four annas, 3 pies (i.e., 1 pice), not 3 pice.

362. Addition, Subtraction, etc.

The idioms for the four simple rules of Arithmetic will be sufficiently illustrated by the following:—

Addition. जोड़ना 5+8 पाँच ग्रीर ग्राठ की जेड़ना

Subtraction बाकी निकालना 8—5 स्नाठ में से पाँच के। घटाना

Multiplication गुणा करना 8×5 ख्राठ के। पाँच से गुणना.

Division भाग देना 40÷5 चालीस में पाँच का भाग देना.

जोड़, बाकी, गुर्गा, भाजन are also used as shortened forms for Addition, Subtraction, Multiplication, and Division.

The Multiplication Tables present peculiarities of their own. They begin from once one is one, once two is two, and differ from the English tables in having tables for one-and-a-half, two-and-a-half, etc. The words also for the cardinal numbers differ from those in general use. One table is given below to illustrate this:—

दे। एक्के दे। दे। दूना चार दे। तियाई छः दे। चै।क्के स्राठ दो पंजे दस दे। छक्के बारह दे। मत्ते चै।दह दे। ग्रहे मेालह दे। नवाँ ग्रहारह दे। दहाँई बीम

CHAPTER XVII. PROSODY.

363.

Poetry **पद्म**

Prose

Word **yoc**

Word with its Case-ending पद

Syllable or letter au

Instant

Long syllable or letter गुर or दीर्घ

Short ,, ,, ,, लघु or हस्व

Half-line चरण

Foot 111

Full pause at end of line or चर्ण विश्राम

Pause at end of गण यति

Poetry measured by number of syllables.

" by number of instants मानिक छन्द

Rhyme. **तुक** or **तुकान्त**

Arrangement of words योजना

Alliteration, etc. ग्रनुपार

It should be understood that these are only approximate, and not exact equivalents.

364. Hindi literature is written in 17. Prose, and verse. Since the beginning of the 19th century, prose has been steadily gaining ground and may now be considered to have taken the place of verse for the general diffusion of knowledge. Up to the end of the 18th century, practically all Hindi literature was written in verse. Not only were the subjects usually relegated to the domain of verse in English so treated in Hindi, but all subjects were thus dealt with. Not merely were there love poems and poems dealing with nature and human passions, but such prosaic subjects, as grammar and arithmetic, were done in verse. During the last century matters were steadily changing, and though verse is up to the present often used for subjects that an English writer would scarcely dream of dealing with in anything but prose, yet the main body of Hindi literature, history, biography, fiction, educational books, is now produced in prose, and verse is more largely reserved for religious subjects, for erotic writings, for descriptions of nature and the reproduction of episodes from the great works in Sanskrit, such as the Mahabharat. Incidents also from the lives of Ram and Krishna are continually being produced in various metres.

Considering the position that verse took in the past of Hindi literature and the place which it still occupies, Hindi Grammar would be very incomplete were Prosody to find no place in it. The subject is so wide that not a chapter but a volume seems called for, and it may be hoped that some really good comprehensive work on the subject may be produced in English. All that can be attempted here is to give a brief introduction to the subject.

Dr. Kellogg has devoted some 39 pages to Prosody in his Hindi Grammar. This is possibly the best we have in English on the subject. In Hindi, Babu Jagannath Prasad of Bilaspur has written two very important works dealing with Hindi Prosody, the larger book, called anough with Hindi Prosody, the larger book, called anough aims at covering the whole ground, the smaller book, are: In the latter has proved of great service to the writer of this Grammar, and he desires to acknowledge this, and to express his high appreciation of the work. Babu Jagannath Prasad is an enthusiast, and writes with great ability and judgment.

There are three main divisions for us to consider:

- I. **भाव** and **रस**, The Emotions and Styles (see below.)
- II. Metre, छुन्द or पिंगल.
- III. Mataphors and Figures of Speech, अलंकार.

भाव AND रस.

(THE EMOTIONS AND STYLES).

365. भाव. It is not easy to find English words suitable to translate भाव and रस. Emotions and Styles are probably about the nearest equivalents.

to be expressed. The originally means flavour or taste, the essence, or juice of anything which produces the flavour, and so, as applied to Prosody, stands for the Styles through which the emotions, or HIT, are expressed. The TH is the appropriate medium for reproducing in the mind of the reader something like the emotions which have been stirring the mind of the writer.

There is a natural bent in the Indian mind to elaborate in the way of dividing and sub-dividing a fine field for such elaboration.

There are not only **HIA**, but **TAHIA**, which apparently refer to the states of mind which precede the fully-blown **HIA** or emotions. There are also **MAHIA**, which indicate the external expression of the emotions.

भाव are of two kinds, स्थाई and संचारी or व्यभि-चारी. The former, eight in number, by some reckoned as nine, refer to the great fundamental emotions or passions which sway human conduct. The latter, generally numbered at 32 or 34, are connected with the more fugitive or secondary or minor emotions or feelings.

The eight **Euis Hia** are 1. Desire, or amorous passion; 2. Mirth: 3. Sorrow; 4. Heroism; 5. Anger: 6. Fear; 7. Aversion; 8. Astonishment. The **Hard** are generally numbered as 32, 33 or 34, but one writer reckons them as 41, including in the number 8 which apparently most writers on the subject regard as which apparently most writers on the subject regard as separate class, called **AA HARD**. If the 8 be included, then they form a separate class, called **AA HARD**, i.e., bodily, such as crying, trembling, horripilation (the standing up on end of the hairs of the body), etc. The remaining states are called **HARD** in the prince and could be a miscellaneous company, including doubt, flurry, pride, lassitude, delight, dejection, sickness, and even death.

- 366. The **t** are nine in number, sometimes a tenth is added.
- 1. शृंगार, the erotic style; 2. हास्य, the comic or humorous; 3. कर्गा, the style in which pathos prevails; 4. वीर, the heroic style; 5 रोट्र, setting forth wrath; 6. भयानक, the terrible; 7. वीभन्स, arousing disgust: 8. प्रदूत, arousing wonder; 9. शान्त,

the quietistic style: 10. **arrae**, the style in which there is a tenderness, corresponding to that which parents manifest.

METAPHORS AND FIGURES OF SPEECH. ग्रालंकार.

367. With Indian writers, this subject is treated in separate treatises, being considered too large and important to be included with "metre." According to western taste, Hindi poets appear to run riot in various metaphors and devices of versification, but from the Indian standpoint it is regarded as essential that strict rules and canons should be applied to the use of a primate or ornamentation.

Words are said to be used, 1. literally, 2. idiomatically, or with a conventionally accepted meaning not strictly literal, 3. figuratively, i.e., in a poetic sense.

In the next place, अंतंकार are arranged under three heads according to 1. Sound शब्दालंकार, 2. Sense, अर्थालंकार, 3. The two combined, उभयलंकार.

These are, again, sub-divided. 1. includes various forms of alliteration, the use of words with similar sound but different meanings, of equivocal words, etc. Under the second come well-nigh innumerable rules about different kinds of metaphors, of the common

qualities which must be found in the thing compared and the thing with which it is compared, the consideration of suitable styles for praise, blame, irony, etc.

In **મૂપપાત્રન્યા** and, edited by two brothers, Pundits Shyámbihāri Mishra and Shukadevabihári Mishra, 129 forms of **अलंकार**, as illustrated in **शिवराजभूषण**, are enumerated, and a further list of between 20 and 30 is given which were not illustrated in that work.

For the further study of this subject, students may be referred to the book just mentioned, published by the Nagari Pracharini Sabha, Benares, price 12 annas, and also to a little book, **xgantualu**, written by Adhyāpak Rāmaratna and printed at the Shresth Printing Press, Agra, price 5 annas.

METRE छन्द or पिंगल.

- 368. This subject is one with many ramifications, and cannot be treated with any fulness. All that can be undertaken is an endeavour to set forth some of the main principles and to offer a few details with reference to some of the very common metres and verses.
- 369. after and unfam, These are two main divisions into which metres have been divided. & applied to both of these methods of reckoning metre

in versification, but the word according is more particularly appropriated for those forms of verse counted according to their number of **माना**. It may be well therefore to write of **मानिक** कन्द and use the word **वृ**न्त for metres worked out according to their **वर्षा** or syllables. **वर्षावृ**न्त.

The first point to consider is the exact meaning or use of these two words, and Hal.

370. au or au. This word means, literally, letter, but in considering Prosody it must be taken to signify a sounded letter, not a written one. It may be a vowel alone, or a consonant with its vowel, or a compounded consonant with its accompanying vowel. It is that part of a word which is sounded at one movement of the vocal organs. This movement may commence with a consonant or not, but must conclude with a vowel (with very rare exceptions). Thus द is one वर्ण, so is can. स्मि also is but one वर्षा. The essential of a वर्षा is one vowel sound, whether that vowel be preceded by a simple or conjunct consonant, or be alone. A vowe! there must be in a and only one. We may call this a letter or a syllable, but in neither case does it correspond with the English letter or syllable, e.g., in English, son, is one syllable, in Hindi it is two, 3+7: i.e., # with its inherent xy is one au, and a with its

inherent is a second and. On the other hand, in English, so is two letters, sea is three, slay is four, screw, five; but the nearest equivalent sounds to these in Hindi. It, I, En, En, are each but one and.

The an are of two kinds, long and short, depending on the length of the vowel, not in any way on the number of the consonants. The long is called a or or, the short and the long is represented by 5, the short by I lt may be more convenient for us to keep to the English signs — and — for the long and short an, respectively. In Hindi, the phrase, and alternative accomplished slowly, would be written down 51155515, i.e., 8 an, 5 of which are long, 3 short. We may express it thus, — —————.

The दोर्च or गुरू consists of one of the long vowels, आ, ई, ज, ए, ऐ, ओ, औ, standing alone, or preceded by a consonant, simple or compound.

The हस्व or लघु of one of the short vowels, अ, इ, उ, ऋ, with or without a consonant or consonants.

The principal exceptions to the above are the following:—

- 1. A short syllable, followed by a syllable beginning with a Conjunctive Consonant, is reckoned long, e.g., in **united**, the syllable **u** would be, ordinarily, short, but as the following syllable begins with the Conjunctive, **us**, this **u** is reckoned long, and the word would be represented by • i.e., **u**=**us**, **us**, and **us** = **us**,
- 2. A short syllable, followed by visarg, or by anusvár, when it represents a strong nasalization, is reckoned long (for this nasalization, with its accompanying consonant, is practically a conjunct consonant). Thus wintered, if reckoned by vowel sounds, would be _______, but, by the above rules, it becomes _______, because wintered equals with and the Conjunct and the preceding short vowel we equal to a long syllable. So wintered becomes _______, and comes ________, and comes ________, and comes _________, and comes __________.

Anunasik does not affect the length of a syllable or

3. Sometimes the conjunct, does not lead to the preceding vowel being reckoned long. This is especially the case when the second member of the Conjunct. is \mathbf{t} or \mathbf{g} , e.g.. \mathbf{g} are as dear to me, my brother, as (my brother) Bharat. Here \mathbf{m} followed by \mathbf{g} is reckoned short, not long, and the line scans \mathbf{g} \mathbf{g} in the following: \mathbf{g} \mathbf

- 5. Other exceptions may be summed up in the words of an Indian writer. श्रीर जा कवि लोग गुरु को भी लघु कर पढ़ते हैं उस को

भी लघु जानो, and if poets read even a long syllable as a short one (then) understand that also to be a short one. Poets take considerable license in this matter.

as two **HITI.** This is a standard of metric measure equalling a short and, the long and being reckoned as two **HITI.** Lines are frequently measured not by the number of and, but by the number of **HITI.** As a matter of practical working, while certain parts of the line may be regulated by long and short syllables, in a definite order there may be other portions of the line where this is not so, but the number of **HITI** must be correct. As an illustration, take the following doha:—

क्यों कीजे ऐसी जतन जा तें काज न हाय। परवत पे खादें कुआँ कैसे निकसे ताय।।

Why spend your energy in such a way that the work will not be effected. Dig a well on a mountain! how will water issue?

In the same poem we find the following arrangements for other lines:—

372. We are now in a better position to understand the broad distinction between the two great divisions of Hind verse, वर्णवृत्ति and माजिक छन्द. The words, broad distinction, are used advisedly, essential difference there is not. In a maffer, the length of the line is reckoned by the number of syllables or वर्ण; in साचिक छन्द by the number of HIT; but forasmuch as there are invariably some regulations about long and short syllables and their order in some part of the चर्या, and also about the number of मात्रा in each चर्गा, the वरावृत्त is not quite distinct from the साविक कुन्द. Again, the साविक ळ्न are never regulated simply by the number of आवा there must be some observance of the arrangement of long and short syllables in some part of the line, and thus the साचिक छन्द are not completely different from the augra. All that can be said is that, in the one class, the stress is on the number of syllables, and, in the other on the number of instants or attal. When the matter is carefully worked out, it transpires that the differences between the two great classes of Hindi poetry are not so great, nor so absolute, as the statements of some writers might lead us to expect. It must be self-evident to any one that the grouping of a number of lines, either with a certain number of instants or a certain number of syllables, could not be poetry, in the sense of metrical poetry. What is effected by accent in English verse is effected in Hindi, more or less, by the arrangement of long and short syllables and the grouping of the words into attal. Apart from this and rhyme, we should not obtain metrical composition.

373. Cæsura, Rest, or Pause. Taxin and a. Verses in Hindi poetry are of various lengths (two, four, six lines, etc., as in English), but these are mostly made up of various combinations of smaller divisions or groupings of syllables. The most common form of verse is one of four atm. An example before us will be useful for reference.

समाचार तेहि समय सुनि सीय उठी अकुलाइ। जाइ सासु पगकमल युग बंदि बैठि सिर नाइ॥ At that time, having heard the news
Sita arose, in great distress
Having gone; to her mother-in-law's two lotus feet
Bowing her head in obeisance, she sat down.

Here there is a full pause (1) at the end of the verse, a half-pause (1) at the end of the half-verse, and pauses (unmarked) at the end of the 1st and 3rd lines or **Equ.**Before each of these pauses, a word is usually completed, i.e., the pause does not occur in the middle of a word. We shall notice that within these **equ.** there are frequently minor divisions, between which there are unmarked and less distinguishable pauses. These pauses must come at the end of a syllable or **equ.**, but not necessarily at the end of a word. The pauses at the end of these minor divisions are called **equ.**

- 374. The word nu (corresponding in a general way to the English word "foot" as applied to poetry) is the name given to the minor divisions noticed at the end of the last paragraph. A nu is a group of syllables or instants.
 - a. As applied to away, the nu, of course, may stand for various numbers of syllables, but it is employed especially for the aggregate of 3 syllables; eight varieties of this nu are possible, according to the order and number

of long or short syllables. For these eight varieties, special symbols are used.

Thus:-			
Symbol.	Name.	Value	English equivalent.*
म	मगण		Molossus.
ये '	यगग	<u> </u>	Bacchic.
`र	रगगा		Cretic.
स	सगर्ग	~ ~ ·-	Anapest.
<u>ក</u> ្	तगरा	. — — —	Antibacchic.
ज	जगगा	<u> </u>	Amphibrach.
, भ	भगगा		Dactyl.
न	नगगा :		Tribrach.

For less than three syllables, π (short for π) and π (short for π) are used. Thus $\pi = -$; $\pi = -$;

b. As applied to **माजावृ**त्त, the **गण** stand for numbers of *instants*, not *syllables*. Symbols also exist for these:—

T = 2 instants.

ढ = 3

 $\mathbf{g} = 4$,

^{*1} is not, of course, intended that these English names exactly represent the Hindi **TUI** or feet, but the long and short syllables of the latter do correspond, in no small measure, with the accented and funaccented syllables of English poetry.

with either **\(\mathbf{H} \)**, **\(\mathbf{E} \), \(\mathbf{H} \)** or **\(\mathbf{N} \)** might spell disaster. Should, however, the poet, for some reason or other, feel greatly moved to begin his poem with a word commencing with one of the banned letters, he can mitigate the danger involved, if not absolutey nullify it, by using with it a long vowel or placing near the word the name of a deity or some other word of equal efficacy.

377. Dialects used in Poetry. Even in English, the language of poetry is not quite identical with that of prose. Such words as morn, eve, erst, ope, chanticleer, the flight of time, and a thousand other words and phrases, are felt at once to belong to the realm of verse rather than to that of prose. In Hindi, however, until comparatively recently, the language of poetry was far more widely marked off from that obtaining in prose than it is in English. It is not perhaps so much in the vocabulary as in the forms of the words that the differences are most marked, especially in the forms of the Tenses of the Verbs. In prose, there has been the steady endeavour to eliminate dialectical differences, to "standardise" the forms; in poetry, these dialectical forms are deliberately, if not always consistently, retained. Braj bhāshā, Avadhi, Eastern Hindi or some other dialect may be selected, or forms from more than one dialect

may be used in the same poem. Braj is the favourite dialect, but the large use of Avadhí by Tulsi Das has led very many to follow him in this respect as in many others.

During recent years, a school of "Khari boli" has grown up, whose aim is to adopt in poetry the forms commonly current in prose writing. Quite a large quantity of verse has been produced on these lines. Naturally, a foreigner might be expected to have a prejudice in favour of the course advocated by the members of this new school, making, as it does, for simplicity, and lessening the difficulties of understanding the language of the poem; but it must be confessed that there is a sweetness and a swing in the dialectical verses that one does not catch in the "Khari boli" lines. One of the great advantages of the dialectical forms is their pliability in the hands of a master; they may be stretched or compressed or twisted or modified to meet the needs of the moment, remaining recognizable and wearing no appearance of grotesqueness or uncouthness. For instance, in the Ramayan of Tulsi Das are found no less than eleven different forms for the word ver : it may be one syllable अस, or two ऐसे, or three ऐसेउ. according to the corner to be occupied.

At present, a somewhat heated controversy is being

waged by the champions of the old and the new styles. Both styles are being used; both have their merits. The new may grow, the old will not easily die. Probably both will live on side by side and flourish, each admired and adopted by many, both by some.

are Divisions of lines, etc. Not a little uncertainty exists with regard to some of the technical terms used in Prosody. The may be used for a verse, but the word has other meanings and uses. Use or use is perhaps the best equivalent for line, but is not an unequivocal word, as it is used in other ways. The half line. The sub-sections within the unit may be used, or they may not be so. If a certrin arrangement of long and short syllables within that sub-section be required, then the sub-section is a unit, if not, but only the number of use laid down, then the name unit is not appropriate.

The Cæsura or Pause occurring at the end of a पद or चरण or sub-section is called a यति.

Generally, a word is completed at the pause occurring in the middle of the line, i.e., at the end of the 1st = \(\frac{1}{4}\); but this is not necessary at the pauses within the = \(\frac{1}{4}\), i.e., at the ends of the sub-sections, but a = \(\frac{1}{4}\) must be complete at these minor pauses, i.e., if the = \(\frac{1}{4}\) in the mate up of 13 instants or = \(\frac{1}{4}\), arranged as follows, 6+4+3

=13, the last instant of each sub-section must be either a short syllable or the second half of a long one, it must not be the first half of a long one. For illustrating this point, take the second sub-section, i.e., the one containing four **HIII.** These four must conform to one of five arrangements, 1. \sim \sim \sim , 2. \sim \sim 3. \sim \sim 4. \sim \sim \sim , or 5. \sim \sim . It must not be \sim \sim for that would involve the second half of the last long syllable passing over into the following sub-section; and this is not permissible.

The sign is used for the pause at the half line, or first line of a dohā, il for the end of the line or dohā.

379. Metres. Very elaborate and exceedingly ingenious methods have been worked out for ascertaining how many different arrangements of long and short syllables are possible in a line containing a certain number of HIT or The scheme for working this out is called HIT. There is another scheme, called HIT, for working out the order in which these various arrangements will arise. By HT it can be ascertained how many varieties will end with a long vowel, how man with a short one. By means of TEE may be discovered what number in the series, worked out according to HIT, any particular grouping of long and

short syllables will be. Other schemes for working out other details are given, eight or nine in all.

Of the ingenuity of these methods and their adequacy to secure accurate results, it is impossible to speak too highly, but whether the ascertainment that in a line containing 32 instants 3,524, 578 different arrangements of long and short syllables are possible is of great value for those who desire to cultivate poetry, may be doubted by some:

वर्णवृत्त.

380. Common to both Varnavritt and Matrik Chhand are the three sub-divisions: (1) सम, in which are included all verses in which the four चर्ण or lines have an equal number of वर्ण or माना; 2) ग्रद्धसम, in which the alternate lines or चर्ण agree: (3) विषम, under which are grouped all other varieties.

Within these sub-divisions are almost infinite possible and actual varieties, according to the number of syllables, in varying order of long and short. Every group of 4 is capable of 16 varieties, with 16 au 4,096 varieties are possible. In the case of lines with 30 and more au, the possible arrangements of long and short syllables must run into millions.

As so many of the popular metres are composed according to the साविक छन्द method perhaps one form

of the augh, may suffice. The aaa is selected, as it is probably the best known; though, in making this selection, it should be pointed out that probably there is no other form of verse in this division which is so free from trammels as regards the observance of the order of long and short syllables as is the aaa. In this way, it is not quite typical of this division of poetry.

The poet who most excelled in this metre was Padmākar; Tulsi Das has also used it very effectively in his Kabitt Ramayan.

The **afa** contains 31 **au** in each line, arranged as follows:—8+8+8+7=31. If possible, a word should close at each of the four pauses, but this is not absolutely essential. A word must close, however, at the 16th and 31st **au**. This condition and the further one that the last **au** of the line must be long, are the only restrictions placed on the full freedom of the poet; yet probably there is no more melodious measure in Hindi poetry than the Kabitt.

Two specimen lines are given-

 रैनदिन आठों जाम राम राम राम राम सीताराम सीताराम सीताराम किह्ये. 2. (As written)—

कहें पदमाकर पविचपन पालिबे को चारचक्रपाणि के चरिचन का चाहिये।

(As read) कहैं पदमाकर पवित्रपन पालिबे को चारचक्रपाणिके चरित्रनका चहिये।

To illustrate the freedom of this form of verse, the metric arrangement of the lines 1 and 2 is placed one over the other, by which it will be seen how greatly they vary.

In the first example, the words conclude at each of the four pauses, according to the strict rule; in the 2nd it is not so, the **प**, though belonging to the second group as regards meaning, is read with the first group, so as to make up the 8 **au**. So with the **च**, in the word **चरिवन**; but, as stated above, this liberty is allowed to the poet.

मात्रिक छन्द.

381. Most of the Hindi poems which enjoy the widest reputation, are written in the styles which conform to the Matrik method of scanning.

Generally, a poet adopts the use of several different metres in the same poem, something after the manner of Tennyson in his "Maud." Writers vary greatly in this matter. Occasionally, a poet exclusively, or almost exclusively, adopts one special metre, e.g., Girdhar Kabiraya made himself master of the Kundaliya, and uses no other form of verse; Bihari Lal's favourite was the Dohā; Padmākar excelled in the Kabitt; Nābhā Das used the Chhappaya largely. Tulsi Das seemed greatly at home with all forms of verse; but possibly the Chaupai was that in which he wrote with the greatest freedom. In his Ramayan, the general method is 4 chaupais (8 lines), followed by a Dohā, with here and there a Soraṭhā, and, scattered up and down the book, some Chhands of various metres. Some of these latter are very fine.

It has been already noticed that in the Matrik Chhand the lines are regulated by the number of instants or **माजा**, not by syllables, **वर्ण**.

Three points should be noted.

- 1. Sometimes only the number of the instants in the line or Charan is fixed.
- 2. Sometimes certain sub-divisions within these Charan are fixed, with the number of instants in each sub-division.
- 3. Sometimes the $\eta \eta$ in these sub-divisions are also fixed, *i.e.*, the order of long and short syllables is definitely laid down. Frequently this only applies to

certain parts of the line: it may be arranged that a long syllable must stand at the end of the Charan, or that certain number occur in this or that sub-division of the line.

With reference to 2, it may very naturally be asked, if the line be only measured by instants, what difference can it make whether it be said that the Charan must contain, say, 13 instants, or that it must have one foot of 6 instants, another one of 4, and a third of 3, making a total of 13? The answer is that in the second way of stating it, a slight restriction is put upon the arrangement of long and short syllables; a foot must always conclude with a completed syllable, and, therefore, under the second method, there must not be a long syllable for the 6th and 7th instants in the line, for then the first half of the syllable would belong to the 1st foot, and the second to the 2nd, which is not permissible, e.g.—

and करे जो आज कर, he who does to-morrow (the work) of to-day, is correct — — — ।——। — — ।।, i.e., 6+4+3, total 13; but were the Charan written, आज कर जो काल करें, the meaning would be the same, and the total number of instants the same, but they would not fall correctly as regards the feet;

- 382. Of the numerous species and varieties of Matrik Chhand, only a few will be explained and illustrated.
- 1. Dohā (दोहा). The Dohā consists of 4 Charans. The 1st and 3rd Charans contain 3 feet of 6, 4, and 3 instants, respectively, total 13; and the 2nd and 4th Charans, 3 feet of 6, 4, and 1 instants, total 11. The last foot of the 1st Charan must be either - or -, but not -. The last syllable of the 2nd and 4th Charans must be short.

राम अनंत अनंत गुण अमित कथा बिस्तार। सुनि आचरज न मानिहहिं जिनके बिमल विचार॥

Ram is eternal, his attributes endless, lengthy stories (of him) innumerable; having heard (them) they will not regard them as astounding, whose understanding is clear.

This is the most common $Doh\bar{a}$; other varieties are also found, e.g.—

मन मोती अरु दूध के। इनके। यही स्वभाव। फाटे पीछे ना मिलें के। दिन किये उपाव।।

The heart, a pearl, milk, of these the nature is, that, when broken, they cannot afterwards be reunited, though myriads of devices be adopted.

Here it will be noticed that, though there are 11 instants in the 2nd and 4th Charans, the arrangement of feet is different, being apparently 4+6+1 or 4+4+3; it cannot be 6+4+1, as there is a long syllable at 6, 7.

383. 2. Sorațhá ($\frac{1}{11001}$). The Sorațhá is a transposed Dohá, the 1st and 3rd Charans of the latter becoming the 2nd and 4th of the Sorațhá, and the 2nd and 4th the 1st and 3rd. Thus, instead of 6+4+3=13, 6+4+1=11, we get 11 instants in the 1st Charan and 13 in the 2nd, and the rhyme also comes in the middle of the half-verse instead of the end.

अम विचार मित धीर तिज कुतर्क संशय सकल। भजहु राम रघुबीर करुणा कर सुंदर सुखद।।

000-0100-10	11	6+4+1
	11	6+4+3
	u	6+4+1
00-001-001000	11	6+4+3

Thus having thought, O steadfast in wisdom, putting away every evil counsel and doubt, worship Râm, the hero of Raghu's line, the home of mercy, the excellent, the giver of peace.

384. 3. Chaupāi. Turī, i.e., four-footed. A Chaupāi is made up of 4 Charans, each Charan containing 16 instants. The 2nd Charan rhymes with the 1st, and the 4th with the 3rd. The last two instants must be — or — , that is to say, a long syllable must not precede a final —. As regards the earlier 14 instants of each Charan, various arrangements are possible and permissible.

For the whole Charan perhaps, the most general arrangement is $6 \div 4 + 4 + 2 = 16$. Other arrangements are also given. The following are quoted from Babu Jagannath Prasad's book already referred to.

- (1) 2+2+2+2+2+2+2+2=16, e.g. **भूठा लेना भूठा** देना ॥
- (2) 2+2+3+3+2+2+2 = 16, ,, **at** it it it it it it is $\frac{1}{1}$ $\frac{1}{1}$ $\frac{1}{1}$ $\frac{1}{1}$
- (3) 2+2+2+2+3+3+2 =16, ,, जग मंगल गुण ग्राम राम के।।
- (4) 3+3+2+2+2+2+2 =16, ,, विश्वनाय पहुँचे कैलासा ॥

(5) 3+3+2+3+3+2 =16, e.g. कहहु राम की कथा सुहाई ॥

(6) 3+3+3+3+2+2 =16, ,, हृद्य बिचारि शंभु प्रभुताई।।

Take the following as an illustration of an average

Chaupāi.

तातें मैं संतन सिर नाई।
गावों हरियश जन मुखदाई।
जो वृज में हरि कियो बिलासा।
से। कबु किहें सहित हुलासा।

Wherefore I, having bowed my head before the saints, will sing the glory of Hari, the giver of peace to his people, the sportive life he lived in Brij, of this will I tell something with joy.

It will be noticed that the 3rd Charan of the above does not scan correctly; it is 6+5+3+2, instead of 6+4+4+2; but there is no difficulty in reading it, because **faul**, though correctly —, reads more like——, the **u** seems to lengthen the previous **fa** nearly into **al**, and the **u** after **u** does not get its full length, and becomes practically short. This example well illustrates how a poet is not a slave to rules, but trusts his ear.

385. 4. Kundaliyá (क्राइलिया). This is not an uncommon verse, and is a good illustration of the peculiarities which some writers delight in.

Its peculiarity consists in this, that the first Charan of the third line must be the same as the second Charan of the second line, and the whole verse must close with the same words as it commences with.

The Kundaliyá consists of 6 lines. The first two are a dohā, the last four a **timi.** This **timi** has four lines, with 24 **माजा** in each, the 1st Charan containing 11 **माजा**, the 2nd 13. The 11th **माजा** must be a short syllable.

बिना बिचारे जो करें से। पाछे पछताय।
काम बिगारे छापने। जग में होत हँसाय॥
जग में होत हँसाय चित्त में चैन न पावै।
खान पान सनमान राग रंग मनहि न भावै॥
कह गिरिधर कविराय दुःख कछ टरत न टारे।
खटकत है जिय माँहि किया जो बिना बिचारे॥

He who acts without thought, will afterwards repent;

He will ruin his work and become a laughing-stock in

the world;

He will become a laughing-stock in the world, and will obtain no peace of mind,

Eating and drinking, the courtesies of life and festivities will yield no pleasure to his mind;

Girdhar kabiraya tells you that trouble cannot be kept back, try how you will.

It comes hammering away at the life of the man who has acted without thought.

In some Kundaliyas, the 5th and 6th lines scan 13+11, instead of 11+13.

Paltu Das, or, as his disciples prefer to call him, Paltu Sahib, wrote many verses, and among others 200 (actually 198) Kundaliyās have been collected and published. He appears to have invented a Kundaliyā of his own. Each verse contains nine lines, the first and last are identical, and the last half of the 1st line is repeated as the first half of the 2nd.

This is but a brief introduction to a very large subject. Not only are there a very great number of different verses, but frequently numerous varieties of one form of verse, e.g., one writer speaks of 23 principal forms of the Dohā.

CHAPTER XVIII.

BRAJ BHASHA

- 386. For the study of the Braj Bhasha, few prose works are available. About the best is the TITA of Lallu Ji. In modern editions of this, however, the tendency is to substitute modern Hindi forms for the more distinctly Braj forms. Probably the best edition obtainable is that published by the (Government) Board of Examiners, Council House Street, Calcutta. Rs. 3. It has useful notes.
- Sometimes, even by Indian readers, the Prem Sagar (also by Lallú Jí) is spoken of as written in the Braj Bhasha; but this is not the case. It was put into the Hindi prose that was then being developed by Lallú Jí from a Braj original. The Braj forms are largely confined to the scraps of verse with which the prose is interspersed. Commentators on the Ramayan and other Hindi books not uncommonly affect a style which approximates in a larger or less degree, to the Braj dialect, but the true domain of Braj Bhasha is poetry. Hindi writers may adhere to modern Hindi in their prose; but, as soon as they use verse, Braj is the dialect most frequently

brought into requisition. It is therefore necessary for the student at an early stage of his reading to acquire some familiarity with the more common forms of the Braj declensions and conjugations.

As Braj forms predominate largely in most Hindi works written in verse, it is needless to refer to many by name. The **assertion**, by Brajbásí Dás, would, I believe, be accepted as a good specimen. An exceedingly useful book is the "Sabhá Bilás." Of this a good edition was published at the Medical Hall Press, Benares, in 1900; it has an English translation and full notes. A most helpful book for a student. (The price is about Rs. 6, I believe).

In the following lists, no pretence is made to completeness, and not every form given is to be taken as necessarily pure Braj. The charge of slavish purism cannot be fairly brought against the majority of Hindi writers. Tulsi Das wrote in Purabi Hindi, but was quite ready to use forms from other dialects, and, in case of need, to make up new forms of his own. The glamour of Tulsi Das' style has so influenced poetry since his time, that few writers adhere strictly and exclusively to Braj forms, but introduce Purabi and other dialectic forms; probably few could decide which are Braj forms and which belong to some other dialect.

In these circumstances, it has been thought better to give some of the more common forms met with in poetry, whether these forms be Braj or not. As the writer has, in a separate pamphlet, dealt with the more distinctive Ramayan forms, they have not been specially included in the following lists.

PARTICLE-POSTPOSITIONS USED IN THE DECLENSION OF NOUNS AND PRONOUNS.

387.	High Hindi.	Braj, etc.
Accusative.	के के व	कों, हि
Dative.	J	जा, 16
Agentive.	ने	very seldom used.
Ablative.	से	तें, सेंा
Genitive.	का	को, कर. With some of
		the Pronouns, 3 is used
		for the Genitive, e.g., जासु,
		i.e., जिसका.
	के	के
	की	की
Locative.	में	में, मां, महं
	पर	घै , पर
	तक	लों, लग

PLURALS OF NOUNS.

388. As regards the Nominative Plural, there is nothing very special to note, except that, when used, \overrightarrow{v} is pre-

ferred to एं for feminines— बातें, not बातें. In the Construct., Plural न or नि commonly takes the place of ज्यों, e.g. लोगन कौ (लोगें का), पुत्रनि कौ (पुत्रों का), स्त्रिन कौ, स्त्रिन कर (स्त्रियों का).

PRONOUNS.

389. 1st Personal Pronoun.

High Hindi. Braj, etc.

Sing. Nominative. मैं में, हैं।

Construct. Base. मुक्त मा, e.g., मापर (मुक्तपर)
Accusative. मुक्तका माहि, मुहि, मोकीं

Genitive.

मेरा मेरी, मार, मम

Plu. Nominative. हम हम

Construct. Base. हम हमन

Accusative. हमका हम कैंा, हमहि

Genitive. हमारा हमार, हमारी

2ND PERSONAL PRONOUN.

Sing, Nominative.

Construct. Base. तुभ ता

Accusative. तुभका ताहि, ताकैं। Genitive. तेरा तेरा, तार

Plu. Nominative. तुम तुम

Construct. Base. तुम तुम

Accusative. तुमका तुमकां, तुमहि

High Hindi,

Braj, Etc.

Genitive.

तुम्हार, तुम्हरी,

(तिहार)

3RD PERSONAL PRONOUN, AND PROXIMATE AND REMOTE DEMONSTRATIVE.

Sing. Nominative.

390.

THE VERB "TO BE."

INFINITIVE.

होना

होनीं

IMPERFECT PARTICIPLE. BIGI

हात

PERFECT PARTICIPLE.

हआ

भयो

Conjunctive Participle. होके, etc. होयके, हैंके

Noun of Agency.

होनेहारा होनहार, होनिहार

* PRESENT TENSE.

Singular.

Plural.

1. 3. **意** 2. **意**1

2. 3. 言

PAST TENSE.

1. 2. 3. **हता**

1. 2. 3. हते

or more commonly--

1. **र**震前 2. 3. **र**震前

CONTINGENT FUTURE.

Generally the same as High Hindi, but ख्री 1. and 3. है। य sometimes is substituted for ख्रा, e.g., हाऊँ for होजे. etc.

ABSOLUTE FUTURE.

1. होइहों, हैहीं, होऊँगी, 1. 3. होइहें, हैहें

2. 3 हो इहै, हैं है

2. होइही, हैही.

IMPERATIVE,

2. **富**ī

2. है।

INDEFINITE IMPERFECT.

1. 2. 3. हातु, हात.

1. 2. 3. होतु, होत

^{*} From this point, the High Hindi forms will not be given.

INDEFINITE PERFECT.

1. 2. 3.भग्री

1. 2 3 भरो

PRESENT IMPERFECT.

ा. हातु हैं।

1. 3. होतु हैं, होत हैं.

2. 3. होत् है.

2. होत् ही, होत है।.

PRESENT PERFECT.

1. भयी हैं।

1. 3. **भये** हैं

2. 3. भयो है

2. भये हैं।

It is unnecessary to go through the remaining Tenses of the Verb; they are seldom met with, and, from the forms given above, will be readily recognized.

391.

A VERB WITH CLOSE ROOT.

Two courses were possible in illustrating the forms of the general Verb: (1) to give forms of different Verbs, as actually met with, in the various Tenses, etc., or (2) to apply these forms to one simple Verb. The latter course has been adopted, as being less confusing to the student.

INFINITIVE.

चलनीं

IMPERFECT PARTICIPLE. चलत, चलत

PERFECT PARTICIPLE.

चल्यो

Conjunctive Participle चलके

Noun of Agency.

चलनहार

CONTINGENT FUTURE.

1. चलीं

2. 3. चल

2. **चली**

ABSOLUTE FUTURE.

1. चलिहों, चलौंगो 1. 3. चलिहें, चलैंगे.

2. 3. चलिहै, चलैंगा 2. चलिहै।, चलौंगे. IMPERATIVE.

2. चल, चले

2. चली

INDEFINITS IMPERFECT.

1. 2. 3. चलतु, चलत 1. 2. 3. चलत

INDEFINITE PERFECT.

1. 2. 3. चल्यी. 1. 2. 3. चले. चलें

PRESENT IMPERFECT.

1. चलत हों

1. 3. **चलत हैं**

2. 3. **चलत** है 2. **चलत हो**

PRESENT PERFECT.

ा चल्यो हों

1. 3. चले हैं

2. 3. चल्यों है 2 चले ही

PAST IMPERFECT AND PAST PERFECT.

In these Tenses, instead of the ordinary auxiliary parts of the Verb रहना are commonly used, रह्यों or रहा for 1. 2. and 3. Sing., रहे for 1 and 3 Pl. and रही for 2 Pl. Thus चलत रह्यो, चलत रहे, चल्यो रह्यो, चले रहे. etc.

392. With the above forms before him, the student will not experience much difficulty in recognizing the various parts of other Verbs. In Verbs with an open root, य is often inserted, e.g., आयो (आया), ल्याऊँ (लाऊँ). With the Verbs करना, लेना, देना a न is often inserted, sometimes न्ह, e.g., कोनो, (किया), दोनो (दिया), लीन्हा (लिया).
